Re: Marden Local Plan Examination

Having read the documentation you so kindly sent me, I feel that the air pollution in this area will have an impact on the Ashdown Forest, the Reversby Ramsar Site, the SEUP, and sites of SSSI designation. As these are all sites of nature conservation, and protected under HRA.

The pollution level is at times along the main Eastbourne Road, above the permitted level. And Eastbourne is now one of the most highly polluted towns in the country, so this will no doubt have a detrimental effect on our habitats, and wildlife.

I think that Marden District Council is right in this, and I fully support them. Also I think we are right in removing the 700 houses proposed at Morning's Mill from the emerging Local Plan, because of one. The increase it will mean in the air pollution.

Two. The effect pollution is having on peoples health, this is now a proven fact.

Three. The effect it will have, and increase the pollution level, which is seriously affecting our lovely wildlife habitats.

The destruction of our wildlife habitats, and the wildlife they sustain, cannot go on, we must stop somewhere, and if we do not, it will be an absolute disaster for everyone.

Yours sincerely,
