East Hoathly is defined as a smaller service centre. The village would have been defined as a larger centre on the basis of the services available within the village. However the population falls below the arbitrary threshold of 1000. The population has been estimated as 923. The non-statutory plan indicates a potential increase in population by 75 houses (the Mews and the South Street proposals.) Using the estimated dwelling occupancy set out in the draft settlement strategy this equates to an additional 158 people living in the village. In addition, these two non-statutory plan sites also include further business units and a doctor’s surgery. The addition of the non-statutory plan sites and the subsequent population growth means that East Hoathly should be defined as a larger service centre and hence would have growth potential. The 15% allowance for the expansion of the resulting population would therefore allow growth of a further 163 people or 77 houses. The non-statutory plan and the emerging Core Strategy are on different timescales. The Non-statutory plan was to 2011. The Core Strategy will need to provide housing land for the period to 2022 – 2027. Over the fifteen to twenty year period further housing development will be needed to meet projected household and population numbers. The existing development boundary at East Hoathly encompasses land allocated for development and this was expanded to accommodate further development in the non-statutory plan. The settlement boundary should be expanded again to accommodate further development to meet local needs and to provide for further housing and employment land. The village lies outside the Area of Outstanding Natural Beauty and there are broad locations where development could take place on land east of South Street. The close proximity to Uckfield, Eastbourne, Ringmer and Lewes means that the village will continue to benefit from these towns’ resources, but the village maintains the ability to provide a good proportion of services from within its own boundaries. Transport links are good and improvable and no other environmental constraints are identified. All new sites would need to be tested through a sustainability appraisal, and at that stage we will demonstrate the suitability of East Hoathly as a location that can accommodate further development than indicated in the Issues and Options Paper.
The St Bede’s upper school occupies a large campus in the village. At present in the adopted Local Plan, the majority of the school site lies beyond the development boundary of the village. When development boundaries were drawn up the decision was taken to exclude built up parts of the school site. This could be argued to be inconsistent with criteria applied to areas defined as ‘countryside’ and ‘built up’ (much of the school grounds are largely built up and reasonably dense school development.) More importantly however, the school has entered into a section 106 agreement with the District Council to allow certain areas to be developed for school related activities, subject to normal planning considerations. The section 106 agreement, known as the ‘masterplan,’ highlights specific areas where school related built development can take place. The areas marked pink on the section 106 plan can legitimately be used for built development in conjunction with the school for the benefit of St Bede’s School Trust (which is a charity wholly dedicated to the advancement and education of children). It is therefore requested that consideration be given to the inclusion, in the Core Strategy, of a specific notation of a school site, where school-related development can take place. Such a policy or notation could take the form of the following: “In the areas notated development related to the education, boarding, teaching accommodation and administration of a school will be permitted, provided that the following is met: • New development will respect the scale, form, design and materials of the surroundings, and • New development will not cause harm to the residential or rural amenity of the area, and • Consideration will be given to how new development can contribute to a wider community benefit, and • The access and traffic generation issues are appropriately managed and will not harm the character of the area, and • Any trees on or near the site will be protected during and after development. A landscaping scheme will be required to integrate any development into its surroundings.” Such a policy could apply to any school site in the district. Although the District Council would not determine planning applications for Local Education Authority development, there are other independent schools in the district that would benefit from such a notation, freeing up development where it is necessary to meet the needs of children attending those schools. Guidance on suitable inclusions within a Core Strategy suggests that spatial planning, as opposed the land-use planning, will include and reflect the relationships between other strategies, both public and private sector, working together to promote sustainable communities. The objectives of St Bede’s School can provide a long term benefit to Upper Dicker and its residents. This already takes many forms and includes the provision and maintenance of sports facilities, church maintenance, the local shop, car parking and employment. Strategies working with the local community could provide greater scope for local authorities and the school to promote action and manage change for the wider community benefit. In the case of St Bede’s School at The Dicker the broad range of spatial planning, encompassing environmental, social and economic within the Core Strategy will enable the local authority and the school to contribute more effectively towards sustainable development. For St Bede’s school such a notation could therefore follow the ‘pink area’ identified in the masterplan. An alternative solution would be to place the ‘pink area’ identified in the masterplan within the settlement boundary for Upper Dicker, which would further introduce flexibility and consistency into policies for the school campus, allowing a wider variety of development in the village.
Upper Dicker is defined as a smaller service centre in the draft Settlement Strategy, as it meets all the criteria for that definition. It has a population that exceeds 100, at least one shop, a pub, a community hall, a place of worship and a primary school. The village also has an impressive range of sports facilities and open space, often as a result of St Bede’s School. The village is also within 5km range of Hailsham and benefits from this proximity. The population size is the only reason why Upper Dicker did not fall within the criteria for a larger service centre, given its wide range of services and its close relationship with both Hailsham and crucially, Berwick (which is notably an area of search for a new settlement). On this basis we believe that it makes an ideal location for small scale growth, along with a number of other villages. In Matrix A of the Draft Settlement Strategy, Upper Dicker is credited with a wide range of shops and services. It is not credited with a petrol filling station or within 2 miles of a train station. However the petrol filling station and train station in Berwick village are within a 5m drive (at 40mph). We believe these facilities lie within 3 miles of Upper Dicker. Area of search 23e highlights Upper Dicker as an area where the draft settlement strategy would limit housing to 20 dwellings. The ‘occupation’ of the village by St Bede’s School is also highlighted as creating a particular local need for housing. In the second Matrix A there is no indication of any particular housing need arising from the Rural Needs Survey, the housing register or anyone expressing a particular need. Either these figures are not available or have not been recorded. It would therefore be useful to know the source of the particular housing need identified and allegedly caused by St Bede’s School. There are flood plains to the north east and south west of the village due to the Cuckmere River and its tributaries. However areas to the north east, along Coldharbour Road, are free from flood risk and could provide some additional growth to bound the existing playing field/village green and create an enclosed and attractive green area. The landscape is gently undulating low weald and can be readily screened in wider views, creating a defined edge to the village. There is therefore considerable scope to allow some small housing growth by infilling or by developing areas to the north of the village. Upper Dicker has an estimated 468 population with housing occupied at an estimated density of 1.9. A 15% increase in population over ten years (as suggested in the Issues and Options report) would mean that a further 37 dwellings, accommodating some 70 people could be accommodated within the village. This could provide some 14 affordable homes.
The Issues and Options paper, in several locations throughout the document, makes reference to the importance of tourism to the local economy and the protection of valued landscapes/townscapes. It is noted that 9.7% of the workforce in the district works in the tourism sector. The management plans for the Sussex Downs and the High Weald Areas of Outstanding Natural Beauty both highlight the value of a buoyant local economy directly relating to the quality and management of the landscape. It follows that the promotion of tourism related development can help to maintain, manage and protect the quality of the landscape. The Sussex Downs will be re-designated as a National Park in the near future. The National Park designation implies some tourism development, albeit consistent with the landscape objectives of the Park. It is recognised that the tourism sector is growing significantly and as a result it is likely that proposals for tourism development are likely to increase at the same pace. It is therefore imperative that provision for such development is accommodated within the Core Strategy. In the section entitled ‘Tourism’ the Issues and Options paper notes the presence of medium scale tourist attractions, highlighting some unexploited potential. Examples include Drusillas Zoo and Pooh Corner. Both these sites lie within Areas of Outstanding Natural Beauty. Spatial objective 6, set out in the Issues and Options paper, also seeks to ‘increase visitors staying in Wealden focusing on sustainable tourism, whilst ensuring that the tranquillity and beauty which attract people to the area is not undermined’. We wholeheartedly agree with the emphasis on tourism as a valued contributor to the local economy, and as a means to manage and protect important landscapes. As a result we advocate the need to specifically address tourism related development in the Preferred Options Core Strategy. There are no specific issues or debating points in the Issues and Options paper relating to tourism, despite the very real importance to the district. We do not believe that the Design Guide Development Plan Document alone will be sufficient to promote and encourage the right kind of tourism development; that protects and enhances the quality of the landscape whilst recognising its value to the economy. Nation planning guidance for tourism takes the form of “Good Practice Guide on Planning for Tourism” (2006) which effectively superseded Planning Policy Guidance 21. The guidance emphasises the value of tourism to the economy, for regeneration and to underpin protection and enhancement of the quality of the landscape/townscape. It also advocates dedicating parts of the development plan to tourism development. The proper planning for tourism is dependent on the plan-led system. This would allow the development of tourism related development to be integrated with the subsequent economic, social and environmental benefits that it can bring. The draft South East Plan also has a specific section on tourism and policies TRS1 and TRS2 deal with coastal resorts and rural tourism respectively. Both policies seek to encourage tourism in recognition of the important role such development plays in the economy and for social and environmental well-being. Other Councils have, where it is relevant, included specific sections on Tourism related Development. Brighton and Hove City Council is one such local example. We believe that the Preferred Options Core Strategy should contain policies that set out which areas are best placed to meet tourism demands and objectives. In spatial terms this would be the areas where the landscape quality and historic interest are the highest and where facilities can be clustered in the interests of sustainable travel. New buildings and accommodation meeting tourism needs should be allowed in rural areas. This should not preclude Areas of Outstanding Natural Beauty or Conservation Areas. Indeed policies should encourage new development where all the commensurate design, scale and access considerations are met and where demand can be justified. We therefore suggest the following draft policy for inclusion in the Preferred options Core Strategy: “Proposals for new tourist accommodation or facilities will be permitted where the following is met: • The proposed tourist facility or accommodation is in proximity or reasonable travelling distance to existing tourist facilities, and •
The access and traffic generation is appropriately managed and will not harm the character of the area or residential amenity, and • The scale, form, design, materials and layout of any new buildings is appropriate to and complements the surrounding area. Proposals in Conservation Areas, Areas of Outstanding Natural Beauty or in listed buildings will be permitted providing the above is met and that proposals do not represent harm to the qualities for which the area was designated. The Issues and Options Paper indicates that the Eastbourne, Hailsham, Polegate triangle is lagging in economic performance. Tension is noted between the need for economic development, highway improvements and environmental protection. Tourism in this part of the district along the Sussex Coast, can contribute to inward investment. Although not entirely related to the provision of employment growth, the importance of tourism on this stretch of the district, from Birling Gap, though East Dean to Seven Sisters, is important and should be encouraged and protected. It is areas such as this which the proposed policy above would have greatest impact, allowing tourism development; properly planned, designed and clustered with other facilities, to contribute to the economic profile of the area, increasing its dynamism and attractiveness to visitors. I would be grateful if the above could be taken into consideration when preparing the Preferred Options Core Strategy.

Part of document: option
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View: Disagree
Reason for comment:
The designation of the High Weald AONB has successfully protected the unique landscape of the Weald against intrusive development for years - and any slackening of existing policy (which does allow development within strict guidelines) would be the beginning of the end. Development should be contained within locations that do not threaten this.

Part of document: ☑ option  
Section of Document: Question 5c  
Reason for comment:  
Dispersing residential development in small clusters may make it easier to avoid the provision of the necessary infrastructure (travel, schools, shops, police, etc.); however, we would simply be deferring the problem. The south-east already suffers an excess of traffic at peak times; by concentrating homes closer to facilities we would minimise gridlock and pollution, as well as making it easier to identify what facilities are necessary.

Consultee ID: Mr Mackenzie  
106233  
Part of document: ☑ option  
Section of Document: Option 6a  
Reason for comment:  
Concentrating development in or on the edge of existing towns makes it easier and more economical to expand the necessary infrastructure (transport especially).

106233  
Part of document: ☑ option  
Section of Document: Option 6b  
Reason for comment:  

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Reason for comment:
With the number of dwellings required, simply hiding it around in small pockets does no-one any favours. Is this not the time to accept that new communities are required - and identify sites for small towns appropriately located for employment/transport (with a commitment to providing the necessary investment in infrastructure). Such towns would be more ideally situated on rail/trunk road routes (e.g. the A23 or M25 corridors), than in the middle of the countryside half an hour from such facilities.

Reason for comment:
Entirely in accordance with the ability of a community to grow, rather than being swallowed.

Reason for comment:
but bearing in mind the limited means of many who need affordable housing - building dwellings a long way from employment creates different pressures.
Option 7c

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

but only where there is a good public transport infrastructure and ready access to primary and secondary schools. Development in or on the edge of towns has to be the priority for these reasons.

Option 7d

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

You cannot make an unprofitable business remain in business. Just look at the withdrawal of so many of our rural post offices....

Question 7e

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

The road network must be a major factor in allowing any expansion of villages, whether large or small. For example, traffic levels in Forest Row are forecast to increase dramatically once Mid-Sussex District Council's new East Grinstead Relief Road opens.
Option 9c

Section of Document:

Reason for comment:
The road network away from the A22/A27 corridors is totally inadequate at peak times. The suggestion (3.8) that there is a 'relatively weak' pattern of movement between these settlements and to Tunbridge Wells from Heathfield has obviously been made by someone who doesn't travel on the A267 at peak hours!!

Option 12a

Section of Document:

Reason for comment:
Sustainable as close to transport, shops and services - but why not expand northwards/westwards beyond Springwood Road (on escarpment, but appropriate landscaping would easily protect) - surely, far more appropriate than 90 dwellings in a field north of the leisure centre!

**Reason for comment:**
The plan to expand a new swimming pool highlighted the inadequacy of public transport here; the site would be a totally unwarranted intrusion into a senetive landscape hitherto protected by its setting in the AONB (indeed, the previous Wealden Local Plan highlighted the sensitivity of this ridge as it is seen from the north). If a development of this size were to be permitted in such a location, disassociated from even a 'small' village, then AONB policies could be torn up and shredded.

<tr>
<td>This is the area where Wealden District Council objected to a new indoor swimming pool as it would intrude into the AONB and destroy the outlook from people's houses. What a difference a day makes.... This area offers sustainability for development; it lies close to two main roads and public transport, close to the town centre and a primary school, and its loss would not have as significant an impact on the AONB as any of the other sites identified on the fringe of the town.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Heathfield is isolated from the rail network and heavily congested by north/south and east/west traffic. The secondary school lies one mile to the east of the town and is only accessed by road; development of even half of the 1,000 dwellings suggested would bring the transport infrastructure to an even longer halt.

The expansion of the population of Heathfield resulting from the development of Green Lane has served to demonstrate what results from housing being built without any improvements to the local infrastructure.

Environmentally sustainable (public transport, choice of schools), without impact on the AONB.
Option 22a

**Reason for comment:**
Actually undecided; this is probably the least sensitive site of any suggested in the Heathfield area yet this number of dwellings would have a significant impact on the local infrastructure, especially if combined with others (the secondary school also involves travelling through the - already clogged - town centre at peak times and traffic congestion at the two main junctions with the A267 is already a nightmare at rush hour). If significant investment was made into the local infrastructure and buses provided in perpetuity as a safer route to schools, this would be an option.

Option 25b

**Reason for comment:**
But not on the same sites; areas suited for social or affordable housing should be separately identified and a development levy applied on all other sites to provide development on them. Forcing developers to provide a percentage of affordable housing on every site of more than a certain size results in the fragmentation of such sites and fails to achieve its objectives.

Question 31a

**Reason for comment:**
If it sounds too good to be true, then it almost certainly is! This apparently sylvan nirvana, free of any increased traffic resulting from thousands of 'new homes' 'integrated into the landscape', a 'constellation of villages working together', etc. will only become reality when government injects the millions of pounds necessary to provide the necessary infrastructure. The Core Strategy proposed includes the torpedo-ing of well established AONB protection, and the dispersal of these new homes into a miriad of groups unrelated to the facilities or lifestyle of existing settlements. Now, a concept such as Halland New Town - well, that would be bolder!
Mr Mackenzie 106233

Question 32a

Your View  Disagree

Reason for comment:
I agree with the objectives but the moment you apply 'Management Speak' such as 'SMART' objectives without referring to the amount or sources of the capital investment necessary to achieve them, it all becomes 'just words'. Simply applying the brakes in one place and the accelerator in another does not result in coherence or understanding; if you are building in the countryside, realise it for what it is and provide the facilities necessary to make it work - not just for the landscape but for the people who will be living there.

Mrs Wilson 106234

Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  Agree

Reason for comment:
The Council supports Wealden in providing for housing both within the Sussex Coastal area and the Rest of Wealden. The Borough Council supports the protection and safeguarding of the AONB. However, it recognises that difficult locational choices need to be considered and that there may be exceptional reasons to locate small scale housing development within the AONB.

Mrs Wilson 106234

Option 2b

Your View  Agree

Reason for comment:
The Council would support a higher percentage level of renewable energy for new developments (option 2b).

106234 Eastbourne Borough Council

Part of document: □ document □ chapter □ section □ option
Option 4c

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Same response as 4a
Option 4d

Reason for comment:
Same as response 4a

Question 5c

Reason for comment:
Settlement boundaries should be expanded to meet the growth necessary. However, this should be done using sustainability principles and ensure the protection of the AONB.

Question 6d

Reason for comment:
The Council has no preference but the choice should be based on a sustainability appraisal.

Question 7e

Reason for comment:
In relation to the village classification, the Council's preference for the villages located close to Eastbourne (Stone Cross, Westham, Pevensey and Pevensey Bay) is a categorisation based on the growth potential as the residents of these villages are likely to seek their services and facilities from Eastbourne. It is appreciated that this preference may not suit all villages in Wealden particularly those not close to a major serviced town.
Option 8a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The Council recognises that the South Wealden and Eastbourne area is an integrated housing market and thus development that takes place in the area adjacent to Eastbourne will have a mutually positive effect in terms of provision of housing and employment choice for the local communities. Of the strategic choices set out in this question the Council would support one of the three: the Hailsham focus (option 8a), the Polegate/Willingdon/Edge of Eastbourne (option 8b) and the Polegate/Hailsham location (option 8c). The level of development would need to be considered in the light of the infrastructure issues for the area.

Question 15g

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The Council recognises that the South East Plan requires Wealden to provide a significant number of new homes in the Sussex Coastal area in the next 20 years and supports this provision because South Wealden and Eastbourne are an integral housing and employment market area. Development that takes place in the area adjacent to Eastbourne will have a mutually positive effect in terms of provision of jobs and housing choice for the local communities. Some of the infrastructure issues in the area, particularly the A27/transport infrastructure and the foul/surface water capacity need to be addressed as part of the provision of development. Thus, due to these infrastructure issues in the area, any development must be of sufficient size to generate the ability to resolve the issues and create sustainable communities.
Reason for comment:
(See representation on Question 15 also). The Council recognises that the South East Plan requires Wealden to provide a significant number of new homes in the Sussex Coastal area in the next 20 years and supports this provision. It recognises that South Wealden and Eastbourne are an integral housing and employment market area. Development that takes place in the area adjacent to Eastbourne will have a mutually positive effect in terms of provision of jobs and housing choice for the local communities. Some of the infrastructure issues in the area, particularly the A27/transport infrastructure and the foul/surface water capacity needs to be addressed as part of the provision of development. Thus, due to these infrastructure issues in the area, any development must be of sufficient size to generate the ability to resolve the issues and create sustainable communities.

Reason for comment:
There is concern with the proposed inclusion of the area east of Friday Street/Langney for possible future housing development in view of the capacity of transport and other infrastructure to support such development.

Reason for comment:
The Council believes that development in the South Wealden and Eastbourne housing market area should be at the most sustainable locations. In answer to Question 17 the Council believes that Stone Cross could be classified as a village with growth potential as a way of delivering sustainable communities. Stone Cross is adjacent to the Eastbourne urban boundary and so the choice of the location for development needs to be considered in the light of ensuring that the village retains its identity. Development would be supported in principle at any of these option locations subject to detailed site feasibility and viability.
The Council notes that the South East Plan does not advocate a new settlement and the quantum of development required in the Plan period, in the Sussex Coastal area, is of a magnitude that suggests a new settlement might not be viable in terms of sustainability. However, if Wealden Council wishes to continue to consider this option, the Borough Council has no objection in principle.

In principle most strategic growth should go to those settlements with services and facilities to sustain the enlarged community. Consideration of growth in the villages should only be considered if there are exceptional reasons for it.

The principle of higher densities needs to be considered in the light of the characteristics of individual settlements and the housing needs of the area.
Option 24c

Section of Document:

Reason for comment:
The principle of higher densities needs to be considered in the light of the characteristics of individual settlements and the housing needs of the area.

Option 24d

Section of Document:

Reason for comment:
The principle of higher densities needs to be considered in the light of the characteristics of individual settlements and the housing needs of the area.

Option 25a

Section of Document:

Reason for comment:
This is a response for all parts of Question 25. The provision of a range of sizes of homes is required in the South Wealden and Eastbourne integrated housing market area to ensure that the economic growth envisaged can be accommodated which would be mutually beneficial to the local communities. This will require larger family units as well as smaller units. The need for affordable housing should be set at the maximum possible in terms of the demographics of the settlements and the site characteristics, including viability.
Option 26a

Reason for comment:
The provision of sites for gypsies and travellers needs to be in the area where there is greatest need and meets sustainability criteria. The Council supports the joint working on site provision throughout the County.

Option 26b

Reason for comment:
The provision of sites for gypsies and travellers needs to be in the area where there is greatest need and meets sustainability criteria. The Council supports the joint working on site provision throughout the County.

Option 27a

Reason for comment:
This is a response to all parts of Question 27. The Borough Council is very supportive of the provision of services and facilities that help to provide a choice of transport mode and also help to reduce the use of the car. A Park and Ride facility would be strongly supported to serve the South Wealden/Eastbourne area. In terms of the potential parkway station at Polegate the principle would be supported but only if this did not diminish the frequency and direct connection of services from and to Eastbourne from London Victoria.
Reason for comment:
In terms of the potential parkway station at Polegate the principle would be supported but only if this did not diminish the frequency and direct connection of services from and to Eastbourne from London Victoria.

Reason for comment:
A Park and Ride facility would be strongly supported to serve the South Wealden/ Eastbourne area.

Reason for comment:
The Borough Council, in principle, supports the provision and protection of open space and leisure facilities that can be used by residents and visitors, and contributions should be sought from developers.
Consultee ID: Mrs Wilson 
106234 Eastbourne Borough Council

Part of document: ✓ option Option 28b

Section of Document: Infrastructure Requirements

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
The Council supports Wealden in its identification of the infrastructure issues for the South Wealden area in relation to the development options set out in the Report of the A27 West Polegate improvements, the A22 link or junction improvement, the need for new sewage treatment capacity for Polegate and Hailsham, Hailsham traffic management in the town centre, Hailsham north access road and/or Lower Dicker road links, Hailsham South access road area. The Borough Council is also concerned to ensure that any development options chosen as part of this process ensure the delivery of the required infrastructure.
We are in need of affordable housing, and I doubt that building in AONB would be affordable except on a huge scale. Once building has started it will continue and the area will be lost forever.

Option 7a

Economic principles would suggest that the supply of services in the villages is sufficient to meet current demand. For example, Forest Row already cannot cope with traffic and Health services to name but a few. It does not mean that they would be adequate to accommodate the proposed 20% increase in size in large villages. New villages, with the appropriate facilities, should be designed to accommodate these new housing developments."

Option 19a

Any proposed development to the North/West of Forest Row is out of the question as residents in Riverside nad Swan's Ghyll have experienced flooding in the recent rains. Development around this area would almost result in a "Tsunami" heading towards these settlements with disastrous consequences.

Option 19a

Where would the access for these developments come from???? Traffic is already a serious problem in Forest Row.

Reason for comment:
There is no scope at Wadhurst - areas identified are on the outskirts of the village (West, East and North) and therefore these sites are not accessible to reap the true benefits of village life. As a village it is already the largest in the area - leave it as it is and don't make it larger. Building of the fringes of the village will ruin it and the surrounding areas. It is unacceptable to develop new housing on the scales proposed in areas of AONB.

Reason for comment:
Ownership of relevant land
We write as the joint owners of the parcel of land at Amberstone Ref ESX249276 comprising OS TQ5911 and TQ5911 0020. This land was included in a development plan produced and submitted to Wealden DC by Wilcon in August 2001. In that plan a new access road to the Southern Water Treatment Works was to be laid through our piece of land. This new road ensured that lorries using the Treatment Works did not have to travel through the proposed residential development. (Hailsham 15b on the new plan.) We would suggest that our land can still have an important and beneficial part to play in any development to the East of Battle Road/South of Amberstone.

Consultee ID: Mr Ricketts
106244

Part of document: option
Option 11e

Section of Document:
Your View  □  Agree  □  No opinion  □  Disagree

Reason for comment:
The road structure to the west and south of the proposed location cannot accomodate the additional traffic which would undoubtedly be generated by such a development. High Broom Road, Stone Cross Road and Burnt Oak Road are narrow roads which in places are single lane and do not allow two vehicles to pass. The size and (at times) volume of traffic using these roads is already dangerous and inappropriate. Additionally there are no footpaths and street lighting is either poor or non-existent. These concerns have been expressed many times in the past by local residents in relation to other planning applications and the Council has a duty to take into account the serious safety issues involved.

Consultee ID: Simmons
106246

Part of document: chapter
Part 1

Section of Document: Context
Your View  □  Agree  □  No opinion  □  Disagree

Reason for comment:
My first comment is regarding the Regional Requirements, paragraphs 1.16-24. I understand the Government's version of the South East plan, following the Examination-in-Public last winter (at which I was a participant) and the imminent Panel report, is expected to increase housing targets significantly. Indeed, the Prime Minister's new aim of 240,000 new dwellings p.a. nationally by 2016 makes that inevitable in this region. While I expect higher figures to be concentrated in the growth areas and where fast economic growth is forecast, rather than such areas as Wealden, it seems likely that all areas will see some increase, perhaps 10% up on SEERA's draft South East Plan rates, and more if strategic transport and other infrastructure investment is planned. While this is a matter for conjecture in responding to your current consultation, my comments on your locational option questions bear this in mind.
Reason for comment:
I agree some very limited development, e.g. careful infilling/rounding off of settlements where justified in terms of community sustainability, within the principle that protection of the character of the AONB is paramount. As regards the last point in paragraph 2.15, at Crowborough the AONB boundary at Palesgate Lane could well be redrawn to include the attractive steep and largely wooded hillside on the south-west flank, down to the brook, to protect the valuable framing it provides to this part of the town, and guard against extension of the housing estate at Jarvis Brook.

Reason for comment:
I agree with all four of these Options. Re 3a, the scope for cross-subsidising small workshop space from high-value housing development should be explored, through mixed-use redevelopment of ‘unwanted’ existing employment land: this would be one way of meeting the Option 3c need.

### Consultee ID: Simmons

#### Part of document: **Option 11h**

**Question 12**

**Section of Document:***

**Reason for comment:**

I agree the suggested spatial objectives for Heathfield. As regards extending the NCR21/Cuckoo Trail, I would like to see the LDF seeking to extend it northwards to Mayfield in due course.

### Consultee ID: Simmons

#### Part of document: **Option 11c**

**Section of Document:***

**Reason for comment:**

Disagree 11c, particularly land to the east. Steel Cross is poorly related to centre of the town and would spread Crowborough out still further northwards. Would be likely to constitute dormitory to Tunbridge Wells.

### Consultee ID: Simmons

#### Part of document: **Option 11d**

**Section of Document:***

**Reason for comment:**

Agree 11d, although form of development would need relating to the landscape. Relative proximity to railway station is an advantage, and should be associated with improved quality bus services to reduce car usage and impact on road network, which would otherwise limit capacity.

### Consultee ID: Simmons

#### Part of document: **Option 11e**

**Section of Document:***

**Reason for comment:**

Agree 11e in part, subject to conservation of landscape character.
### Question 11f

**Possible Spatial Objectives**

1. A general policy is needed for Crowborough based on its unique townscape/landscape character of a town set on well-wooded hillsides. Such a policy would aim to safeguard that character by limiting high-density redevelopment of larger properties with gardens valuable in townscape and environmental (biodiversity, climate change) terms. New development, except at the town centre, should generally be at relatively low overall (gross) density to enable growth to be landscaped with tree planting thereby augmenting the town character. 2. There is a clear need for provision of small sites for business/employment development oriented to the A26. There should be no further employment development in the Jarvis Brook area, where traffic congestion on the B2100 is increasingly apparent.

Part of document: □ document □ chapter □ section ✓ option
Option 13a

Section of Document:
Your View   ✓ Agree   □ No opinion   □ Disagree
Reason for comment:
I agree this is worth considering, particularly the finger of land intruding into the Tunbridge Wells/County boundary: if agreed a boundary change would seem sensible.
Option 14a

Reason for comment:
daagree in the main – poorly related to town and centre. A smaller scheme off Snatts Lane would be better. It is important to preserve the green wedge to Maresfield.

Option 14b

Reason for comment:
dextends town northwards undesirably.

Option 14c

Reason for comment:
daagree in main – limit to northern part only.

Option 14d

Reason for comment:
dagree in part, i.e. to area north of farm.
Simmons

Option 14f

agree, as most closely associated with centre, subject to access.

Option 14g

agree, subject to flood risk and mixed-use concept. Assume high density housing would be largely of flats.

Question 14j

definitely disagree. No case for expanding west of the Bypass: most undesirable.

Question 14k

agree the spatial objectives, but see my answer to Question 27b regarding implications of the Lewes rail link: would add pressure to expand Uckfield further.

Reason for comment:  
I see no strategic advantages at Hellingly.

Consultee ID: Simmons  
106246  
Part of document: ☑ option  
Option 18h

Section of Document:  
Your View: ☑ Disagree

Reason for comment:  
The green gap here should be preserved strategically.

Consultee ID: Simmons  
106246  
Part of document: ☑ option  
Option 18i

Section of Document:  
Your View: ☑ Agree

Reason for comment:  
18i and j could also be seen as a package for the longer term, with 6,000-9,000 dwelling capacity, justifying linked social infrastructure, related to the railway stations, but requiring considerable improvement/realignment of the A27T (see paragraph 6.39).

Consultee ID: Simmons  
106246  
Part of document: ☑ option  
Option 18j

Section of Document:  
Your View: ☑ Agree

Reason for comment:  
18i and j could also be seen as a package for the longer term, with 6,000-9,000 dwelling capacity, justifying linked social infrastructure, related to the railway stations, but requiring considerable improvement/realignment of the A27T.
If the Wealden rail line is to be reinstated to Lewes (see my response to Q27b) Eridge station would become a strategic location (junction to Tunbridge Wells and by the A26). An adjacent new village on the valley floor would then justify consideration, if carefully designed to minimise impact on the AONB. It would enhance the business case for the rail investment.

see my comments on Q7 a-d regarding Rotherfield. I see growth potential as limited. AONB landscape setting is crucial. Village cannot take more traffic, especially at B2100 junction in the village centre.

I agree the growth potential should be capped. In view of the spread-out form of the village, there is a danger of sprawl.
I agree the growth potential should be capped. In view of the spread-out form of the village, there is a danger of sprawl.

I agree, but flexibility is needed regarding viability.
Option 24b

Reason for comment:
I have considerable reservations with ‘typical densities’. As paragraphs 6.13-15 indicate, there is a wide variety of circumstance in the District, and there are dangers of developers seeing them as ‘one size fits all’ situations. Instead I believe density policy should derive from the specific ‘place’: the genius loci. This should include redevelopment of existing low density housing in pleasant green environments: policy in this respect should stress preservation of local character. That said, I agree Option 24b: an average of 40 dwelling per hectare would be appropriate, provided it is made clear that this would permit a range from 20 dph (providing executive detached housing for senior managers etc. and their families, and with ecological benefits) to 60-70 dph (flats at and adjoining centres with good public transport).

Option 24d

Reason for comment:

Option 25a

Reason for comment:
I agree compared with the present situation, in order to provide for small/new household needs, but the proportion needs defining and appropriate locations, mainly at and adjoining centres, specified.

Reason for comment:

Consultee ID: Simmons
106246

Part of document: ☑ option
Option 27a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:
On balance, I disagree. It is an interesting proposition, but with major implications as alluded to in paragraph 6.37. I do not believe there will be a viable business case – or at least without significant, potentially adverse, implications for Wealden. The National Rail interest (including reinstating dual track throughout and platform extensions to serve 8-car units) from Oxted to Lewes to provide a ‘secondary’ route from London to Brighton and Eastbourne does not to my mind hold water, as it would be much slower than the 50-55 minutes main line journey to Brighton via Gatwick; not only is the route significantly longer, there would be several station stops (at least Edenbridge, Eridge for Tunbridge Wells, Crowborough, Uckfield) preventing fast running. Nor do I believe a Sussex-Tunbridge Wells link would generate sufficient patronage. The consequences would be that to provide an adequate business case as regards passenger forecasts to justify the considerable investment, major redevelopment would be needed at key Wealden locations, particularly at Crowborough and Uckfield, and also Isfield (Lavender, see Option 18a) and Eridge (see my answer to Question 18k). Moreover, the main rail usage would be by peak period commuters rather than the steady all-day patronage required to justify the investment, and it seems unlikely that promotion of services from Crowborough and Uckfield to Brighton etc. would answer! The existing line is now doing well with Southern’s recent investment and the promotional activities of the Sussex Community Rail Partnership. That should be supported further, together with the Spa Valley Railway's now expected extension to Eridge in 2008 or 2009 and the tourist (and weekend park and ride) potential of that for linked services to Tunbridge Wells (west) and Groombridge. My heart says good idea; my head cannot agree!
I agree. Sites could be identified at the Wealden/Tunbridge Wells (County) boundary on both the A26 (first priority and A269. Further, a weekend Park and Ride facility could be promoted at Eridge station car park, using the Spa Valley heritage railway (SVR) which is has agreement with Network Rail to extend to Eridge in 2008 or 2009.

I agree with the options and see the second bullet point in paragraph 7.7 as particularly promising. This is now seen as a clear issue nationally, pressed by the RTPI and reflected in the current Office of Fair Trading study, whose report will no doubt inform the draft LDF Core Strategy in due course.

Question 31a

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:

I agree – this reads well. My views on the Wealden line are set out in my answer to Q. 27b; to my mind a more realistic and achievable transport vision would focus on better bus services linking the main settlements, with stronger public sector control over route franchising.

Consultee ID: Simmons

Part of document: □ document  □ chapter  □ section  ✔ option

Question 32a

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:

I agree these are a reasonable set of possible objectives. My only problem is with SO2: Maximising the use of previously developed land should specifically exclude building on valuable gardens. Also I do not agree that 75% of new housing should be at over 40 dwellings per hectare: I supported the 40% average in response to Question 24 so this figure should in my view be 50%. As regards SO5, this should recognise that the final South East Plan in 2008 is very likely to include higher figures than SEERA’s draft Plan: my comment on Part 1 above.

Your View □ Agree □ No opinion □ Disagree
Reason for comment:
Far too theoretical. Need to consider whether existing infrastructure has spare capacity and/or whether it can be expanded to meet future demands

Consultee ID: Mr ROSE
106247

Part of document: □ document □ chapter □ section □ option
Option 13a

Section of Document:
Your View □ Agree □ No opinion □ Disagree
Reason for comment:
Needs to be very careful co-ordinated with Kent CC, Tunbridge Wells Borough Council. Development of edges of areas is likely to give rise to unforeseen problems.

Consultee ID: Mr ROSE
106247

Part of document: □ document □ chapter □ section □ option
Question 13b

Section of Document:
Your View □ Agree □ No opinion □ Disagree
Reason for comment:
Surrounded by Tunbridge Wells. Needs sensitive handling between authorities
Your View
☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Subject to strict controls

Why is Cousley Wood a separate area? Ditto Beech Hill; what about Tidebrook? These form an integrated community whole and should not be fragmented. Local employment opportunites fragile and limited, so any development will increase commuting in particular to Tunbridge Wells and London. Wadhurst railway station parking now full to capacity and no room to expand. Road infrastructure is poor, very congested at times. B2100 link road from Tunbridge Wells towards A21 and A268 to Rye (used as A21 diversion when shut): B2099 cross country route from Crowborough towards Ashford: both roads neglected by ESCC. Kent Public carpark taken over by Uplands Community College in term time, so only parking available is kerbside. Water supply poor (on top of a hill we have no water pressure and situation worsens with any development). One stretched doctors’ surgery with limited vehicular access. Bus service to Tunbridge Wells but only of use to those within walking distance of routes. Wadhurst is a ridge village in an AONB. One of its pleasures is occasional fields breaking up existing developments. If these disappear then the village will lose much of its character.
Reason for comment:

Agree/disagree is irrelevant for a question such as this. Whilst this may be Wealden's vision, Wealden is not an isolated District. Here in Wadhurst, on the fringes of Wealden, I am concerned about what Kent CC, Tunbridge Wells BC and Rother DC have in store for us; each is just a few minutes away. Our lines of communication take us to these places, not into Wealden so much, thus it would be good to have some co-ordinated planning with adjoining authorities.

Reason for comment:

This is a general comment about this so called consultation process. There seems no where one can make general comments. This is a really un-user friendly document. The way that representations are invited is poor, hardly likely to encourage anyone to comment apart from the dedicated. It is also unfortunate that the consultation is in the holiday period. I suspect the vast majority of Wealden residents will know nothing about it. Dry, dull and uninspired best summarises it, yet it will have a profound impact on our lives. You might have had a road show but it should have come to the smaller communities. Wadhurst always gets overlooked, I suspect because it is in the furthermost corner of Wealden (wholly remote from Hailsham)

Settlements in the High Weald Area of Outstanding Natural Beauty

**Your View**  
☐ Agree  □ No opinion  ✔ Disagree

**Reason for comment:**

Development will destroy the character of the countryside. I am advised that the recent tree felling on the Ashdown Forest (not Ashdown Heath!) has been authorised by English Nature and that the Consrevators have had no say in the matter.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 106249  Mr. Ballan

Part of document: Option 3c

Section of Document:

Reason for comment:
THERE IS A SHORTAGE OF SUITABLE ACCOMMODATION PARTICULARLY IN THE 4000 SQUARE FEET BRACKET.

Consultee ID: 106249  Mr. Ballan

Part of document: Option 3a

Section of Document:

Reason for comment:
There is a shortage of suitable office space and very little freehold.

Consultee ID: 106249  Mr. Ballan

Part of document: Option 3b

Section of Document:

Reason for comment:
for the reason stated in 3a

Consultee ID: 106249  Mr. Ballan

Part of document: Option 3d

Section of Document:

Reason for comment:
Otherwise where are people to live. The problem from an employer's perspective is that the transport infrastructure is dreadful, it is impossible to reach Brighton by train from Uckfield and the surrounding districts, the costs of running a car increase very year so one is forced to recruit locally. Inland Revenue rules state that travel between home and office is taxable so anyone commuting from Sevenoaks to Uckfield can only travel by car. It would probably take 2-3 hours to travel by rail.
In principle but in practice the Cross in Hand - Heathfield road is a disaster in peak periods. I have staff living in Punnets Town and Horam and the only way to get to work on time is to travel before 07.00.

Too many external factors come into the equation such as water, electricity, sewerage. Transport must be a key factor.

The road infrastructure is unsuitable.

Option 14b

Section of Document:

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
Reasonable access to the A22 SINGLE carriageway bypass.

Consultee ID: Mr Ballan
106249

Part of document: □ document □ chapter □ section □ option
Option 14c

Section of Document:

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
This is a transport bottleneck.

Consultee ID: Mr Ballan
106249

Part of document: □ document □ chapter □ section □ option
Option 14g

Section of Document:

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
Risk of flooding as a result of industrial building on the flood plain.

Consultee ID: Mr Ballan
106249

Part of document: □ document □ chapter □ section □ option
Question 14k

Section of Document:

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
The TESCO supermarket and the fire station should be relocated nearer to the bypass, existing sites create bottlenecks. The UCK channel should be either widened or deepened or the industrial buildings re-located. It is very difficult to park to use the railway station. IF the Uckfield-Lewes link is restored then car parking provision has to be top priority.

☐ document  ☐ chapter  ☐ section  ☑ option

Option 18b

Section of Document:

Reason for comment:

There are no mains drainage services in Knowle Lane, power is via overhead wire, water has a 2”
main. The document does not state where these 2800 dwellings are to be built. 2800 dwellings means
a MINIMUM of 5600 additional cars on roads that are poor to say the least. Teenagers will have to
travel to secondary schools in Uckfield or Ringmer - public transport is virtually non existent. The A22
has bottlenecks at Polegate and Uckfield during morning and evening, it is virtually impossible to pass
through Heathfield due to existing traffic. Lewes is a nightmare. In other words the transport
infrastructure is dreadful. According to the Electoral register there are 275 residents in the village this
would equate to about 120 homes, building this number of new homes will destroy the village in much
the same way as Ringmer has been destroyed. I moved out of Crowborough to live in the country,
what you are proposing is to make Halland another Crowborough. Your statistics state that the
percentage of working people in Halland is 19% whereas Crowborough is 12% - dodgy statistics?
South East: March to August 2003 were the warmest months on record in the UK and included the
country’s hottest temperature ever of 38.5°C at Brogdale in Kent. The South East is especially
vulnerable to the detrimental effects of climate change. Average temperature and sea levels have
already risen – and are expected to go up even further. Increasingly frequent storms will combine with
a greater risk of summer droughts to further polarise the seasons. The South East receives less
rainfall than any other region in the UK: it has less water available per person than Spain or Greece.
As a result, the area is heavily dependent on groundwater to provide its drinking water supplies.
Water resources are already overstretched and there are limited opportunities to extract more water
from groundwater sources without damaging the environment. Most of the South East’s major centres
of population are on coastal flood plains, making them very vulnerable to floods and extreme weather
events. Government plans to develop more housing on flood plains have attracted criticism in the
wake of the recent flash floods. The pressures of an expanding population will place the climate under
even greater strain. MPs have expressed concern that emissions from the housing sector “could
constitute more than 55% of the UK’s target for carbon emissions in 2050, nearly doubling the current
30% contribution.” Pressure for more housing and other developments in the area also means that
transport, the fastest growing source of greenhouse gases in the UK, will expand. The South East
Climate Change Partnership estimates that by 2080 summer temperatures will have risen by up to
6°C, and winter rainfall is expected to increase by up to 30%. In agricultural terms, this translates to
between 40 and 100 extra days of plant growth per year. Sea level rises will mean more pressure on
coast lines. Planning will have to take account of more likely extreme and distressing events and seek
to protect sensitive areas, both natural and man-made. The severe flooding experienced by people
living in Sussex and Kent in 2000 demonstrated the acute personal, social and economic costs
associated with such events. Across southern England, estuaries and low coastal land could be
inundated. Eroding cliffs will retreat ever faster as rising tides and more vigorous waves and storms
rip at their exposed faces. Further inland, hotter, drier summers will put the local oak and beech
woodlands at risk. The Sussex water meadows may also be adversely affected. Redshanks,
Lapwings and other wading birds will increasingly find their habitats threatened by rising sea levels
and ever-drier land.

<td><strong>Reason for comment:</strong></td>
<td>Comment is made that Halland depends upon East Hoathly for services. This is nonsense for one has to go to Ringmer or Lewes for GP and Dental requirements. It is impossible to find an NHS dentist in this area. All shopping is carried out at the supermarkets in Lewes, Uckfield and Hailsham. If 4000 dwellings is the minimum to fund a secondary school then the proposed development of 2800 dwellings would be insufficient to fund schools meaning much more use of the already creaking A22 to Uckfield and the B road to Ringmer.</td>

<tr>
<td><strong>Reason for comment:</strong></td>
<td>Initially, brown field sites within existing towns and villages should be targetted. If, as is likely, this is inadequate for the development plans being foisted on the area, then a radical rethink on location is required. Most towns and villages are, in some way, historical accidents, to which we have grown attached. Rampant development in many of these areas will destroy their character, therefore, consideration should be given to the recreation of new towns/villages to accommodate the proposed developments, rather than degrade the existing ones.</td>

<tr>
<td><strong>Reason for comment:</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Option 3a

Your View □ Agree  □ No opinion  ✔ Disagree
Reason for comment:
Isolated conversion of unused barns to alternative use hardly seems an issue, but widespread conversion of farmland to housing estates needs to be tightly controlled.

Option 3d

Your View □ Agree  □ No opinion  ✔ Disagree
Reason for comment:

Option 5a

Your View □ Agree  □ No opinion  ✔ Disagree
Reason for comment:
Settlement boundaries cannot be both maintained and expanded. These are contradictory statements. However, if sensitive in-filling can be accomplished that is acceptable. Unfortunately, this is unlikely to meet Wealden's building remit, and, as these boundary regions have been under pressure for some years, there is little free space left in these areas. They should be maintained, and the proposed large new housing developments should be used to build new villages.

Option 5b

Your View □ Agree  □ No opinion  ✔ Disagree
Reason for comment:
As employment and other facilities are concentrated in and around the towns, this must be a favoured location for further development. However, the precise figures of 80% etc seem to be quite arbitrary, and if the proposed developments can be 100% sited around the towns, then do that.

Reason for comment:
This is too much for the villages to absorb.

Reason for comment:
Economic principles would suggest that the supply of services in the villages is sufficient to meet current demand. It does not mean that they would be adequate to accommodate the proposed 20% increase in size in large villages. New villages, with the appropriate facilities, should be designed to accommodate these new housing developments.
Consultee ID: Brotherton

Part of document: option 7c

Section of Document: Agent ID: Agree No opinion Disagree

Reason for comment: The scale of development proposed would be better sited in new, planned villages.

Consultee ID: Brotherton

Part of document: option 19a

Section of Document: Site Allocation Thresholds

Your View Agree No opinion Disagree

Reason for comment: Minimum site sizes of 15 houses seems to be a lot for edges or in-filling in villages. It should be lower at ~5.

Consultee ID: Brotherton

Part of document: option 19a

Section of Document: Option 19a

Your View Agree No opinion Disagree

Reason for comment: Housing already extends up to the development boundaries, so it is unclear how the proposed 200-340 houses would be accommodated without going predominantly onto green field sites. In addition, traffic flow on the A22 through Forest Row is already congested, with queues regularly extending north up this road on evenings and weekends. Yet, this would appear to be the area identified for development, and, if the main road and village centre already struggle to cope with the existing traffic volumes, it is difficult to understand how the traffic discharging from 20% more houses will be handled.
Consultee ID: 106252
Brotherton

Part of document: □ document □ chapter □ section □ option
Option 24b

Section of Document:
Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
A prime need is for low cost, starter homes for first time buyers. Low rise maisonettes, looking like conventional houses, could be built to achieve increased densities without looking out of place.

Consultee ID: 106252
Brotherton

Part of document: □ document □ chapter □ section □ option
Option 25a

Section of Document:
Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
To be offered for sale as starter homes, but legislation is needed to prevent 'buy to let'.

Consultee ID: 106252
Brotherton

Part of document: □ document □ chapter □ section □ option
Option 25d

Section of Document:
Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
'Affordable housing' seems to be a misnomer, as it has nothing to do with houses which people can afford to buy. It means rentable properties, and it would be helpful if this were made clearer. It is unclear why these are specifically proposed for rural areas, but sensitively mixed in, at a low level, with new developments is far preferable than adding blocks of them to existing developments.

Consultee ID: 106252
Brotherton

Part of document: □ document □ chapter □ section □ option
Option 25f

Section of Document:
Your View  □ Agree □ No opinion □ Disagree

Reason for comment:
With proper planning controls.

Consultee ID: 106252
Brotherton

Part of document: □ document  □ chapter  □ section  ☑ option
Option 27f

Section of Document:
Your View  ☑ Agree  □ No opinion  □ Disagree
Reason for comment:
Two places needed per property to anticipate future car ownership levels, and to avoid parked cars spilling onto roads as happens with past developments.

Consultee ID: 106252
Brotherton

Part of document: □ document  □ chapter  □ section  ☑ option
Option 28a

Section of Document:
Your View  ☑ Agree  □ No opinion  □ Disagree
Reason for comment:
Option 28b

Reason for comment:
Do not compromise and complicate housing developments by tying them into provision of recreational facilities. If they are a natural part of a large development, then yes. But if not, then what are we paying our rates for, if not to provide local facilities such as these.

Option 28c

Reason for comment:

Question 31a

Reason for comment:
The sentiments are fine (and words are cheap), but they are not consistent with the scale of development to be imposed upon the district.

Question 32a

Reason for comment:
This question makes no sense. It is not possible to give a simple yes/no answer to 14 different, and, in some cases, contradictory questions. The responses to the 14 points will be found in the responses to the individual sections of this document.
Consultee ID: Mr Wood
Agent ID: 106255

Part of document: □ document □ chapter □ section ☑ option

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
The logical conclusion of the present policy is that 39% of Wealden will eventually be concreted over while the other 61% is largely protected from development. This would be unacceptable to council tax payers resident in the 39% so, at some stage, a bigger share of development will have to be directed to areas currently designated as of outstanding natural beauty. Given the extent of the new development required, this would be a good time to change the policy. This change should recognise that all Wealden residents are equally keen to preserve the quality of their environment and that new development should be distributed equitably throughout Wealden and not restricted to 39%.

Consultee ID: Mr Farmer
Agent ID: 106257

Part of document: □ document □ chapter □ section ☑ option

Option 9a

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
The proposed development would have the effect of destroying the natural boundary of Buxte Park and would effectively make Five Ash Down a suburb of Uckfield.
Opportunities for development at Pound Green and off Limes Lane without major encroachment on green belt. I have concerns over parking issues in respect of Buxted Station due to proposed expansion in the north of Uckfield and Maresfield.

Reinstatement of the Uckfield - Lewes link should not be seen as a local issue but also as a regional issue reducing the amount of traffic passing through Wealden.

The A27 needs to be improved to dual carriageway to reduce accidents in the Middle Farm area and improve the junction at Polegate.

Option 11c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

As joint owner of the area south of Walshes Road, Walsh Manor Farm, I agree this is an ideal area and open for development. We are fully supportive of inclusion of the of the land for consideration for housing as suggested in the Core Strategy and believe it has some considerable advantages in achieving long term housing goals. The area adjoining Walshes Road is not in productive agricultural use - it is currently grazed by horses. The upper part nearer Walshes Road are not a flood plain. It forms a natural extension to the built up area. Much of the area is below the road level and could therefore be easily screened - especially with the inclusion of a relatively small green corridor. It will be close to the railway station and could prove an excellent location from the point of view of sustainable transport especially if the proposed link road on the west side of the railway is constructed. There is potential sufficient buffer for areas of interest to English Heritage, SSIs and AOB to the south.

Option 11d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Fully supportive of inclusion of land at Walsh Manor for following reasons: - land is currently not in agricultural use - upper parts are not as a flood plain - forms a natural extension to built up area - easy to screen - access to railway - potential buffer zones.

Your View: [x] Agree  [ ] No opinion  [ ] Disagree

Reason for comment:
Reason for comment:
I believe that some development should take place in ANOBs so that the burden of development in non urban areas is shared by both designated and non designated areas. It would be unfair to spoil some areas in Wealden that are naturally beautiful but are not designated areas.

Reason for comment:
If this means siting wind turbines on the high spots in the Wealden area

Reason for comment:
Until it can be shown that the 10% target can be realistically met

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option
Option 3a

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
This would reduce the pressure on rural development and therefore the need to increase service infrastructure in rural areas

Consultee ID: Leech  
106260

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option
Option 3d

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
But only if this was for people living in the local area. It would be foolhardy to create business accommodation and then increase road traffic moving people around the county to get them to work

Consultee ID: Leech  
106260

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option
Option 5a

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
But only if the necessary service infrastructure is increased proportionally to cope with the increased development
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Leech
Consultee ID: 106260

Option 6a

Section of Document:

Reason for comment:
It would be easier to increase existing service infrastructure in towns than to create new infrastructure in rural communities. If the infrastructure is not created in the rural communities then this will lead to more road travel about the County by the new people in the rural communities traveling into the towns. This figure should be maintained or perhaps increased increased.

Consultee ID: Leech
Consultee ID: 106260

Option 18a

Section of Document:

Reason for comment:
Developing any small village in the Wealden area to this extent would, in my view, be totally unacceptable and grossly unfair to those living there. Isfield currently has limited service and transport infrastructure and could certainly not cope with development on this proposed scale. The cost of providing additional infrastructure to support development on this scale would be enormous. The suggestion that "this development could provide much lacking services in the village" is laughable given that the cost of this to villagers is 8000 houses and I suspect that no one is that desperate for these "additional services" If the Lewes / Uckfield rail link reopens it is more likely to be used as a commuter route to London rather that Uckfield and Lewes and will therefore not satisfy their needs as suggested, rather as a feeder housing village to Greater London.

Consultee ID: Leech
Consultee ID: 106260

Option 18b

Section of Document:

Reason for comment:
Developing any small village in the Wealden area to this extent would, in my view, be totally unacceptable and grossly unfair to those living there.
Developing any small village in the Wealden area to this extent would, in my view, be totally unacceptable and grossly unfair to those living there.

Reason for comment:
Unless it can be shown that it can be achieved at no cost to tax payers and that hard evidence given to show that it will be used effectively and will remove cars from the roads. It should be taken into consideration the advances in car technology that will probably produce economic and very low emmission , nearly "clean" engines in the future (5 to 10 years, probably the same time it will take to re-instate the rail link) will make it more difficult to convince car users to give up the convenience of a car and travel by train.

Part 10

Section of Document: Details of How to Comment

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Building should not take place on greenfield sites or flood plains, particularly in light of the recent flooding in other areas.

Consultee ID: Mr & Mrs Hollis
Agent ID: 106268

Part of document: □ document □ chapter □ section □ option

Option 18j

Section of Document: 

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Berwick should not be considered for such a housing development as it is unsuitable for the following reasons: 1. Berwick will be the gateway to one of the most beautiful areas of the National Park, with wonderful uninterrupted views to the Downs. The additional housing proposed shall cause major disruption and congestion to the local area. This proposal shall dramatically change the rural character of the Sussex countryside of the area. 2. Arlington Reservoir is a peaceful home to wildlife including the locally renown and rare osprey. 3. With the recent events of flooding to areas that have historically not been considered threatened by flooding, we should learn a lesson and should not build any further on or within the vicinity of known flood plains. Maybe we might expect the Planning Authorities to listen to and take on board professional advice made by the Environment Authority this time. Note that flood plains exist to the east & south east of Berwick (refer to http://maps.environment-agency.gov.uk/wiyby/mapController for details of current flood plains in the area) 4. The increase in population will have a major impact on traffic congestion on A27 and surrounding areas. The section of road from Drusilla’s round about to Lewes has recently experienced several serious road accidents. 5. An increase in population of Berwick shall require a major improvement in employment opportunities in the area. Where is it intended that these additional people shall obtain employment? 6. The area is unsuitable for such a large increase in families as there are currently few amenities to serve the proposed additional population. It would be more practical to build on the edge of existing towns where the required infrastructure is already in place.
Consultee ID: Hodgson

Part of document: ☐ document ☐ chapter ☐ section ☑ option

Question 6d

Section of Document:

Your View ☐ Agree ☑ No opinion ☐ Disagree

Reason for comment:

If it is necessary to build more homes, they should be fitted in to small sites within already built up areas. Although this will be more costly in terms of money, it won't be in terms of protecting our environment. The planning of homes needs to be considered in a more creative way rather than a blanket covering of green field sites simply for the convenience of contractors, and to fill a quota. I understand that homes built in the Sovereign Harbour area of Eastbourne are not selling, which would suggest that the planning of that development was inappropriate to the needs and finances of those we are trying to provide homes for. The answer is not to just build more and more houses, but to build modestly in small vacant areas and then to ensure (through Housing associations or other such organisations) that the homes remain available for key workers and low income families and are not sold off, thereby creating a continuous cycle of need for affordable homes.

Consultee ID: Hodgson

Part of document: ☐ document ☐ chapter ☐ section ☑ option

Question 16h

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

Polegate - This small town does not have the infrastructure to support such a development, nor does it have the potential to address this deficiency. In this area of great beauty, more roads, schools, health facilities, shops, would do great damage, in addition to which there is clearly insufficient water to cover the needs of a large influx of people - we had a severe shortage last summer for the existing population which the available water resources currently have to cover.

Consultee ID: Schmandt

Part of document: ☐ document ☐ chapter ☐ section ☑ option

Option 2b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

Given the importance of reducing our carbon footprint and the fact that fossil fuels are simply running out, 20% is a MINIMUM figure for the amount of renewable energy we should be requiring of new development, and we should be looking to increase that figure yearly. New housing should presently be built to a minimum standard of 3 star as defined by the Code for Sustainable Homes, also with a view to incremental improvement in subsequent years.
Consultee ID: Schmandt 106284

Part of document: □ document □ chapter □ section □ option
Option 19a

Section of Document:

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
There is already too much traffic in Forest Row and there is a possibility of more still in the wake of developments around East Grinstead. If Forest Row is further extended it will lose the character of a country "village" from which nature is visible at any point, and will become a less appealing place to live.

Consultee ID: Schmandt 106284

Part of document: □ document □ chapter □ section □ option
Option 25a

Section of Document:

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Not everyone who can contribute to the community is wealthy.

Question 32a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Option 18f

Section of Document:

Reason for comment:

Some of the options being proposed by WDC will involve a substantial expansion of several small villages that are set in the most inappropriate and least sustainable locations, in complete contradiction to what is set out in Wealden's own July 2007 document entitled ‘Core Strategy, Issues and Options Background Paper, Draft Settlement Strategy for Villages’. Section 6.77 of this paper, ‘Other Villages and Hamlets’, clearly states that some 51 villages or hamlets, including Lower Dicker, Berwick and Berwick Station, do not satisfy the criteria for identified growth categories and that in these areas (to quote the paper) “growth would be limited to smaller infill schemes (typically 1-5 units depending on the character of the village and how development impacts on the AONB)” Despite this unequivocal statement, WDC has nevertheless put forward options to expand Lower Dicker (four options of anywhere between 600 and 2700 new houses) and Berwick (by up to 7000 new houses). Taking the WDC proposed figures for the maximum development on these two sites alone would create an additional 9700 new homes, compared to an anticipated requirement for an additional 8000 new houses to be built across the whole of Wealden District between 2006 and 2026. This must surely be a mistake. It is unclear how WDC would secure funding to pay for the major infrastructure improvements that would be required to enable new development in these areas to be even remotely viable. The government steadfastly refuses to pay for such things and there are limits on what the private sector can be expected to fund when developers are already required to provide a percentage of affordable homes within their developments.
Reason for comment:
The proposal to increase housing provision by up to 7000 new homes in Berwick runs contrary to the government’s policy of creating sustainable communities whenever new development is planned, and for at least 60% of new developments to be on brownfield sites. There are a number of reasons why this level of development in Berwick would not be sustainable. The A27 is at or above capacity at peak times; there are serious water shortages in the south-east; Berwick station has a limited number of car parking spaces and no space for expansion; bus services are infrequent and those that do exist run to a limited timetable and depend on volunteer drivers; and there are no local secondary schools, apart from the private St Bede’s in Lower Dicker. Because there is little employment opportunity in the immediate area, building a new settlement in Berwick would create a significant increase in commuter traffic and a corresponding increase in carbon dioxide emissions. If each of the proposed 7000 new homes in Berwick were to contain just one employed person travelling to work by car to surrounding towns such as Crowborough, Brighton or Hailsham, this would potentially generate in excess of 20,000 journey-miles each day. School runs and trips to the nearest supermarket in Hailsham would simply generate even more traffic and journey miles. Although not on a flood plain, Berwick and surrounding areas have high existing water tables and recent flood events in the south-west, west Midlands, Yorkshire and Humberside are predicted to become increasingly widespread as a result of global warming. The hardstanding required for an additional 7000 homes, including the building footprint, space for car parking and a share of distributor roads would, according to my calculations, amount to a loss of well over 100 hectares of permeable surface, which could conceivably surcharge the surrounding water table and bring with it an increased risk of flooding.

Reason for comment:
It is unacceptable of WDC to have allowed insufficient time, when many people are on holiday, to allow for a full and frank democratic debate on an issue that will not only affect this generation, but many others for the foreseeable future. While accepting that many parts of the country are under pressure to meet the government targets, that alone does not justify the pace at which the people of Wealden are expected to respond to questions of vital importance to all of us. A major concern about the content of the consultation paper is the future sustainability of many of the options that have been put forward by WDC. The World Commission on Environment & Development defines sustainability as: ‘development that meets the needs of the present without compromising the ability of future generations to meet their own needs’. By this measure those options that involve significant and disproportionate expansion of small villages and hamlets would fail on all counts.
Across the board prescriptive density targets should be abandoned and replaced by a flexible system that treats each potential housing site on its own merits, taking into account a range of factors including the immediate context, availability of public transport links and services, infrastructure capacity, other amenities such as schools, surgeries etc and primarily in response to local demand. Many late Victorian towns and villages have housing densities in excess of 60 houses per hectare accommodated in two storey terraces and suffer no loss of amenity because of having a high notional density. They are also highly efficient in terms of land use and high land value is the single most important factor in determining the affordability of house prices. In turn, land prices are indirectly controlled through a planning system that is ultimately dictated by government policy.

It goes without saying that it is essential for infrastructure planning and implementation to be completed before finalising locations and quantity of new housing development. This chicken and egg dilemma is already evident in the Thames Gateway, where some developments have apparently stalled because of the difficulties of agreeing who should pay for infrastructure. The problem is exacerbated by having to coordinate and synchronise delivery by multiple public and no-public bodies (privatised utilities, rail/bus franchisees, the Environment and Highways Agencies, and others). It is unclear how WDC would be in a better position to resolve these issues and secure funding to pay for major infrastructure improvements to enable new housing development to be even remotely viable. The government steadfastly refuses to pay and there are limits on what the private sector can be expected to fund when developers are already required to provide a percentage of affordable homes within their developments.
Consultee ID: Mr Anastasakis
106288
Part of document: ☑ option
Option 18j
Section of Document:
Your View ☑ Disagree
Reason for comment:
Developing this location would be damaging to the character of the village, its cultural heritage, it would be a disaster for the environment and its unique ecosystems, and particularly its rare bird populations. Commercially, such a development would also destroy Berwick's attraction as a destination for sustainable, environmentally friendly and culturally sensitive tourism. Speaking from the position of a person with deep experience in the matter, I assure you that such a development would be taking the area downwards and away from a tourism, economic and ecological balance that other parts of the country and the world are struggling to achieve (with very limited success) for decades. If you do need further assistance and explanations on why I see this as a monumentally bad idea, please feel free to contact me using any of my details.

Consultee ID: Mr Shilston
106291
Part of document: ☑ option
Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View ☑ Agree
Reason for comment:
This agreement is based solely on the need for affordable housing to meet local requirements. Further migration into the area should not be encouraged because the transport links are poor.

Consultee ID: Mr Shilston
106291
Part of document: ☑ option
Option 2b
Section of Document:
Your View ☑ Agree
Reason for comment:
It is hard to limit this target without knowing how the consequences might have a negative affect on the area. I would support any initiatives short of wind farms.
Option 3a

Section of Document:

Reason for comment:
This is largely based on the anecdotal view that there is a shortage of good employers, however, this may because the road links are so poor, rather than lack of space.

Option 4a

Section of Document:

Reason for comment:
I do not dispute the need for better employment opportunities in the area, however, until the problem of the A27 is resolved, it is all academic. The A27 to Lewes is dangerous enough as it is, particularly for those residents in the area who have to access it from small side roads. Simply broadening an access path from Polegate to the existing A27 does not solve the problem.

Option 5a

Section of Document:

Reason for comment:
There is much cynical and speculative acquisition of plots of land outside settlement areas with a view to battering away at the planning system by repeated planning applications. This is a monumental waste of time for the planning authorities. Boundaries should be clearly stated and tightly defined.

- ✔ option

**Section of Document:**

**Reason for comment:**

I disagree with this on the basis that there is already too much cynical and speculative purchase of farm land in small plots with a view to battering away at the planning system. Any relaxation of boundaries is only going to make this worse and make it harder for the planning authorities to avoid creating precedents.

Option 7b

Reason for comment:
The idea that affordable housing should be permitted is of course irrefutable. That it should be permitted everywhere, even in AONBs is a charter for the cynical and speculative acquirers of land who will seek to bend the definitions to the limit in order to justify building for their own purposes. This already happens.

Option 8a

Reason for comment:
Any further pressure on the A27 is not sustainable

Question Ten

Reason for comment:

Question 15h

Reason for comment:
Option 16a

Reason for comment:
It is hard to see how this can integrate with Polegate rather than create a new mini town. Unless the housing serves local needs only, it will only increase the chronic congestion on the A27 due to people commuting out of the area.

Option 16b

Reason for comment:
For the same reasons as 16a.

Option 24a

Reason for comment:

Option 24d

Reason for comment:
It is largely a fantasy that living near a train station will cause people to give up their cars in an area with dispersed employment and leisure facilities.

Part of document: ☑ option
Option 27a

Section of Document:

Reason for comment:

It makes no sense to create isolated affordable housing areas with no support services, they should be integrated into larger towns/villages with amenities. Should they be in rural areas, how will it be possible to prevent second home owners from buying them? It would also create a precedent for the numerous speculators who currently exist to build on farm land plots for their own purposes.

Where is the evidence that in dispersed communities it is remotely possible to have bus services that can cater for the myriad different reasons people leave their homes? Having development around villages/towns should be supported for different reasons.
Consultee ID: Mr Shilston  Agent ID: 106291

Part of document:  ☑ option
Option 27d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The cost of dualling the A27 would be so astronomical that central Government would require large scale development to justify it. If development in the Polegate area is to meet local needs then dualling is not needed anyway. The A27 is used currently by people commuting out of the area so the housing should be nearer to the destination anyway.

Simply making it easier for traffic from the Polegate area (should it be developed further) to filter onto the existing A27 is not acceptable. The road is already overloaded and dangerous all the way to Lewes. The dualling of the road further north of the current route is a possible option to meet the legitimate needs of local job creation whilst avoiding detracting from the AONB, providing it doesn’t then justify larger developments all along it’s length.

Reason for comment:
The area to the south of Sandy Cross Lane is not a suitable area for development since access is through narrow, winding rural lanes. In particular, pedestrian access is currently unsafe. The additional traffic that this development would generate could not be served by Sandy Cross Lane and its junction with the Hailsham Road. A new access road would need to be built, joining up with the Hailsham Road to the south of Sandy Cross Lane. However, any further development whatsoever in Heathfield is unsustainable since residents need to travel long distances for work, leisure, hospitals and serious shopping. The lack of transport infrastructure, both road and rail, means that this will cause further road congestion and CO2 emissions. The idea that significant employment opportunities could be developed locally is, at best, fanciful.

Question 15g

Section of Document:

Your View    □ Agree □ No opinion □ Disagree

Reason for comment:
The Golden Cross junction of the B2124 and A22, being congested, leads to increased traffic along unsuitable side roads to join the A22 at other sites e.g. along Shortgate Lane and Park Lane in Laughton
Option 18b

Reason for comment:
Would increase traffic along B2192 and adjacent roads. Danger of continuous development with Uckfield with no intervening green space.

Option 18c

Reason for comment:
Golden Cross congested +++ A22 with junction with B2024. Would lose valuable agricultural land to significantly improve this junction. B2024 already has heavy traffic load.

Question 18k

Reason for comment:
Village life is distorted by proximity to A roads. There is a danger that villages degraded by their proximity to A roads or relieving B roads will be further degraded if the amount of traffic and its speed is not controlled.

Option 24d

Reason for comment:
But design is important. Many recent developments are boring and environmentally unfriendly.

Reason for comment:  
In the proposal it suggests that this "development could in large part be hidden". I should be very interested to learn just how this feat could possibly be achieved, given that we are talking about up to 7000 houses, a town not dissimilar in size to Hailsham! Looking out towards Berwick from the Downs, there is a beautiful, nearly unbroken panorama; I cannot believe that this idyllic view would not be spoiled by these plans.

Reason for comment:
Look to history. Hampden Park was a quiet prosperous village until it was "re-developed" in the late 70's. Now house prices are down and anti-social behaviour is up. Is this to be the fate of Polegate? Not a single house should be built until there are no "For Sale" boards in the town.

Section of Document: Question One

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
The current criteria for whether or not these would benefit the area are too vague. For example, it would not be possible to control whether or not these homes would be bought as second/holiday homes. In other parts of the country, this type of occupation has clearly aggravated community problems, not solved them. However, I do think each existing community in an AOSB should have a small number of affordable homes built. Wherever possible these should be distributed throughout the village and not concentrated in one part of it. The way this question is worded makes this response difficult. I disagree to non-affordable, but agree to limited affordable homes.

Your View: Agree
Reason for comment:

Consultee ID: shilston
Part of document: Option 27b
Section of Document:
Your View: Agree
Reason for comment:
Yes, this sounds wonderful, but I do not see how it is consistent with some of the proposals for 'new settlements' - is this considered to be a less emotional term than 'new town' or 'massive housing estate'? Meanwhile any development of the A27 will blight this end of the Downs, which must surely be the area's greatest asset. As such, why has so little been included about the national park?

Far too much listed in this table to agree to blanket agreement

However and wherever the new homes are built, I would like to see them 'design-led', with architect involvement, as opposed to the common developer practice of using in-house 'technicians'.  

Page 1909 of 6217
Mr Godding

Part of document:  

Section of Document:  What Happens Next?

Reason for comment:
A glance at the Rest of Wealden landscape and an appreciation of the challenges facing the district indicates that Uckfield will be a key location in considering new housing provisions. I have lived there for 29 years. My views are as follows. If we are to maintain the character of the district, as I believe we should, a sustainable rural / urban balance will be essential. Support for local communities is best achieved by a balanced development pattern. It makes no sense to allow villages to become isolated dormitory areas and towns in high scenic locations [Heathfield and Crowborough] to stagnate whilst developing Uckfield to metropolis proportions in a dual culture district. Reasons to develop should be pursued in villages and AONB areas rather than excuses not to. Development in Uckfield, whilst inevitably significant, should employ criteria preserving the town’s best features and limiting urban coalescence. The refused proposal to locate housing on Downlands Farm [Area 14a] has given me cause to appraise the area in some detail. The fragility of extensive ancient woodlands, the severity of the housing footprint already felt on the north of the town, the intolerable pressure placed upon the conservation areas of Church Street and Upper High Street and the near impossibility of meaningful integration all mitigate toward the retention of Snatts Road as a development boundary. Many of the same limiting factors apply to Ringles Cross [Area 14b] especially if necessary growth takes place in Maresfield, Five Ash Down and Buxted, enabling the hamlets to become a resource for Uckfield rather than a burden upon it whilst maintaining a countryside gap between settlements. An imaginative town centre scheme [area 14g] was produced, at a recent ‘Vision for Uckfield Day.’ A new Uck overpass, provision for the sought after Lewes rail link and a people sized central square would open up the Bellbrook area for retail expansion with employment in Area 14h. This scheme or one of its kind would further enhance the already apparent opportunity to locate housing in area 14d and beyond. Here, in a Low Weald Character landscape there is scope for a mixed integrated community with the critical mass necessary to attract essential infrastructure provisions.
Sandy Cross Lane is a very narrow lane in which in places two cars can only pass with care, there are no pavements so people have to walk in the road, which is extremly dangerous, this is a major route for children going to school, we already have extra traffic from people using the lane as a rat run from work and school, and now Wealden propose to put in an extra 120 to 200 houses, this would make the lane into a death trap. This Lane is in a ANOB, area which we have always been assured by the Council is a protected area and would NEVER have development let alone 120 to 200 houses. There is also the flooding point to take into account, as with the heavy rain of the last few weeks, the fields absorb the water where as tarmac and cement do not. There was a problem with water after Green Lane was built, which involved extra cost of new drains to be put in, this could so easily happen again. With globel warming being on everybody's minds, these areas must be protected, from tarmac and cement, what affect would this sort of development have on the wildlife in the area, and I believe some of the fields have SSI's on them. Surely there are brown field sites within the town that could be used, and where are these people coming from for these houses, as there seem to be many houses on the market already, that cannot be sold, surely we do not need extra.

Sandy Cross Lane is a very narrow lane which may not be able to support additional traffic. Southern side has always been considered building limit on AONB.
Sandy Cross Lane is a very narrow lane in which in places two cars can only pass with care, there are no pavements so people have to walk in the road, which is extremely dangerous, this is a major route for children going to school, we already have extra traffic from people using the lane as a rat run, from work and school, and now Wealden propose to put in an extra 120 to 200 houses, this would make the lane into a death trap. This lane is in a AONB area, which we have always been assured by the Council, is a protected area, and would NEVER have development let alone 120-200 houses. There is also the flooding point to take into account, as with the heavy rain of the last few weeks, the fields absorb the water where as tarmac and cement do not. There was a problem with water in the lane after Green Lane was built which involved extra cost for new drains to be out in, this could easily happen again. With global warming being on everybody's minds, these area must be protected, from tarmac and cement. What affect would this sort of development have on the wildlife in the area? and I beleive some of the fields have SSI's on them. Surely there are brown field sites with in the town that could be used, and where are these people coming from for these houses, as there seem to be many houses on the market already that cannot be sold, do we really need extra.

Development would cause irrepaparable damage to a landscape acknowledged to be of very great ecologial importance and environmental sensitivity. It will result in the loss of ancient woodland, wetland habitats and the unacceptable disturbance of natural habitats of acknowledged nature conservation importance. The still existing strategic countryside gap between Uckfield and Maresfield would largely disappear and will threaten the same for both from Five Ash Down.

Criteria should include changes be modest, in keeping with the conservation of the area, provide low cost housing for local people, employment where possible, and not substantially increase traffic/road widening schemes.

Consultee ID: Mr Welch
106308

Part of document: □ document □ chapter □ section □ option
Option 6a

Section of Document:

Reason for comment:
Agree in principle, but feel the percentage should be viewed on a case-by-case basis. One risk is that, by developing an existing infrastructure, we create an 'urban sprawl' that gradually envelopes nearby villages anyway - Crowborough might be a potential example. Look at the growth of south London as a guide.
This document follows the ideas of Mr Prescott, and just as he has been abandoned by the Labour Government you should do the same with this plan. It is plain to see that the only people in joyous agreement are the developers, and landowners.

I do not consider it necessary to encroach into the ANOB’s around Heathfield or Crowborough. Once you start you will just keep eroding them away.

**Reason for comment:**
This area and 12d would increase the traffic chaos which already exists at rush hours when staff and pupils are trying to get to and from the Community College and the two Primary Schools. It should be remembered, I estimate, that upwards of 2000 pupils, plus staff, are trying to access these schools. The Community College is after all the largest employer in Heathfield. The roads, some no more than lanes are inadequate now without further development. The plan gives the impression of being all about houses! houses!, without telling where all the other extra buildings, such as schools, bus stations etc are going.

Part of document: Option 12d

Section of Document:

Your View
☐ Agree
☐ No opinion
☒ Disagree

Reason for comment:
These houses plus the ones at 12c would add considerably to the chaos which already exists at rush hours with staff and pupils trying to get to the Community College and the two Primary schools. Taking all three schools there are about 2000 pupils and staff. The college itself being the biggest employer in Heathfield. The houses would be built in an AONB at the source of the river Dudwell which a few miles on flows past Bateman's the home of Rudyard Kipling. It seems that AONB's are only for planners to stop 'Joe Bloggs' building a house, but when the Council want the land it suddenly becomes OK.

Consultee ID: MR BLAKE

Question 12h

Section of Document:

Your View  □  Agree  □  No opinion  ✔  Disagree

Reason for comment:
I believe it is wrong to upset so many people with sites for housing which are obviously not going to be used but will blight the value of their properties, and by nibbling away at the AONB's will set precedents for further erosions of the beautiful countryside around Heathfield.

Consultee ID: Mr McCloskey
Consultee ID: 106311
Agent ID:

Part of document: 
Option 18j

Section of Document:

Your View  □  Agree  □  No opinion  ✔  Disagree

Reason for comment:
Poor Road Infrastructure, to cope with a large population, with limited local employment opportunities, would result in high cost commuting and associated environmental impact. Greater "Carbon Footprint" than devloping brownfield sites. Farming decline will reverse with long term food inflation, due to increasing global wealth reallocating resources. We will need our farmland!
 Reason for comment:

I am totally AGAINST the prospect of receiving up to 2800 new homes in Halland which incidentally makes up 80% of the total 'Rest of Wealden'requirement of 3400 homes 2006-2026. I am not oposed to a modest sustainable growth year on year with a view to Low price housing for our younger people but this too must be ecologically balanced. There are other areas MUCH better for potential growth, Polegate ,,Buxted,Uckfield,Crowborough which have Stations,schools and infrastructure in place and BERWICK, there is huge potential here. My reasons AGAINST HALLAND proposals are :

ECOLOGICAL - Loss of small community. Destruction of fields and lanes, effect on wildlife including rare species ans our Right to Roam. The impact on out footprint to fuel these houses, the new roads needed to site them on and the huge amount of materials to build these houses and all the lorries bringing the stuff here via the overstretched A22. The prospect of 2800+ extra cars(remember Halland is a couple of miles from East Hoathly,over three miles to station,with virtually nil bus service (one every two hours).No sustainable employment in the vicinity(cars needed to get anywhere).

UTILITIES - HALLAND has....
1. No Mains Gas Supply. 2. Fragile Electricity supply and overhead cabling, powercuts are higher that average. 3. There are no near supplies of water or reservoirs and water is the most valuable commodity, 2800 extra bathrooms(+ the ensuites which are commonplace now in new housing) and gardens, washing machines etc. 4. Drainage and waste water system is antique and over capacity already. SERVICES- HALLAND has virtually none (and keeping mindful that East Hoathly is a couple of miles away along the busy A22.) We are not the same place. 1. No primary or secondary schools. 2. No Doctors or Dentists. 3. No Major Hospital within 15 miles (try getting to Eastbourne or Brighton Hospital quickly, it ain’t going to happen) 4. No shop or post office (other than a small garden centre selling vegetables and limited other produce and with very limited opening hours, but not before 8.30,not after 5.30 and not Sunday at all and also unlicensed) Today people need access to provisions outside these hours. 5. No Chemist 6. No bank or Building society. 7. No park,pavilion or proper recreation area 8. No public convenience. 9. No Library 10. No Rail Station-nearest over 3 miles and not going to Eastbourne/Brighton /Lewes or anywhere I wan to go to. 11. Narrow footpaths and in many places none at all.(no footpath/cycle paths to East Hoathly). 12. No streetlighting in most places. 13. No Waste Tip facility. 14. No recycling area. 15. In Halland I have never seen the Police patrol on foot or patrolling in cars (I do hear their sirens regularly rushing along the A22 and THROUGH the village ) 16. No centre, it is a hAMLET dissected by a busy A22. Why would you want to live here.....I will tell you ! because it has lovely country side and it has not lost it's rural feel, it is not a sprawling mass.THAT IS WHY IT IS SO IMPORTANT TO TRY AND KEEP IT THAT WAY. Finally, and possibly very importantly where are all these people going to work, there are few jobs round here , to work MOST will have to get in cars .THINK OF THE IMPACT ON THE GLOBAL FOOTPRINT........ I do appologise if there are any wrong facts, but this is as I believe.

**Question 32b**

**Reason for comment:**

Wealden DC obviously do not want the public to respond as it is virtually impossible to find the relevant parts online even for IT literate people which I am not.
Question 15g

Reason for comment:
The Hailsham, horsebridge and Hellingly area has a good domestic, commercial and Industry balance centred on Hailsham town and is an area, which has successfully absorbed a considerable degree of development in recent times whilst still keeping its country town environment. There is still considerable development to come in the area with the arrival of another supermarket chain etc. and the stage has been reached where the area needs to rest and take stock, before moving on, and I therefore consider that development in the area between Hailsham and Polegate, i feel this should be rejected for it is without doubt the beginning of a process, which will result in a cintiguous sprawl of development always stretching northwards from the cost with the associated detrimental effect on the environment and identity of the area in general and its residents.

Option 18c

Reason for comment:
Proposals for a minimum of 11,700 and a maximum of 19,200 new houses to be built in the Berwick, Wilmington, Arlington, Lower Dicker, Summer Hill and Hellingly areas are wholly inappropriate. -There is no local need -massive incursion of new inhabitants to a rural area will entirely destroy the existing fabric of the local community -Existing infrastructure is totally inadequate. Few local shops - new residents will be forced to use the roads to Lewes, Eastbourne or Hailsham -Existing inadequate road network (particularly the A27) -Water supplies are currently dangerously overstreched -New housing should take place on brownfield sites -New development on the massive scale proposed can only be absorbed in metropolitan areas Full details of comments can be found within the submitted letter.

Detrimental to character of local rural area and village; overburdening of local resources and infrastructure (particularly A27); too close to proposed National Park; any building on greenfield sites should be avoided.

Consultee ID: Mrs Roach
106320

Part of document: □ document □ chapter □ section □ option
Part 10

Section of Document: Details of How to Comment
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
I am in possession of your documents concerning housing development in Heathfield and surrounding villages. As a resident in Sandy Cross Lane, Heathfield, I am writing to say that the choice of this Lane on the south side for building 200 houses is totally unsuitable. The lane is narrow with no pavements or footpaths and it already dangerous for children walking to school and dog walkers. In places there is barely enough room for two cars to pass. If the traffic were to increase lives would be put at risk. Already, cars have been written off through people driving too fast in the Lane. Further more the access to Hailsham Road both from and into the lane is also dangerous. The land to the South is part of the area of Outstanding Natural Beauty which as I understand it, can not be made available for building. Hopefully, people at Wealden will see sense and realise that building under these circumstances is detrimental to the environment, residents and visitors to the area. Mrs S J Roach

Consultee ID: Healy
106322

Part of document: □ document □ chapter □ section □ option
Option 18a

Section of Document:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
Traffic problems - traffic has increased. Most of the village does not have pavements - too dangerous to walk through. Limited facilities. Full comments can be viewed within the sent letter.
Option 27b

Section of Document:

Reason for comment:
The reinstatement of a Lewes/Uckfield/Tunbridge Wells train service would bring considerable benefits to residents in Tandridge District with the prospect of enhanced services on the Uckfield Line and would provide an alternative mode of travel to car journeys using the A22, a route that passes through Tandridge District, and the A26. In view of the expansion of Uckfield over a number of years, the reinstatement of this train service is worthy of serious consideration.

Option 12e

Section of Document:

Reason for comment:
This is a very narrow lane which will not be able to cope with any significant increase in traffic.

Question One

Section of Document:

Reason for comment:
AONB should be protected from development otherwise they serve no purpose and gradually all our countryside will be ruined. New developments should be confined to areas that have already been urbanised.
Option 2a

Reason for comment:
Sources of renewable energy should only be used if appropriate. For instance, is siting a gigantic wind turbine in an AONB really worth the supposed benefits? There's too much knee-jerk reaction and political hype around this subject and not enough hard evidence.

Option 2b

Reason for comment:
Protecting Wealden's countryside from overdevelopment is a far more important consideration than setting targets for renewable energy.

Option 3a

Reason for comment:
Incentives should be offered to encourage businesses to utilise areas such as unused agricultural buildings. It brings employment to rural areas and preserves the look and feel of the countryside. This may take time but ultimately it will benefit the region. This land should not be used for housing developments - it is too remote with no suitable infrastructure.
Consultee ID: 106325  

Option 3d

Section of Document:

Reason for comment:

Any new housing development should be matched by opportunities for employment, otherwise it puts further peak time pressure on overcrowded roads and public transport.

Consultee ID: 106325

Option 5a

Reason for comment:

A settlement boundary for a village was put in place for a good reason. If the boundary can be moved at any time then it renders it meaningless.

Consultee ID: 106325

Option 5b

Reason for comment:

A settlement boundary is there to protect the village from overdevelopment. If it can be ignored then it is meaningless, however strict the criteria. Once it is breached it is open to subjective opinion on what is supposedly strictly necessary development.
Village boundaries must be maintained. The need for affordable housing is being used too often to destroy beautiful countryside. In reality, often only a tiny fraction of the development is affordable, the rest equals yet more big profits for developers and investors.

Additional housing will have less of an impact on towns than on smaller villages, so a higher proportion of development should be focused on towns. Money should then be invested on improving facilities/transport etc in the towns to cope with additional demand for services.

This seems a very arbitrary classification.
Consulttee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option

Option 7c
Section of Document:
Your View ✓ Agree □ No opinion □ Disagree
Reason for comment:

Consulttee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option

Option 7d
Section of Document:
Your View ✓ Agree □ No opinion □ Disagree
Reason for comment:
Too many villages have lost all their shops and amenities are now purely housing settlements. The vast profits to be made from changing shops and pubs into houses has been absolutely to the detriment of villages. For many it is already too late but those that remain should be protected.

Consulttee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option

Option 8c
Section of Document:
Your View ✓ Agree □ No opinion □ Disagree
Reason for comment:
This approach would seem to give both towns potential opportunities for economic growth and manage the potential upheaval of focusing all development on just one town. It is also far preferable to too much development in villages and rural areas, where there are far fewer positives to additional development.

Consulttee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option

Question Ten
Section of Document: Site Allocation Thresholds
Your View □ Agree □ No opinion ✓ Disagree
Reason for comment:
Smaller pockets of development may be far more suitable for villages and have far less of an impact. It it wrong to prioritise additional administration ahead of the impact on villages and their residents.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option
Option 16g

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Polegate town centre and station has a huge amount of potential for improvement and could offer far more than it does currently. The station is in urgent need of a car park. If there were better shops and a smarter centre it would attract shoppers from surrounding villages and bring in new businesses.

Consultee ID: Stelling
106325

Part of document: □ document □ chapter □ section ✓ option
Option 18e

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Consultee ID: Stelling
106325

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18i

Section of Document:

Your View ☑ Disagree

Reason for comment:
This proposed development is too close to the South Downs and important landmarks such as the Long Man. It would have far too much of a detrimental impact on the surrounding landscape and add to the traffic problems on the A27.

Consultee ID: Stelling
106325

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18j

Section of Document:

Your View ☑ Disagree

Reason for comment:
This proposed development is far too large for such a tiny settlement in a rural area on the edge of the South Downs. It would have an enormous detrimental impact on the surrounding area – which includes some of the gems of the South Downs, such as the Long Man and Alfriston that are enjoyed by local people and tourists alike. It would destroy a lovely stretch of countryside including Arlington Reservoir and be clearly visible for miles around. This area is on the edge of the proposed South Downs National Park – it is absolutely unsuitable for such large scale development. Income from tourism is important to this area and it cannot fail to detract from the area’s natural beauty. From a logistical perspective, 7,000 new houses could amount to 10,000 + additional cars on narrow country lanes and an already congested A27. The station is tiny with an infrequent service and extremely limited parking. Given these restrictions it is impossible to see how sufficient improvements to infrastructure could cope with the increased demand and volume. Historically, promises to improve transport and infrastructure rarely materialise. The reality is more likely to be a vast, sprawling housing estate. Berwick is totally unsuitable for development of this size and should be removed from consideration. Creating new towns has rarely been successful throughout the country and is not suitable for a rural area. Numerous smaller scale developments throughout the region would have far less of a detrimental impact.
Reason for comment:
I do not believe that creating a new town is the right solution for a rural area, much of which is designated an area of outstanding natural beauty. Whilst I strongly disagree that either Berwick or Wilmington Green are suitable sites, due to their proximity to the South Downs, it is hard to see how any of the proposed sites can be seen as any more suitable. New towns do not work - they end up as unpopular soul-less settlements with poor infrastructures - this has been seen many times before across the country. Developers build houses to make a profit and promises regarding transport, infrastructures, shops, businesses etc are often delayed or ignored. What is left is a vast housing estate where families have to rely solely on car use to get to work, schools, go shopping etc. This is totally unsuitable for an area that already has poor roads and public transport. The concern over objections bogging down numerous smaller development proposals does not warrant the building of a new town and smacks of laziness on Wealden's part. This is not a good enough reason to destroy a chunk of countryside and exacerbate existing traffic and transport problems.

Reason for comment:
Public transport is quite poor in this region and at peak hours is stretched to capacity. Just because it exists it doesn't mean it can cope with increased demand.

Reason for comment:
More family homes should be built for families on low incomes. Smaller units are often designed for developer's profits rather than the population's needs.
The percentage of affordable housing should be far higher than 40% If this is the greatest need, and it is constantly sited as such, then more affordable units should be built in areas that can absorb the increased population.

This doesn't make sense. Larger developments of affordable housing should be sited within easy access to shops and other facilities therefore reducing the need for families on low incomes to have to run one or more cars.

If villages in rural areas have a development boundary in place, there should be no exceptions made or it is rendered pointless and open to overdevelopment.

**Reason for comment:**

Dualling the A27 would have a terrible impact on the South Downs and spoil the rural feel of the area. It would also encourage faster driving speeds and rather than reduce accidents is quite likely to increase them. As has been shown in other areas, adding lanes to busy roads does not reduce congestion - the new lane soon fills up with new cars and it's back to square one.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Stelling  Agent ID:
106325

Part of document: □ document  □ chapter  □ section  ☑ option
Question 31a

Section of Document:

Your View   □ Agree   □ No opinion   ☑ Disagree

Reason for comment:
There are many areas of this document that are well reasoned and positive, in particular plans to regenerate the towns of Polegate and Hailsham. However, I fundamentally disagree with proposals to create a new town in a rural area, in particular Berwick and Wilmington Green. This proposal is ill-conceived and would have disastrous consequences on the area. Developments in rural areas should be of a small-scale, whatever the impact on administrative procedures.

Consultee ID: Stelling  Agent ID:
106325

Part of document: □ document  □ chapter  □ section  ☑ option
Question 32a

Section of Document:

Your View   □ Agree   □ No opinion   ☑ Disagree

Reason for comment:
I fundamentally disagree with all proposals to create a new town in a rural area such as Berwick or Wilmington Green. Any proposals that damage the beauty of the South Downs should not be considered - their negative impact far outweighs any benefits and dressing up such proposals by calling them ecotowns is rather misleading. There is very little ecological value in concreting over beautiful countryside bordering a potential national park.
I do not agree with the creation of a new town in Berwick. Although I understand that additional affordable housing is required in this area, it makes far more sense to develop existing towns such as Polegate or Hailsham. This would provide an opportunity to improve the facilities and infrastructure, such as schools, transport and shopping, of these towns, something that would benefit existing and new residents and provide a welcome boost to the local economy. New towns throughout the country have rarely been successful and are more often that not soulless, undesirable places to live. Residents invariably have to rely on cars to get anywhere as it can be years before public transport gears up to meet the needs of the new town, indeed, if ever. Surely it would be better to improve existing public transport in existing towns rather than starting from scratch? In the case of Berwick, narrow country lanes would be inundated with excess traffic, the train station is tiny with an infrequent services and extremely limited parking and the A27 is already overloaded. If this truly is affordable housing, surely it would be better to build somewhere where families do not need the additional expense of running one, even two, cars? Indeed, building a new town in the countryside seems to be entirely at odds with environmental goals. 7,000 houses in Berwick could equate to 10,000 + more cars on the road. Then there’s the permanent loss of a beautiful swathe of countryside bordering an AONB and proposed national park. Losing yet more open countryside is a loss for everyone, not just the people lucky enough to live there. A development the size of a new town will have an extremely large impact on the surrounding area. It seems ill-judged and unnecessary for this to be the case when an equal number of new homes could be spread between existing towns, and even some suitable villages. It smacks of laziness on the part of Weaden council to consider building a new town in Berwick. There’s no doubt it would be an effective way to tick off a big chunk of their new housing obligations in one swoop, but I do not agree it is the right way.

A small amount of development could take place, as long as it is in keeping with the environment and area.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
The statement 'some development' is too loose to be sensible. AONB must be protected and if it is a valuable resource should be protected as such. There may however be justification for development of existing buildings and in 'brownfield' within AONB areas where settlements already occur, overall however the footprint of such development should not be extended further into the AONB.
Consultee ID: Mrs Moore
Agent ID:
106332 individual

Part of document: Option 2a
Section of Document:

Your View  ✔ Agree  ❑ No opinion  ❑ Disagree

Reason for comment:
New development should generate at least 10% of its energy needs - as this is obtainable in places such as the London Borough of Merton and is now in national planning policy documents I am surprised that 10% is even a question for debate. It can be fairly easily achieved through simple measures like solar water heating which are significantly cheaper to install at build time than as retrofit.

Consultee ID: Mrs Moore
Agent ID:
106332 individual

Part of document: Option 2b
Section of Document:

Your View  ✔ Agree  ❑ No opinion  ❑ Disagree

Reason for comment:
With domestic oil reserves pretty much exhausted, gas not far behind and the prospect of increasing fossil fuel prices we should seek to free ourselves from the mercy of international fossil fuel producers and be generating more in the UK and particularly in an area such as Wealden. This is particularly true as Wealden and the South East in general tend to be further away from even the traditional sources of power generation and therefore significant generation losses are incurred in bringing the power to us. Much better to have some form of local generation - both as part of new housing development and also within its own right. I personally think a wind turbine less intrusive than a mobile mast and potentially considerably more useful in the long run.
specifically re 3.5 - how can rural landscape support itself. I think rural power generation may be one way whether by biomass growth - particularly sustainable wood based industries, or by siting of alternative power sources. Maybe Wealden farmers could generate income by generating power if done in a sensitive way with good community consultation. I also think that equestrian development though providing income in the shorter term, does degrade the landscape and land over time and I would be interested in any guidance that the core strategy can give in this area?

Option 3b

absolutely, otherwise you create more traffic congestion and less sustainable areas overall
Consultee ID: Mrs Moore 106332 individual

Part of document: □ document □ chapter □ section ☑ option

Option 6a

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
But it seems somewhat arbitrary whether it is 70 or 80%? In some villages some growth may be necessary to keep a critical mass of local services such as school and shops so it seems hard to apply a rule in every case though I'm sure across the district as a whole it can be made to work appropriately.

Consultee ID: Mrs Moore 106332 individual

Part of document: □ document □ chapter □ section ☑ option

Option 5a

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Changing the boundaries with consultation and support of local community is necessary if more affordable housing is to be built in our villages. I think we should go for sympathetic high density though as much as possible to ensure that as much true countryside as possible can be maintained. For instance bigger houses built subdivided into flats rather than something that instantly 'looks' like flats and thus not in keeping with village character.

Consultee ID: Mrs Moore 106332 individual

Part of document: □ document □ chapter □ section ☑ option

Option 5b

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
I would prefer to see extension of the settlement boundaries, even if these were just 'small pockets' around existing hamlets, then it becomes clear what the rules of the game are. Otherwise I see no point in development boundaries as the whole thing becomes totally subjective in any case.
Reason for comment:
It is sensible to develop some classification however I'm not sure how much it will help as so much
must be site specific according to any new proposals. The link to how this feeds through to housing
allocations is not clear to me.

Reason for comment:
Forest Row has been classified as a village with 'growth potential' which is reasonable according to its
accessibility and services but not according to its geography and current traffic load particularly in
view of likely new houses in neighbouring East Grinstead. Again this seems too crude unless
considering specific proposals that a community can then debate - there is a huge difference between
4, 40 and 400 houses.

Reason for comment:
Agree with comment 525 from High Weald AONB representative
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 106332  
Mrs Moore individual

Part of document: Option 7d

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Agree in principle but is it workable? what if no one wants to take it on? How long would such a restriction remain and would empty premises cause more of a negative impact? It would certainly be good to seek to maintain and to publicise this as then community groups may come forward to undertake the service as I understand has happened in a number of rural communities when people saw services under threat.

Consultee ID: 106332  
Mrs Moore individual

Part of document: Question 7e

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☐ Disagree  ☑ Disagree

Reason for comment:
Overall this seems quite crude and I'm not sure that what it means for a large village such as Forest Row is sufficiently clear.

Consultee ID: 106332  
Mrs Moore individual

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
The question is imprecise and does not make any consideration of whether successive applications of say 14 houses on the edge of villages would trip the same considerations and criteria. If you must put any number onto villages it should be 5 or 6 and there should be some statement as to the interrelation between cumulative new proposals overall house numbers in proportion to existing village housing.
Option 11c

Reason for comment:
This area seems to have good access

Option 19a

Reason for comment:
Forest Row is a tricky one as there is an acute need for affordable small home units in the village, it has the services to support them and is a highly desirable area. However as a village there appears to be little space where the current development boundary can be extended, with flood plain, Ashdown Forest and AONB surrounding the village, traffic is already very problematic and under further threat from significant expansion of housing in East Grinstead. So what to do? The overall housing numbers feel too high unless someone can be very creative with the kind of development that they propose. I think Forest Row would be a good place for the kind of development more often seen in cities with high densities obtained and more communally managed land/absense of lots of drives and individual garages as it is a village that is very liveable without a car. Visionary new developments that managed to architecturally fit in a number of dwellings into one unit in keeping with village character (there are many examples of subdivided older houses which could be mimiked), with creative use of space perhaps including car clubs on site rather than facilities for individual car ownership should be sought rather than the typical host of separate dwellings along 'traditional' lines.

Question 19f

Reason for comment:
As with the comment from the High Weald AONB it is not clear why these proposed numbers are made and how they may benefit the area itself rather than helping overall meeting of targets across the district of centrally forced housing numbers.
Option 25b

Reason for comment:
Your View ☑ Agree ☐ No opinion ☐ Disagree

Consultee ID: Mrs Moore 106332 individual

Section of Document:
Agent ID:

Consultee ID: Mrs Moore 106332 individual

Part of document: Option 24a

Reason for comment:
If the South East has to build more houses in an already overcrowded area it must increase its densities otherwise there will soon only be houses with tiny gardens (or possibly just large expanses of decking) and no countryside to speak of. Higher density figures will challenge developers to be more creative and sympathetic rather than rolling out the same old things that they typically propose.

Consultee ID: Mrs Moore 106332 individual

Part of document: Option 24c

Reason for comment:
Agree with comments 4391 and 4449. Higher densities can be achieved if developers seek to make them attractive and we have surely learned lessons from bad, cheap blocks of flats in the '60s. Repeat my previous comment under 24a - if the South East has to accomodate increasing new housing in an already overcrowded area we are better to seek properly designed 'dense' areas with communal space, rather than lots of small house units crammed together with tiny gardens.

Reason for comment:  
I think this is a good target. Social housing should no longer be seen as some lesser, disadvantaged cousin and there must be a real campaign around this in the Wealden area. Getting on the housing ladder appears to be practically impossible for anyone who doesn't work in the city or have someone to help them out. Properly thought out social housing merely helps to redress the balance of who has access to capital and who hasn't be they teachers, nurses or local shop workers.

Challenge is to have acceptance in local community and proper consultation.

Consultee ID: Mrs Moore
Part of document: Option 27a
Section of Document:
Reason for comment:
Though this seems desirable the development should only be there if there are other more compelling reasons to put it there. Also, if this is really to be an aim then the type of development permitted should be that which will tend to use buses..... With changing work/leisure/shopping patterns I think it is trite to have development follow bus routes.

Consultee ID: Mrs Moore
Part of document: Option 27b
Section of Document:
Reason for comment:
Have put agree though think issue is very complex. Environmentally I believe good bus routes are a much better, less capital intensive option but we appear to be much more reluctant to use them than trains. 'Frequent rider' routes such as the Oxford - London 'tube' show that when a good enough service is offered (and the economics works out with ticket prices and parking considerations) then people do switch modes to buses. Whether this can be created in Wealden - I don't know!

Consultee ID: Mrs Moore 106332 individual
Part of document: ☑️ option Question 31a
Section of Document:
Your View ☑️ Agree ☐ No opinion ☐ Disagree
Reason for comment:
It all sounds great though there is significant tension between many facets of it - preserve landscape and character but also promote economic development, necessary home building and improve transport links. The examples of York and Norfolk etc are more specific whereas Wealden complicates by its diversity. However diversity is very sustainable so the more if we can maintain and promote the better. I’m sure it can be done well but the vision and the priorities of competing objectives need to be very clearly understood - ideally also by a wider group of Wealden residents...
Reason for comment:

Agree/ Disagree not applicable. It is interesting that here we finally get people frustrated at the whole consultation process. My gripe (and I am within the 18 - 49 age group) is exactly that it has not been made immediately accessible to many and it has taken significant time to respond properly - I estimate at least 2-4 hours at my computer to do a 1/2 decent response and that is with a local ‘roadshow’ organised by our district councillors and my own significant prior knowledge having been a councillor for the past 4 years. As the person with comment 4348 stated, it may have profound implications on our lives and environment but most people are happily ignorant of its existance or find it all just too hard (understandably) to get to grips with. Here is the real challenge of the local framework, getting to the complexity required but also allowing it to be accessible to more people - and somehow to get the media more involved with promoting it... The East Grinstead Courier runs a 'beautiful baby' competition annually - it gets a huge number of voters for a completely fatuous thing of no real merit to anybody. It is a great frustration that the media cannot be better involved at getting people's views on these kinds of issues.

Reason for comment:

I too am overwhelmed by the breadth of the 14 different objectives but broadly agree I think. Am pleased to see SO14 but also wonder what this really means and whether the implications and requirements of this are much understood. I also wonder whether the fact that SO14 is buried so near the end of the document and at the end of this list of objectives is a sad indicator of the value and concern levels around climate change. I suggest that Peak Oil as a concept also be taken into consideration in the development of this framework and wonder how such consideration might shift its focus.
Any development within the AONB should be on brownfield sites within existing towns and villages, and should be on a small scale e.g. no more than 10-15 houses. Examples such as the small development at Horam where they knocked down the old house.

As long as developers don’t add the cost of installing renewable energy provisions to the cost of their houses.

Part of document: [ ] document [ ] chapter [ ] section [x] option

Section of Document: Question 5c

Your View [ ] Agree [ ] No opinion [x] Disagree

Reason for comment:
Where you allow expansion of towns and villages outside the settlement area, they just get larger and larger until they join up. There is no stopping point. I live on the outside of Heathfield and enjoy my "countryside" setting. I would be very upset if I ended up in the middle of the town. If you do develop around the outside of the town, you alter the demographic of the area, you affect the value of people’s property and you fundamentally change the fabric of the area - a very beautiful area.

Consultee ID: Mrs Thain

Part of document: [ ] document [ ] chapter [ ] section [x] option

Section of Document: Option 9c

Your View [ ] Agree [ ] No opinion [x] Disagree

Reason for comment:
We moved from West Sussex and chose Heathfield because it was in the AONB and we were given to understand that there would be no expansion or large scale development within the town. To grow the town on this level would alter it considerably and put a great deal of strain on the roads, doctors' surgeries and schools. We might as well have stayed in West Sussex, which has little character left at all.

Consultee ID: Mrs Thain

Part of document: [ ] document [ ] chapter [ ] section [x] option

Section of Document: Option 12c

Your View [x] Agree [ ] No opinion [ ] Disagree

Reason for comment:
The roads here can support the building works vehicles and the increased traffic from new residents, and the town is easily accessible. The area around the market and the units and garage nearby is ugly and could be better used. I was very interested to read the comment from user name 4220 as his proposal for houses in a vernacular style was refreshing. Most developers seem determined to build boxes tightly packed together which spoil the character of an area.
### Option 12a

- [ ] section  
- [x] option

**Section of Document:**
- Option 12d

**Your View**  
- [x] Agree  
- [ ] No opinion  
- [ ] Disagree

**Reason for comment:**
The point in the document about more houses along the road line at Cade Street makes sense, as long as it was on a small scale, but you would need to consider that the road is lethal and would need calming, and that you are in the AONB. I am opposed to any development that makes Heathfield look like any other town with the bog-standard developers' boxes though.
Absolutely not! Sandy Cross is accessed by a small, narrow lane, that can not handle the load of lorries that development would bring, and would not handle the additional traffic of new inhabitants. You would have to widen the road by taking people's gardens and I would be extremely unhappy if you took mine. Our house has views across fields all the way to the coast at Pevensey. You can not hear traffic. This would be lost and Wealden's supposed care for maintaining the character of the local environment would be proved to be false. The additional traffic that would go through Old Heathfield would also spoil that little hamlet and Heathfield Park. The primary school there could not take the additional children. The access to the town is poor. We are in the AONB. To alter the fabric of this area would detrimentally affect the value of my home. Sandy Cross is attractive, with older style houses and green space. There are many footpaths around the area that are regularly used by a number of people. To add new houses would alter the demographic of the area too - I moved here to create a safe and quiet place to bring my children up and I do not want to be surrounded by housing estates. Many residents of Sandy Cross seem to feel as we do: I am prepared to oppose this for as long as it takes, in any way necessary, and I am sure I am not the only one.

General Comments: Agree reluctantly: Since I have only lived in Lower Willingdon for 9 months and do not have a car, I do not feel I am qualified to pass an opinion on many of the questions shown here. However, generally I would hate to see the local countryside spoilt by much development. Small groups of houses and flats should be allowed in or near towns and smaller groups centered round some villages. New building should be mainly 'affordable' housing.

Option 14e

Section of Document:

Your View ☑️ Agree ☐ No opinion ☑️ Disagree

Reason for comment:
Mass concentration of housing and its associated infrastructure (shops, schools, workplaces roads etc) is not desirable in any area for rural Sussex particularly Isfield where there is no existing infrastructure to build upon. Concentration of housing means congestion on the existing road system which is already creaking at the seams.

Section of Document:

Reason for comment:

One focus of the railway re-instatement is not to service the local community but to try to relieve the pressures on the Brighton to London line. Will people from the Hastings line, Brighton or Lewes want to catch a train to London via Uckfield if it takes up to 30 minutes longer? (It may not even stop at the new stations or existing stations up to East Croydon, to reduce travel time). The idea of jumping on a train to go shopping is Brighton is appealing, but carrying all the shopping home is not, therefore the car is the only option.- That is why the mass of people in Sussex do not use the existing bus service therefore would not use the train.

Question Thirty

Section of Document: Infrastructure Requirements

Reason for comment:

To many projects listed
In order to adequately meet the various challenges of runaway climate change, it is vital that as much energy as possible is generated from renewable sources, with their minimal carbon footprints. New domestic and commercial developments in Wealden should meet a requirement of at least 20% of energy being renewably generated, with immediate effect, and this target should be reviewed upward after 3 years.

I also request that new domestic housing should be built to a minimum standard of 3 star as defined by the Code for Sustainable Homes, with immediate effect and that this standard too be raised by one star grade each year to reach a target of the maximum 6 star rating by 2012.

The current system whereby only developments of over 15 units are required to deliver 30% affordable housing means that developers plan to avoid this requirement. The threshold should be set much lower eg at 3 or more units.
Reason for comment:
I believe that a housing density of at least 35 units per hectare is needed in order to make the most efficient use of natural and other resources, and to control affordability, especially for those that already live in the area.

### Option 14d

**Part of document:**
- ☐ document
- ☐ chapter
- ☐ section
- ✓ option

**Section of Document:**

**Your View:**
- ✓ Agree
- ☐ No opinion
- ☐ Disagree

**Reason for comment:**
Downlands Farm forms no part of the current Wealden Plan, rightly so, because it falls outside the natural landscape boundary of North West Uckfield, the tree-lined ridge that follows Snatts Road. Development beyond this line would be visible from 2 AONBs, particularly the High Weald AONB. It would be very visible from Maresfield. We should preserve for future generations the precious landscape and ecology of the area. Any development would cause irreversible environmental damage. The area has all the characteristics of the High Weald, and should be afforded appropriate protection. It also contains significant ancient woodland, woodland ghylls, very diverse and much rare flora and fauna, lowland heath, ancient common and unimproved grassland. Development in this area would cause unsustainable progressive biodiversity and habitat degradation of adjacent Woodland Trust reserves [namely Lake Wood SNCI and Views Wood], Buxted Park SSSI, and other local Wealden Sites of Nature Conservation Importance: West Park LNR, Butcher’s Wood, Budletts Common Rocks and Uckfield Cemetery. The small market town character of Uckfield would change irreparably with a large bolt on development on Downlands Farm, whose character and position is incompatible with sustainable development principles. It has no logical connection to Uckfield, and the only possible access to the area is from the by-pass; the by-pass would then become an integral part of the town’s internal road network. Development of this site would erode the strategic countryside gap which separates Maresfield and Five Ash Down from Uckfield, thus coalescing those villages into an urban sprawl. There would be potentially highly significant noise and light pollution and a heavy CO2 footprint. The steep slopes of the site would pose flash flood dangers and potential additional flooding and pollution to the Shortbridge Stream, which has a very high EU purity designation. Downlands Farm development would result in considerable in- and out-commuting. Our local and wider villages and roads, and the Ashdown Forest, already suffer detrimental and heavy rat run and through traffic. Uckfield would suffer an enormously increased burden on its creaking infrastructure from a 25% increase [sites in the Wealden Plan, plus Downlands] in population. The town is already severely congested, and has little potential for expansion because of its topography: it sits in a natural bowl, hiding it from the adjoining High Weald and South Downs Areas of Outstanding Natural Beauty, has a river running through its centre, and just one narrow road connecting its north and south communities. We should make every effort to support good planning principles, first exhausting every brownfield site before even considering building on a greenfield site. If then a greenfield development is considered necessary, sites of a far lesser ecological and landscape quality than Downlands Farm should be developed. Downlands Farm should be placed in the hands of professional conservationists and preserved as a perpetual asset to the community. “5th December 2000 Wealden Local Plan Review concluded that any outward expansion of development on the north western edge of the town, largely comprising land at Downlands Farm and Budletts Common would cause unacceptable damage to the visual quality, continuity and rural character of the surrounding countryside….. Further consideration was given by the council in 2002 a detailed reappraisal of the land on the north-western edge of the town was carried out in order to assess its potential to accommodate major housing growth, but this reappraisal confirmed the councils earlier findings in terms of landscape impact, as well as identifying significant concerns in education and transport issues. 15th December 2003 a further planning review and 91 objections were received.” Nothing in the landscape or habitats has changed; nor should it.
Option 14b

Section of Document:

Reason for comment:

The three sites around Ringles Cross form no part of the current Wealden Plan, rightly so, because they fall outside the natural landscape boundary of North West Uckfield, the tree-lined ridge that follows Snatts Road. Development of these sites would erode the strategic countryside gap which separates Maresfield, Buxted and Five Ash Down from Uckfield, thus coalescing those villages into an urban sprawl. Development on Budletts Common would be an unjustified intrusion into a quiet, unspoilt rural area and would cause the direct loss of valuable ecological habitats supporting . There is significant ancient woodland, very diverse and much rare flora and fauna, lowland heath, ancient common, wetland, unimproved acid grassland, and lower Cretaceous sandstone outcrops, and any development would cause irreversible environmental damage. Development in this area would also cause unsustainable progressive biodiversity and habitat degradation of adjacent Woodland Trust reserves [namely Lake Wood SNCI and Views Wood], Buxted Park SSSI, and other local Wealden Sites of Nature Conservation Importance : West Park LNR, Butcher’s Wood, Budletts Common Rocks and Uckfield Cemetery. Budletts Common has two potentially important medieval earthworks which should be protected. The small market town character of Uckfield would change irreparably with a large bolt on development on Budletts Common, whose character and position is incompatible with sustainable development principles. It is not contiguous with any previous development, and access on to London Road is extremely dangerous. There would be potentially highly significant noise and light pollution and a heavy CO2 footprint. The hydrology of this site is too complex and sensitive to sustain the imposition of housing and industrial activity. There are many springs on Budletts Common (“budlett” means “spring”) and the Common contains a network of ditches, streams and drains which take the spring water to the Shortbridge Stream. Because of the existence of springs, the water table is generally relatively high, and recent heavy rain (20 July 2007) caused flash flooding which would be exacerbated by covering the Common with roads, buildings and hard standings on sloping ground. The natural drainage infrastructure would be severely compromised. Budletts Common development would result in considerable in- and out-commuting. Our local and wider villages and roads, and the Ashdown Forest, already suffer detrimental and heavy rat run and through traffic. Uckfield would suffer an enormously increased burden on its creaking infrastructure from a substantial increase in population. The town is already severely congested, and has little potential for expansion because of its topography: it sits in a natural bowl, hiding it from the adjoining High Weald and South Downs Areas of Outstanding Natural Beauty, has a river running through its centre, and just one narrow road connecting its north and south communities. We should make every effort to support good planning principles, first exhausting every brownfield site before even considering building on a greenfield site. If then a greenfield development is considered necessary, sites of a far lesser ecological and environmental quality than Budletts Common should be developed. “5th December 2000 Wealden Local Plan Review concluded that any outward expansion of development on the north western edge of the town, largely comprising land at Downlands Farm and Budletts Common would cause unacceptable damage to the visual quality, continuity and rural character of the surrounding countryside….. Further consideration was given by the council in 2002 a detailed reappraisal of the land on the north-western edge of the town was carried out in order to assess its potential to accommodate major housing growth, but this reappraisal confirmed the councils earlier findings in terms of landscape impact, as well as identifying significant concerns in education and transport issues. 15th December 2003 a further planning review and 91 objections were received.” Nothing in the rural landscape or ecological habitats of Budletts Common has changed; nor should it.

**Question 16j**

**Section of Document:**

**Your View**  ☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

Polegate could be considered for the establishment of a new eco-settlement to regenerate the area. Its strategic proximity to road and rail infrastructure is ideal, and it would benefit from a necessary upgrading of those facilities. The countryside is the least valuable of the Wealden district.

Question Twenty Nine

Housing Delivery

Agree

Reason for comment:

Mrs Wallis

Settlements in the High Weald Area of Outstanding Natural Beauty

Disagree

Reason for comment:

If you start to build on AONB, it will never stop. These areas are for the local people to appreciate, nature and wildlife, not for housing projects.

Mrs Wallis

Option 2a

Agree

Reason for comment:

If it can be kept affordable, then it the direction new housing must go towards

Mrs Wallis

Option 2b

Agree

Reason for comment:

We have to make every effort to make our lifestyles as sustainable as possible. We cannot continue to drain resources at the current rate, so if it’s possible, and affordable, then why not!
Option 9c
Section of Document:
Reason for comment:
If you want to develop AONB around Heathfield, you will have a fight on your hands. Local people here actively use the area and to spoil it by building will be at the detriment of our lifestyles, let alone the damage caused to the extensive amount of local wildlife which has been squeezed into smaller and smaller areas already. It would be a tragedy.

Option 12e
Section of Document:
Reason for comment:
This area is totally unsuitable and I can’t believe it has even been considered. The lane is far too narrow for any increase in traffic, there are no pavements and parts of it where two cars cannot pass without one having to stop. It is well used by locals and dog walkers. Added to the fact the area is AONB and this should never be built on. We have a duty to protect these areas and the wildlife that they sustain. The value of my house would be significantly reduced as the wonderful view would be ruined by 100’s of new roofs and the peace that we are used to would be shattered. I would join any group formed to oppose this option and will fight tooth and nail to stop any development in this area. Why should the lifestyle of myself and my neighbours be compromised like this. If brownfield sites cannot be found, then new housing cannot be developed. ANOB’s MUST be protected for all our sakes and our sanity.

Consultee ID: Mr Buttle
Agent ID: 106345
Millwood Designer Homes
Part of document: option

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Agree
Reason for comment:
There should not be a presumption against new development in the AONB. If appropriate, suitably located, sensitively designed and sustainable, new development can have a positive benefit on the rural locations without compromising the sensitive designation.

Consultee ID: Mr Buttle
Agent ID: 106345
Millwood Designer Homes
Part of document: option

Section of Document: Option 3c

Your View: Agree
Reason for comment:
Debate and guidance in respect of renewable energy sources should be led by Central Government and not Local Planning Authorities, making ad hoc policy arrangements. This whole issue should be addressed under the remit of Building Regulations and should not be a bolt on to the Planning System. Where appropriate, new development should strive to achieve at least 10% of its energy generation from renewable energy sources. Although voluntary currently, developers are being required through the Code for Sustainable Homes to implement a step change in sustainable house building practice and deliver properties that will be energy efficient and ultimately carbon neutral. This Company has already adopted a positive approach to this issue and aims to act responsibly, to bring about more energy efficient dwellings which incorporate the use of renewable energy options.

If it is appropriate and cost effective (particularly to purchasers), higher renewable energy levels should be the objective and if circumstances are suitable to allow for such design features, then this aim is supported in principle. It will however depend upon a number of factors, including market demand and public perception and should therefore not be applied generically as this could act as a barrier to development and hence result in economic and social disbenefit to communities and settlements.

Strongly agree with an emphasis on residential development

**Option 3b**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

Agree, provided that they are suitable for future employment use and flexible enough to adapt to changes in market demand, without having a detrimental impact on surrounding uses. If they are not appropriate, poorly located or fit for purpose, then alternative sites should be identified and sites redeveloped for other uses (e.g., residential/mixed use/retail).

**Option 3d**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

Housing should be developed in suitable locations which offer a range of community facilities with good access to jobs, key services and infrastructure. This should be achieved by making efficient use of the land and that the priority for development should be previously developed land. Local employment opportunities should be promoted through the allocation of suitable employment land to achieve the economic and social objectives of the District.

- [ ] chapter
- [ ] section
- [x] option

**Option 5a**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

Settlement boundaries should be regularly reviewed and appraised to take account of the need for growth in line with government guidance and the emerging Regional Spatial Strategy for the South East. Whilst the priority remains the reuse of previously developed land, there may be overriding constraints to development or un-implementable consents, which requires new allocations to be made, some of which may be out with existing settlement boundaries. Restricting or constraining development has significant implications on the vitality, social and economic well-being of communities and in the current circumstances where housing numbers are required to increase annually, it is necessary for all settlements to contribute to the delivery of dwellings, offering choice and variation to the market.
Option 5b

Section of Document:

Reason for comment:
In certain circumstances, small scale development outwith settlement boundaries is appropriate eg reuse of brownfield sites, agricultural buildings, enabling development etc. In these situations, this approach can be justified, but should be sensitive to the location and setting, be accessible and be of high quality design. If larger previously developed land/sites in rural areas become available for redevelopment purposes, a pragmatic approach should be adopted by the LPA.

Option 6a

Section of Document:

Reason for comment:
This representation relates to Questions 6a - d inclusive. Existing settlements should remain the focus of development as they offer the greatest range of services and facilities, thereby are the most sustainable locations. However, villages are also an important resource and should not be ignored when future development requirements are considered. Development in villages should not be precluded simply because of location, as new development in such locations can be sustainably justified and will have a positive impact upon the social and economic objectives of the locality, supporting village services and facilities through the introduction of new residents. Flexibility is required in the choice of development locations and planning policy must reflect this in terms of changing work and lifestyle patterns. Whilst the principle of focusing development on urban areas is accepted, a generic policy which adheres strictly to a specified urban/rural split for planned growth is not implementable for many reasons.

Option 7a

Section of Document:

Reason for comment:
Agree with the caveat that circumstances may change and additional development may arise, therefore policies must have flexibility to adapt to change.

106345 Millwood Designer Homes

Part of document: □ document □ chapter □ section □ option
Option 7d

Section of Document:

Your View  □ Agree    □ No opinion    □ Disagree

Reason for comment:
New development in villages can support the viability of local village services and facilities. Where it is not economically or commercially viable to sustain a business, a policy will not assist unless financial support is provided or development permitted to sustain the services and facilities.

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Your View  ☑ Agree

Reason for comment:

Site allocations as specified are acceptable provided that there is an appropriate policy base to allow for smaller sites to be considered for development purposes within towns and villages, and it is not to the detriment of the consideration of alternative sites for residential development.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 106345  Mr Buttle  Millwood Designer Homes  
Consent ID:  
Part of document:  Option 25a

Section of Document:  
Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:  
A need does exist for small dwellings and flats to respond to the need for smaller houses, arising from demographic and social circumstances, however there needs to be choice, which should not be at the expense of mainstream, and particularly family housing. There is a strong demand for a range of housing and house types, and this should be encouraged and facilitated to provide choice to meet both the private and affordable needs of the District, in line with PPS3, the emerging RSS for the South East and the Structure Plan.

Consultee ID: 106345  Mr Buttle  Millwood Designer Homes  
Consent ID:  
Part of document:  Option 23e

Section of Document:  
Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:  
This representation relates to questions 24a - c inclusive. Agree that on average densities should be between 30-35 dph as indicated in the Non Statutory Plan. Development densities should be guided by the details of PPS3, which reflects that a range of densities should be applied. However in our opinion a maximum of 40 dph for new development should be set in Wealden (see separate comment for 24d) to reflect the character and attractiveness of the District. If the density is increased generically, it will jeopardise the character of the area, reducing the demand to come and settle in the area. Equally if densities were artificially increased to the higher end of the proposed range, existing residents will relocate elsewhere rather than to the new housing stock which will be too dense.

Consultee ID: 106345  Mr Buttle  Millwood Designer Homes  
Consent ID:  
Part of document:  Option 24a

Section of Document:

Part of document: □ document □ chapter □ section ☑ option
Option 24d

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Where circumstances exist (e.g., at locations accessible to public transport) increased density of dwellings should be permitted provided that there is no detrimental impact on the surroundings and the character.
Option 25b

Section of Document:

Consulter ID: Mr Buttle

Agent ID: Millwood Designer Homes

Part of document: ☑ option

Section 25b

Your view: ☑ Disagree

Reason for comment:

The level of affordable housing requires to be based on local needs, however affordable housing must take into account the development viability, in accordance with paragraph 29 of PPS3. In essence, if demonstrated through a development appraisal that it is not economically viable to provide the required level of affordable housing, then this should be taken into account in the District Council’s assessment and an appropriate level of affordable housing provision that is economically viable (if any) should be agreed. It is imperative that each site is considered on its individual merits and circumstances, otherwise if applied inflexibly, there could be a detrimental effect on the viability of development in the District, with a consequent impact on affordable housing delivery. It is very important that the District Council’s objective for providing affordable housing is based on an up to date housing needs assessment but is also fully aware of housing market areas and housing market demands. The objective of delivering 60% of new development needs on previously developed land is supported, however by definition these sites have been used or previously developed. This will always mean that the cost of developing them is greater than would be the case for a greenfield site. There are often significant costs of site preparation, often including demolition works. The structural stability of neighbouring buildings is often an issue, as is the replacement of old infrastructure such as sewers. Site access is often more difficult in a constrained site within a built up area and in many cases there are problems with contamination and the costs of remediation works can be a major consideration. Many previously developed sites can only be developed if the value of the development being created is sufficient to fund the works required to bring them into beneficial use. The requirement to provide such levels of affordable housing will severely limit the value of any scheme and in many cases make the development of the site unviable. This will directly undermine the intentions of policies to bring forward such sites for development. Furthermore, previously developed sites carry the same base costs as greenfield development, and with increased Section 106 costs resulting from additional County Council requirements and the threat of Planning Gain Supplement, which is currently an unknown burden, development could be rendered economically unviable. The Open Market Value of residential and commercial sites is rising across the South East and also within Wealden District, which is driven by a shortage of property investment opportunities and policies of constraint. The impact of this leads to further increases in land and property values, making the economics of development more vulnerable, particularly when affordable housing and other site factors and contributions are taken into account. This in turn affects the delivery of affordable housing and could, in part, be overcome by consideration of further land allocations across existing settlements in the District, to bolster urban and rural communities, where sustainability can be demonstrated. 40% affordable housing is too great a demand on site viability and on previously developed land, there should be negotiation up to a maximum of 30% as above 30% development becomes economically unviable.

Question Twenty Nine
Section of Document: Housing Delivery

 Reason for comment:
The delivery of development is driven by market demand and market conditions. Introducing artificial or punitative measures to force the speed and delivery of development will have an adverse impact on the development process and worsen the situation. The Planning system and process needs to be less restrictive and land which is suitable, available and deliverable must be allocated and considered.

Question Thirty
Section of Document: Infrastructure Requirements

 Reason for comment:
Measures which improve the infrastructure and enable development must be supported and implemented in a coordinated manner to ensure that the economic and social objectives of the District are implemented. Development will not be achieved without investment in infrastructure and where appropriate and directly related, developers should contribute accordingly to the delivery of that infrastructure. The District’s future is dependent upon the delivery of development (commercial and residential) and appropriate steps must be taken to ensure that the circumstances for future development are put in place.

Reason for comment:
The proposed settlement will destroy the historic village of Isfield, which will effectively cease to exist. The impact on the surrounding environs and on the current inhabitants of Isfield would be devastating. The proposed new settlement will have no benefit for the present village. Such a huge development in one area will create enormous pressure on the current infrastructure.
we do not believe that a new large settlement anywhere in the district is the answer to finding sites for 8,000 new homes. But we do believe that the needs of the entire district are best met by spreading the new homes around Wealden District.

Section of Document: Infrastructure Requirements

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
We need to preserve the countryside for everybody - whether countryman or town dweller. We will not achieve that by covering it in new houses and settlements. It makes sense therefore to concentrate new developments in and around our existing towns - which would also allow the most efficient use of existing and future infrastructure, minimise commuting, and make these places as vibrant as possible. We all need good towns, just as we all need pleasant countryside.

I am very weary of the sort of classification proposed which sounds like something out of Russia or other centrally planned economies - and look what those led to. Towns are towns and villages are villages, all with real people in them, not numbers. Towns and villages need to be treated individually according to local circumstances, albeit with an eye to the wider context of Wealden and East Sussex.

Concreting over the countryside will turn the beautiful Wealden area, which we all love, into another Surrey. And there will be no going back. Once this countryside is lost it will be lost for ever. Far better to concentrate the impact of development in towns. That is where the focus should be - on making our towns vibrant and pleasant places for people to work, live and go shopping, while preserving the countryside for us all, and for those that come after us.
Consultee ID: Mr Cartwright
Consultee ID: 106349

Part of document: Option 14h

Section of Document: Site Allocation Thresholds

Reason for comment:
I disagree with proposals to develop Uckfield beyond the bypass. Development needs to be concentrated closer to the town centre where it can make best use of the infrastructure and enhance the character and vibrancy of the town rather than becoming a disconnected urban sprawl.

Consultee ID: Mr Cartwright
Consultee ID: 106349

Part of document: Question 16j

Section of Document: Site Allocation Thresholds

Reason for comment:
Please try not to increase the urban sprawl over the beautiful countryside. Would it not be better to build upwards where necessary - even if modestly? Polegate and Hailsham are very low profile places. In my view they would benefit from more central massing, becoming more town like rather than just being rather ill defined spreads.
I most strongly disagree with this option which would ruin Isfield and the surrounding countryside for no good cause. There is no significant employment in the village. The new settlement would become just another commuter town. The houses would probably be bought by, or sold on to, outsiders in search of a self-created surburbia and do nothing to help the accommodation problems faced by Wealden people, let alone Isfield. It would be an artificial creation, and we have all seen the horrors that those can turn into. If housing in Wealden is needed, it would be much better to continue the organic development of existing towns rather than build over the countryside which, once lost, will be lost to everybody forever. It is also a complete nonsense to link the possibility of a new settlement with the funding of the Uckfield Lewes rail link. If others think they need a railway they should argue the case and put up the funding without ruining the countryside, but hopefully it will not come to that.

New towns or settlements are not the right answer for Wealden where there is general agreement that the countryside should be preserved. If more housing is needed, the key to success will be to develop the existing towns where infrastructure, jobs, shops and facilities can be best concentrated.

The Core Strategy makes much of the need to preserve the Wealden countryside. That will not be achieved by building large new settlements on it to fund railways. If the latter are thought to be required, they should be considered for funding against competing priorities for hospital, school and so on. And money to pay for them should be raised as is normal, from various sources (including Planning Gain). But houses should be built where they can best be absorbed into the community, not by constructing vast new settlements in the countryside which then create their own additional demands rather than meet the need of the people of Wealden.
Mr Cartwright 106349

Reason for comment:
I agree, but contributions should be balanced and proportionate.

Mrs Rodemark 106351

Section of Document:
Question 31a

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
I hope all of us who live here pause a little from time to time to think why Weaden is such a pleasant place to be. Could it be that the poor infrastructure actually protects us from becoming another Surrey with hundreds of thousands of people coming here to live when their places of work are elsewhere? Of course we need good infrastructure. But we need to proceed with caution and beware of unforeseen results. The first part of the Preliminary Spacial Vision looks fine but the final paragraph could condemn Wealden to being just another overbuilt suburb - hardly the legacy we would wish to leave to our children.

Part of document: □ document □ chapter □ section ✓ option
Option 8d

Section of Document:

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
I disagree with this policy if it generates the sort of proposal which has been suggested for the Isfield area, i.e. between 5,000 & 8,000 new dwellings. Isfield is a pleasant village with a friendly community. Few features of the present village would be likely to survive the scale of development which has been suggested. The surrounding countryside, much of which would be lost if this suggestion were adopted, may not be AONB, but it is very attractive and valued by many people, particularly the meadows adjoining the Ouse. The document mentions that development on the suggested scale would permit the provision of facilities which the village lacks at present. I take it that these might include the restoration of the Uckfield/Lewes railway line and of Isfield station. If the restoration of the line can only be funded by development in the countryside on this scale, I would rather use the bus service. Even if the station re-opened, development on this scale would inevitably generate greater use of local roads, particularly those leading northwards (towards the A272 & the commuter routes to London). The route northwards, for at least a couple of miles, is along country lanes which are quite inadequate for increased traffic.

Reason for comment:
Houses Already On-stream for North Hailsham 1200-1800 This tranche is 890-1500. Two commuters per household gives a minium of 4000 commuters travelling west or south along the A22 (Hailsham doesn't have any jobs!) This leaves aside the issue of how the commuters actually get on to the A22 How do these numbers meet sustainability issues! What more needs to be said?

Option 15f

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

It seems reasonable to register a (very) qualified agreement for option 15f. Hailsham desperately needs more work opportunities. Clients with a genuine interest in developing significant commercial activities within reasonable travelling distance of Hailsham ought to be actively sought. A model for such enterprise might be a Call Centre type of activity – local labour and little need for clients to travel to the site. An incursion into land west of the A22 should not be contemplated if all that is on offer is warehousing and a few (more) minimum wage jobs. The idea of extending out to new settlements at Arlington and Berwick does not appeal to me.

Question 15h

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

I disagree with any further significant housing development in Hailsham and the immediate vicinity. A history lesson. In 1970 a Hailsham Town Centre Map was approved for the purposes of development control by East Sussex County Council and ratified by the (then) Hailsham District Council. It featured a road system design aimed at increasing accessibility and aiding movement in and about the town. The redundant railway line and areas of the old Station yard were to form a two way road by-passing the town centre. Further, a sensibly sized intersection with South Road (on the same level!) was proposed. The pedestrianized town centre, including the High Street, George Street and Market Street, would have been served by a one-way ring road. Other proposals for the immediate vicinity were the diversion of the A271 to form a northern by-pass and, after 1981, the extension of the new road along the railway cutting to Hellingly Station. This would have been matched with an improved South Road to form a viable route for north/south traffic meeting the A22. These road improvements were planned to coincide with an increase in population from just over 8,000 to some 20,000 by 1981. Clearly Wealden District Council failed to deliver! Today anybody who tries to make their way about the town can appreciate (?) this. For the future? What chaos will ensue when White House School is finally moved, the Tesco store is open and the developments around Hailsham, already approved, are completed? Can we expect some improvements, by way of planning gain, if yet more houses are built? Probably not - a senior Wealden Planning Officer recently gave a clear indication that developers are increasingly unwilling to pick up the bill for 'historic' infrastructure deficits.
Option 27a

Reason for comment:
Sound idea in principle – 'should' sounds a little strong.

Option 27b

Reason for comment:
As per other respondents why a long term aim? Should have been included in Table 15. Not because of the need to fund it's development, rather as a mechanism for maintaining some of the essential character of this part of Sussex. In the end we have to decide - more cars, more roads or public transport. I would suggest the following novel criteria for this new line - journeys on it should be affordable, safe and pleasant. Perhaps in the future people will be able to travel down to a pleasant countryside halt called Berwick Station. From hence they will be able to walk or cycle through pleasant countryside to the foot of the South Downs. Perhaps!

Option 27c

Reason for comment:
Option 27f

Section of Document:

Reason for comment:
‘Parking standards should derive from the ownership levels of different types of household.’ What does this statement mean? It is a personal observation that people now assume the right to permanently park their vehicles (often more than one) on the public highway. In many areas this causes congestion and safety issues. National or local byelaws must soon be in place to remove this ‘right’ or the nation’s highways will grind to a halt. Housing planning for the future should take this into account.

Option 28a

Section of Document:

Reason for comment:
By all means protect existing sports and recreational facilities. Unfortunately we must face facts. Britain is no longer a country where social consensus operates. Open public spaces and housing, particularly for the more elderly, are simply now longer an option.

Question Twenty Nine

Section of Document: Housing Delivery

Reason for comment:
Total silliness. Take away the arbitrary targets and you remove much of the perceived problem and the attendant bureaucratic cost. WDC is currently embarrassed over the Hellingly Hospital site. That’s because it gave permission for an inappropriately sized development on the site thereby hoping to meet government targets. The development is currently stalled (possibly because of an appeal to the Secretary of State over an adjacent site). Simple to avoid anyway, just don’t register for planning permission! Speculators land banks are built up over time by stealth. What comes next? Surveillance of all land and punitive taxes if some bureaucrat decides it should be built on so that central government can be seen to be ‘doing something’?

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
12D North Heathfield College. Leisure Centre. Set in Area of Outstanding Natual Beauty on edge of two conservation areas, opposite Heathfield Park with status of scientific importance, at the mouth of the river Dudwell, not a good site for more homes or does that matter? With local Council, as Falmer Stadium has just been given permission in AONB. Heathfield College, built in 1952 for 500 students. Still on same size site, now holds 1500 students and 200 staff. This is overcrowding. School is surrounded by small country roads and grass verges. So no parent parking. No local jobs. So why more houses?

Consultee ID: Freeman
106360

Part of document: □ document □ chapter □ section ✓ option
Option 12d

Section of Document:

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
the proposed area is on the edge of 2 conservation areas opposite Heathfield Park (site of scientific importance) with listed sandstone walls. Site has numerous underground springs and is close to a historical water gathering source. Any construction may affect the water flow of the river Dudwell. Traffic hazards at the B2096, will be exacerbated by further development - current traffic levels are at a maximum.
Consultee ID: Manchip 106361
Part of document: □ document □ chapter □ section ✓ option
Option 12e
Section of Document:
Your View □ Agree □ No opinion ✓ Disagree
Reason for comment:
The infrastructure of Heathfield is not capable of maintaining any more multiple building without massive reorganisation in particular in our area of Sandy Cross. The land cannot cope with existing traffic especially at school times, we agree wholeheartedly with M Lander’s comments and will certainly support his action group. The publicity for this meeting was not sufficient. Please ensure that more people get to know about the next stage.

Section of Document: Context

Your View ✗ Disagree

Reason for comment:
Common Sense says create the infrastructure first. Roads, sewers, water electric, doctors, hospitals etc. Then add the expansion plans. But this will not happen, it is much more fun to moan later that this or that should have been done first but never was. Why change the habit of generations.
Option 12c. Soil and drainage should be investigated. Fields near present recycling centre seem to be waterlogged most of the time.

Option 18c Golden Cross. Impact on Deanland Park village (quite a lot of old people all over 50) should be taken into account.

This is a poorly thought out proposal. The feasibility concerning infrasturucture required (which is far outdated at the moment) will be extensive and expensive and put the viability of these sites beyond economic limits. The impact to the local enviroment added to the water table make development unsuitable. The road network is inadequate at present and would need vast improvements including the A27.

More redevelopment should be allowed on redundant farm buildings to enhance the local area. Why build more affordable homes in the area when they have the right to buy?

Reason for comment:
A development of the suggested site is completely out of proportion with the village and with other villages in the vicinity. It would spoil an area of great natural beauty and create urban sprawl within 2 miles of the downs. The local infrastructure could not support a town of this size. To develop the necessary amenities would further destroy the natural beauty of the area, which is its only asset.
Mrs Palmer 106377

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Disagree

Reason for comment:

A new development of this scale would totally destroy a great corridor to the downs. The volume of extra traffic could not be supported by the surrounding major roads. It would have a major impact on exceptional wildlife which exists around this area particularly the old brickworks. Residents of Berwick have moved to this area specifically to acquire a quieter mode of living, some have lived here all their lives - all would have their quality of living destroyed.

Reason for comment:

People have chosen to live in Halland because of its isolation and it is vital for the character of the countryside that creeping suburbanisation is stopped. The health, transport, power, communication and education infrastructure is poor and as the new estate in Ringmer has not been properly supported with schools or doctors why should we believe that this would happen in Halland. Young people on a new estate would be stranded leading to social problems, traffic would escalate on an already overstretched and dangerous section of the A22, and local services would collapse under further strain.

Option 16f  

Your View  

☐ Agree  ☐ No opinion  ☑ Disagree  

Reason for comment:  

We wish to retain Hindsland Playing fields for both Willingdon and Polegate residents to use - playing pitches are needed to enhance the area’s facilities, to encourage exercise among all age ranges. The land that adjoins the A2270 could be used for recreational and amenity use and still allow Willingdon to retain its rural/village appearance. It also acts as a good strategic gap between Polegate and Willingdon. Extra funding of £100m has just been announced for sport and physical education, designed to benefit all children and young people aged 5-19 between April 2008 and March 2011. It includes the aim that all 5-19 year olds, regardless of their education or employment setting, will be able to access a further 3 hours each week of varied, high-quality sporting activities over and above that provided at school. The residents could walk to the Railway Station, walk to Polegate to shop and this would help regenerate Polegate – especially if the redevelopment of Polegate Town Centre was to go ahead. All traffic should be directed onto Jubilee Way. The land that adjoins the A2270 could be used for recreational and amenity use and still allow Willingdon to retain its rural/village appearance. It forms an attractive break between Polegate, Lower Willingdon and Willingdon, hiding the development. By Mornings Mill Farm entrance, a Community Centre/Cottage Hospital to serve the immediate area for minor injuries and outpatients like Uckfield Hospital.

Part of document:  

☐ document  ☐ chapter  ☐ section  ☑ option  

Section of Document:  

Option 16g  

Your View  

☑ Agree  ☐ No opinion  ☐ Disagree  

Reason for comment:  

The area has potential for substantial improvement; regeneration would attract more commerce into the town, which is very well served by public transport.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Question 16h

Section of Document:

Reason for comment:

We would prefer not to have any extra housing and development in the area and when drawing up a plan you should consider the quality of life of the residents already here and the damage any overdevelopment will cause without the appropriate infrastructure in place.

Consultee ID: Mrs Adams 106398 Willingdon and Jevington Parish Council

Question 16i

Section of Document:

Reason for comment:

COMMENTS ON STATED AIMS: 1. “Ensuring that the location of development to meet the town’s service and employment needs is co-ordinated with that of Eastbourne, and that public transport links to Eastbourne are improved through a quality bus corridor”. AGREE. We also think that improved road links out of the area, in particular the A27 link to Brighton must be improved to both alleviate congestion and encourage manufacturing and industry into the area. 2. “Improving /redeveloping the Rail Station and adjoining town centre with more intensive use of land and an improved environment and choice of shops”. AGREE. We strongly disagree with any proposal to move the station out of Polegate Town Centre as it would have a very negative effect on the economy of the town. 3. “Respecting and protecting the backdrop and setting of Polegate and Willingdon against the South Downs” AGREE 4. “Taking advantage of the bypass completion to improve the environment and space available for buses, pedestrians and cyclists”. AGREE. We believe the bypass should provide the clear boundary for any development. -Improving gaps in Polegate’s housing stock and in community facilities, including for the elderly, a new sports hall, and good quality new housing. - “Protecting Willingdon’s village like character” and “Providing new parks and open spaces in and around Polegate and Willingdon”. AGREE. In particular we would want to see Hindslands retained as playing fields and the land adjoining the A2270 kept clear of development to retain a green barrier between Polegate and Willingdon along the A2270.
### Question 16j

**Consultee ID:** Mrs Adams  
Willingdon and Jevington Parish Council  

**Reason for comment:**  
The upgrading of the A27 to a dual carriageway should be a top priority to ease the congestion at the traffic lights on the A2270 and the A27.

I disagree with any development in and around Berwick because of the implication on the wildlife in this area, especially on the brown field site where the habitat is quite rare.
Consultee ID: Thompson  
Part of document:  
Section of Document:  
Reason for comment:

Land in the area of A22/ Arlington Road East as shown on map. With the increased activity at Knockhatch Adventure Park, Arlington Stadium, increasing activity events at Michelham Priory and traffic along Arlington Road West itself the area is no longer an countryside in a remote location. The area at present is in fact dangerous for walkers and horse riders due to volume and speed of traffic. The area as shown in submitted plan, has housing albeit sparsely located along both sides of the road so is not an encroachment into open countryside, most of the land was a dairy farm until ot lost its quota and was split into smaller parcels - and is open virgin countryside so no problem with ancient woodlands or footpaths. At the end of the site marked are landfills sites which could either be incorpoted into the developement areas or kept as protected areas. In addition the road access is good. Further details on submitted letter.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Adams
Part of document: ☑ option
Section of Document: Option 18b
Reason for comment:
HALLAND EXPANDED VILLAGE It is my intention to consider the direct effects in the village of Halland if the proposals outlined at the Parish Council meeting held at East Hoathly on 28th July, 2005 are carried through namely 1800-2800 new dwellings. 1. The expansion in terms of housing will presumably mean also the expansion of boundary limits to accommodate such developments. As suggested at the meeting the south side of the roundabout which bisects the B2102/A22 would be a starting point as this area is not considered to be on a flood plane. As a resident of Halland for 27 years and living on the A22 I have observed flooding on a regular basis with surface water from the roundabout (A22) and running south from the area of the Cottinghams Nursery – the so called collection point is near the speed camera it then flows under the A22 via a 10” pipe only, into an open water course across my land on to lower fields near the sewage treatment works. The point I emphasise, any further development will no doubt create further flooding to the A22 from the high ground. 2. Halland does not have it’s future in its ‘own hands’ the influences will come from outside its own boundaries, i.e. additional traffic, more pollution, increased ‘nose to tail’ bottle necks along the A22 which restricts access to residents to the A22. Speeding vehicles travelling south with little or no control over speed resulting in children and parents being dangerously at risk of injury. 3. Safety factors along A22- at a minimum, i.e. no recognised pedestrian footpath travelling south, chevron traffic signs prior to roundabout, are a safety hazard for pedestrians. Finally, my previous comments are essentially to emphasise the greater volume of traffic both day and night. People are unable to open windows because of excessive noise and pollutions levels. This is nothing short of a nightmare for residents along the A22 through Halland. I am therefore reversing my decision taken at the East Hoathly meeting which was to agree an expansion of the village development. My total disagreement now is for one reason and one reason only and that there is no real indication from either document i.e. Consultation of update of Parish Plan or the Wealdon Core Strategy that a single carriage way/bypass will ever be planned let alone developed. This is nothing more than short sightedness that will heap misery on both motorists and residents alike. Putting the ‘cart before the horse’ would aptly describe this folly.

Reason for comment:
At present there are significant problems with traffic and parking. Many roads are passable only in single file especially in the evenings due to parking. Whilst there is access to the railway station the car park is overflowing with cars parked on the access roads. Services and the village infrastructure are stretched already, South East Water and the Parish Council have already logged complaints about planning for some areas for very good reason. The mains services water e.g. are already a problem remember last year we had a drought. Extra housing requires extra facilities e.g. Doctors, schools, parking, water and drainage supplies etc. This plan is a bad idea for the existing occupants.

Question 31a
Section of Document:
Your View: Agree
Reason for comment:

but with low housing density
Consultee ID: Mr Wade
Part of document: Option 12e
Section of Document:
Reason for comment:
There are a number of reasons why development should not even be considered for the area south of Sandy Cross Lane. Chief is the fact that this is in an Area of Outstanding Natural Beauty, where development should never take place. Sandy Cross Lane itself is a narrow country lane, scarcely wide enough for two cars to pass in places, and already made dangerous by speeding traffic and its use as a rat run to Heathfield College. It is certainly not suitable for heavy vehicles - just imagine how many lorry journeys would be needed for 200 homes! Pedestrians using the lane already take a considerable risk - there are no pavements at all. The lane has poor access to the Hailsham Road, and access to the main town is very poor without a car - more emissions, more traffic! The infrastructure of Heathfield as a whole cannot support any wholesale development - local jobs are at a premium, local services are already stretched, the roads clog up for the slightest problem and we don't even have a proper police presence. On a wider scale, water is often scarce in this area - can the supply cope with vastly increased demand? In addition, I would be concerned about potential structural damage to my house, built near the road at a time when the heaviest traffic was a horse and cart. I would wholeheartedly oppose any development in this area, in any way necessary.

Consultee ID: Norton
Part of document: Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Reason for comment:
Largely disagree - 'some development' is not quantified; public transport totally inadequate so further development might add significantly to car journeys; any building on green field areas is going to reduce the land's capacity to absorb rainfall and add to existing run-off problems - such as we have seen during the extremely heavy rain on 20 July. There might be a case for a very small amount of development on redundant brownfield eyesore sites

Consultee ID: Norton

Reason for comment:
Target not high enough
Consultee ID: Norton  
106420

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option
Option 2b

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
I do not think a 10% target is enough. Apart from the inevitable rises in the prices of fossil fuels as reserves run down (no significant new oil discoveries having been made in recent years), there is increasing competition for existing reserves from developing countries (as well as the geopolitics issue of depending on fossil fuels in areas of political instability). The cost of extraction increases as reserves in more difficult places are developed - North Sea oil did not become economic to extract until the oil crises of the 1970s forced up the price. So as the cost of fossil fuels rises, renewables will become more economic than they seem at present. And we are still a VERY long way from the hydrogen economy. Building regs need to enforce the use of solar energy in new buildings (more likely thermal rather than photovoltaics for the foreseeable future) There is scope for biofuel usage via coppicing of wood. There might be scope for use of ground source heat pumps in new buildings (if a hole is being dug in the ground for the foundations anyway it could perfectly well be adapted to incorporate heat pump technology). I think wind turbines are less unsightly than nuclear power stations. Any increase in use of renewable energy needs to be coupled with improved building insulation standards and developers must not be allowed to wriggle out of their obligations to meet better standards.

Consultee ID: Norton
106420

Part of document: Option 7d

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
I think Marefield should be changed to intermediate growth

Consultee ID: Norton
106420

Part of document: Question 7e

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
I think Marefield should be changed to intermediate growth

Consultee ID: Norton
106420

Part of document: Option 9a

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
Uckfield is already becoming too much of a sprawl. It should not be expected to cope with further significant development without the flood issues being addressed properly and without reinstatement of the Uckfield-Lewes rail link. Traffic problems in the High Street now as bad as before the bypass was built. In my view a fatal mistake was made in not including access to the bypass from the middle of Uckfield (Church Street - Rocks Road)

Consultee ID: Norton
106420

Part of document: Option 9b

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
No development in AONB around Crowborough should be allowed. Inadequate westward transport links
Consultee ID: Norton
106420

Part of document: Option 9c

Section of Document:

Your View: Agree

Reason for comment:
Qualified agreement on the grounds that the development is distributed as widely among the 3 towns as possible. However would oppose development in the AONB.

Consultee ID: Norton
106420

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Your View: Disagree

Reason for comment:
30+ and 15+ are meaningless figures. No more than 10 for villages.

Consultee ID: Norton
106420

Part of document: Option 14g

Section of Document:

Your View: Agree

Reason for comment:
As long as building is confined to the brownfield sites and new development suitably protected against flooding. Luxfords Field should not be touched.

Consultee ID: Norton
106420

Part of document: Option 14h

Section of Document:

Your View: Disagree

Reason for comment:
Uckfield should not be allowed to extend west of the by-pass. If it did so extend, sooner or later there will be another by-pass....
Consultee ID: Norton  
106420

**Part of document:**  
- Document: ☑️
- Chapter: ☐
- Section: ☐
- Option: ☑️

**Section of Document:** Option 18a

**Your View:**  
- Agree: ☐
- No opinion: ☐
- Disagree: ☑️

**Reason for comment:**  
New settlement inappropriate - would need new infrastructure. Flood risk area.

---

Consultee ID: Norton  
106420

**Part of document:**  
- Document: ☑️
- Chapter: ☐
- Section: ☐
- Option: ☑️

**Section of Document:** Question 18k

**Your View:**  
- Agree: ☐
- No opinion: ☐
- Disagree: ☑️

**Reason for comment:**  
New settlements undesirable in principle, because of the risk of gaps between new and old settlements being built over in the far future.

---

Consultee ID: Norton  
106420

**Part of document:**  
- Document: ☑️
- Chapter: ☐
- Section: ☐
- Option: ☑️

**Section of Document:** Option 21a

**Your View:**  
- Agree: ☑️
- No opinion: ☐
- Disagree: ☐

**Reason for comment:**  
Potential for some development but 500 new houses far too many in relation to existing size of village.

---

Consultee ID: Norton  
106420

**Part of document:**  
- Document: ☑️
- Chapter: ☐
- Section: ☐
- Option: ☑️

**Section of Document:** Option 25a

**Your View:**  
- Agree: ☑️
- No opinion: ☐
- Disagree: ☐

**Reason for comment:**  

Consultee ID: Norton

Part of document: Option 24b

Section of Document:

Reason for comment:
Higher housing density would hopefully preclude 3-bed houses being extended into 5-bed ones at a future date, thereby rendering them unaffordable.

Consultee ID: Norton

Part of document: Option 25b

Section of Document:

Reason for comment:

Consultee ID: Norton

Part of document: Option 25c

Section of Document:

Reason for comment:
Ill-thought-out question. If you want to put 500 new houses in Maresfield are you seriously suggesting that 250 of them would be affordable housing?

Consultee ID: Norton

Part of document: Option 25d

Section of Document:

Reason for comment:
Small amount of affordable housing according to local needs - and it should not subsequently be sold on the open market.

Mr. Prigmore (Consultee ID: 106421) Agreement: Disagree

Reason for comment:

Carter Lewis & Co (Consultee ID: 106422) Agreement: Agree

Option 23b

Reason for comment:

To put forward a site located at the South East end of the village of Lower Horsebridge to the North of Hailsham. An area of 0.8 Ha. For residential or mixed use purposes. Existing access from the A271. Close proximity to Hailsham town. Full details within the submitted letter.

Dade Speer Dade Planning Consultants (Consultee ID: 106423) Agreement: Agree

Option 12e

Reason for comment:

Confirming on behalf of landowners that the land as submitted within letter can be made available for housing.

Mr. Spillman (Consultee ID: 106425) Agreement: Disagree

- [ ] chapter
- [ ] section
- [x] option

**Section of Document:**

**Option 14c**

**Your View**
- [ ] Agree
- [ ] No opinion
- [x] Disagree

**Reason for comment:**

- The area is unsuitable as the Framfield Road is already badly congested and provides access to the Hospital.
Option 14g

Reason for comment:
The town is already divided by heavy traffic right through its centre. Development of town facilities is necessary but building houses in this area can only cause more damage in an area where only recently the drainage system failed. In the last 10 years Infill building has not only aggravated surface water flooding but is starting to obscure views in the Town's Conservation area and some listed buildings.

Option 14h

Reason for comment:

Requests should be made for assurance that drainage and water supply systems on which Uckfield depends and which may be situated inside or outside the Wealden have the necessary capacity and are storm and flood proof. This should apply to all vital infrastructures e.g. gas, electricity, fire and police.

Consultee ID: Mr Hardy
106433 Uckfield & District Preservation Society

Part of document: □ document □ chapter □ section □ option
Question 14k

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
As the number of new houses in the Wealden area is to be about 10400 in 20 years time has the possibility of a new settlement been considered? This would reduce the possibility of more infrastructure failures in the overloaded parts of the Wealden area and make the new housing scheme more sustainable. The underlying problem for the western world is that it is outgrowing the world's natural resources. China has had a population control system in action for some time now.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Sharp Agent ID:
106435

Part of document: Option 16e

Section of Document:

Your View Agree No opinion Disagree

Reason for comment:
This portion of land provides a haven for wild-life, is a buffer between the by-pass and existing housing and provides a valuable soakaway for rainfall - do we really want a concrete, tarmac and shoebox house jungle adding to the flooding potential to already inadequate drains. There are already "Industrial" unit vacancies in Polegate and Eastbourne so the spin about providing local jobs is a red herring. Most people will work where the money is and that is NOT in Polegate. Inadequate schools capacity, dental and medical shortfalls and an overstretched and probably soon to be reduced hospital provision make this and many other proposals a recipe for disaster not to mention the appalling increase in road traffic that will result as we already have an up to capacity train service and virtually no spare station car park potential due to the erection of the "station slums" the Appeals Inspector permitted on "surplus" shoppers car park land adjacent to Polegate station.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Fagan
106437

Part of document: ☑ option
Option 2b

Section of Document:

Reason for comment:
New domestic housing should be built to a minimum standard of 3 star as defined by The Code for Sustainable Homes with immediate effect, and this standard be raised by one star grade each year, reaching the maximum standard of 6 star by 2012.

Consultee ID: Mr Fagan
106437

Part of document: ☑ option
Option 19a

Section of Document:

Reason for comment:
I believe a 20% increase in population is not conducive to today's concept of sustainable development. The village currently struggles to meet its requirements for local education, health and social services. Furthermore the proposed locations have a number of questionable features. They begin the process of physically linking Forest Row to East Grinstead losing the village lifestyle, both locations are of a hilly nature with serious risk of run off causing flooding lower down, and most importantly a major portion is agricultural land. It is a well known issue in national news that the present system of relying on long distance food is unsustainalbe. We need to preserve as much agricultural land for future food requirements as possible.

Consultee ID: Mr Fagan
106437

Part of document: ☑ option
Option 25a

Section of Document:

Reason for comment:
These should indicate created as affordable housing with measures to prevent buy to let.
Consultee ID: Mr Fagan

Part of document: Option 24a

Section of Document:

Reason for comment:
This does not seem conducive to affordable housing.

Consultee ID: Mr Fagan

Part of document: Option 24b

Section of Document:

Reason for comment:
This is probably the minimum if affordable housing is to be the main element of any new development.

Consultee ID: Mr Fagan

Part of document: Option 24c

Section of Document:

Reason for comment:
Agree on the basis that the main purpose of any development will be for affordable housing. We know that the cost of housing in this area is very high.

Consultee ID: Mr Fagan

Part of document: Option 25b

Section of Document:

Reason for comment:
Affordable housing is the only viable solution to the housing crisis facing young people.

| **Reason for comment:** |
Reason for comment:
The nature of this consultation exercise causes me great concern for the way in democracy is heading in Wealden. The reasons for this statement are: -Wealden District Council has already endorsed, at Cabinet level, on the 6th December 2006 and the 1st August 2007, the decision to proceed with the Eastbourne / Hailsham Triangle Blueprint. No mention of this STRATEGIC decision is made in the consultation document. -The pamphlet sent out to all households on the consultation was masked by the inclusion of a larger, generic Council document. -The timing and duration of the consultation (holiday and 6 weeks) were both inadequate to allow full participation. -The strong preference for internet participation effectively cut out the rural community who do not, in the main, enjoy broadband and so either had no connectivity or used dial-up - with attendant problems of speed and cost. -The £15 cost of the document disenfranchised many in the community who, not being able to purchase the document, would not be able to submit a paper-based return. -The Wealden statement (Hailsham Gazette 8th Aug) that they would 'only accept representations based on accurate assessments of developments'. This is an assumption that the Council's interpretation is the only view which will be acceptable. -The potential for the views of rural communities to be overwhelmed by those in the towns - although there may be a 50/50 town/rural split in the population, a single town will always have a larger number than the individual communities around it.

Your View  ☑ Agree  ☑ No opinion  ☑ Disagree

Reason for comment:

The A22 acts as a clear boundary between town and rural areas. This was recently recognised with the transferring of land and properties to the west of the A22 from Hailsham Town to Arlington Parish. The development of commercial / industrial / business to the west of the A22 will be the forerunner of a massive increase in the size of Hailsham and the loss of countryside.

Reason for comment:
The South East Plan has no stated requirement for a new settlement to meet the number of houses required in it. The proposals contained with the Core Strategy for new settlement(s) are unwelcome, and fly in the face of one of the key statements in the Strategy document, namely, 'the Cuckmere Valley, the last unspoiled river estuary in the South East, near the famous cliffs of the Seven Sisters'. The locations of most, if not all, of the new settlements is such that the Cuckmere Valley will not remain unspoilt.

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
The introduction of a Parkway station will add to traffic movements and lead to more congestion and pollution.

Consultee ID: Mr Collins  Agent ID:
106438

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 27d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:
Dualling of the A27, or any other road, acts to increase traffic and after a short period congestion is back to where it was before. Look at the M25 to see how bigger roads generate even more traffic.
Consultee ID: Mr Collins 106438

Part of document:  ☑ option
Option 27e

Mr Collins

Question Twenty Nine

Housing Delivery

Agree

Your View

Agree

No opinion

Disagree

Reason for comment:

A simple Yes / No answer to 4 and half pages does not allow the level of granularity required.

Question Thirty

Infrastructure Requirements

Disagree

Reason for comment:

The Eastbourne / Hailsham Blueprint had already been agreed between Eastbourne Borough Council and Wealden District Council Cabinets on the 6th December 2006 prior to this Core Strategy consultation. I disagree with both that decision and the Triangle. I therefore cannot agree with WDC's spatial vision.

Question 31a

Reason for comment:

The Eastbourne / Hailsham Blueprint had already been agreed between Eastbourne Borough Council and Wealden District Council Cabinets on the 6th December 2006 prior to this Core Strategy consultation. I disagree with both that decision and the Triangle. I therefore cannot agree with WDC's spatial vision.

Question 32a

Reason for comment:

Whilst there are laudable objectives in this local spatial vision, there are a number of objectives that I would not support such as SO5, SO10, and SO12 - the latter because of the adverse impact on villages' way of life caused by the Eastbourne / Hailsham Triangle.
Consultee ID: Mr Sullivan

Part of document: Option 6a

Section of Document:

Your View: Agree

Reason for comment:
There is much less despoilation, greater closeness to infrastructure and less destruction of natural rural amenities

Consultee ID: Mr Sullivan

Part of document: Option 18j

Section of Document:

Your View: Disagree

Reason for comment:
(From Mrs J Sullivan same address as Mr M Sullivan) This would be a serious despoilation of the entire area around the C39. Berwick, Lower Dicker and Arlington would all be badly affected. Quite apart from insufficient infrastructure the continuous movement of construction traffic would severely destroy the peaceful country environment of those who live in and around Berwick. Huge negative impact on: Roads/water supply/sewage/wildlife

Consultee ID: Mr Sullivan

Part of document: Option 18j

Section of Document:

Your View: Disagree

Reason for comment:
The choking effect on the infrastructure - roads, sewage, water supply, schools and a massive loss of amenity in sight of the South Downs means this area will be totally ruined by any major development here. The scope for social problems created by a huge settlement is enormous. The proposed site is also an SSI.

Your View: Disagree

Reason for comment:
Reason for comment:
Houses should not be built at the rear of the Community Centre in Hailsham but a round cycle track all round the edge leading into car park by the new school with entrance from Marshfoot, Magam Down, Battle Road, (from Cuckoo Walk exit at Harmers Hay). The centre would be a green park of walks, running track, cycle ramps, green spaces for picnics, events, fireworks, maybe a bandstand and space for sports, somewhere for all the young and old making Hailsham a safe country town where people will want to spend time without a car, a charge could be made for safe parking of bicycles ect. With all extra traffic that will be coming into Hailsham roads will be at a standstill cycle paths onto Hailsham would make it safer. I would like this to happen for my grandchildren and future people of Hailsham and for Hailsham to be a place to be proud of. New houses need to be built near stations as our roads are too narrow and congested already, which will cause more accidents. Lower Dicker if the A22 can be made safer would keep traffic away from Hailsham. Polegate would not cause too much problem but cycle paths should be made on all sites.
We are writing in response to the proposed development of up to 470 new homes on the land adjoining Benhall Mill Road and at Little Mount Farm. As residents of Benhall Mill Road living in close proximity to the above proposed development we have many concerns. · The access to the proposed development is a grave cause for concern. As residents of Benhall Mill Road for 24 years we have seen a significant increase in the amount of traffic using the road, to a point where further increase can only be a danger. Residents of Benhall Mill Road have little off-road parking and so are obliged, along with employees of Burslem’s and Kidman’s, to park on the road. There is a 40m.p.h. speed limit, yet it is a bus route and turning point and much used by hearses and the cars of mourners, sometimes in very large numbers. Access points for these housing developments would place heavy pressure on the road. Whereas at present cars can negotiate parked vehicles, buses and hearses in safety, the increase in traffic caused by this development would constitute a danger both to car drivers and to the many families living in the road. If permitted, the development could easily add a further 2000 car journeys per day on this road, in character a country lane, along which families and young children choose to walk for recreation. It provides a tranquil approach to the cemetery, crematorium and adjacent countryside. As such, access to development sites from Benhall Mill Road is totally inappropriate. · The provision of services for the above development would also be a cause of great difficulties. Within the past 21 years the county boundary was changed, moving houses in Benhall Mill Road from East Sussex into Kent due to the fact that East Sussex found it difficult to provide appropriate services, such as refuse collection, to an out-lying area. · Tunbridge Wells and Kent’s services in this area are already very over-stretched. Claremont School is heavily over-subscribed, so much so that Benhall Mill Road, parts of the Forest Road and others closer still are not in its designated catchment area. Residents of the relatively new developments off Benhall Mill Road are expected to travel a considerable distance, crossing major roads, to reach Broadwater Down School. This inadequate provision would be made intolerably worse. The nearest East Sussex school, Frant, is a very considerable distance, especially for primary age children, along roads with no pavements, and is already full. In all the above areas Wealden Council would be creating problems with which Tunbridge Wells Borough Council and their residents would have to deal. · These sites seem poorly placed to meet East Sussex housing quota requirements. They do not fulfil the genuine need for East Sussex communities to grow, but rather meet quotas in a meaningless way for the people of East Sussex, and in doing so create or exacerbate problems for their neighbouring community in Tunbridge Wells, both residents and council alike. · Green and open spaces in the near vicinity of more urban areas are essential to the quality of life of the residents. Tunbridge Wells cannot be asked to suffer both in-filling and the extension of its urban area. Tunbridge Wells Borough Council has rejected development in the nearby Hawkenbury area as unnecessary and wrong, so it seems acutely unjust that the town should be forced to grow to meet the ‘quota needs’ of Wealden Council. · The land behind Benhall Mill Road has been designated a ‘Site of Nature Conservation Importance’. The land was used as a hay meadow and supported an abundance of wildlife. Lack of mowing has led to the decline of the skylark, but the addition of the whitethroat to this area. Reptiles are regularly seen by local residents. It seems very probable that at least three species are present, entitling it to Key Reptile Site status. None of the land has been ‘enriched’ with artificial fertilisers, nor sprayed with pesticides. It is clear that the proposed development is grossly out of proportion to the existing blend of housing and green sites, and highly damaging to the local environment. It is also completely out of kilter with the current climate of opinion, that the need for new housing should and can be met through the development of brown field sites.
Consultee ID: mr nyemann

Part of document: ☑ option

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: ☑ Disagree

Reason for comment:
Areas of Outstanding Natural Beauty should be preserved at all times and COSTS. Once any development within an AONB a precendent is set allowing further development to take place.

Consultee ID: mr nyemann

Part of document: ☑ option

Section of Document:

Your View: ☑ Agree

Reason for comment:
The council should require all new development to generate a minimum of 10 percent or more of its energy by using renewable sources.

Consultee ID: mr nyemann

Part of document: ☑ option

Section of Document:

Your View: ☑ Disagree

Reason for comment:
The defined development boundaries should be maintained as a planning tool. Any expansion would require increased infrastructure, adding more roads would impact on villages and their surrounds.

Consultee ID: mr nyemann

Part of document: ☑ option

Section of Document:

Your View: ☑ Agree

Reason for comment:
Rather than expanding existing towns, a new settlement should be built. Preferably at the site mentioned in this question.
Affordable housing should be in areas close to easy transport and areas of economic development.

Part of document: ☑ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View  ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:
Part of what makes the High Weald AONB a unique and special place is the dispersed settlement pattern and the historic farmsteads that dot its landscape. If a policy of no building in the AONB is maintained as farms close and are replaced by large expensive houses this unique character will be lost as will the land based workers that have lived in the area for centuries.
Without serious thought put into the road, retail, and other service infrastructure this option would simply put even more pressure on Hailsham. People will not be encouraged to do anything but drive into Hailsham for all their needs and Saturday mornings would go from a crawl to a standstill.

Reason for comment:
Because Hailsham is not in an AONB means it is an easy target for development. But simply building yet more housing estates without thought put into infrastructure and services is not acceptable. There are not enough doctors, dentists already, the road get clogged very easily, there are very little travel alternatives such as cycle paths or footpaths away from traffic around Hailsham and parts of Hailsham are either on or beside flood plains. Hailsham's strong sense of community is slowly being eroded and it is being turned from an attractive market town into a dumping ground for inappropriate housing development. We cannot allow this to go ahead!
Not everyone has aspirations to live in a five bedroom mansion!

Part 1

Section of Document: Context

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

Whilst recognising the value and importance of consultation and the need to involve as many people as possible in devising and developing a strategy, I believe there are some basic flaws in the way this consultation has been presented. For example, it is described as a broad vision, but has, in certain areas some quite clear and finer details, such as talking about a bridge over the railway line at Berwick, if this village becomes a new town. It presents as if an official from Wealden looked at a map of Wealden and pulled numbers from a hat alongside villages and towns. If it is a consultation based on no definite details, then why put figures in at this stage? why not simply say the options are to develop and build accommodation anywhere in Wealden? This would really would be a blank piece of paper.

Consultee ID: Mr Hale  
106450

Part of document:  
☐ document  ☑ chapter  ☐ section  ☐ option

Part 5

Section of Document: Wealden's Places

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

This section highlights the failure of the consultation exercise to be meaningful. I have looked at the sections of the document that affect me and have made my opinions, against developments in the area where I live. I, and others who live near me, could have gone through the document agreeing to developments in all other areas. This would not have been because we agreed with developments in those areas, but because it would have diminished the possibility of developments near to where we live. This section highlights the fact that too many questions are being asked, when at this stage, a broader outline of possibilities would have been a more effective way of gaining views.
Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
The question asks whether there is agreement to 15 plus houses being build on the edge of villages. Unfortunately, most of the suggested developments are for more than 15 new houses. Therefore the question is irrelevant, misleading and wrong.

Reason for comment:
To build what would be a new town so close to the Downs, particularly to something as well known as the Long Man, would be complete folly. It would be a small step to building new towns all along the A27, which would have a dramatic effect on the landscape and the environment.

Reason for comment:
There are so many reasons why this makes no sense; a few are:- - it would have a dramatic effect on the environment. - it includes building on the old brickworks, which is a natural, wildlife area. - it would be close to, and visible from, the Downs. - it goes against Wealden's own stated policy of not creating new towns. - the level crossing at the station already causes tailbacks and so, as the consultation document states, a road bridge would be needed which would be highly visible from the Downs. - the village would not be able to sustain such growth, ie it does not have the necessary infrastructure. - the A27 is well known for its accident record and encouraging more cars would intensify these problems. - a recent survey of the village in relation to identifying future housing needs for local people, resulted in an anticipated demand of less than 10, so any new town would not be meeting local needs. It would also not be related to where employment is based resulting in virtually all those moving to the new town having to travel to work, mostly by road and so increasing problems on the A27, as identified above.

Reason for comment:
But the road & rail infrastructure must be improved if we are to attract more employers to the area - hence justify the need for more housing schools GPs etc

Consultee ID: piegrome
106453

Part of document: ☑ option
Option 18j

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
There are many reasons for dis agreeing with this suggestion most already listed by other objectors. As there is little opportunity for local employment most of the breadwinners would have to commute by car or rail. Neither the A27 or A22 can carry much more traffic without major upgrades (dual carriageways) Increasing the number of stopping trains at the station will further increase the congestion at the level crossing - abridge would only be possible if some existing buildings were removed The station car parks are very limited and often full now - there is very limited opportunities for increasing there sizes - where would the commuters park there cars?

Consultee ID: piegrome
106453

Part of document: ☑ option
Option 27d

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
The A27 between Beddingham and Polegate are part of the main south coast route between Southampton and Ashford and as a result it carries heavy vehicles as well as commuters and local traffic. Much more traffic than a simple single carriageway road should. Good transport links both road and rail are an essential requirement for encouraging major employers to site their facilities in the region A motorway standard road along the south coast is essential

Question 31a

Section of Document:

Reason for comment:
But are the Wealden planning staff strong enough to withstand the pressures to add more housing and associated infra-structure than the area can absorb, The pressures will come from developers, higher regional and central government?

Consultee ID: Mr & Mrs Harrison
Agent ID: 106454
Part of document: chapter

Part 1

Section of Document: Context

Reason for comment:
No such goals can be met by providing required expansion in the areas of lower natural beauty and these areas are better suited and prepared for an expansion of affordable housing

Consultee ID: Mr & Mrs Harrison
Agent ID: 106454
Part of document: option

Option 2a

Section of Document:

Reason for comment:
I would like to see a higher percentage of renewable energy sources if at all possible.
Option 2b

Reason for comment:
We should set the bar high 50% should be an and individual areas should be given targets and incentives for hitting a higher rate sooner.

Option 3a

Reason for comment:
If land must be built upon and it should only be land in areas of a lower level of natural beauty, such land must only be built upon is there is a clear vital demand for its use.

Option 3b

Reason for comment:

Option 3c

Reason for comment:
Option 3d

Reason for comment:

It is vital that we build housing where there is a direct and appropriate need for such housing. It would be wrong to jeopardise AONB with housing built before the business demand was sufficient. But AONB should not be jeopardised just for a small business need...remember many people are still able to commute to work by bus or car from towns.

Option 4a

Option 4b

Hailsham is ideal as not on the Key AONB and with a town and business to support new housing.
Option 5a

Section of Document:

Reason for comment:
Villages in Kent and Sussex are the envy of the rest of the country and boundaries must be maintained. Towns on the otherhand will natuarly expand and I no reason to stop expansion of Towns in the right manner.

Option 5b

Section of Document:

Reason for comment:
No because then the two will merge and you are just creating a town.

Question 5c

Section of Document:

Reason for comment:
Boundaries are there for a reason..to protect the existance of small villages and towns, to break these boundaries will threaten the existance of such places.

Option 6a

Section of Document:

Reason for comment:
At :Least 80% in towns and only 20% elsewhere if it is definately required and is right for villages

Option 7a

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree
Reason for comment:
Your classification is not correct, there are certainly some areas that will be able and even pleased to take on extra housing which will benifit local business. however in the main classifications are optimisic about the amount of extra housing needed to support business, some areas like my village of Rotherfield has a Post office, stores and a couple of pubs, this is enough for the population as it stands and we do not need more housing to support it.

Reason for comment:

The Village of Rotherfield is in near perfect balance with the level of business and amenities being just right for a village of our size. The introduction of up to 150 new homes would put the village out of balance and put undue strain on those amenities in particular the surgery and school facilities. Rotherfield is also in an AONB and this beautiful village is home to people who wish to keep it the way it is. If they wanted affordable housing they would move to one of the local towns. Affordable housing would not fit in with the current local demographics and would almost certainly prove the sort of eyesore people in the village would wish to avoid. In addition the local road system is already under strain and would not be helped by additional housing. This a quite village in good balance, please do not go and upset it!

Reason for comment:

It is misleading to describe this as 'Berwick Station' as it encompasses much of Arlington as well. This is a totally inappropriate site for a new town - it will lead to infill development between Eastbourne, Polegate and Hailsham and destroy much of the natural beauty of the Cuckmere valley.

Reason for comment:
This consultation has been a very poorly publicised and the response period has been too short. This document is huge and takes a very long time to digest, even without reading all the supplementary strategies and reports. The format lends itself to 'nimbyism' as it is difficult to give the same consideration to questions about areas one doesn't know well. It is not possible to submit a comment (such as this one) without checking the agree/disagree box even when this makes no sense.

Ms Yates

Question One

Settlements in the High Weald Area of Outstanding Natural Beauty

Disagree

Reason for comment:

The Weald's AONB is under great pressure from housing development, but we have the planning policies to safeguard the countryside, the villages and the views of the villages from surrounding hills. PPS7 must be adhered to in all cases.
Option 2a

Reason for comment:
10% of energy by renewable sources is a good start. I hope we can go on from there with solar and wind generating.

Option 2b

Reason for comment:
I think this is possible, together with insulation and energy saving.

Option 3c

Reason for comment:
Small businesses including farming need to be encouraged.

Option 5a

Reason for comment:
Settlement boundaries should be maintained. They are the key to keeping the Weald's balance between countryside and small scale village character.
Option 20a

Reason for comment:
To even think of Rotherfield and Town Row as having 'Growth Potential'!

Option 20b

Reason for comment:
Wadhurst has already taken more than it is able of new, particularly large houses for well-off commuters. It is becoming a large sprawling mess. We must preserve what there is left of this Wealden village.

Option 20c

Reason for comment:
Mayfield, one of the finest villages could follow Wadhurst in becoming a suburbia surrounding a sad, once beautiful ancient place. It is a matter of SPACIAL sense: villages need to have open spaces around them.
Consultee ID: Ms Yates
Agent ID: 106457

Part of document: ☑ option
Question 20d

Section of Document:

Your View ☑ Disagree

Reason for comment:

We are being asked to choose between a set of false options. Wealden Council is being asked by a government who does not care about England or the countryside, to build thousands of houses and there is no place for them. Wealden Council has a duty to preserve the countryside and the villages and it should say so.

Consultee ID: Mrs Goodwin
Agent ID: 106461

Part of document: ☑ option
Option 18j

Section of Document:

Your View ☑ Disagree

Reason for comment:

Because of water shortages, flooding, traffic, landscape and biodiversity issues.
I object very strongly to residential and employment development on this site for the following reasons: 1. There seem to be no 'material considerations' within the terms of section 54A Town & Country Planning Act 1990 which could reasonably indicate that this appeal should be determined other than in accordance with the East Sussex County Structure Plan, the adopted Wealden Local Plan and the Non-Statutory Wealden Local Plan. 2. It is close to the neighbouring High Weald Area of Outstanding Natural Beauty (AONB). Both can be seen clearly from the other. An intrusive major development next to an AONB is likely to have a detrimental effect on the AONB itself. 3. It would obliterate the strategic green countryside gap between Uckfield and Maresfield leading to unsightly urban sprawl. 4. It would inflict permanent aesthetic and ecological damage on the landscape, with its unspoilt rural countryside, which also currently acts as a natural defensive shield to Uckfield. The proposal would significantly increase trampling as well as noise, light, CO2 and toxic chemical pollution locally. The adjoining Woodland Trust SNCI at Lake Wood already suffers vandalism even though there are no homes in the vicinity. The children from 750 new homes would quickly find that Lake Wood, the woodland ghylls, ancient woodland, wetland, unimproved grassland and rock outcrops on the neighbouring site of the proposed development provided them with a convenient playground. Even innocent adventures such as building camps, lighting bonfires, picking wild flowers, climbing trees and damming streams would cause unsustainable and progressive physical, chemical and biological degradation of the habitat. The proposal to develop the ancient woodland as a public-access country park would increase the environmental disturbance. Hundreds of domestic cats would further endanger wildlife by annually killing thousands of small birds, mammals, reptiles and amphibians which would otherwise help to support the food chain for rarer predator animals. A healthy wood is not just a collection of trees, it is a balanced community of many hundreds of different species of plants and animals. There would be a progressive damaging effect on the biodiversity of a large area of healthy ancient woodland: leaving us with trees and little else in a few years time. The rocks, water, plants and animals of Downlands Farm, Budletts Common and Lake Wood are of exceptional quality. For example some key species on the site include wood warbler, lesser spotted woodpecker, common sandpiper, turtle dove, great crested newts, dormice and badgers: they should be conserved, not put at risk. 5. It would fragment existing habitats which would make it more difficult for wildlife to range widely either during the mating season or for feeding. 6. The hydrology of the site is such that it yields unusually pure spring water which helps support the extraordinary biodiversity of the site and surrounding area. 7. There has been no attempt by the developer to assess the potential ecological impacts on the Shortbridge Stream which the proposed development will drain into. This is a particularly sensitive environment and given that the minor streams flowing through the development site are tributaries of it, there is clear connectivity between the development site and the Shortbridge Stream itself. Therefore it seems to be important that in determining this planning appeal the consideration of impacts should extend downstream from the development site to include the full length of the ghyll streams and also the Shortbridge Stream from the point of entry of the ghyll streams downstream as far as its confluence with the main River Ouse. In view of the ability of the Ouse sea trout stock to use very small streams for spawning, the ghyll streams (including those stretches downstream of the site boundary) should be regarded as potential sea trout spawning habitat and should be properly and independently surveyed to establish whether they are used by sea trout. 8. The developer has made wholly inadequate proposals for protection of the landscape, habitats, flora, fauna and geological features of the site. For example the developer wants to pipe the ghyll streams which beggars belief as a protective measure! 9. Uckfield’s infrastructure struggles to cope with its present population. The High Street is usually congested and the car parks are usually
full during working hours. There is not even an adequate station car park for rail passengers. This development would produce about 4,000 - 9,000 extra traffic movements per day and many of them would be to escape from the development via the A22 and rat runs like Snatts Road to circle round and re-enter the town. The developer seems to have ignored or cynically underestimated this issue. 10. The proposed industrial/employment area seems superfluous in view of the many vacant premises in Uckfield's Bellbrook Business Estate and the new business estate currently being developed in nearby Maresfield. Most of the residents of the proposed 750 houses would commute to work outside Uckfield. 11. The likely presence on the site of archaeological remains related to John of Gaunt make it essential that a thorough professional independent archaeological assessment be undertaken.

Your View ☒ Agree ☐ No opinion ☐ Disagree

Reason for comment:

I feel that residential or employment development at or near Ringles Cross would be highly undesirable for the following reasons: 1. There seem to be no 'material considerations' within the terms of section 54A Town & Country Planning Act 1990 which could reasonably indicate that this appeal should be determined other than in accordance with the East Sussex County Structure Plan, the adopted Wealden Local Plan and the Non-Statutory Wealden Local Plan. 2. It is close to the neighbouring High Weald Area of Outstanding Natural Beauty (AONB). Both can be seen clearly from the other. An intrusive major development next to an AONB is likely to have a detrimental effect on the AONB itself. 3. It would erode the strategic green countryside gap between Uckfield, Five Ash Down and Maresfield leading to unsightly urban sprawl. 4. It would inflict permanent aesthetic and ecological damage on the landscape, with its unspoilt rural countryside, which also currently acts as a natural defensive shield to Uckfield. The proposal would significantly increase trampling as well as noise, light, CO2 and toxic chemical pollution locally. The site is near to the Woodland Trust SNCI at Lake Wood which already suffers vandalism even though there are no homes in the vicinity. The children from hundreds of new homes would quickly find that the woodland ghylls, ancient woodland, wetland, unimproved grassland and rock outcrops neighbouring the site of the proposed development provided them with a convenient playground. Even innocent adventures such as building camps, lighting bonfires, picking wild flowers, climbing trees and damming streams would cause unsustainable and progressive physical, chemical and biological degradation of the habitat. The proposal to develop the ancient woodland as a public-access country park would increase the environmental disturbance. Hundreds of domestic cats would further endanger wildlife by annually killing thousands of small birds, mammals, reptiles and amphibians which would otherwise help to support the food chain for rarer predator animals. A healthy wood is not just a collection of trees, it is a balanced community of many hundreds of different species of plants and animals. There would be a progressive damaging effect on the biodiversity of a large area of healthy mature and ancient woodland: leaving us with trees and little else in a few years time. 5. It would fragment existing habitats which would make it more difficult for wildlife to range widely either during the mating season or for feeding. 6. Uckfield's infrastructure struggles to cope with its present population. The High Street is usually congested and the car parks are usually full during working hours. There is not even an adequate station car park for rail passengers. This development would produce about thousands of extra traffic movements per day and many of them would be to enter the town centre.

I think this proposal is a terrible idea so I object to it for the following reasons: A. There seem to be no 'material considerations' within the terms of section 54A Town & Country Planning Act 1990 which could reasonably indicate that this appeal should be determined other than in accordance with the East Sussex County Structure Plan, the adopted Wealden Local Plan and the Non-Statutory Wealden Local Plan. B. It is close to the neighbouring High Weald Area of Outstanding Natural Beauty (AONB). Both can be seen clearly from the other. An intrusive major development next to an AONB is likely to have a detrimental effect on the AONB itself. C. It would obliterate the strategic green countryside gap between Uckfield and Maresfield leading to unsightly urban sprawl. D. It would inflict permanent aesthetic and ecological damage on the landscape, with its unspoilt rural countryside, which also currently acts as a natural defensive shield to Uckfield. The proposal would significantly increase trampling as well as noise, light, CO2 and toxic chemical pollution locally. The adjoining Woodland Trust SNCI at Lake Wood already suffers vandalism even though there are no homes in the vicinity. The children from 750 new homes would quickly find that Lake Wood, the woodland ghylls, ancient woodland, wetland, unimproved grassland and rock outcrops on the neighbouring site of the proposed development provided them with a convenient playground. Even innocent adventures such as building camps, lighting bonfires, picking wild flowers, climbing trees and damming streams would cause unsustainable and progressive physical, chemical and biological degradation of the habitat. The proposal to develop the ancient woodland as a public-access country park would increase the environmental disturbance. Hundreds of domestic cats would further endanger wildlife by annually killing thousands of small birds, mammals, reptiles and amphibians which would otherwise help to support the food chain for rarer predator animals. A healthy wood is not just a collection of trees, it is a balanced community of many hundreds of different species of plants and animals. There would be a progressive damaging effect on the biodiversity of a large area of healthy ancient woodland: leaving us with trees and little else in a few years time. The rocks, water, plants and animals of Downlands Farm, Budletts Common and Lake Wood are of exceptional quality. For example some key species on the site include wood warbler, lesser spotted woodpecker, common sandpiper, turtle dove, great crested newts, dormice and badgers: they should be conserved, not put at risk. E. It would fragment existing habitats which would make it more difficult for wildlife to range widely either during the mating season or for feeding. F. The hydrology of the site is such that it yields unusually pure spring water which helps support the extraordinary biodiversity of the site and surrounding area. G. There has been no attempt by the developer to assess the potential ecological impacts on the Shortbridge Stream which the proposed development will drain into. This is a particularly sensitive environment and given that the minor streams flowing through the development site are tributaries of it, there is clear connectivity between the development site and the Shortbridge Stream itself. Therefore it seems to be important that in determining this planning appeal the consideration of impacts should extend downstream from the development site to include the full length of the ghyll streams and also the Shortbridge Stream from the point of entry of the ghyll streams downstream as far as its confluence with the main River Ouse. In view of the ability of the Ouse sea trout stock to use very small streams for spawning, the ghyll streams (including those stretches downstream of the site boundary) should be regarded as potential sea trout spawning habitat and should be properly and independently surveyed to establish whether they are used by sea trout. H. The developer has made wholly inadequate proposals for protection of the landscape, habitats, flora, fauna and geological features of the site. For example the developer wants to pipe the ghyll streams which beggars belief as a protective measure! I. Uckfield’s infrastructure struggles to cope with its present population. The High Street is usually congested and the car parks are usually full during working hours. There is not even an adequate...
Consultation Responses

station car park for rail passengers. This development would produce about 4,000 - 9,000 extra traffic movements per day and many of them would be to escape from the development via the A22 and rat runs like Snatts Road to circle round and re-enter the town. The developer seems to have ignored or cynically underestimated this issue. J. The proposed industrial/employment area seems superfluous in view of the many vacant premises in Uckfield's Bellbrook Business Estate and the new business estate currently being developed in nearby Maresfield. Most of the residents of the proposed 750 houses would commute to work outside Uckfield. K. The likely presence on the site of archaeological remains related to John of Gaunt make it essential that a thorough professional independent archaeological assessment be undertaken.

Mrs Mailley-Smith

Part of document: Option 14a

Section of Document:

Reason for comment:

I object very strongly to development on this site for the following reasons: 1. There seem to be no 'material considerations' within the terms of section 54A Town & Country Planning Act 1990 which could reasonably indicate that this appeal should be determined other than in accordance with the East Sussex County Structure Plan, the adopted Wealden Local Plan and the Non-Statutory Wealden Local Plan. 2. It is close to the neighbouring High Weald Area of Outstanding Natural Beauty (AONB). Both can be seen clearly from the other. An intrusive major development next to an AONB is likely to have a detrimental effect on the AONB itself. 3. It would erode the strategic green countryside gap between Uckfield, Five Ash Down and Maresfield leading to unsightly urban sprawl. 4. It would inflict permanent aesthetic and ecological damage on the landscape, with its unspoilt rural countryside, which also currently acts as a natural defensive shield to Uckfield. The proposal would significantly increase trampling as well as noise, light, CO2 and toxic chemical pollution locally. The site is near to the Woodland Trust SNCI at Lake Wood which already suffers vandalism even though there are no homes in the vicinity. The children from hundreds of new homes would quickly find that the woodland ghylls, ancient woodland, wetland, unimproved grassland and rock outcrops neighbouring the site of the proposed development provided them with a convenient playground. Part of document: Option 14a
Section of Document:

Reason for comment:
I disagree primarily because I believe in the importance of green space to people's physical and mental wellbeing. This open space is particularly valuable because of its ecology and landscape and proximity to other important sites. The numbers of people with mental health problems is increasing and expected to increase further and. large areas of green space will become more valuable. This area could be opened as a country park for the benefit of the local population as well as visitors to the area because the landscape and views are outstanding.

Consultee ID: Mr Brooke  
Consultee ID: 106466

Part of document: Part 1
Section of Document: Context

Reason for comment:
This section clearly sets out the purpose of the framework and this is understood. However it is clear that the levels of housing proposed for the area have been dictated by SERO, a non elected body and are not based upon the organic housing needs of the area but on an objective of shifting population from large towns and suburbs of London to the rural areas of the South East.

Consultee ID: Mr Brooke  
Consultee ID: 106466

Part of document: Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
Generally disagree except for small scale, sympathetically designed units to meet needs within villages and towns for the people who wish to stay in a rural/semi-rural area, including in particular the provision of bungalows for the elderly who wish to downsize. However development that does not meet this broad criteria should be strongly discouraged not just in AONB but in the majority of rural areas in order to maintain that characteristic..
Option 2a

Reason for comment:
Idealistic aims but is it feasible. Is it 10% (or 20%) of new development that has to meet this requirement or new development to make up 10% of the South East target? In either event I think that much further thought needs to be given to a) the effect on house building costs for the young and the elderly in Wealden who should be the targets for any housing development and b) the achievable environmental and economic benefits of such local schemes against national policy, for instance, of utilising nuclear power for electricity provision, as in France.

Option 3a

Reason for comment:
Only if site was a previously identified brown field site and then only when there is a clear local need for additional housing.

Option 3b

Reason for comment:
In principle agree that existing business areas/premises should be retained for this purpose but what is the test for a clear market existing for business premises?
There are more factors applicable to business location that plentiful housing in any one area. I would have thought that organic business creation and expansion will lead to a gradual increase in local housing demand. Relocation of an established enterprise to a new location normally occurs as previous large scale industries or undertakings cease operations and this leaves a large labour market already housed. The notion that new housing should occur only with some kind of immediate and compensating balance between that and business development seems a bit unrealistic. The principle of bringing commuters back into local employment is a laudable sustainability objective but without detailed knowledge of where people commute to and who they work for this may be difficult to achieve.
Mr Brooke

Option 5a

Section of Document:

But only subject to strict criteria

Consultee ID: 106466

Part of document: option

Option 5b

Section of Document:

But what will these criteria be? Brown field sites only? Development potential only for local growth? Development which does not cause pressure to fill in space between existing separate settlements? How will the criteria be developed and how will they be subject to public support or scrutiny?

Consultee ID: 106466

Part of document: option

Question 5c

Section of Document:

East Hoathly's proposed development on the brown field site at South Street and the green field site at Church Marks Lane should now be regarded as the permanent settlement boundaries for development. Further expansion of the village is not in line with the strategic objectives to maintain village character and will inexorably lead to further green field development to the west of the Church Marks Lane development and lead to gradual merging of the settlement with Halland. The natural green barrier between the existing settlement boundary and the bypass and also that between the village and the attractive rolling, forested countryside towards Chiddlingly should be maintained.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Brooke

Part of document: Option 6a

Section of Document: Agree in principle because towns and urban areas generally will have more cost effective infrastructure and transport links as well as the likely employment opportunities for new settlement. However it would be impractical to be overly prescriptive and each case must be considered on merits and its adherence to established development principles.

Consultee ID: Mr Brooke

Part of document: Option 6b

Section of Document: Disagree

Reason for comment:

Consultee ID: Mr Brooke

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:

These figures are arbitrary although appear reasonable. However the number of units allowed per village should be the number that will match the organic growth of the village and not to neatly divide up the impact on the area of providing additional housing by central government dictat.
Halland has no current infrastructure and an 1800 unit development is too small by your own criteria to bring enhanced infrastructure to make this a self sufficient village. The site if developed would then led to inexorable pressure to subsume East Hoathly by further ribbon development and would lead to it becoming a dormitory commuter suburb of a larger Uckfield with poor transport links and no train service.

Reason for comment:

The site if developed would then led to inexorable pressure to subsume East Hoathly by further ribbon development and would lead to it becoming a dormitory commuter suburb of a larger Uckfield with poor transport links and no train service.

Reason for comment:

12e Sandy Cross Lane is a narrow country lane quite unsuitable for the fast and heavy traffic already using it, making it hazardous for pedestrians. Any additional traffic which would inevitably be occasioned by building works is unthinkable. The area south of Sandy Cross Lane is an AONB and as such should be preserved for the enjoyment and sanity of walkers and the residents of the Lane who have chosen to live there and for future generations of country lovers.
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:

Any new development in an Area of Outstanding Natural Beauty would ultimately destroy this status, the outline of the landscape would be altered, not only local to the development but the surrounding area also, amenities and roads would sub-divide and ultimately lead to more encroachment and therefore loss of what is an economic asset (tourist destination) for the region.

Question 7e

Section of Document:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
For villages this depends on the land available. Large developments of 15+ can change the character of any village large or small and restrict the possibility of development on 'old' land. Also we need to ensure affordable housing kicks in with even smaller developments, a development of 3 houses should include one as 'affordable' otherwise we could end up with no affordable housing in the villages.
Reason for comment:
Any development should be within the current boundaries of the village. In Forest Row there is limited room for development to the west of the village. Any development North would be on the flood plains and due to recent events would be un-wise. The Village has a vibrant character and diversity because it has limited potential for growth within its borders. There is a close community and this and the fact that we are surrounded by beauty attract people on a tourist and regular basis. The Village has a vibrant character and diversity because it has limited potential for growth within its borders. There is a close community and this and the fact that we are surrounded by beauty attract people on a tourist and regular basis. The Village would be severely degraded as its character and status as a Village would be put in jeopardy affecting tourism and businesses, which exist because of the unique character of the Village. Development North would: a. Create a development prone to flooding; b. Create more flooding elsewhere in the village, as the ground would be unable to then absorb as much water causing the water to collect elsewhere; c. Create undesirable/unmarketable housing prone to flood damage raising insurance premiums locally; d. Infringe on the character and beauty of the village; e. Ultimately join up with Ashurst Wood as a step to turning Forest Row into a suburb of East Grinstead;

Reason for comment:
Let the people who live in the Villages decide!

Reason for comment:
The density of housing should reflect the character of the area, accessibility and the housing needs. There will obviously be a higher density with 2 bedroom houses than with a 5 bedroom house. These questions do not take any of this into account. We should be looking at creating housing that frees up existing housing e.g. more retirement settlements that free up more family homes which thus allows growing families to move locally freeing up smaller properties for first-time buyers!
Option 24b

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty  
Reason for comment: communities have to live and some limited development is OK if it meets strict guidelines
Option 14a

Reason for comment:
this is an area of high landscape value and further development is inappropriate here. Also, the infrastructure is inadequate to support further development.

Option 14a

Reason for comment:
Development here would damage the rural setting of Uckfield and Maresfield and the rural character of the surrounding villages and countryside. This area is a strategic countryside gap between Uckfield and villages to the north. The area is clearly visible from two AONBs. It is a diverse and ecologically viable habitat, including ancient woodlands and ghyll valleys. Development would degrade this habitat, which is irreplaceable. The area has a poorly developed infrastructure and most of the roads (e.g. Snatts Road) are narrow and unable to take further traffic.

Option 14b

Reason for comment:
Ringles Cross is surrounded by attractive countryside, some of which is of high landscape value. The roads are generally at capacity, and some (e.g. Snatts Road) are narrow and unsuitable to take further traffic.
Consultee ID: Mr Wallace
Agent ID:
Consultee ID: 106470

Part of document: Option 21a

Reason for comment:

Strongly opposed to expanding existing Polegate/Willindon area west of the A22. It is marvellous that the South Downs are so free of surrounding development except in the existing ares near eastbourne & Brighton. Every attempt should be made to preserve this beauty.

But is unlikely to prove an attractive alternative route to London.
To be on the route from Brighton & Lewes to Eastbourne it (& associated development) would have to encroach on greenfield land to the west of the existing A27.

As well as leading to an urban corridor at the foot of the South Downs, it would greatly increase traffic in the area, including through Alfriston, along unsuitable roads.

Question 32a
Section of Document:
Your View  ☑ Agree  □ No opinion  □ Disagree
Reason for comment:
In general
Westham village services do not have "good access", especially from the north, so this value judgement is unjustified in the absence of any details of the possible development. Objectively, most of the new dwellings would be "Within easy driving distance of a small high street having very few parking spaces". The high street was not built to be the focus of a group of modern housing estates and it is difficult to see how the junction with Peelings Lane could take more traffic and parking could be provided without detriment to the existing village centre and the quality of life of its residents. It is particularly difficult to see how the access to the primary school could cope with a larger intake. It would make sense to move the primary school out to a location where adequate parking and safe road crossing could be provided, and to build homes in the village centre where the school now is. (NB If the flood risk is considered too great for homes, then it's too great to leave the primary school there anyway.) The castle and adjoining high streets of Pevensey and Westham are picturesque, but do not suffice to support much tourist industry, as evidenced by the planning application for change of use of the Priory Court Hotel. With the coast a mile or so southeast and the so-called "trunk" roads west to Lewes and Brighton, east to Hastings and north to London all single-carriageway with the exception of the stretch between Dittons and Boship, communications with other regions are too poor for the area to attract other wealth-creating industries. New homes in the area are therefore unlikely to lead to new local jobs for the new house purchasers. Building on Westham farms principally to assist Eastbourne workers to move out into the country and commute back into the town should have no place in a "sustainable development" strategy.

Reason for comment:
For Forest Row any house building should be eco friendly. No farmland should be used as we shall need it to feed ourselves in the future. for new energy supply I would suggest a wind farm on tip of Ashdown Forest where radio masts used to be. Why not buy private estates with plenty of land to build community centres or transform large buildings into flats as they come onto the market? Decisions over where development could take place can only come from inside the district and those who understand the needs of our communities and the existence of character of Wealden landscape not from anybody outside it, although financially it has to fit into the whole of the country. X housing.

But very limited - in AONB’s only brownfield sites, such as farm building conversions etc, again encouraging sustainable material use and renewable energy etc...

Absolute must! The visual impact of wind turbines on the South Downs or indeed on the High Weald may be undesirable to many, but at least it is reversible! If we find in years to come that wind turbines are obsolete owing to other technological advances, energy saving measures, or other solutions to climate change, they can be dismantled and removed. The potential effects of climate change on the landscape and the people on this planet will not be that easy to rectify! We must do EVERYTHING we can, NOW to curb climate change. I therefore, wholeheartedly, support this policy.

Part of document: □ document □ chapter □ section ✔ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:
We should try to add more housing to existing larger towns in the form of highrise buildings.

Consultee ID: Mr Huikeshoven
106480

Part of document: □ document □ chapter □ section ✔ option
Option 2a

Section of Document:

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:
I think we should set the target higher if at all possible. After all we do not really want the large numbers of houses forced upon us by central government. If we have to have some, let them at least be models of energy efficiency even if this adds to the initial cost. Solar panels seem to be the best solution at the moment: they are efficient and non-invasive. Windturbines should be avoided : they are eyesores and a source of noise pollution.
Option 2b

Reason for comment:
This requirement should be the starting point and subject to upward review periodically, as and when technology progresses. In addition, in order to further reduce the carbon footprint of new housing, these should be built to a minimum standard of 3 Star as defined by The Code for Sustainable Homes with immediate effect, and this standard be raised gradually to the maximum standard of 6 Star by 2012. This appears to be possible in continental Europe, so why not here?

Option 19a

Reason for comment:
Many parts of the F.R. infrastructure are already strained and could not possibly cope with a 20% increase in population. Healthcare, schools, roads/traffic, to name a few. Traffic is my biggest worry: the A22 goes right through the village and, even before a 20% increase, we frequently get clogged up already. Crossing the A22, in order to get from one side of the village to the other will become very difficult.

Option 24a

Reason for comment:
It is an arbitrary figure, creating a straitjacket. Development in individual villages should be allowed to reflect the individuality of each village; not a "hamfisted" catch-all percentage.
Consultee ID: mr Huikeshoven
106480

Strict measures to avoid "buy to let" will be required.
Option 25c
Section of Document:

Reason for comment:
Another hamfisted dictat. Not all villages can be treated in the same way.

Option 25d
Section of Document:

Reason for comment:
Rural areas are not the same as towns, whether one likes it or not.

Option 25f
Section of Document:

Reason for comment:

Option 25g
Section of Document:

Reason for comment:
And the figures used for "cars per household" should take into account the -whether we like it or not- continuing growth in car ownership. Over the years I have seen kerbside parking increase to such an extent that many streets in our towns and villages start to feel like ski slalom courses.

It is nice if you can get it (as was the case with the cricket/tennis pavilion in Forest Row) but in general house building and provision of sports facilities are really to separate issues.
Consultee ID: Mrs Mayhew
106482

Part of document: Option 13a

Section of Document:

Reason for comment:
The edge of town location makes it unsustainable and the biodiversity of the area would be compromised by such a large scale development.

Consultee ID: Mr Foley
106483

Part of document: Part 10

Section of Document: Details of How to Comment

Reason for comment:
I believe that the South East has borne more than its share of residential development over the last few years and that, in particular, the wrong type of housing has been built in Wealden. Previous development has been incentivised by the wish to maximise profit to developers and does not cater to the needs of the communities themselves. The crying need for villages in Wealden, as elsewhere, is for low cost starter homes so that children who have been brought up in those communities have a chance of finding affordable housing within them, if they so wish. Without a balance of age groups, including those in starter homes, primary schools will find their rolls declining. The inherent problem seems to be the cost of the underlying land which pushes up the cost of houses. It is made worse by the impotence of local councils to influence what planning applications that come before them. What is needed is some form of positive discrimination in favour of low cost housing - directed towards the needs of the people in the communities. Surely it should be possible to build houses of a size to suit those buying for the first time and, if necessary, include covenants that restrict their sale to people who have lived or worked in the village for, say, 5 years. This approach is common place on the Isles of Scilly, for example, so why not use it here? I believe also that the Wealden infrastructure would need to be vastly improved to sustain any significant level of residential building. For instance, our local village pub in Rotherfield, the Kings Arms, is struck by large vehicles almost every month and little seems to have been done to redirect such vehicles elsewhere. Any large scale building, with the consequent extra traffic on our already congested and sometimes narrow roads would simply make the traffic congestion worse. Whilst I recognise that Rotherfield, like all villages in Wealden, must bear some share of extra homes, the proposal to build another 150 new houses in Rotherfield seems completely out of proportion with the capacity of the infrastructure and would destroy the nature of the village.
I accept that new housing in the affordable and open market is required. Wealden has a variety of locations where development could take place. This could provide large numbers of affordable houses in numerous rural locations where 'locals' complain they are squeezed out due to unaffordable prices. In addition higher value houses will attract investment to those areas. Whichever, it needs to be a proportionate mix. So why do I DISAGREE? Having my own concerns regarding Fresh water supply, Sewage disposal, Road infrastructure and Medical facilities and not fully understanding the whole process, I had to read the full Consultation Document [well most!]. It is fairly apparent without reading the Consultation Document that the supply of fresh water to South Wealden is stretched at the moment, 2005 and 2006 saw hosepipe bans in force. Even the year 2026 does not look far enough ahead for untreated fresh water storage, yet it appears South East Water are not looking anywhere near that far. It was interesting to read the comments from Southern Water and the Environment Agency regarding water and sewage treatment. Essentially, unless either new treatment works are built or current ones expanded, then for a number of reasons those systems cannot cope beyond other than a slight increase in new houses. The road infrastructure is in serious need of improving for current surfaces and creating new roads. The A27(T) west of Polegate is appalling bad. Whilst the Polegate by Pass new A22 has been a welcome improvement, it has only partially addressed the whole area road problem. [If the traffic lights and road markings at Cophall roundabout are an indication of what is to come, can we rely on the Highways Agency judgement?] Medical facilities from GP surgery to Hospital are in questionable ability to deal with large increases of population. In our area we have a constant battle with ward closures, cancelled operations and, the potential of withdrawing the Accident and Emergency unit or Maternity [perhaps both] from the EDGH. BEFORE a sod is turned or a brick laid the people of the area should be told how many new houses are actually going to be built. THEN and BEFORE any housing development takes place the Utilities companies and Facility providers should upgrade to the proposed new capacity PLUS 10%. Thank you.

A blanket ban on development is too inflexible. There should be strict regulation but this should be fine-tuned to allow a response to local circumstances and local needs. Small scale developments to meet the need for affordable housing (including first time buyers) should be allowed.
Part of document: Option 2a
Section of Document: Option 2a
Reason for comment: All new development should meet government targets

Part of document: Option 2b
Section of Document: Option 2b
Reason for comment: Wealden should aim for a higher target wherever this is viable.

Part of document: Option 3a
Section of Document: Option 3a
Reason for comment: Land allocated for employment purposes should not be left unused indefinitely but there needs to be strict criteria on alternative uses to prevent profit-maximising behaviour by landowners and developers. E.g. Planning permission for affordable housing only?

Part of document: Option 3b
Section of Document: Option 3b

- [x] option

Question 4e

Section of Document:

Your View  
- [x] Agree  
- [ ] No opinion  
- [ ] Disagree

Reason for comment:
More employment development in Uckfield should be considered to match the amount of new housing planned.
Option 5a

Section of Document:

Reason for comment:
This statement is contradictory. You cannot maintain boundaries and expand them at the same time.

Option 5b

Section of Document:

Reason for comment:
This policy would allow judgments to be made on a case by case basis without giving carte blanche to developers. The criteria should not be so strict as to make incremental growth impossible.

Question 5c

Section of Document:

Reason for comment:
All boundaries should be reviewed, taking into account such factors as the optimum size and shape of individual settlements, natural and man-made boundaries and proximity to other settlements.
Option 6a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

This question needs to be viewed in the context of other policies. If there are to be restrictions on development inside the AONB this rules out quite a large number of towns and villages. Any distribution of development is therefore not between urban and rural areas in general but between urban and rural areas outside the AONB. This would result in an even greater urban focus. There is both a need and a demand for housing in the villages which would not be met with this distribution. At the same time, focusing 80% of planned development in the few towns outside the AONB would lead to large-scale growth that would change the nature of the existing communities.

Option 6b

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

This question needs to be viewed in the context of other policies. If there are to be restrictions on development inside the AONB this rules out quite a large number of towns and villages. Any distribution of development is therefore not between urban and rural areas in general but between urban and rural areas outside the AONB. This would result in an even greater urban focus. There is both a need and a demand for housing in the villages which would not be met with this distribution. At the same time, focusing 75% of planned development in the few towns outside the AONB would lead to large-scale growth that would change the nature of the existing communities.

Question 6d

Reason for comment:

Question 6 ignores other alternatives to this approach; for example, the development of a new settlement to take the majority of the planned growth or the distribution of a percentage of growth to each individual settlement.
Consultee ID: Mr. Serpis
106485 Uckfield Town Council

Part of document: Option 7a
Section of Document:
Your View   Agree   No opinion   Disagree
Reason for comment:
A system of classification is useful and this one seems rational.

Consultee ID: Mr. Serpis
106485 Uckfield Town Council

Part of document: Option 7b
Section of Document:
Your View   Disagree
Reason for comment:
Agree with the principle but not the criteria proposed. Classifying villages within 5km of towns as having more growth potential is inviting the suburbanisation of the countryside and the spread of ‘urban sprawl’ as towns and villages grow towards each other.

Consultee ID: Mr. Serpis
106485 Uckfield Town Council

Part of document: Option 7c
Section of Document:
Your View   Disagree
Reason for comment:
Wealden has already discovered that planning housing development is easier said than done. Development should take place in line with local needs and demand. These are likely to change over the next twenty years so planning according to too strict criteria is doomed to failure.

Consultee ID: Mr. Serpis
106485 Uckfield Town Council

Part of document: Option 7d
Section of Document:
Your View   Agree
Reason for comment:
Such services are vital to village life and should be protected as far as possible. If they are uneconomic subsidies should be provided.

Reason for comment:
The reason given for these thresholds is that ‘There is a risk of the examination into site allocations becoming bogged down with hundreds of small site omission objections.’ Another, unstated, reason is that larger sites will generate higher infrastructure provision and affordable housing. There are also reasons against such a policy. Smaller, more distributed, sites may be preferable in terms of their impact on the landscape, infrastructure and character of a town or village. They also tend to be more deliverable. If sites are not included on the proposals map it should be made clear that the housing nevertheless counts towards any overall target for an area – and that pro-rata developer contributions to infrastructure development will be expected.

Consultee ID: 106485  Mr. Serpis  Uckfield Town Council

Part of document:  Option 14h

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

Development to the west of the A22 would breach the boundaries of the town allowing subsequent unchecked expansion.
Option 14a

Section of Document:

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that sites to the north of the town centre are preferable to those to the south. There are, nevertheless, concerns raised by the proposal as outlined. Parts of the site are of ecological value and some doubts have been expressed as to the developer’s ability to protect these adequately – especially if both sections go ahead. Ease of access to the by-pass is a point in favour of this site but the scale of the development, especially if both sections were to go ahead, would increase traffic congestion caused by residents accessing town centre services. This would be worsened if other northern sites were also developed and town centre road improvements to alleviate these problems would be required.

Option 14b

Section of Document:

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that sites to the north of the town centre are preferable to those to the south. There would be good access off the A22 and moderately good access to the town centre. Nevertheless the scale of development would exacerbate current traffic congestion problems and town centre road improvements to alleviate these would be required. The extent of development should be confined to those areas closest to Ringles Cross so as to maintain the gap between Uckfield and Five Ash Down and Coopers Green.

Option 14c

Section of Document:

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that further sites to the south of the town should not be developed. Vehicular access to the town centre from this site is poor and the development would add to current traffic congestion problems along Framfield Road and at the junction of Framfield Road and the High Street. The council is also concerned to protect the landscape and vistas in this area and to maintain the natural boundary between Uckfield and Framfield.
Consultee ID: Mr. Serpis  Agent ID:
106485  Uckfield Town Council

Part of document:  Option 14d

Section of Document:

Your View  

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that further sites to the south of the town should not be developed. Although there would be good access to southern road networks the scale of this development would exacerbate current traffic congestion problems in the town centre and road improvements to alleviate these would be required. There are also concerns that the ‘long term gradual extension of the town Southwards’ would lead to urban sprawl and change the current compact nature of the town. If the development linked through to Ridgewood Road, Ridgewood village, which is now on the fringe of Uckfield, would be completely swallowed up and lose its separate identity.

Consultee ID: Mr. Serpis  Agent ID:
106485  Uckfield Town Council

Part of document:  Option 14e

Section of Document:

Your View  

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that further sites to the south of the town should not be developed. There is not ‘Good access via Ridgewood to Uckfield’ as claimed in the consultation paper. Ridgewood Road is already congested and access to the town via the High Street would cause increased congestion at the Framfield Road and Bell Lane traffic lights. Development of this site would change the nature of Ridgewood from that of a rural village to that of a suburb of Uckfield. The landscape of the southern slopes is worthy of preservation and only the northern section could be developed without destroying important vistas.

Consultee ID: Mr. Serpis  Agent ID:
106485  Uckfield Town Council

Part of document:  Option 14f

Section of Document:

Your View  

Reason for comment:

Unless, and until, infrastructure development takes place, UTC considers that further sites to the south of the town should not be developed. This looks attractive as an infill site but access via Bridge Farm Road would cause increased congestion at the Framfield Road traffic lights suggesting the need for a new river crossing giving direct access onto Bell Lane.
UTC is keen to see the redevelopment of brown-field sites in the town centre to provide mixed retail, community and residential use. This redevelopment would provide services for the planned increased population and give the opportunity for road improvements to ease traffic congestion. Residential development on the flood plain should only take place if flood prevention measures are in place and/or appropriate building design is used.

These objectives are an ideal to be aimed at that fits in well with the vision for Uckfield emerging through public consultation over the last six months.

Reason for comment:
Maresfield retains a geographical separation from Uckfield which would not be jeopardized by the proposed growth.

Option 21b

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Development in Five Ash Down might take some of the pressure off the need to find more sites in Uckfield. There are some fears that if this development takes place as well as the Downlands Farm and Ringles Cross proposals this would destroy the gap between the village and Uckfield as well as adding to traffic congestion and putting pressure on Uckfield town centre.
Consultee ID: Mr. Serpis  
Agent ID:  
Uckfield Town Council

Part of document:  
Option 21c

Section of Document:

Your View

### Option 24a

**Section of Document:**

**Your View** | | Agree | No opinion | Disagree |

**Reason for comment:**

Higher densities would reduce green space to an unacceptable degree.

### Option 24b

**Section of Document:**

**Your View** | | | Agree | No opinion | Disagree |

**Reason for comment:**

Higher densities would reduce green space to an unacceptable degree.

### Option 24c

**Section of Document:**

**Your View** | | | Agree | No opinion | Disagree |

**Reason for comment:**

These densities may be appropriate for town centre development but not greenfield sites.

### Option 24d

**Section of Document:**

**Your View** | | Agree | No opinion | Disagree |

**Reason for comment:**
Option 25a

Section of Document:

Reason for comment:
There is a need for smaller dwellings for single people and first time buyers. Housing should be appropriate for the site. Flats should be low rise and designed to fit in with the environment. (e.g. mansion-style).

Option 25b

Section of Document:

Reason for comment:
The same figure should be applied to all towns.

Option 25c

Section of Document:

Reason for comment:

Option 25e

Section of Document:

Reason for comment:

Part of document:  □ document  □ chapter  □ section  ☑ option  
Option 26b
Section of Document:
Your View  ☑ Agree  □ No opinion  □ Disagree
Reason for comment:
Agree with the distribution throughout the District close to towns but consider sites within towns unsuitable.
Option 27a

Section of Document:

Reason for comment:
Bus services should follow development not the other way round. Current services reflect current not future need.

Option 27b

Section of Document:

Reason for comment:
New development will take place anyway. Instatement of transport services is a prerequisite for this and development can help to fund it. This should be an immediate not a long term priority, not dependent on prior development.

Option 27d

Section of Document:

Reason for comment:
Safety considerations are as important as the impact on the South Downs. The A27 runs along the foot of the downs for much of this route and could be dualled without great damage.

Option 27e

Section of Document:

Reason for comment:
Would ease town centre congestion.
Large households need more car parking spaces. The criteria should be discussed and tested. For example, the policy requiring fewer parking spaces for town centre dwellings is based on the erroneous assumption that such dwellings requires fewer spaces than similar size households in fringe locations.

<td>Reason for comment:</td>
<td>This is a must. We need to stop the need for travelling distances to work and this strategy would maximise the likelihood that residents in the new areas will be employed close to their place of residence.</td>
<td></td>
</tr>
</tbody>
</table>
Despite the natural beauty of the area, its low population density and extensive potential for sustainable and renewable power generation suggest the 10% target is not ambitious enough and therefore we should strive to achieve the highest possible renewable target.

There is no benefit to leave land undeveloped if a more realistic prospect comes forward.

Seems redundant. If the market need is significant enough, the pressure for redevelopment will not exist.

is just verbiage. It seems unlikely that circumstances will arise where there is a conflict between the stated new business development 'focus' and other alternatives (presumably large business development).
Section of Document:

General agreement to this principle but should be done with sympathetic consideration to the surroundings and the AONB.

Reason for comment:
The options here propose rather arbitrary proportions (on what basis are we to make the decision that one particular percentage split is more appropriate than another?). The majority of development should be based on need and available amenities and therefore each decision would depend on the infrastructure, employment opportunities, and housing demand in the proposed locations. Paragraph 4.26 supports this view. This philosophy would assist in reducing the need to travel distances.

Reason for comment:
Growth can only come with a properly structured plan to develop and improve infrastructure and services.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: Option 7b

Section of Document:

Your View Agree No opinion Disagree

Reason for comment:
Whilst Crowborough is not a village, the viewpoint given represents a good guide for classification.

Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: Option 7c

Section of Document:

Your View Agree No opinion Disagree

Reason for comment:
Whilst Crowborough is not a village, the viewpoint given represents a good guide for focussing development in villages with the greatest capability for supporting growth in a reasonable strategy.

Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: Option 7d

Section of Document:

Your View Agree No opinion Disagree

Reason for comment:
If premises are not used then they should be considered for change of use because change of use in many of these cases is likely to be due to the business becoming uneconomic.

Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: Option 9c

Section of Document:

Your View Agree No opinion Disagree

Reason for comment:
Less impact on AONB and the shared approach is best to ease the burden on an already overstretched Wealden infrastructure.
Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
As long as it can be demonstrated that there is a housing need. Thirty dwellings (the threshold applicable to Crowborough) may be far too low. Again, the size of the development must be proven and be in line with the local infrastructure.

Option 11a

Reason for comment:
Affordable housing near town centre providing there are sensible densities.

Option 11b

Reason for comment:
Crowborough Town Council has already identified this area for recreation. Any development to this area would likely involve the loss of further recreation land. PPG 17 is quite clear that Crowborough is woefully short of such land. This site would also impact on land designated as AONB.
Option 11c

Reason for comment:
Development would open up the town. The development could bring other benefits such as new facilities, infrastructure, localised shopping by the addition of a parade of shops and allotments, all built into the cost of the development. Easy access onto the main roads network.

Option 11d

Reason for comment:
Currently there is no road infrastructure that satisfactorily serves this area now, let alone sufficient to support more housing development.

Option 11e

Reason for comment:
Currently there is no road infrastructure or amenities that satisfactorily serves this area now, let alone sufficient to support more housing development.

Question 11g

Reason for comment:
Question 11h

Reason for comment:
Suggest that Crowborough relocates the current industrial site from Jarvis Brook to the area in and around the MOD camp site. Re-develop the current industrial areas for housing. This will open up Jarvis Brook for additional housing that is near the railway station and heavy vehicles will no longer have to come through the town. The new industrial area would be a modern industrial development, with direct access onto the main roads, all of which would serve as an inducement to attract new business to the area.

Option 13a

Reason for comment:
We must look for suitable housing sites wherever possible. This as long as it is demand driven and either the infrastructure can sustain it or the development addresses that issue.

Option 24a

Reason for comment:
This is the highest density that should be allowed to maintain the look and feel of Wealden's rural aspect and mix of development, amenities space and communities. The only possible exception could be that higher densities could be considered in some 'inner town' locations.
Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: ☑ option
Option 24b

Section of Document:

Your View ☑ Disagree

Reason for comment:
Surely all development must have considered transport links prior to development.

Surely all development must have considered transport links prior to development.

Consultee ID: Butcher
106486 Crowborough Town Council

Part of document: ☑ option
Option 25a

Section of Document:

Your View ☑ Agree

Reason for comment:
Would consider higher densities for terraced housing but would be very concerned over 'blocks of flats' changing the character of Wealden. Any higher density development must maintain sufficient quality and special requirements within the dwellings.
Consultee ID: Butcher 106486  Crowborough Town Council

Part of document:  Option 25b  

Section of Document:
Your View  Agreed  No opinion  Disagree

Reason for comment:
40% affordable housing for developments in Crowborough but query why different in other areas. Consideration should be given to reduce the threshold on the number of dwellings built in any given development that would then trigger affordable housing. We believe that this should be reduced to five dwellings. This would more likely get affordable housing built.

Consultee ID: Butcher 106486  Crowborough Town Council

Part of document:  Option 25e  

Section of Document:
Your View  Agreed  No opinion  Disagree

Reason for comment:
Agree as long as the need for housing can be demonstrated.

Consultee ID: Butcher 106486  Crowborough Town Council

Part of document:  Option 25d  

Section of Document:
Your View  Disagree

Reason for comment:
Disagree strongly. This would lead to a divided social structure.

I think the land at the top of Mutton Hall Hill would be a good location for new housing and a possible Health Centre.

Option 12d
Section of Document:
Reason for comment:

Option 12e
Section of Document:
Reason for comment:

Option 12f
Section of Document:
Reason for comment:
Your View  Disagree

Reason for comment:

I concur with the views of the Ashdown Friends of the earth. There is no evidence that these plans are sustainable and they certainly are not in the interests of our villages which is already over-burdened with traffic etc. I have yet to find one local person who is in favour and given that we live in a democracy ( although you'd never believe it given that local community views are not taken into account ) it would be appreciated if those of us who live here and will be badly affected could have our views acted upon over the views of developers and big business greed.
Reason for comment:
New domestic housing should be built to minimum standard of 3 star (defined by Code for Sustainable Homes) with immediate effect, and this standard be raised by one star grade each year reaching the max. standard of 6 star by 2012.

Reason for comment:
New domestic and commercial development should meet requirements of generating AT LEAST 20% of its energy from renewable resources with immediate effect, and that this target be the subject of upward review after 3 years.

Reason for comment:
I think an analysis should be done as to whether or not new housing in Forest Row is sustainable or necessary according to local needs and requests. I think there may be room for affordable sustainable housing but only up to about 50 on brownfield sites, if there are any and not in any areas of outstanding natural beauty.
Consultee ID: Ms Wyatt
106489

Part of document: ☐ document  ☑ chapter  ☐ section  ☐ option
Part 5

Section of Document: Wealden's Places

Reason for comment:
We have personally suffered from flooding and run offs of water from the Ashdown Forest and other areas open areas must be taken into account. Increased rin-off from new development might add to flooding risk and we do not, either, have the infrastructure to cope with yet more development. We are already over-run with traffic which is damaging our community. The A22 could not carry increased traffic loads from the A237 anyway. 80% of traffic in East Grinstead is local traffic. It does not need to "be relived" and a new relief road will simply encourage more unlocal heavy traffic THROUGH our village.

Consultee ID: Ms Wyatt
106489

Part of document: ☐ document  ☑ chapter  ☐ section  ☐ option
Part 6

Section of Document: Wealden's Communities

Reason for comment:
There is a tendency in Wealden for developers to pursue a more profitable market for luxury 5 bed £1 million plus value homes, which tent to draw in wealthy clients from other areas outside to the detriment of local lower income families who have to move across boundaries because of a shortage of affordable housing. Existing policy has attempted to redress this by requiring develop. of over 15 dwellings to include 30% affordable or social housing but this has brought limited success. This threshold shouulds be lowered to prevent piecemeal applications of fewer than 15 dwellings ducking under this requirement.

Consultee ID: Ms Groves
106490

Judith Norris Ltd

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
As such large areas of the district are within the AONB, to prevent development in these areas would lead to economic and social decline. Careful consideration must be given to design; not all development should be assumed to have a negative impact on the landscape.
Option 6a

Section of Document:

Your View  ✓ Agree  □ No opinion  □ Disagree

Reason for comment:
A small number of houses should be built in all villages (5-60) with at least 60% affordable as this would help to retain services and be in keeping with the character of the area.

Option 14c

Section of Document:

Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
There should be no development on the floodplain areas of Uckfield

Question 18k

Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
A number of smaller new settlements would be more appropriate than one larger one these should include all village facilities.

Part of document:  option
Option 18j
Section of Document:
Your View  ☑ Disagree
Reason for comment:
Mrs Ewing

I live in Sandy Cross Lane. It has changed in the past 14 years that I have lived here, from a quiet country lane, into a fast through road to the two schools. It is a very narrow lane, with nowhere to walk, which at the moment is dangerous to my two children, and for me when I walk my dogs. We also have a terrible problem with flooding, as the water from Cherry Gardens runs straight down our private road, across into Monkhurst Farm and the other houses near it. The added traffic and lack of natural drainage that would result from building this amount of houses is very unfriendly to the local wildlife and to the existing residents. I therefore disagree most strongly with the proposal to build in Sandy Cross Lane. Mrs Janet Ewing

Mr Deacon

SANDY CROSS LANE is a very narrow road which Wealden District Council propose 120-200 new houses, if any one were to come to our road during school term time in the morning or afternoon they would see just how busy this little road is, and wherer many residents DO NOT have off road parking and with 120-200 more houses that could mean 240-400 more cars as most houses are 2 car family’s these days it would make our road a DEATH TRAP for residents and pedestrians alike as there are no pavements. As noted in the core study which already points out accessibility to the town is poor as well as access to the area which has a limited due to the narrow lane passing the site. Also notes in the study is the towns poor transport links and limited bus service and most roads are 'B' roads or narrow country lanes. Surely more houses would be better placed on brown field sites and not in AONB and where wild life and trees would not be comprised, also wherre access would not be so much of a problem.

Mr. Seaton

Part of document: Option 27b

Section of Document:

Your View: Disagree

Reason for comment:

The line of the track should certainly be protected as we cannot predict how economic forces may change in favour of railway travel in the future but the price of re-instatement should not be the creation of a new settlement.
Consultee ID: Mr Seaton
106496

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

Consultee ID: Mr Kaemena
106497

Part of document: ☑ option

Section of Document: Option 12e

Your View ☑ Disagree ☐ No opinion ☐ Agree

Reason for comment:
The existing highway network that would be used to access this site is unsuitable for the increased traffic and pedestrian movements that would be associated with the proposed residential development. What has happened to the council's policy of not building in the AONB and protecting Wealden's rural character? This particular development would show complete disregard for both these principles?

Consultee ID: Mrs Osborne
106499

Part of document: ☑ option

Section of Document: Option 16d

Your View ☑ Disagree ☐ No opinion ☐ Agree

Reason for comment:
These are fields that are accessed from the cuckoo trail and are very popular with many people walking their dogs. It is the nearest countryside to Polegate and within walking distance of the town. Walking keeps people healthy. It will be a great shame if all the little green spaces are filled in with more houses. Polegate usually suffers from a water shortage It also has a lack of doctors, school places, and waiting lists at the hospital. The roads are often congested around here.
Mr. Dowsett from Dowsett Associates expresses his view on Option 23a of the document.

Reason for comment:

My clients consider that the Herstmonceux option should be adopted as the area of approximately 5 acres close to the existing development in Buckwell Rise, which would be ideal for residential development to assist in meeting the possible target of 100 dwellings as envisaged in the Consultation Paper.

Ms. Aitken from Aitken Associates provides feedback on Option 8c of the document.

Reason for comment:

Ms. Aitken's view on Option 18h of the document is also provided.

**Reason for comment:**
Uckfield is already quite a linear town and the proposals for developments north of the town would extend this. Further development in Five Ash Down and Maresfield will link then to the town giving a north/south spread of around four miles. Proposals for Ridegwood (Cysleys farm) and Halland would extend this spread.
### Traffic problems in Uckfield occur only at peak times and even then are not major. No sledge hammer to crack a nut required. Less traffic would use the bypass.

### Your View
- [ ] Agree
- [ ] No opinion
- [x] Disagree

### Reason for comment:
Traffic problems in Uckfield occur only at peak times and even then are not major. No sledge hammer to crack a nut required. Less traffic would use the bypass.
Option 21b

Section of Document:
Your View ☑ Agree ☐ No opinion ☑ Disagree

Reason for comment:
WDC has just lost a battle to stop housing development on the Grampian site for up to 140 houses plus business units and possibly a care home. Since the village currently has only about 100 properties this development will already impact heavily on the community. It is at odds with WDC’s position to now have put forward suggestions for up to another 400 or so houses. In effect we would be looking at something approaching a six fold increase in the size of the village over the next 19 years. There are not the schools or services to support this and all the evidence suggests that children would have to be driven to school (the distance and lack of footpaths preventing young children walking) and that most people would have to commute to London, T. Wells or the coastal towns, thus creating more traffic problems.

### Option 4d

**Section of Document:**

- **Your View**: Agree
- **Reason for comment:**
  
  I think this makes sense; to increase development around Hailsham/Polegate/Willingdon, and to bring younger people and hopefully economic growth to the area is very much in tune with the Council's strategy.

### Option 6a

**Section of Document:**

- **Your View**: Agree
- **Reason for comment:**
  
  To expand and regenerate existing towns must surely be more sensible than expanding villages in rural areas.

### Option 6b

**Section of Document:**

- **Your View**: Disagree
- **Reason for comment:**
  
  The A27 is already intolerably crowded; if there is to be an increase in traffic, it makes sense for it to be on the A22.
Option 8b

Reason for comment:
So long as development is stopped westwards of Polegate to preserve the AONB and the South Downs National Park.

Option 16a

Reason for comment:
This would create a mini-town, separated from Polegate and Hailsham, adding vastly to the traffic problems on the A27 without helping as much as development elsewhere with the much needed rejuvenation of Polegate and Hailsham town centres.

Option 16b

Reason for comment:
Again, the housing area would be separated from Polegate and Hailsham and not help with the planned regrowth of these areas.

Option 16c

Reason for comment:
This starts to link up Polegate and Hailsham, encourages use of the A22 rather than the A27, and seems sensible.
Consultee ID: Mrs Abey

Part of document: Option 16d

Section of Document: Agent ID: Agree

Reason for comment:

I disagree strongly. * Development on this greenfield site would spoil the character of the historic village of Wilmington. * The Long Man is an important cultural, historical and tourist attraction. People come from all over the world to see him, and any development which impacts on the appeal of the approach to, and view from, the site must be resisted. * Alfriston's popularity with tourists is partially because of the Long Man; less people visiting that will impact on businesses there. * Further traffic on this section on the A27 is almost unthinkable! * The Inspector has recommended that the South Downs National Park boundary is extended to the railway line, so that the village is not cut in half. Whether the proposal goes ahead or not (which it probably will) it reinforces that this is a very special area, and not suitable for development of any kind.

I think it cannot be duelled in its current location, but creating a dual carriageway running west from the Polegate bypass roundabout north of the railway line, so long as it is far away enough, and preferably sunken from view, of the South Downs National Park, might be sensible.

Consultee ID: Mrs Virgo  
106514  
Part of document: Option 18j  
Section of Document:  
Reason for comment:  
There is no infrastructure to support such a large steelement at Berwick Station, the local roads & A27 are insufficient to support existing traffic, let alone new development. It would also ruin what is a quiet and small village in a unique area of rural beauty, & destroy the character of this small community. Building a new town here is not the best way of dealing with the requirement for new housing as it will bring little employment and create the sorts of social problems I wish to get away from here in Eastbourne. Why not build the houses at the place they are actually wanted: ie, in the towns and existing settlements where the jobs and infrastructure already exist.

Consultee ID: Mr & Mrs Levett  
106515  
Part of document: Option 18a  
Section of Document:  
Reason for comment:  
Our attractive, historical, rural community would be totally destroyed by this enormous proposed settlement. Isfield would cease to exist and will be engulfed in a continues development from Uckfield southwards.

Consultee ID: Mr & Mrs Levett  
106515  
Part of document: Option 27b  
Section of Document:  
Reason for comment:  
We notice that part of the key to the acceptability of the above proposed development, is the potential to raise funds towards the restoration of the Wealden line link between Uckfield and Lewes by developing the land in and around Isfield as mentioned on page 18 of the summary guide to the Core Strategy Issues.
Consultee ID: Mr & Mrs Hancock

**Option 16a**

**Section of Document:**

**Your View**
- [ ] Agree
- [ ] No opinion
- [x] Disagree

**Reason for comment:**

Strongly oppose - landscape rural and attractive – A27 cannot take more traffic. Strongly oppose all development West of A22 due to impact of any development on the setting of the South Downs.
Option 16b

Section of Document:

Reason for comment:
Strongly oppose – Pelham Homes development already rejected by Planning Members. Strongly oppose all development West of A22 due to impact of any development on the setting of the South Downs.

Option 18k

Section of Document:

Reason for comment:
Support judicious infill in certain scheduled villages avoiding damage to their character. Similarly modest adjustments could be made to certain larger villages.

Option 18i

Section of Document:

Reason for comment:
Strongly opposed. This new settlement would conflict with the AONB and the proposed National Park. Furthermore, this would be contrary to the proposal by the Inspector to extend the National Park Boundary to include all Wilmington Green. Common Land is protected. Landscape at the foot of the downs would be gravely damaged. South East Regional Plan does not promote new towns or settlements. Parkway station would depend on track capacity and impact on services to existing station.
| Consultee ID: | Mrs Vine | Agent ID: | | | | | Part of document: | □ document | □ chapter | □ section | ✓ option | | | Option 18j | | | | | | | Section of Document: | | | | | | | Your View | □ Agree | □ No opinion | ✓ Disagree | | | | Reason for comment: | Strongly opposed. The statement on page 100 that the new settlement would not be seen from the Downs is inaccurate. New settlement would destroy attractive farmsteads and small areas of woodland. There would be an adverse effect on traffic infrastructure – There would be no employment opportunities and people would have to commute. There should be no new settlement in open country. | | | | | | | Consultee ID: | Mrs Vine | Agent ID: | | | | | Part of document: | □ document | □ chapter | □ section | ✓ option | | | Option 24a | | | | | | | Section of Document: | | | | | | | Your View | ✓ Agree | □ No opinion | □ Disagree | | | | Reason for comment: | Depends on location - higher in towns lower in rural areas. | | | | | | | Consultee ID: | Mrs Vine | Agent ID: | | | | | Part of document: | □ document | □ chapter | □ section | ✓ option | | | Option 24b | | | | | | | Section of Document: | | | | | | | Your View | □ Agree | □ No opinion | ✓ Disagree | | | | Reason for comment: | too heavy a density – although could be acceptable in a town location. | | | | | | | Consultee ID: | Mrs Vine | Agent ID: | | | | | Part of document: | □ document | □ chapter | □ section | ✓ option | | | Option 24c | | | | | | | Section of Document: | | | | | | | Your View | □ Agree | □ No opinion | ✓ Disagree | | | | Reason for comment: | Strongly opposed to the level of density – although could be acceptable in a town location. |

Option 18a

Section of Document:

Reason for comment:

There is no LOCAL need for large scale development in Isfield and development on this scale would entirely destroy the existing fabric of our community. The character and environment of villages like Isfield should be preserved, cherished and sympathetically enhanced with SMALL scale development to allow for low cost housing and gradual growth. New towns or settlements in rural villages are not the best way of dealing with the requirements of housing in Wealden District, they will bring little employment and create socal and other problems, whilst not actually providing housing where it is wanted. New development on the massive scale proposed should be absorbed in existing towns where the infrastructure, jobs, shops and facilities already exist and could be improved and maintained.

Option 27b

Section of Document:

Reason for comment:

The Isfield Level Cross is on a junction ill-equipped to deal with the increased traffic that would build up as and when the gates were open. If the train DOES NOT stop at Isfield it would be of no benefit to our community. If the train DOES stop at Isfield parking for cars from outlying areas would presumably have to be provided and if a charge were levied, cars would inevitably park on the road. Isfield has very few pavements, generally people walk by the side of the road or on grass verges if available. Cars parking on the village roads would obviously be a danger to the public – would we then have to have double yellow lines!!? If the reinstatement of the railway line is essential to our future transport needs both locally and nationally surely the reinstatement of the line should be funded by Central Government and not by turning Isfield into a “New Town”.

Page 2483 of 6217
In relation to development on and just over the borders of Wealden District, the wording of the consultation paper is inaccurate. This may be due to the on-going preparation of other documents by neighbouring authorities. However, it should be amended to accurately reflect not only the current position, but also the policies and intentions of neighbouring authorities and strategic documents including the Regional Spatial Strategy. In referring to the A22, paragraph 6.41 sets out the District Council’s concerns re increasing traffic. It goes on to make a number of statements which should be corrected. A letter setting out these points has been posted to the District Council.

The future of our CHILDREN! The need to reduce the use of fossil fuels and the potential that this area has to make a big contribution to the renewable energy sector.

Only if the development is mixed/ balanced and has everything that people need in their daily lives, with GOOD public transport links, affordable housing, green spaces, work opportunities etc.
Part of document: Option 3b

Reason for comment:
I would NOT like to see massive industrial parks especially on flood plains!

Part of document: Option 3c

Reason for comment:
New Developments NEED to include work opportunities, schools, parks, public transport, shops, entertainment venues - everything that people need. This creates better places to live, less crime and antisocial behaviour and reduces the need for people to make journeys, therefore reducing the impact on our climate.
Option 5a
Reason for comment:
Settlement boundaries SHOULD be maintained! Redevelopment of existing sites should always be the first port of call, with old properties being redeveloped and actual brown field sites being developed first. Smaller houses which fit the needs of local families should be built instead of massive 5 bedroom houses.

Option 5b
Reason for comment:

Question 5c
Reason for comment:
Development in this area needs to be controlled and monitored to protect the reasons that we all love to live here. Ie small towns and villages, green spaces and open countryside. A delicate balance is needed so that people who live here can continue to live in homes that meet their actual needs. Developments have to be balanced with all the things that people need in their everyday lives and this MUST include GOOD and RESPONSIVE public transport.
Option 6c

Reason for comment:
I agree that a small amount of development would be beneficial here BUT this town needs more than just new homes. It needs investment, entertainment for the towns young people, green spaces, better public transport, new jobs which give people hope and worth and all the things that make for better and more vibrant towns. It also needs to keep that which gives it is individuality and history, ie links to cattle market!

The theory behind this type of thinking is good BUT individual places are just that and each has a limit to what it can handle. How many of these 'add ons' would be allowed? Could they be 30+ 5 bedrooms houses or 30+ affordable/ housing association houses? Please don't just add houses, think about the other things people need.

Protect them anyway
Kent County Council’s has concerns regarding the option to develop a small urban extension at the south eastern fringe of Tunbridge Wells around Hawkenbury. Prospective capacity for up to 490 dwellings is indicated (Table 4). These concerns relate to: i. The efficacy of the proposal in meeting housing needs and demand arising within Wealden as opposed to those more directly related to the Tunbridge Wells urban area situated outside the District ; ii. The relationship of this greenfield proposal to the search sequence for locating new residential development at the Tunbridge Wells urban area contained within the Kent and Medway Structure Plan; iii. The impact on infrastructure and services in Tunbridge Wells, particularly with respect to highways, of a prospective development lying beyond the Tunbridge Wells Borough and Kent County administrative boundaries; iv. The impact of any proposals on the strategic policy priority to conserve the setting of Tunbridge Wells ( South East Plan Policy CC8c and Kent and Medway Structure Plan Policy TW1) On (i) The option is peripherally located within Wealden on its northern edge and unrelated to the principal urban centres contained within Wealden District. The I and O consultation document does not appear to advocate that the proposition would be a response to need and demand arising beyond the district i.e. from the Tunbridge Wells area and within the context of the current South East Plan there is no joint assessment of housing provision nor provision for joint LDF working to address housing demand and supply for the Tunbridge Wells urban area as a whole. On (ii) As a prospective urban extension to the Tunbridge Wells urban area the option should be considered in the context of prevailing strategic policy for the urban area and its housing land supply characteristics. Policy emphasises reliance on urban capacity in view of the prevalence of important policy constraints at much of the urban periphery. Strategic housing provisions for the Borough are being fully met and current indications are of a modest surplus of housing supply relative to policy requirements to 2016 [ Kent Housing Land Study 2006: Tunbridge Wells Borough]. Provisions are being met through the yield of urban capacity and a continuing strong flow of windfall sites. Given the wide incidence of Green Belt and other high level constraints at the periphery of the Tunbridge Wells urban area the County Council considers that evidence of the continuing and significant contribution of windfall sites to housing supply at the urban area should legitimately be taken into account. KMSP Policy HP2 recognises the role that settlement extensions can play in delivering housing but places this below other alternatives, such as re-use of land within the urban areas. An early and substantial release of greenfield land at the periphery of the Tunbridge Wells urban area would be premature and unnecessary in the context of the policy requirements applicable to Tunbridge Wells Borough and its principal urban area. On (iii) The impacts of development on infrastructure requirements and appropriate mitigation measures are central themes of the South East Plan (Policy CC5) and the Kent and Medway Structure Plan (Policies QL12 and IM1). Infrastructure and servicing requirements associated with an urban extension in the vicinity of Hawkenbury would predominantly impinge on the wider urban area located within Kent/Tunbridge Wells Borough. The County Council as highway and transport authority for the urban area has concerns regarding access to the area. For example, Hall's Hole Road, between Pembury Road and Forest Road/Bayhall Road would be the automatic choice of route for traffic heading east and north, but does not have the capacity and there is already a poor safety record at the junction with Pembury Road. Because Halls Hole Road and Forest Road have become an unofficial 'southern by-pass', measures have been taken to reduce its attractiveness, including some calming measures and a short length of one way. Any infrastructure demands arising from major new development that would undermine this approach would be regrettable and impinge directly on Kent. The Kent and Medway Structure Plan policies provide a clear expectation that funding for infrastructure will accompany new development where it generates additional demands on infrastructure. Policy QL12 establishes that
new community services and infrastructure should be provided within new residential developments in response to needs generated by the new development or growth in demand from the community as a whole. Policy IM1 requires appropriate and proportionate contributions from developments to meet the costs of providing infrastructure associated with the needs from the new development. Given the impact on infrastructure that the development option proposed in the Core Strategy would have on Tunbridge Wells, KCC seeks reassurance that adequate funding would be provided to mitigate the impact on infrastructure across the boundary. Further information on our policy to contributions can be found in our Guide to Development Contributions and Provision of Community Infrastructure, available from http://www.kent.gov.uk/publications/community-and-living/guide-to-dev-contributions.htm. On (iv) Policy TW1 of the Structure Plan (and CC8c of the draft South East Plan) place great importance on the conservation of the natural and built environment of Tunbridge Wells and any proposal for development of the urban fringe must ensure that the town’s setting is carefully protected. KCC would welcome discussions with Tunbridge Wells Borough Council and Wealden District Council to explore some of these matters and consider the cross-boundary issues raised by this option if it were to be taken forward. In the interim, and pending clear identification and appropriate mitigation of cross boundary impacts Kent County Council objects to the option for urban extension to the south east of Tunbridge Wells on the grounds outlined above.

Consultee ID: Miss Tipping
106523 Kent County Council

Part of document: ☑ option

Option 27e

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Kent County Council would welcome renewed and joint consideration with Wealden and Tunbridge Wells Borough of the case for, and options for, a Park and Ride facility to serve the southern/ south western approach to Tunbridge Wells. The Tunbridge Wells Transport Strategy (2003) recognised that are four main corridors of movement into Tunbridge Wells, including from the south where quality Park and Ride facilities could benefit the management of travel demand. Options for the siting of Park and Ride have been identified on the three approaches (from the north, east and west) lying within Tunbridge Wells. The County Council recognises the constraints on the southern corridor imposed by environmental considerations but also notes the commitment of the Wealden Local Plan (1998) to continue to examine the site potential.
Reason for comment:
I feel that there is a need for extra housing in Heathfield and this site because of its location lends itself perfectly for this use.

Reason for comment:
"I feel that this would be a good area for development because of its close location to the town center and other amenities."
Option 18j

Section of Document:

Your View   □ Agree   □ No opinion   ☑ Disagree

Reason for comment:

It’s hard to see what ‘powerful justification’ (Core Strategy, Section 4.20) there could be for a new settlement at Berwick Station. - Although there is a station, it is very small, has limited car parking, and currently few trains stop there. The level crossing already causes traffic problems, so a bridge would almost certainly be necessary. I don’t know about the bus service (I’ve never spotted a moving bus in the area, only those parked at the station), but have doubts that it’s adequate for commuters’, school children’s or homemakers’ needs. - It is acknowledged (Section 5.39) that proximity to a station does not necessarily lead to reduced car use. The lack of employment and absence of schools (or any amenities) in the area would inevitably give rise to thousands of extra car journeys daily (with a concomitant increase in the CO2 emissions that we are all being exhorted to reduce). - Road transport links are atrocious. The A27 is already a cause célèbre – close to or at (above?) capacity at peak times and notoriously dangerous. The A22 isn’t much better. The A22 isn’t much better. - The area is increasingly short of water ... - ... and also prone in parts to flood, due to the high water table and poor drainage – the latter likely to be greatly exacerbated by the loss of permeable surface inherent in a development of the size proposed. - Such large-scale development would impact detrimentally on local SSSIs, and lead to the destruction of important wildlife habitats. - The area is clearly visible from the Downs (forgive any scepticism that such 'folds in the land' as there are will largely hide a development of the proposed magnitude) and is an important gateway to them. The landscape – with Arlington Reservoir set like a jewel in an age-old patchwork of fields, woods and small settlements – is some of the most beautiful to be found anywhere, and is a major factor in attracting the many visitors who are so important to our local economy. The far-reaching views are something which we should cherish and safeguard. Whereas Hailsham and Polegate are on the periphery of the view from the Wealden section of the Downs, Berwick Station New Town and Wilmington Parkway would be centre-stage, and a blight forever. Finally, experience points overwhelmingly to the conclusion that new settlements simply don’t work. In an area with such scant employment opportunities as Wealden, the need for housing must be primarily for those who already have family/friends and/or existing employment here. In neither case would Berwick Station be a particularly relevant location for the majority. There is an existing small community which has evolved over time and will continue to evolve. It will doubtless grow over the coming years, but any growth must be sustainable and proportionate. To swamp it with a new town for people who have no particular need (or even desire) to be there – and for which almost all services will have to be provided at huge cost – seems perverse. Given that ‘a higher proportion (than 30%) of rural housing … could be considered to be contrary to national policy’ (Section 4.23), and that Berwick Station undoubtedly is rural (with very few services), this proposal to site 59–88% of the new housing requirement for the whole District there seems deeply flawed.
I, too, would like to register my dismay at the way in which this consultation is being conducted. The timescale would in any circumstances be inadequate. As it is, at peak holiday time and with the complete lack of attendant publicity, the process is woefully undemocratic and appears positively furtive. These are matters that affect Wealden residents deeply, and we deserve to be given greater opportunity to learn what is afoot and to voice our opinions than has been the case. On the proposals in general, I am in favour of locating the majority of the new housing in the existing towns. In a district with such poor infrastructure, it seems the more sensible option to take Mohammed to the mountain rather than attempting the reverse. I would also, however, favour a fairly high proportion (up to, say, the 30% mentioned in the Core Strategy) being located in the rural areas - but in a manner that reflects the 'dispersed settlement pattern' which characterises rural Wealden. The only sustainable way to add significant housing in these rural areas is to build a small number of new houses in a large number of the villages. Even the smallest village could absorb, say, 5 new houses, and the larger ones more. It is my view that this would be to the detriment of none and to the advantage of some (where it might just be enough to tip the balance in cases where village shops/schools/post offices are currently facing closure). I would not favour a 'new settlement' approach (in any location), as I don't think it works. Communities evolve and grow over time, and cannot just be created - even if all the promises on infrastructure provision were to be kept, which is seldom the case. Far too many new towns remain, decades after they were built, soulless and disaffected places where people simply don't want to live.

There is an obvious need for housing in this area and this site would appear to be appropriate for this use.
Despite the natural beauty of the area, its low population density and extensive potential for sustainable and renewable power generation suggest the 10% target is not ambitious enough, and option 2b, requiring a higher power generation target, is more appropriate.

Option 3a makes good sense. Where land has been allocated for development, but the anticipated use is unlikely to be practical, the resource that the land represents should be used for an alternative development. Option 3b seems redundant. If the market need is significant enough, the pressure for redevelopment will not exist. Option 3c is just verbiage. It seems unlikely that circumstances will arise where there is a conflict between the stated new business development 'focus', and other alternatives (presumably large business development). Option 3d must be a core element of the strategy, since it maximises the likelihood that residents in the new areas will be employed close to their place of residence.
Option 5a is the safest route to follow. This allows for settlement growth where necessary, but ensures that there are barriers to prevent the growth being 'unchecked'. Q6. The options here propose rather arbitrary proportions (on what basis are we to make the decision that one particular percentage split is more appropriate than another?). This makes 6d seem most appropriate, but would require more detail than a simplistic proportion, as most of the options seem to suggest. Each decision would depend on the infrastructure, employment opportunities, and housing demand in the proposed locations. Paragraph 4.26 supports this view. Q7. The option 7a classification seems like a good basis for classifying settlements. Although most of the criteria in option 7b are not relevant to Crowborough (since it constitutes a town rather than a village), the criteria provide a good guide for classification. As with all these issues, the criteria involve some arbitrary limits. In particular, the restrictions on the amount of growth could be unduly restrictive in the case of very small conurbations, which may be able to take relatively high percentage increases in size (though that may be unpopular locally). Option 7c is also not relevant to Crowborough, but focussing development in villages with the greatest capability for supporting growth is a reasonable strategy. Option 7d is also inapplicable to Crowborough, but some village services need protecting. The issue is problematic, however, because change of use in many of these cases is likely to be due to the business becoming uneconomic, and there is little the development framework can do about that in the short term. Q9 Option 9c distributes the required development across the largest geographical area. This ensures that there will be the least tendency to encroach on the AONB, that the load on local infrastructure will be most evenly spread, and the impact on local character will be minimised. From the perspective of Crowborough, infill development is already significant, and emphasising Crowborough in preference to the other areas puts unreasonable growth pressure on the town. Although Crowborough is well served for shops and important amenities, it is becoming crowded in many areas, and public transport is already stretched or deficient. Note. Paragraph 4.53 suggests that areas such as Crowborough, which are already seeing extensive development, may be meeting the required growth targets anyway. If that is the case, imposition of further development seems hard to justify.
Part 5
Section of Document: Wealden's Places

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Q10 Thirty dwellings (the threshold applicable to Crowborough) may be too low. A planning site with only thirty houses on it is modest in terms of the development plans. Q11 Option 11a. Pine Grove and the town centre are good candidates for development, so long as any change of use of Wealden Council's offices at Pine Grove results in replacement by an equally significant employer. Option 11b includes a strip of land adjacent to the A26 that also looks ideal for development. Here, any development should not be at the expense of the existing recreational facilities at Goldsmiths. Option 11c. This plot of land, although notionally within the AONB, is enclosed by major roads, and little of it supports any landscape of significant merit. Development of the most north-eastern areas would require improvements to, and creation of, footpaths alongside Steel Cross. Option 11d. Inspection of maps clearly shows that Crowborough's development is already heavily biased towards the South of the town centre. Walshes Road and Western Road are a major traffic bottleneck, and increasing housing provision in this area would cause traffic chaos. Option 11e. This suffers from the same problems that beset option 11d. Question 11h. The area north of London Road and Pleasant View Road adjoins a major road and, although strictly within the area of the AONB, would allow for some development without reaching as far as the woodland. It is also closer to the town centre than the developments proposed to the South and South East of the town.

Part 6
Section of Document: Wealden's Communities

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Q24 The higher density of 40 dwellings per hectare makes for very small plot sizes. The Non-Statutory plan recommendation of 30 dwellings per hectare is more appropriate. The extent of public transport links, particularly in Crowborough, does not justify a higher building density. Q25 Option 25a. Flats are generally family-unfriendly dwellings, so would be less acceptable as a general housing type than houses. Terraced houses, however, make good use of available space, and should be encouraged. Option 25b. Crowborough has large areas of high value housing, so requiring 40% of new build to be affordable is reasonable. Option 25f. Planning applications have already come before the planning committee for ancillary dwellings, and the committee has recommended restrictions on future use. Option 25g. It is hard to think of any examples where this might be needed.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Stocks
Agent ID: 106538

Part of document: ☑ chapter  ☐ section  ☐ option
Part 6

Section of Document: Wealden’s Communities

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Q24 The higher density of 40 dwellings per hectare makes for very small plot sizes. The Non-Statutory plan recommendation of 30 dwellings per hectare is more appropriate. The extent of public transport links, particularly in Crowborough, does not justify a higher building density. Q25 Option 25a. Flats are generally family-unfriendly dwellings, so would be less acceptable as a general housing type than houses. Terraced houses, however, make good use of available space, and should be encouraged. Option 25b. Crowborough has large areas of high value housing, so requiring 40% of new build to be affordable is reasonable. Option 25f. Planning applications have already come before the planning committee for ancillary dwellings, and the committee has recommended restrictions on future use. Option 25g. There are no businesses where this would be applicable. Q26 Few residents in any area would welcome typical traveller encampments. If sites are provided, they should be as isolated as possible, and be provided with facilities that ensure there is minimum reason for the travellers to engage with the main conurbation. Q27 Option 27a must make sense - improving public transport is rarely detrimental. Option 27b. The reinstatement of the Lewes/Uckfield/Tunbridge Wells line would transform rail access in this area of Wealden. Option 27f. The difficulty with restricting parking provision this way is that it favours higher income families. The figures for car ownership are statistically derived, and there is the danger that in some areas, higher levels of car ownership would result in undesirable on-street parking. Q28, P133. Option 28a. Crowborough is well provided with open spaces, so no additional provision is needed, given the current population. Option 28b. It is essential to require developer contribution to ensure all local amenities are maintained at a level commensurate with the population. Option 28c. Existing sport and recreation facilities should always be protected.

Consultee ID: Mr Stocks
Agent ID: 106538

Part of document: ☑ chapter  ☐ section  ☐ option
Part 7

Section of Document: Making it Happen - Implementation

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Q29 It is very important that developers, already benefiting from an excess demand situation that inflates property prices, do not further benefit through manipulation of their land holdings. Q30 30c. The ongoing water delivery problems in the South East make reservoir expansion very important. 30m. Road transport links to the South East of Crowborough are an ongoing problem, but should not be viewed in isolation. While it is desirable to take vehicles off the road, where there is a demand for road transport, congestion does no good. Realistically, the presence of the industrial areas in Jarvis Brook provide employment, and are currently dependent on a significant amount of road-based deliveries. 30n. Possibly the most worthwhile infrastructure development in the Wealden area. 30t. The Crowborough Multi-Purpose Community Hall is a very large White Elephant.

<td>Q31 The themes presented are all worthy, but businesses that start up in the area should be locally beneficial and environmentally benign. Q32 SO2 makes for dwelling plots that are too small. Regarding SO10 (specifically in Crowborough), there seems to be little need for more retail outlets. Otherwise, the objectives are laudable.</td>

**Reason for comment:**

Overall new development should be minimised I feel focus should be given to reducing new building by reuse of derelict properties. I also feel the Council should look into statutory powers to enforce the reuse of abandoned or unused properties.
Consultee ID: Combes
106541

Part of document: Option 18j

Section of Document:

Your View: Disagree

Reason for comment:
There is no infrastructure to support any significant increase in housing at Berwick Station, the local roads are insufficient to support the existing traffic and there is limited access onto the A27, which in any event is overcrowded and dangerous. The railway station has no capacity for expansion, and has a very limited service. Furthermore, your own document notes that it is unlikely to reduce the number of people using cars to commute. It would also ruin what is a quiet and small village in a unique area of rural beauty and destro the character of this small community. This area is used by many people for walking, cycling and other recreational activities, and any development here would be to the detriment of the entire community of the wider area. Building a new town here is not the best way of dealing with the requirement for new housing in Wealden as it will bring little employment. They should be built at the place they are actually wanted; the towns and existing settlements where jobs and the infrastructure already exist.

Reason for comment:

Consultee ID: Ms Ruse
Part of document: section

Question 32b

Your View  ☐ Agree  ✅ No opinion  ☐ Disagree

Reason for comment:

Quesion Two: New domestic housing should be built to a minimum standard of three star as defined by code for sustainable homes immediately reaching the maximum standard of six star by 2012. Question Seven: Forest Row should concentrate on houses for people who commute to the village. Question Six: Additional development must be managed in accordance with existing infrastructure. Question Five: Forest Row is already full; there is no room for development within existing settlement boundaries. Question Twenty-Four: Higher density acceptable on a small scale if well designed and satisfies needs and is sustainable; consider flats. Question Two: Wealden should consider harnessing energy sources independently of buildings i.e. small wind farm high on Ashdown Forest. Other sites for wind turbines to be considered. Sustainable homes should be given priority especially on sensitive sites.
The Core Strategy offers an opportunity for settlement boundaries to be reviewed and for changes to be made where appropriate. Boundary changes may provide scope for small-scale development.

Option 5c is for comment rather than for agreement/disagreement. Paragraph 4.6 proposes suggested criteria for defining boundaries - primarily to draw a distinction between the towns and villages and open countryside. A simple visual assessment associates the buildings at Kings Ride Farm, Kings Ride, Alfriston with the built form of neighbouring development, rather than the open countryside. The Core Strategy offers an opportunity to establish settlement boundaries in line with the suggested criteria. The inclusion of the buildings at Kings Ride Farm within the Alfriston settlement boundary would be consistent with the pattern of development and would lead to the removal of unsightly buildings, thereby enhancing both the built and natural environment. A plan will be provided showing the suggested modification.

This potential development area offers a real opportunity for major housing provision without extending the outer urban boundaries into the countryside. Several of the spatial objectives could be met through the release of the land - by making a significant contribution toward increasing Polegate's housing stock; providing new parks, open spaces and other community facilities whilst respecting and protecting the setting of Polegate and Willingdon against the South Downs.

**Option 11a**

**Your View**            | ✓ Agree | □ No opinion | □ Disagree |

**Reason for comment:**
It makes sense to develop in the Town Centre if possible. This would be a good place for multi-storey blocks of flats as already exist in the vicinity.

**Option 11c**

**Your View**            | ✓ Agree | □ No opinion | □ Disagree |

**Reason for comment:**
Only within the existing Setlement Boundary and then with the conditions 1, Development should be restricted to a maximum of two stories 2 There should be adequate landscaping so that the buildings were not visible from the AONB 3 There should be no development of 4 or more bedroom houses 4 There should be a minimum of 50% RSL/"affordable housing"
Consultee ID: Mr Edwards  Agent ID:
106545

Part of document: Option 11d

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
This would be an ideal place for development if there were an adequate road system. However the combination of Western Road and Whitehill Road would in practice rule it out.

Consultee ID: Mr Edwards  Agent ID:
106545

Part of document: Option 11e

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Acess to the rest of Crowborough is restricted due to the inadequacy of Western and Whitehill Roads.

Consultee ID: Mr Edwards  Agent ID:
106545

Part of document: Question 11g

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The general objectives would be benificial for Crowborough. However if Tourism is to be developed, it should be focused to identify which tourists are to be attracted and where they are to be accommodated.

Consultee ID: Mr Edwards  Agent ID:
106545

Part of document: Question 11h

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
If Development Areas are to designated, it is important that it is done in conjunction with an enforcable housing policy and does not merely become a "Developers Charter"
Option 16f

Section of Document:

Reason for comment:

16f. One feels about this area that Eastbourne is creeping North to swallow up various hamlets, villages and green spaces. Hindsland, Willow Farm and Mornings Mill Farm are green spaces here. It would make complete connection by landscape to Polegate, also preventing Polegate from remaining the same as it is now. Surely it would be in everyone’s interest in Polegate or passing through that these developments were not granted.

Option 16g

Section of Document:

Reason for comment:

Figure 6 main options, 16g. Polegate I believe has adequate housing development already, including a great variety of types and sizes of buildings that suit a small township. All these buildings help Polegate have a pleasant environment. More population, cars and heavier traffic would take away the village effect.

Question One

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID:  Mrs Upton  Agent ID: 106548

Part of document:  ☑ option
Question One
Section of Document:  Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  ☑ Disagree

Reason for comment:
Allowing development within an AONB runs contrary to the principles of AONBs. To do so once - even in a minor way - will amount to scope creep. Having made an exception on one occasion, there will be no way of restricting further development. The boundaries will be meaningless.

Consultee ID:  Mrs Upton  Agent ID: 106548

Part of document:  ☑ option
Question One
Section of Document:  Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  ☑ Disagree

Reason for comment:
Given the statement below, taken from the consultation paper, I do not understand how allowing development in the AONB can be considered a viable option. "The spatial strategy must be based on delivering a spatial vision and a number of objectives that derive from this - such as ... protecting key environmental assets." [para1.45] Even taking into account another stated objective of meeting housing needs, on land within an AONB the priority lies with the protection of the environmental legacy. That is precisely why areas are allocated AONB status. To reinforce this point please see the Government definition of an AONB below. "an area of high landscape value of national importance, within which the conservation and enhancement of its natural beauty is the priority"

Consultee ID:  Mrs Upton  Agent ID: 106548

Part of document:  ☑ option
Option 4a
Section of Document:

Your View  ☑ Disagree

Reason for comment:
I strongly oppose any encroachment onto the greenfield site west of the A22. This acts as a buffer to protect the South Downs, and is a highly sensitive landscape setting. The cumulative environmental threat to the area should this buffer disappear would be disastrous.
Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option
Option 4c

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
A far more appropriate solution for the location of new employment/business development opportunities for the local economy.

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option
Option 5a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
I completely agree that settlement boundaries should be maintained. The additional clause here suggesting that they be expanded 'where needed to allow for necessary growth' is far too vague. Who will define and police the definition of 'necessary'?

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option
Option 6a

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
I am not clear why it is not possible to offset the allocations in the Rest of Wealden (where para 4.53 states that housing targets are being exceeded) with the Sussex Coast Policy area, which is acknowledged in the document as being a more difficult area to identify new sites for development.

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option
Option 8d

Section of Document: Site Allocation Thresholds

Reason for comment:
Too simplistic - needs to consider individual villages, for example in smaller villages 10+ could equate to a significant addition.

**Reason for comment:**
Option 15e

Section of Document:

Reason for comment:
The areas that have previously been developed are an option, although consideration needs to be given to that areas of scrub and regenerating woodland should be thoroughly assessed to understand the impacts. In addition, the scheduled ancient monument should not be sacrificed for any development.

Option 15f

Section of Document:

Reason for comment:

Option 15h

Section of Document:

Reason for comment:
Option 16a

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
On a practical level, this would create effectively create a new town that would be attached to Polegate in name only, as the A22 & A27 will act as a barrier to creating the community vision that is discussed elsewhere in the document (e.g. references to 'Enquiry by Design'). The additional residents will need to rely on cars for transport, increasing the pressure on the A27. Finally, the environmental impacts should be considered. The Council has previously acknowledged the area as a possible habitat of bats, and Great Crested Newts have been found nearby. These two species are top of the list of creatures to protect in the UK, and any such development would increase the risk to their continued survival in this area.

**Option 18h**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
Reason for comment:

Strongly disagree. The consultation paper states that there are certain key factors in deciding on the appropriateness of an area as a new settlement. One of these us ensuring that the location is acceptable in transport terms. Possibly the most talked about transport issue in Wealden is the capacity of the A27 approaching Polegate. A new settlement in this location would add further pressure to this issue. A second key factor is whether the landscape impact would be less than other alternatives. This would have a 360 degree impact on the ground, along with the additional dimension provided by the views from the South Downs, which make this not only less favourable than a town extension, but also less favourable than a similar new settlement away from the South Downs, where it is not looked down on also. A third key factor given in the paper is that it should divert development away from the attractive countryside towards less sensitive areas. With the South Downs in the process of being made a National Park there is no argument that it is not a sensitive area. In addition DEFRA has proposed that the boundary of the National Park be extended to the railway line, i.e. adjacent to where this development is proposed. I cannot imagine a more sensitive landscape to select in light of this. I would also be interested to know of a new community of this size and position that has been successfully established rather than the failures that the consultation paper quite rightly quotes.

Reason for comment:

I cannot see how a town of the size proposed could hope to be hidden in the folds of the land, as suggested in the consultation paper. The settlement would be a highly visible and degrading sight from the South Downs. This is aside from the ecological and community aspects already raised in earlier objections.

Reason for comment:

I cannot see how a town of the size proposed could hope to be hidden in the folds of the land, as suggested in the consultation paper. The settlement would be a highly visible and degrading sight from the South Downs. This is aside from the ecological and community aspects already raised in earlier objections.

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option

Section of Document: Infrastructure Requirements

Reason for comment:
Tricky to answer as one question. 30a - Disagree. Impact on South Downs and traffic noise 30b - Disagree. Do not agree with Folkington/Cophall link 30o - Disagree. Improve Polegate station rather than build new one.

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option

Section of Document: Infrastructure Requirements

Reason for comment:
Again tricky to answer as one discreet question. SO2 - a blanket 60% with a 40 dwellings per hectare could conflict with SO1, which aims to have appropriately integrated development. Challenge to ensure that such densities do not lead to unsympathetic new builds in historical areas. SO5 - nice to have, not a key objective.

Consultee ID: Mrs Upton
Agent ID: 106548

Part of document: ☑ option

Section of Document: Infrastructure Requirements

Reason for comment:
SO13 - in the pursuit of the objective of creating open space and leisure facilities, let us not forget and in the process spoil an area that we are already blessed with, being the South Downs.

106553

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option

Section of Document:  
Option 5a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Village boundaries should be reviewed to allow for the delivery of much needed new homes. New housing development can help support local facilities and services as well as provide affordable housing. Boundaries should be expanded to allow for both immediate and reserve housing sites.

Consultee ID: Mr Barker  
106553

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option

Section of Document:  
Question 5c

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Settlement boundary changes in Five Ash Down, in the area to the east of the existing development boundary, should be considered favourably, for the reasons set out in the representation document submitted on behalf of Mrs Jane Brown.

Question One
Settlements in the High Weald Area of Outstanding Natural Beauty

Option 18j

Reason for comment:
Re 18i: A new settlement in this area is quite out of the question given the existing road structure - C39 and A 27. Also the services currently available (hospitals, schools, fire service, ambulance, police) would be unable to cope. The water supply would be stretched and there is very little main drainage.

Potential for a New Settlement or Concentrated Growth

Reason for comment:
**Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses**

<table>
<thead>

- [ ] chapter
- [x] section
- [ ] option

**Section of Document:** Potential for a New Settlement or Concentrated Growth

**Your View**
- [ ] Agree
- [ ] No opinion
- [x] Disagree

**Reason for comment:**

From any point of view the establishment of a new town at Berwick would lead to very many problems—not least of which is the A27, the C39, no railway crossing apart from the gates (and do not forget what is going on at Beddingham). Also, it must be relayed that there is a good, old brickyard near the station, which could support perhaps 10 or 15 new homes.

- [ ] document
- [x] chapter
- [ ] section
- [ ] option

**Section of Document:** Location Plan

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

Access is excellent, impact would be minimal, as additional housing is needed in the area, this would appear to be the ideal location.

**Reason for comment:**
Consultee ID: Freeman

Option 18b

Section of Document:

Your View ☑ Agree ☐ No opinion ☒ Disagree

Reason for comment:
Destruction of the character of the area No employment in area Lack of facilities Lack of Further and Higher education

Consultee ID: Freeman

Option 21f

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Halland only has growth potential on a very small scale. Development should be on brownfield sites only.

Consultee ID: Freeman

Option 27b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
We are strongly in favour of the re-opening of the Lewes - Uckfield and Eridge - Tunbridge Wells lines.

Consultee ID: Brine

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☐ Agree ☐ No opinion ☒ Disagree

Reason for comment:
Question too vague - what is 'some' ?

**Reason for comment:**

But seems totally unrealistic.......... Nice sentiments though.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Miss Ryland 106573

Part of document: Option 13a

Section of Document:

Reason for comment:
Green belt, urban fringe is not compatible with Tunbridge Wells own policy of infilling brown field sites. Moreover much of this area is unimproved grassland, a priority habitat covered by a Biodiversity Action Plan.

Consultee ID: Miss Ryland 106573

Part of document: Question 13b

Section of Document:

Reason for comment:
Landscape & Biodiversity; without you showing a plan your reference to a Northern part and a Southern part cannot be understood. If the northern part is the Meadow which was considered and not taken forward into the Non Statutory Local Plan (Chapter 20, Policy TW1) then it was established during that process (see para. 20.32) that the entire site has SNCI status, an error having been made when the boundary was changed in 1993. Plan 2 in your Chapter 20 decision (2005) shows the extent of the SNCI. It appears to cover all the "Northern" part and some of the "Southern" part (presumably land at Little Mount Farm?) in your current option. All of the points raised by local residents in 2004 remain valid. I repeat my previous submissions. I refer also to the ecological reports by Dolphin Ecological Surveys commissioned by local residents in 2004 and Middlemarch Environmental's report commissioned by Wealden DC in August 2005. No significant change is possible in 2 years since then. Transport & Accessibility; no recent and full independent transport survey has been done on Benhall Mill Road and Forest Road for KCC to assess the impact of this proposed option on top of recent developments in the road and on Forest Road nearby. Also need to take into account other proposed nearby sites such as Birchlands (Application WD/2007/0621/MAJ). The impact of a further 490 units will be hugely significant in an area of rural character on the urban fringe. Infrastructure & Accessibility; local primary schools in Tunbridge Wells are increasing their class sizes and number of classes already, to cope with increased demand. There is no provision locally to cope with children from another 490 units. A new school, doctors and dentist would be required for the local community, not just a financial contribution.
Consultee ID: Mrs Doyle

Part of document: Option 8b

Section of Document:

Reason for comment:
To have further development in this area seems wrong when there is not enough infrastructure in place i.e. more hospital beds, better access through roads.

Consultee ID: Mrs Blake

Part of document: Option 12a

Question Thirty

Infrastructure Requirements

Your View

Reason for comment:

Especially item 30 o - but emphasising again that I would not wish to see a reduced train service serving Polegate town centre

Consultee ID: Mr Stone 106585

Question 31b

Your View

Reason for comment:

I am in general agreement with this document, but any possibility of approving lots of new housing in the Polegate/Eastbourne area before they make the decision on closing the maternity unit of Eastbourne DGH? No - I thought not! Well, perhaps they might reopen it one day ;-)
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
AONB designated areas should not be subject to any development other than reusing existing "brownfield sites" although these rebuilds should not be significantly different in character and size to existing buildings, as this would change the nature of existing settlement.

Option 5a

Reason for comment:
Settlement boundaries should be maintained without any changes. There are many other variables in the Background Paper so that any change to this well defined boundaries could cause confusion. There must be some established "givens". Changing this means that the whole consultation process would need to be completed yet again if new boundaries were to be established.

Option 5b

Reason for comment:
"Strict Criteria" needs definition before agreeing to this option.

Option 7a

Reason for comment:
Criteria seems to be too arbitrary. Not having a good service really means no service.
Looking at figure 9 of the paper, I cannot see how you have classified certain villages as having growth potential since, from local knowledge of the area, there appears to me to be no difference between those designated as "with growth potential" and those designated "with intermediate and limited potential" in terms of being able to support further development. Also, why are other villages not considered?

Too arbitrary. 15 could be too many in villages. Each plan should be viewed case by case

Encroachment on AONB should be avoided.

it is inappropriate to plan large scale development in an AONB

#### Reason for comment:
Provided that this plan can be accomplished without infringing on the AONB.
Option 22a
Section of Document:
Your View □ Agree  □ No opinion  □ Disagree
Reason for comment:
This would be a development within the AONB. The services (a garage, bakery and a primary school at the eastern end of the village that is almost at full capacity and very limited public transportation) will not support this scale of development which appears to be a significant percentage increase in the population of this small settlement. How much of this increase would be re-use of existing land and how much would be greenfield?

Section of Document:

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
Our attractive, historical, rural community would be totally destroyed by this enormous proposed settlement. Isfield would cease to exist and will be engulfed in a continuous development from Uckfield southwards.
Reason for comment:
We notice that part of the key to the acceptability of the above proposed development is the potential to raise funds towards the restoration of the Wealden line link between Uckfield and Lewes by developing the land in and around Isfield as mentioned on page 18 of the summary guide to the Core Strategy Issues.
We welcome the opportunity to make representations on behalf of our client Miletus Ltd to the Core Strategy Issues and Options Consultation Paper. In particular we encourage the point at 1.11 that sets out that the Local Development Framework must meet minimum requirements set out at a regional level from the South East Plan—principally the provision of levels of new housing as well as identifying and allocating over time, specific sites to meet strategic and local requirements for development of all kinds, including housing and for business. In respect of Sustainable Development in Wealden, we support the premise that Wealden is fully committed to the principles of sustainable development. Sustainable development is a key theme identified in national planning policy, in particular PPS1 sets out the Government's objectives for delivering sustainable development. One of the Government's key objectives as set out in paragraph 1 is to ensure that planning shapes the places where people live and work ensuring the right development in the right place at the right time. Accordingly, we would expect to see sustainable development as a constant theme running through the Wealden Local Development Framework. Paragraph 1.15 highlights a number of themes that have already been identified through the consultation process, we support the following themes: - Ensuring adequate infrastructure is in place for new housing - Sustainability as a key objective in all development - Need for some development in and on the edge of villages (including in designated Areas of Outstanding Natural Beauty to sustain vitality) particularly for affordable housing - Need for employment development and mixed uses, not just housing. The South East Plan is an important document that sets the context for the Local Development Framework for Wealden. In terms of housing provision there are demanding figures for the South Coast Policy Area to be met to 2026. In addition to those figures identified in the South East Plan there is a need to meet any delivery shortfall from the Structure Plan to be carried forward which in the case of Wealden is significant. We welcome the fact that Wealden have identified that the Core Strategy will need to make provision to accommodate any shortfall in housing provision. Wealden is a large and very rural district and it is recognised that many local residents travel to work or shop outside the District. Indeed the 2001 Census shows that 43% of the workforce travel outside the District to work. There is a limited amount of brownfield land which means that in order to meet targets set out in the South East Plan there will be a need for a significant amount of new development to occur on greenfield sites. We recognise that fact set out in paragraph 1.31 that the District's economy is heavily dependent on the service sector and whilst this has helped to generate high levels of employment, median salaries are relatively low. This has contributed towards high levels of out-commuting. It is clear that there is a need to provide high quality employment and business land in sustainable locations within Wealden District to limited the levels of out-community and to ensure that the local economy stays strong.
We welcome the opportunity to comment upon Part 2 of the Core Strategy - Issues and Options Consultation Paper on behalf of our client's Miletus Ltd. It is recognised that Wealden is a beautiful district with diverse landscapes in particular the South Downs and the High Weald are nationally protected landscapes and are designated as 'Areas of Outstanding Natural Beauty' (AONB). Indeed Wealden contains more of the total High Weald AONB than any other district. Other areas identified as valued and important landscapes are Low Weald and the Coastal Levels. We concur with the view at paragraph 2.12 that a broad policy approach will be required in the new plan for the whole of the District which reflects the four main landscape character areas. In terms of Question One regarding Settlements in the High Weald Area of Outstanding Natural Beauty we consider that advice contained in PPS7 'Sustainable Development in Rural Areas' should be considered. In terms of AONB's that are nationally designated sites, paragraph 22 of PPS7 states that major developments should not take place in these designated areas except in exceptional circumstances. Applications for major developments in these areas should be subject to rigorous examination and planning permission for major developments should be carried out to high environmental standards. PPS7 goes onto suggest at paragraph 24, that there are areas of landscape outside nationally designated areas that are particularly highly valued locally. The Government believes that carefully drafted criteria-based policies in LDDs, utilising tools such as landscape character assessment, should provide sufficient protection for these areas, without the need for rigid local designations that may unduly restrict acceptable sustainable development and the economic activity that underpins the vitality of rural areas. In light of advice contained in PPS7 we suggest that a sensible approach forward in terms of locating development and economic activity in Wealden is to identify sites outside the nationally designated AONB’s first, i.e. in sustainable locations in areas such as Low Weald and the Coastal Levels before allocating development within the High Weald and South Downs AONB’s. This will ensure that protection of the most important landscape areas is met.
We welcome the opportunity to make representations on behalf of our client Miletus Ltd to Part 3 of the Core Strategy -Issues and Options Consultation Paper. In respect of Wealden’s working patterns it is important to note at paragraph 3.11 that many people work in places that bear no geographical relationship to where they live. Furthermore this unsustainable pattern of travel is further highlighted at paragraph 3.13 that identifies significantly large numbers of actual journeys to work within the District itself in terms of both in-commuting and out-commuting. In respect of Question Three- Employment Land, we agree with Option 3d that states new housing development should be balanced with an appropriate level of new business development. In respect of the Sussex Coast Economy, paragraph 3.25 identifies the area around Hailsham and Polegate together with the adjoining Borough of Eastbourne as economically different from the rest of Wealden. This area has been termed the Eastbourne/Hailsham triangle and has been identified as an area lagging in terms of economic performance at a regional scale with housing growth not being matched by job growth. We agree that the ‘triangle’ area has the opportunity of being a dynamic, attractive and connected sub-region with the A27/A22 as its development spine. We agree that it is an area suitable of attracting inward investment as key to broadening the local economy and there needs to be a concerted effort to bring sites forward especially in Hailsham and Polegate and improve infrastructure which has been holding up the development of sites. In respect of Question 4 - Hailsham/Eastbourne Triangle we agree with Option 4d as the area around the A22 in Hailsham as a suitable option for additional new employment/business development.
We welcome the opportunity to make representations on behalf of our client Miletus Ltd to Part 4 of the Core Strategy -Issues and Options Paper. In respect of Settlement boundaries paragraph 4.4 states that there is a strong planning case for retaining village boundaries. We however concur with the view set out at paragraph 4.5 that boundaries could be amended to be drawn more broadly to include scope for new development in those settlements considered suitable for some growth. In respect of Question 5- Settlement Boundaries we agree with Option 5a that states settlement boundaries should be maintained, but should be expanded where needed to allow for necessary growth. In respect of Development In and On the Edge of Towns, paragraph 4.15 has identified that the Structure Plan proposed a doubled rate of house building in Wealden between 2006-2011 principally on greenfield sites. Paragraph 4.17 identifies that over the past 5 years a mean of 112 dwellings on previously developed land in the Rest of Wealden have come forward - if this trend carries forward then around 88% of the target for the Rest of Wealden will come from brownfield sites. In contrast 46 dwellings per year in the Sussex Coast policy Area in the same period were on previously developed land, and if continued then a brownfield target here of only 25% or so would be achievable. We concur with the view at paragraph 4.19 that the South East Plan is clear that greenfield housing allocations will be necessary in Wealden, furthermore we consider that the premise set out at paragraph 4.21 that focussing development in a limited number of locations, particularly in the Sussex Coast Policy Area where development patterns and infrastructure are less dispersed will have sustainability benefits of locating a large amount of new development in one place. In respect of Question 6- The Urban/Rural Split we disagree with options 6a, 6b and 6c. In respect of 6d we consider that growth of some villages near towns, particularly Hailsham might meet an urban rather than a rural need. In respect of Classifying Villages, we note at paragraph 4.28 that the 2007 Parish Planning Conference that there is a need for some villages to accept some appropriate and gradual development. This was because of the need to support and reinvigorate local services and communities and make housing more affordable. Paragraph 4.29 has identified that villages in Wealden along A roads and villages in more isolated locations seem to offer a higher level of services relative to their size. Paragraph 4.31 identifies that villages close to towns and/or rail stations may be fairly sustainable, despite having a limited range of services, or even lack of shop because of short overall journeys. In respect of Question 7e - Settlement Classification and Settlement Strategy, we suggest that the settlement of Lower Dicker given its sustainable location adjacent to the A22 in the Hailsham/Eastbourne triangle and location of the Swallow Business Park for employment purposes is a suitable location for additional growth. In respect of Question 8- Options for the Sussex Coast Policy Area we agree with Option 8a the Hailsham Focus. We concur with the view set out in paragraph 4.42 that in this option with the majority of growth being focussed on Hailsham, with less growth around Polegate/Willingdon, that the argument for Hailsham would include the potential for carefully conceived and located development to help regenerate the town and greater strategic capacity and road capacity than Polegate (with the A22 being less congested than the A27.)
We welcome the opportunity to make representations on behalf of our client Miletus Ltd to Part 5 of the Core Strategy Issues and Options Consultation Paper. In terms of Hailsham we consider that the growth of this location is an important sustainable option to meet housing and employment requirements set out in the South East Plan. In response to Question 15h, in particular we consider that the first Spatial Objective set out under paragraph 5.33 is important being the need to improve Hailsham's Economic performance and accessibility as part of the Hailsham-Eastbourne Triangle programme. Furthermore, it is considered that the improvement of the quality of entrances/approaches to the A22 gateways to the town is also an important spatial objective to meet in Hailsham. Question 15i asks for any other broad areas for consideration, we consider that Lower Dicker provides a suitable sustainable location for additional development. It has already been identified as a suitable location for employment development and we consider that further mixed use development in this area would meet sustainable development objectives set out in PPS1 and PPS3. Further consideration is given to Lower Dicker below in relation to responses to question 18. In respect of the Potential for a New Settlement or Concentrated Growth we agree with the identification at paragraph 5.41 of Lower Dicker to the north-west of Hailsham as a potential location for development. This paragraph states that Lower Dicker is disparate in form, but is accessible along the A22 and has relatively few planning constraints on development. The Core Strategy document has identified three potential locations in this broad area for a 'new village' of modest size which would need to be of exemplar quality - a true village with all attendant services not suburbanisation of the countryside. In response to question 18 we agree with option 18d at Lower Dicker New Village - Hackhurst Lane as a new settlement option. We consider that this is a sustainable location for additional mixed uses including housing and employment purposes. The Local Development Framework suggests that this option maybe suitable for an additional 1,300-1950 dwellings. It describes the area as currently comprising a mix of employment and residential uses lacking visual form. The A22 is described as a bottleneck at this point but does have the opportunity to be improved considerably through funding. It is described as currently having a poor bus service. The land to the west of Hackhurst Lane Industrial Estate is correctly described as having an unimplemented employment land allocation. However we would clarify that the site benefits from outline planning consent and there is a current reserved matters planning application ( ref WD/2007/1504/MAJ) being considered by the Local Planning Authority and this confirms that the applicants are committed to the development of the site for employment purposes. The principle of development in the Hackhurst Lane area of Lower Dicker has already been established in the currently adopted and Non-Statutory Wealden Local Plans being proposed as a suitable site in the 1998 Plan under Policy VB22.2 and designated under Policy BS2 in the 2005 Non-Statutory Plan. Government guidance also supports economic development in this location under PPS1 which seeks the promotion of a strong, stable and productive economy that aims to bring employment. PPG4 confirms that planning authorities should aim to ensure sufficient land is available to accommodate Industrial and Commercial Uses. The introduction of further development in the form of a new village at Lower Dicker will provide a sustainable option to assist in meeting the demanding housing and employment requirements set out in the South East Plan. Lower Dicker is identified within the Hailsham-Eastbourne Triangle programme as a suitable location for additional development. The issues identified in the the LDF Core Strategy relating to the current poor public transport provision and road improvements required at the A22 could be funded through investment into this area. Indeed the location of Lower Dicker is not subject to restrictive landscape designations such as AONB as much of the District is and offers...
an excellent location for future sustainable development opportunities.

Section of Document: Wealden's Communities

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

We welcome the opportunity to make representations on behalf of our client Miletus Ltd to Part 6 of the Core Strategy Issues and Options Consultation Paper. In respect of housing need paragraphs 6.7-6.10 of the Core Strategy Issues and Options Consultation Paper are important considerations. These paragraphs state that small units, flats and terraced houses comprise 22.9% of existing stock compared to the national mean level of 45%. Historically most units built were larger units. This is set against the backdrop of low overall delivery and with most proposals for greenfield sites being predominantly larger units not meeting overall needs and not providing mixed and balanced communities. A Strategic Housing Markets Assessment has been undertaken for the District and this shows that the indicative need for market housing is as follows: 31% one bed, 32% two bed, 29% three bed, 8% 4+ beds. The main need in terms of social housing is for small units for the elderly and larger 3/4 bedroom family units. The Assessment has identified that encouraging smaller units in rural areas could help younger families with less equity to afford to live there. If more smaller units were built then this could be one of several factors allowing densities to increase. Mean densities of new development in Wealden, at 35 dwellings per hectare are below the 40+ dwellings per hectare achieved in surrounding rural districts, they are also sometimes below historical densities of development. In terms of Question 24- Housing Density, it is clear that there is a requirement for smaller units to meet housing need, on this basis we consider that option 24d that in locations accessible to public transport provision higher densities should be permitted to assist in meeting this need. In respect of Affordable Rural Housing Needs the Core Strategy has suggested that historically there have been problems in bringing forward sufficient affordable housing in the District to meet demand. The Authority have suggested that there may be a need to move away from the current rural 'exceptions sites' policy as this is fairly strict and only allows them on the edges of the most accessible villages. On this basis Option 25d allowing sites solely for affordable housing should be allocated in rural areas. A further way of meeting the affordable housing needs would be to adopt Option 25g allowing ancillary dwellings to businesses providing key rural services if appropriate controls are in place. In respect of Transport Needs paragraph 6.41 states that the A22 is the main North-South route in the District. Paragraph 6.42 suggests that the County Council's current policy is to restrict all new junctions onto the A22, with major development using existing junctions. We object to this policy on the basis that it is considered that a flexible approach is required if the housing and employment requirements set out in the South East Plan are to be met for the low weald Towns. It is considered that the County Council policy is too strict and could prevent a number of growth options for development as well as removing the possibility of less environmentally damaging access road alignments to potential growth options to the North of Hailsham and west of Uckfield. In respect of a response to Question 27a we agree that development should be located where it might improve the viability of bus services to and between towns. In particular investment into locations that are currently less well served by public transport provides the opportunity to improve the sustainability credentials and benefits to new and existing locations.
Reason for comment:
Our attractive, historical, rural community would be totally destroyed by this enormous proposed settlement. Isfield would cease to exist and will be engulfed in a continuous development from Uckfield southwards.

Reason for comment:
We notice that part of the key to the acceptability of the above proposed development is the potential to raise funds towards the restoration of the Wealden line link between Uckfield and Lewes by developing the land in and around Isfield as mentioned on page 18 of the summary guide to the Core Strategy Issues.

Reason for comment:
Housing is necessary in the area. However it must take into account the AONB and be low density and not alter the character of the region.

Reason for comment:

I appreciate that Wealden is obliged to create this development strategy, however are we not already over-developed in this area? It will not stop at Willingdon or even Polegate. It seems that no-one will be happy until the entire area between the South Coast and a line drawn through Gatwick Airport is brimming with concrete from seaside to runway. What chance the Downs National Park then? I do not support the central government demand regarding housing requirements at all, and seriously dispute the building requirements which they wish to impose on this region. Unelected bodies MUST NOT continue to hold the power to inflict the Government's housing figures on us. There are hardly any GREEN FIELD sites left in this area, only brownfield. S.E. England is already overpopulated, bursting at the seams and there seems little in the plan regarding improvements to local services, infrastructure etc, Even plans announced by local health service trusts run counter to the needs of an increase in population as outlined in this document. The only building that should be permitted anywhere within Wealden is in small development areas of *verifiably* AFFORDABLE DWELLINGS built and sold ONLY to truly LOCAL people. I DO NOT agree with any new town developments particularly in A. of O.N.B. I do not support large scale expansion of towns such as Polegate, Heathfield and Uckfield, or any development that will lead to the “City South of Gatwick” and which will destroy the tranquility of the region for future generations. It is the existing features that make Wealden such an attractive place in which to live and work and to visit. Surely it is Wealden Council’s duty to uphold these values and to act as guardian of the countryside. We are fortunate to live in one of England’s most attractive regions. The Council must find the courage to tell Central Government that in this part of the South East we have “standing room only” on this bus and there’s another one behind going somewhere else… I would also like to take this opportunity to protest most vigourously about the denial of my democratic right to express my opinion via my elected Councillor, Stephen Shing. Having taken part in a democratically organised poll I would like an explanation as to why the disparate wishes of his constituents are to be combined and will be used as a SINGLE SUBMISSION . I ELECT my councillors and expect them to be able to represent MY VIEWS INDIVIDUALLY - not as part of a “group submission” that is (it seems to me) ILLEGALLY being lumped together with those of my fellow residents.

No development at all.
No to any development at all. Time to stop building in the UK. Once developers start they will not cease our countryside needs to be protected. Over development does not bring wealth, jobs or better communities-only more money for local councils via council tax. Essential facilities are stretched to limits; hospitals and schools; doctor surgeries. Unless the government enforces developments there should be no major housing or business developments. Businesses bring jobs in themselves and money for local people. Government of EU should be more accountable/responsible to US the people.

1) Ref and Broad Area: I do not support the proposal that will change Halland’s current status to that of an ‘Expanded Village’ 2) Potential Scale of Development. The construction of 2800 dwellings in Halland is unrealistic and unacceptable because the current infrastructure will not support a project of this magnitude 3) Landscape and Biodiversity. Given the proportional car to new home ration has WDC considered the issue concerning Pollution? 4) Transport and Accessibility. WDC’s risk assessment identifies that the A22 within the Parish is both poor and dangerous. Any future expansion within the District will impact dramatically on Halland and will only serve to exacerbate the problem of congestion. The volume of traffic has increased to unacceptable levels and one side of the road has little or no pavement. Halland is in urgent need of a bypass now. 5) Infrastructure, Services and Other. Services are minimal, the bus service is inadequate and noise levels reach unacceptable levels during the 24 hour period.
Section of Document:

Reason for comment:
There should be a policy which allows for settlement boundaries to be expanded where necessary in order to allow for future growth. In addition, policy should allow for appropriate development to take place outside of settlement boundaries.

Section of Document:

Reason for comment:
Within this area the majority of growth should be focused on Hailsham given its strategic and road capacity, and the potential for development to regenerate the town.

Section of Document:

Reason for comment:
Within the rest of Wealden district, some future development should be focused in Uckfield, given the town’s existing services and its potential for expansion.
It is recognised that the town is not serving local needs and therefore, we support the growth of Heathfield. Appropriate retail facilities should be provided to support the sustainable growth of Heathfield.

We agree that, as part of a joint approach with Tunbridge Wells Borough Council consideration should be given to an urban extension to the south east of Tunbridge Wells (an area which falls within Wealden district boundary).

We support the growth of Uckfield in improving its role as one of the main service centres in the district and to support the recognised need to improve the existing retail offer in the town centre. As such, the growth of Uckfield should ensure that there is sufficient flexibility for suitable retail provision in the future.
Question 15g

Reason for comment:
The growth of Hailsham should ensure that there is sufficient flexibility for suitable retail provision in the future.

Agree

Question 18k

Reason for comment:
It would be entirely sustainable for any planned future growth to make suitable provision for retail facilities.

Agree

Question 32a

Reason for comment:
We fully support the objective (SO10) to broaden the weak retail offer currently provided by the district’s towns through meeting the need for additional comparative goods floorspace and additional convenience goods floorspace by 2016.

Agree
I appreciate that Wealden is obliged to create this development strategy, however are we not already over-developed in this area? It will not stop at Willingdon or even Polegate. It seems that no-one will be happy until the entire area between the South Coast and a line drawn through Gatwick Airport is brimming with concrete from seaside to runway. What chance the Downs National Park then? I do not support the central government demand regarding housing requirements at all, and seriously dispute the building requirements which they wish to impose on this region. Unelected bodies MUST NOT continue to hold the power to inflict the Government's housing figures on us. There are hardly any GREEN FIELD sites left in this area, only brownfield. S.E. England is already overpopulated, bursting at the seams and there seems little in the plan regarding improvements to local services, infrastructure etc. Even plans announced by local health service trusts run counter to the needs of an increase in population as outlined in this document. The only building that should be permitted anywhere within Wealden is in small development areas of *verifiably* AFFORDABLE DWELLINGS built and sold ONLY to truly LOCAL people. I DO NOT agree with any new town developments particularly in A. of O.N.B. I do not support large scale expansion of towns such as Polegate, Heathfield and Uckfield, or any development that will lead to the “City South of Gatwick” and which will destroy the tranquility of the region for future generations. It is the existing features that make Wealden such an attractive place in which to live and work and to visit. Surely it is Wealden Council’s duty to uphold these values and to act as guardian of the countryside. We are fortunate to live in one of England’s most attractive regions. The Council must find the courage to tell Central Government that in this part of the South East we have “standing room only” on this bus and there’s another one behind going somewhere else… I would also like to take this opportunity to protest most vigourously about the denial of my democratic right to express my opinion via my elected Councillor, Stephen Shing. Having taken part in a democratically organised poll I would like an explanation as to why the disparate wishes of his constituents are to be combined and will be used as a SINGLE SUBMISSION. I ELECT my councillors and expect them to be able to represent MY VIEWS INDIVIDUALLY - not as part of a “group submission” that is (it seems to me) ILLEGALLY being lumped together with those of my fellow residents.

Below are my enlarged comments on section 16f, area between Lower Willingdon and Polegate i.e. that which immediately concerns myself: This is a large area of fields and at present is not being farmed to any great extent. However I feel VERY strongly that it is not suitable for large numbers of houses, nor any buildings, as it is well recognised as a flood plain. There is not the surrounding road structure to absorb the additional huge number of vehicles which would come with the houses. Nor the general infrastructure of community provision; schools, doctors etc. which would be needed. However, I do think that the land could be put to very good use for the EXISTING population. I am told that a new primary school is needed for one thing. There is also a VERY great need for open land for sports and recreation-this area is at present very badly served. The "Hindusland" already exists and should be incorporated. Sports fields are an obvious addition to a school and there could also be a leisure and sports centre, perhaps a small lake, "wildlife trails", cycle trails and much more, all already badly needed. It is reported that Wealden District Council has won a £237,000 grant from the Big Lottery fund for play activities-then this is where some of that money could go. This type of use would place a minimum of interference on the nature of the land for absorbing surplus water and I feel this great opportunity for the future of Willingdon and Polegate should not be lost. Once the area disappears under acres of concrete and houses, it will have been lost forever.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Part of document: Option 14h
Section of Document:

Your View

Reason for comment:
Currently the SE Plan requires Wealden DC to find land to build 8000 new homes over the next twenty years. This equates to 400 homes each year, 230 in the Sussex Coast sub region (South Wealden) and 170 in the rest of Wealden. The initial challenge is to identify sites for these homes, but regrettably it is virtually certain that the government will considerably increase the number of dwellings required in the South-East and we can expect many of them to be in Wealden. For the 8000 sites that must be identified now, we have no hesitation in saying that the right course of action is to spread the burden as evenly as possible between the five towns and the other principal existing settlements. In the Uckfield area we very strongly oppose option 14h, areas to the West of Uckfield (A22) Bypass and would urge that Wealden DC does everything possible to facilitate option 14g, Uckfield Town Centre Opportunity Area. Uckfield was disastrously developed in the 1960’s and 70’s, with exceptionally low quality buildings and a great waste of space. Bold policies, involving demolition of much of what was built then, could revitalise the town and provide much new sustainable housing. The aim of the Core Strategy must be to maximise brown field opportunities and if green field development cannot be avoided, it must be as close as possible to established settlements in areas of low landscape attractiveness – in other words in areas that have already been spoilt by earlier development. We are strongly opposed to any new settlement option for the 8000 homes required now. We are extremely disappointed to see option 18a, the Lavender New Settlement at Isfield. It is made quite clear that this would be dependant on the restoration of the rail link and could provide the funding needed to restore the line. Whilst we consider that it is most unlikely that Wealden would include this option in the Core Strategy, we are seriously concerned that its inclusion is a pointer for what could happen in the future, if, as expected, the number of homes to be built in Wealden is drastically increased by the government. Isfield, even with a restored rail link, is not the right place for these homes. An 8200 settlement would be the size of Uckfield and would virtually merge with it – especially if option 14h was accepted as part of the Core Strategy. New Towns have virtually always been unsuccessful. Even today, long after their establishment, the centres trade very badly in comparison with established towns and the residential areas are bland with very few local services. Whilst the restored rail link is being touted as ‘a green option’ the new homes along the line seem unlikely to be occupied by local people, most of who work in areas not served easily by the rail line. More long distance commuting is not what Wealden needs. We would hope that the expanded population of existing towns is matched by expansion of local employment opportunities. A settlement of over 6000 homes, such as suggested for Isfield (18a) and Berwick (18j) could at least be expected to have major new infrastructure. Smaller settlements such as those proposed along the A22 at Halland (18b) and Lower Dicker (18c) would have none. There are increasing numbers of accidents along the A22 and such settlements would massively add to the risks. The Consultation Document asks for views on building a new ‘parkway’ station in the Polegate area and on the priority that should be given to restoration of the Uckfield-Lewes rail link. Given all the other constraints that exist in Wealden, it is inevitable that a considerable number of the homes needed will be in the Hailsham/Polegate axis. We note that Eastbourne is a major employment generator for many residents of Wealden. We therefore reluctantly support the majority of options put forward for the Hailsham and Polegate areas, with the notable exceptions of option 15f, area west of Hailsham bypass, and options 16b and 16a, also areas west of the A22. We therefore feel that the building of Polegate Parkway station should be a priority. We do not support the restoration of the Uckfield /Lewes rail link. The subsidy of ‘major housing development alongside’ is too high a price to pay, especially as much of the line runs through the AONB. Finally on affordable housing we commend Wealden for already having targets above most other neighbouring authorities. We agree that 40% of all developments of 10 houses or more should
be affordable and that there should be a 50% requirement in smaller settlements for sites of two dwellings or more. We add that there is a need for affordable homes of three, or even four bedrooms. Too many of the affordable homes built today are single bed roomed flats.
Currently the SE Plan requires Wealden DC to find land to build 8000 new homes over the next twenty years. Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
Scale and type of development out of keeping in rural setting. Ancient woodland and a unique wildlife habitat would be lost to future generations. Infrastructure is inadequate and in the light of global warming concerns green spaces between settlements are a high priority as well as helping to drain excess water away. Uckfield is a relatively small town and this would further exacerbate road congestion problems and damage the amenities of local residents. Access on to roundabout on A26 unsuitable.

Consultee ID: 106606
Mrs Taylor
Part of document: □ document  ✓ chapter  □ section  □ option
Part 5
Section of Document: Wealden’s Places
Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
14 B Area around Ringles Cross Road links are poor. Rocks Road from Piltdown through Shortbridge is used by golfers, fishermen, people crossing to the pub, deer crossing the road, cyclists and walkers and is narrow with dangerous bends. The junction with Snatts Road opposite Buckwood Grange is already extremely dangerous. Snatts Road is a narrow winding road with parking on either side already used as a rat run and turning right out into London Road can be extremely dangerous with fast approaching traffic from Budlets roundabout and low visibility. Housing development is unsuitable in this location with poor road links and would mean the loss of more green space and woodland. It would generate more noise and light pollution and put the current infrastructure in the town under too much pressure. There are currently no NHS dentists I am aware of and plans are in the pipeline to downgrade the Princess Royal Hospital in Haywards Heath with the loss of accident and emergency and maternity services. Uckfield is a relatively small town and this would cause worse problems of congestion and damage the amenities of local residents.

Question 32b

Reason for comment:
Small scale developments and all other options should be considered before large scale developments start. It is in the interest of the developers to build as many dwellings as they can to increase their profits. Their interests should be of the least importance. The housing should reflect the area. High occupancy flats should not be built next to bungalows.

**Reason for comment:**
I do not believe the infrastructure i.e. transport, water, schools, roads is at all adequate to support extra housing in Polegate, Willingdon & Stone Cross. Also I don't believe we should be taking away the beautiful countryside we have around us. Once it is gone there is no going back and as keen ramblers we are definitely against any further development.

Part 10

Section of Document: Details of How to Comment

Reason for comment:
9th August 2007 Wealden District Council Vicarage Lane Hailsham BN27 2AX (submitted through www.wealden.gov.uk) Dear Sir or Madam: Core Strategy Consultation I write with regard to the above document on which you are currently consulting. I am a resident of Isfield and consider the proposal for a new settlement of between 5300 and 8200 new homes in this area to be hugely misguided. If it were to go ahead as things stand not only would it represent a massive over development of an area lacking in basic infrastructure but it would also destroy the character of one of the villages which this part of England has for many years fought to maintain. The principle of development of large numbers of affordable homes in the South East is a sound one and one which all local authorities will have to embrace whether they agree or not due to the directives from central government. However one of the key points made by the minister was that we should learn from the mistakes of developments in 1960s such as poorly thought out and designed new towns. Wealden is fortunate to have areas of outstanding natural beauty to the north and south of the district but this should not lead to the remainder being regarded as developable land. There are important views to and from the Southdowns for example that any development must be sensitive to. All good development involves a contextual analysis of its site and location and responds accordingly. This principle of good design is at the heart of national planning policy and is wholeheartedly supported by the likes of the RIBA and CABE. The principle of a new settlement at Isfield is fundamentally flawed in that its immediate response to context is completely brutalist – without even considering the aesthetics or urban planning issues it would require the complete destruction of the existing village as we know it – and this is completely at odds with the largely rural character of Wealden outside its major population centres. The requirements of a new, good quality new town with a healthy and sustainable centre, appropriate infrastructure and suitable amenities would all have to be sited and constructed from scratch around the existing village effectively destroying it. Isfield is a farming village and a ribbon development winding along the route of the road to Uckfield, it has no clearly defined village centre that would make a suitable core to build up the base of a new town, and is served only by a pub and a part time post office. New development should augment and respect the character of the area into which it is to sit. It is clear from looking at the post war new town developments such as Milton Keynes, East Kilbride and Glenrothes that huge errors in urban design were permitted on the basis that large numbers of homes were needed very quickly. Contemporary dogma meant these large numbers of homes were designed around the car with soul-less shopping malls and offices that lie dark and empty in the evenings at their centres and suburban sprawl beyond. They lack vibrancy and community often lead to alienation and the resultant social issues this raises. One might argue that lessons have been learnt from this first wave of new towns and that they are on a much larger scale than those proposed for the new settlement at Isfield. However a more recent example of a new town development of a similar scale and completed in the late 1990’s illustrates that lessons have not been learned. Prince Charles’ Poundbury in Oxfordshire is a soul-less, dogmatic faux ‘town’ more akin to acres of suburban sprawl than to a community focused, well planned and serviced town with a vibrant heart. Poundbury has more in common with the gated communities or retirement villages found throughout the United States of America than what we regard as a town. The proximity of Uckfield to Isfield also makes the creation of a new settlement in this location inappropriate and unsustainable. Isfield and Uckfield’s competing commercial centres would mean neither would have completely satisfactory facilities and amenities and slowly the two would be absorbed into one another. One of the key issues that accompanies the desperate need for good quality new housing stock in the South East is desperate need for the infrastructure to support it. In the South East we have the busiest roads and railways in the country. The A26 is unable to cope with the volume of traffic to which it is
subjected to daily, the railway that runs from Brighton to London is at saturation point and railways that run from other large population centres along the south coast are slow and out dated and all aimed at travel to London rather than travel through out the region. It is clear that despite government efforts people have chosen the individual freedom of their cars over the railways and buses. But the roads remain woefully inadequate. The railways only seem to serve larger towns and cities with no meaningful discussion over the reinstatement of the large network of former lines that served more rural communities. In Isfield, despite campaigning for the reinstatement of the Lewes to Uckfield line for many decades, the vast majority of village residents are now against it. The most recent Parish Council meeting where the announcement of a feasibility study into the Lewes to Uckfield line by Network Rail was announced was witness to this. This is almost entirely attributable to the identification of Isfield in the draft Core Strategy document as being suitable for a large new settlement (subject to the reinstatement of the Lewes to Uckfield railway line). This is unfortunate as the railway would serve the village and its population well in its current state – especially as the bus service is being cut from two buses and hour to one an hour in September. It seems that country wide infrastructure comes to rural communities when their land is required and not when local community needs require it. In line with proposals elsewhere in the draft Core Strategy the interests of Wealden district would be best served in targeting development proportional to each town or village in the district and targeting investment in regeneration and master planning of the larger town centres in the region. By doing this sustainable growth can be managed, existing centres improved and importantly the rural character of Wealden can be maintained. This is essential to safeguard the character of the district whilst looking to the future. Yours faithfully Olli Blair RIBA cc. Colin Webb – Chairman, Isfield Parish Council Charles Hendry – MP for Wealden The Editor, Sussex Express

<td>Question 3a: Agree Land which has been allocated for employment use for some time but has remained undeveloped should be considered for housing, mixed use or other alternative development. By retaining allocations which are undesirable to either local businesses and/or fail to attract investment from outside of the district/county, sites are effectively redundant. Such sites could provide a valuable source for new housing land and, in accordance with PPS3 (2007) guidance, could be used more efficiently. The Local Authority should analyse this policy approach further because of the district’s ‘limited legacy’ (paragraph 1.3.14) of brownfield land.</td>
</tr>
</tbody>
</table>
Reason for comment:
Question 2: Disagree New developments are continually becoming more energy efficient with the advent of BREEAM/EcoHomes standards, the Code for Sustainable Homes, and tighter Building Regulations. A development which proposes a renewable energy scheme is an improvement to existing building practises, however, a policy stipulating a blanket 10% or 20% renewable energy target for all new development may not appropriate given that the viable use of such technologies can be very site specific in both their practical application and financial viability. A more general policy should be adopted which encourages developers to analyse their sites in this context and to demonstrate whether or not a scheme can accommodate any renewable energy technologies.

Reason for comment:
Question One
Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
Some development should be allowed in the High Weald AONB, certainly in the larger towns. It is important not to rule out settlements which could be made more sustainable by reducing the need for residents to rely on other towns for services and employment. Some planned development for towns and villages within the AONB will also help to address the affordability of housing, which is an issue unlikely to be sufficiently tackled through piecemeal windfall sites. Development should, however, be commensurate with the size of settlement and the availability of appropriate sites to accommodate new development. For instance, in smaller villages, any housing allocations should comprise a sufficient number of dwellings so as to maintain existing local services and shops and to meet rural housing needs.
Reason for comment:

New developments are continually becoming more energy efficient with the advent of BREEAM/EcoHomes standards, the Code for Sustainable Homes, and tighter Building Regulations. A development which proposes a renewable energy scheme is an improvement to existing building practises, however, a policy stipulating a blanket 10% or 20% renewable energy target for all new development may not appropriate given that the viable use of such technologies can be very site specific in both their practical application and financial viability. A more general policy should be adopted which encourages developers to analyse their sites in this context and to demonstrate whether or not a scheme can accommodate any renewable energy technologies.

Reason for comment:

A development which proposes a renewable energy scheme is an improvement to existing building practises, however, a policy stipulating a blanket 10% or 20% renewable energy target for all new development may not appropriate given that the viable use of such technologies can be very site specific in both their practical application and financial viability. A more general policy should be adopted which encourages developers to analyse their sites in this context and to demonstrate whether or not a scheme can accommodate any renewable energy technologies.
Option 3a

Reason for comment:
Land which has been allocated for employment use for some time but has remained undeveloped should be considered for housing, mixed use or other alternative development. By retaining allocations which are undesirable to either local businesses and/or fail to attract investment from outside of the district/county, sites are effectively redundant. Such sites could provide a valuable source for new housing land and, in accordance with PPS3 (2007) guidance, could be used more efficiently. The Local Authority should analyse this policy approach further because of the district’s ‘limited legacy’ (paragraph 1.3.14) of brownfield land.

Option 3b

Reason for comment:
Adopted Local Plan Policy already seeks to protect existing employment premises where there is evidence of need, which is likely to be continued into the DPD. If there is a genuine market need for certain premises, then they would be safeguarded, however, some sites may not be attractive to businesses for various reasons and, as such, the Local Authority is recommended to adopt a flexible approach when analysing evidence on the viability of employment premises/sites and efforts made to attract new occupiers/investors over a period of time. Agree to this option only on the basis that there is a clear market requirement for the type of premises identified, which is realistic and viable. Too often, sites that would be better re-developed for non employment uses are retained and either remain vacant or do not attract investment.

Option 3d

Reason for comment:
New housing development should be planned alongside proposals for new employment development. The Issues & Options Consultation Paper acknowledges that a key challenge and priority of the district is stimulating economic regeneration and growth, such as in the South Coast policy Area (the Hailsham/Polegate-Eastbourne Triangle), and, if this is to be realised, new housing needs to be planned which is commensurate with the level of employment development proposed.

Part of document: Option 6a

Section of Document:

Reason for comment:

Agree that the vast majority of new development will need to be focussed in/around major settlements. This approach would accord with national planning policy guidance regarding sustainable development principles and would help to realise some of the districts regeneration objectives and needed infrastructure improvements. Areas of focus should be the around Hailsham/Polegate-Eastbourne Triangle and Uckfield. Obviously, it is not possible at this stage to define what level of development will be appropriate until the sites available to meet future growth have been more thoroughly examined.

Reason for comment:

Agree that the vast majority of new development will need to be focussed in/around major settlements. This approach would accord with national planning policy guidance regarding sustainable development principles and would help to realise some of the districts regeneration objectives and needed infrastructure improvements. Areas of focus should be the around Hailsham/Polegate-Eastbourne Triangle and Uckfield. Obviously, it is not possible at this stage to define what level of development will be appropriate until the sites available to meet future growth have been more thoroughly examined.

Part of document: Option 4d

Section of Document:

Reason for comment:

Given the scale of growth envisaged in the South East Plan (which in any event is considered by most to have significantly underestimated the amount of housing required in the region) it is likely that all of the locations identified in question 4 of the Issues & Options Consultation Paper will be required if appropriate levels of employment and housing are to be identified in the Core Strategy.
Comments on question 9: Agree that developing each of these towns further would be appropriate, given our response to question 1 and that development on their peripheries is the likely option depending on the level of growth. As to the distribution of development, Uckfield is a sustainable settlement within the district and its location outside of the High Weald AONB means the landscape impact of new development around the town is likely to be less. Expansion of Crowborough and Heathfield will require careful site selection paying a particular focus to landscape impact on the High Weald AONB.

Settlement Policy Boundaries (SPBs) are the correct means for establishing the principle of development and should be maintained. The Local Authority must look to expand SPBs as part of a strategy to identify sufficient sites in appropriate locations to meet the PPS3(2007) requirement to identify a five year housing supply. It will not be possible for urban capacity and windfall sites to contribute to the necessary identified supply, in which case it is important for Local Authorities to plan housing growth more proactively particularly in predominantly rural districts like Wealden. Where necessary, boundaries should be expanded to accommodate areas of planned growth appropriate to the size of settlement (see comments on question 1).

Notwithstanding comments on question 5a, Wealden is a district comprising scattered development where there are many rural settlements which do not have SPBs, but where appropriate infill development can help to sustain social networks and services in rural areas in accordance with guidance contained in paragraph 38 of PPS3 (2007). Therefore, local planning policy should allow for some infill development within well defined villages and hamlets without SPBs through a criteria based approach. This accords with the advice of paragraph 38 of PPS3 (2007).
Option 6b

Reason for comment:
Agree that the vast majority of new development will need to be focussed in/around major settlements. This approach would accord with national planning policy guidance regarding sustainable development principles and would help to realise some of the districts regeneration objectives and needed infrastructure improvements. Areas of focus should be the around Hailsham/Polegate-Eastbourne Triangle and Uckfield. Obviously, it is not possible at this stage to define what level of development will be appropriate until the sites available to meet future growth have been more thoroughly examined.

Option 6c

Reason for comment:
Agree that the vast majority of new development will need to be focussed in/around major settlements. This approach would accord with national planning policy guidance regarding sustainable development principles and would help to realise some of the districts regeneration objectives and needed infrastructure improvements. Areas of focus should be the around Hailsham/Polegate-Eastbourne Triangle and Uckfield. Obviously, it is not possible at this stage to define what level of development will be appropriate until the sites available to meet future growth have been more thoroughly examined.

Option 8a

Reason for comment:
Comments on question 16: As with Hailsham, Polegate will be an appropriate focus for growth given the employment aspirations of the ‘Triangle’ initiative and the sheer scale of housing and employment development that will be required.

Comments on question 15: We agree that Hailsham should be a major focus for development. It is recommended, however, that the Local Authority does not lose sight of smaller sites which can make a significant contribution to supply regardless of the eventual location(s) selected for major development. These will include small areas which could be taken into the SPB and identified for housing/mixed use development without giving rise to the strategic infrastructure considerations which go with large scale growth options. In the short/medium term, such sites can make an important contribution to ongoing housing land supply before supply from major development areas is delivered. An example of such a site is land south of Station Road, east of the existing industrial estate and north of New Barn Farm, Hailsham. These comments are particularly relevant given the draft South East Plan requirement for any shortfall in Structure Plan housing requirements to be carried forward into future housing targets.

PPS3 (2007) requires Local Authorities to identify a five year supply of housing on sites. Clearly, in the interests of certainty, the accepted split between large (10+ dwellings) and small sites (1-9 dwellings) is an appropriate starting point and the identification of housing sites of 10 units or more will provide certainty in terms of demonstrating a five year housing land supply.
Reason for comment:

Question 1: Agree Some development should be allowed in the High Weald AONB, certainly in the larger towns. It is important not to rule out settlements which could be made more sustainable by reducing the need for residents to rely on other towns for services and employment. Some planned development for towns and villages within the AONB will also help to address the affordability of housing, which is an issue unlikely to be sufficiently tackled through piecemeal windfall sites. Development should, however, be commensurate with the size of settlement and the availability of appropriate sites to accommodate new development. For instance, in smaller villages, any housing allocations should comprise a sufficient number of dwellings so as to maintain existing local services and shops and to meet rural housing needs.

Your View

Reason for comment:

I am only concur with what has already been said. Perhaps more to the point - why is no-one questioning the perceived need for so much additional housing in the South East? This 'need' would appear to have metamorphosed into a central government directive. Presumably the relevant local authorities are having some say. There can be very few residents of the South East who agree with this perception. With regard to Isfield - if a development of this magnitude were to proceed it would signal the virtual destruction of much of the rural environment of Sussex, paving the way for other such developments. People want to live in villages for a reason - they do not want their villages turned into towns.

Reason for comment:

Already heavy traffic during school pick up & drop off times. No opportunity to widen roads, as such the heavier traffic would be even more dangerous than it is currently. No pavements on Sandy Cross Lane. If given the go ahead this would possibly give a green light to further development into AONB & would set a precedent. Would irrevocably change the character of Sandy Cross Lane.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:

If small developments of 1 or 2 houses were allowed in each village in the Wealden area there would be no need for new town developments. The infrastructure required for the proposed new town would be devastating for the area and would increase taxes and rates throughout. Roads, schools, hospitals and doctors; I am sure all of this will not be paid out of private developers profits. It is a knee jerk, badly proposed and unthoughtout proposal. The numbers mentioned I'm sure are scare mongering in the extreme in the hope that when they are reduced to the numbers truly required there will be less objections from residents. This is normal local and central government thinking.

Question 18k

Reason for comment:

**Reason for comment:**
While it may have been in a planning document from years ago, this is a major development close to or within the AONB. Pursuing this is contrary to Wealden's own spatial vision
Question 12h

Section of Document:

Reason for comment:
Agree for the most part but it is important to promote a thriving market town environment. Other parts of the country have made more progress on this in towns of a similar size than Wealden seems to have done. I am unconvinced that the last two bullet points are appropriate for a town like Heathfield.

Question 31a

Section of Document:

Reason for comment:
While these are fine words, they imply that there will be singing and dancing in the streets of Wealden - when the reality we face is a despoiled environment with insufficient infrastructure to support these expansion plans. And just what does "Growth will be focused where it will be accessible, most sustainable and most benefits the objectives set for that place" actually mean in practice?

Question 32a

Section of Document:

Reason for comment:
Consultee ID: 106619
Mr & Mrs Holmewood

Part of document: Option 18a

Section of Document:

Your View: Disagree

Reason for comment:
Our attractive, historical, rural community would be totally destroyed by this enormous proposed settlement. Isfield would cease to exist and will be engulfed in a continuous development from Uckfield southwards.

Consultee ID: 106619
Mr & Mrs Holmewood

Part of document: Option 27b

Section of Document:

Your View: Disagree

Reason for comment:
We notice that part of the key to the acceptability of the above proposed development, is the potential to raise funds towards the restoration of the Wealden line link between Uckfield and Lewes by developing the land in and around Isfield as mentioned on page 18 of the Summary guide to the Core Strategy Issues.
The Issues and Options paper highlights the limitation of settlement boundaries in providing for future development requirements in the district. This concern is underlined by consultations, referred to in the paper, that found that some development boundaries ‘were drawn too tightly and are preventing small scale housing from being built’. Acute problems of housing affordability, through lack of supply, in Wealden’s rural areas provides an indicator of the effect these restrictive policies can have. The paper outlines the requirement for ‘8,000 new homes between 2006 – 2026’ in the district and expresses concerns about the limited growth areas for new development. Limited growth areas coupled with a lack of brownfield sites leads to the conclusion that some greenfield sites will have to be developed in order to help meet the economic and housing needs of the district. This is not to suggest a free for all and the urbanisation of the countryside should occur. Appropriate policy can enable suitable development through strict criteria and help ensure the spatial vision objectives of delivering housing, employment and protecting key environmental assets. Figure 12 in the paper provides suggestions for village growth potential and identifies infill schemes within development boundaries and allocated sites for affordable housing on the edge of villages without development boundaries. This does not seem to indicate much flexibility for appropriate small scale development outside of development boundaries. However, the paper does identify that smaller sites might not be allocated on the proposals map but could be considered through criteria based policies. Criteria based policy can and needs to allow for infill development on greenfield sites to provide much needed small scale sites in rural areas. This will help to provide for housing and employment provisions on a small scale in rural areas with a minimal impact due to surrounding development. We therefore suggest the following draft policy for inclusion in the Preferred Options Core Strategy: “Proposals for in-fill development outside of settlement boundaries will be permitted where the following are met: - The scale, form, design, materials and layout of any new development is appropriate to and complements the character of the existing residential area; - Particular care is taken to siting and design within AONBs; - The development is of a density appropriate to character of the existing residential area.” I would be grateful if the above could be taken into consideration when preparing the Preferred Options Core Strategy.

Option 12d

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
This land is a green field site on farm land within the High Weald Area Of Outstanding Natural Beauty and is located at a considerable distance from the existing built up area of Heathfield and the Town Centre. The development of this site for up to 90 dwellings would greatly increase the amount of traffic on the B2096 which at peak times during the school term, is already heavily congested with traffic associated with the Community College, as well as other traffic. In addition, the development of this site would be at odds with the Government's objectives for sustainable development, as set out in PPS1, PPS3, PPS7, and PPG13. It would also contradict existing Development Plan policies where they seek to protect the countryside from harmful forms of development. The site is also located directly opposite Heathfield Park and within a very rural area. In addition, without major expansion, the Community College simply could not cope with the additional demands that would be placed upon its existing resources. There is an overwhelming case therefore for not considering this land for residential development.

At least 10%, & in the high end, more expensive and larger houses why not make it more. Greywater systems as well, to minimise the use of drinking standard water when washing the windows / flushing the loo.
Option 2b

Section of Document:

Reason for comment:
This plan is set out over a long timescale - why not set a higher standard for a few years time.

Option 3a

Section of Document:

Reason for comment:
But bear in mind that once the new houses go up land which wasn't wanted for employment purposes may suddenly become desirable for that usage.

Option 3b

Section of Document:

Reason for comment:
If better use could be made of business sites - e.g. going from single to 2 storey then why not.

Option 3d

Section of Document:

Reason for comment:
The statement makes it sound as if people will be encouraged into the area by both new homes and new employment opportunities. The essential trick is to make the area suitable for the people who already live and work here; those who live here, work elsewhere & would like to move their business closer to home; those who work here & are commuting in because they can't find suitable (affordable) housing here.

Question 7e

Section of Document:

Reason for comment:
I have lived in Polegate & Eastbourne for the last decade, but without a car I know very little about many of the villages & towns mentioned. It is difficult to reach many of the areas by public transport, and can be very expensive when you try. If further development takes place in any or all of them, without some cohesive public transport plan, there will be a great many more cars on the roads. Since I have been here, 3 small post offices which I have used have been closed, along with one of the large post offices in Eastbourne. If you are using the existence of Post Offices as part of the village criteria, what guarantee do you have that they will remain open over the duration of the plan, & into the future? How will you ensure that any new developments, or enlargements of smaller hamlets into villages, gain a Post Office?

Part of document:  ☑ option
Question 15g

Section of Document:

Reason for comment:
If I cycle along the Cuckoo trail (north from Polegate) the worst bit is going through Hailsham - traffic on one small section; going through housing estates; the trail in places looking more like an alleyway than a rural cycleway. The Cuckoo trail is a commuting route for people, as well as a leisure route, and a peak times it can get congested. Easy access onto it is good, but if more people use it then there could be problems. Also expansion of Hailsham bringing it into close contact with the expansion of Polegate leads the Eastbourne conurbation growing ever bigger.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Ms Dobell  
106621  Resident

Part of document: ☑ option

Section of Document: Option 16g

Reason for comment:
The big issue is carparking space - the station serves not just residents of Polegate, but also lots of people from the wider area. There isn't space at present, isn't a short-stay section for people dropping off / picking up people from the train, and there is a shortage of spaces on the street for shoppers. More houses means more cars.

Consultee ID: Ms Dobell  
106621  Resident

Part of document: ☑ option

Section of Document: Question 16j

Reason for comment:
As a Polegate resident I like the quiet nature of the place - until the bypass was built we could sit in the garden & not hear any human activity - despite living on a housing estate. Now we have the continuous drone of the vehicles, & any building in the area will make that worse. The groups of children who congregate in the town centre are generally easy going, & the groups are small by virtue of the size of the population. We have almost instant access to the countryside, and foxes / hedgehogs / bats / slow-worms all come into the garden. Enlarging Polegate will turn it from a very small town - more a village suburb of Eastbourne - into something that could have all the problems of an urban area. Modern developments cram as many people in as possible without using highrisers, but the problem with a highrise is the people not the architecture. You get the same problems on small estates with little or no parking, no verges or green spaces, no gaps between the houses, no gardens (or gardens so small that they are more like large window boxes). In practical terms they are close to the slums and terraces that used to dominate towns in the early 20th century - but the houses are small & yet so expensive that people on a halfway decent wage can't afford to buy. I'm sure a lot of people in all the picturesque villages will say the same: development bad, status quo good. I'm concerned that as Polegate isn't as pretty or touristy as many other places in Wealden it is already seen as a more attractive place to put more buildings. Given the way house prices seem to constantly rise, giving lucky householders end a windfall, but making the situation worse for those renting / looking to buy, is there any way that covenants could be used, to ensure that on resale any profit exceeding x% is returned to the council? Or a covenant to say that a 2 bed house has to remain a 2 bed house (so that attic / garage conversions & extensions which double the size of a house & thus price it out of the league of a first time buyer are more difficult to obtain planning permission for). Sky high prices are what is driving the need to build affordable homes.

Question 18k
Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
one new settlement would relieve the need to drastically expand in other places, but would have an overwhelming impact on whichever location was chosen. The council would need to be certain that the infrastructure would be in place - schools / shops etc BEFORE the majority of the houses were built. The council would also have to ensure that the trains / buses were in place to serve the community - and services would remain in place even if they were not financially lucrative - particularly as it seems to be being sold to us as an ecotown. If you have one new town - even a small one - where are all the people going to work? There won't be many jobs in the new shop(s) / school, and you could end up with everyone departing the place first thing in the morning to drive to Eastbourne / Brighton / Lewes / London. Then you'll get complaints that there aren't any jobs local to the new settlement, as well as the transport infrastructure getting overcrowded at that point.

Consultee ID: Ms Dobell
Agent ID:
106621 Resident

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option

Question 19f
Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
Any building in the north of the county could affect the flooding potential in the south - e.g. more tarmac means more surface runoff entering the drainage system immediately, rather than being able to soak into the ground & slowly filter through. This is true for all development, but you need to bear in mind that a development some miles away can still impact on people / the environment.
Part of document: Option 24d
Section of Document:
Reason for comment:
All locations where you are planning more than a handful of new properties need to have full public transport links

Reason for comment:
I have tried to answer the questions in as constructive manner as possible. I have had difficulty with some aspects of this consultation paper - it took a long time to set up so that I could answer questions, & then I have spent 3 hours 45 min in the library trying to answer things. You can only have a terminal for 1 hour at a time, & can't have 2 hours on the same day, so my answers have been quicker & had less thought as I have gone on. I am being timed out now.
Reason for comment:
Ensure that when the planning permissions are granted there are clauses so the council does not lose out - for instance if the housing developer agrees to built a Post Office / community centre but then says that their costs have increased & asks the council for funding. The council shouldn't be the one to fork out money if the builders can't meet the original spec. rather than having a fixed deadline you could state that any planning permission which hasn't been acted upon needs renewal each year (with this being an admin task rather than a resubmission of plans).

Reason for comment:
I agree with some points - generally some improvements are needed anyway, but others are a) only contingent upon developments & b) could add to the case for further developments (e.g. once a road is 'improved' more people may ask ofr housing to be built in a certain area). When looking at public transport you have featured the coastal route - Eastbourne through Polegate towards Lewes - & mentioned the reinstatement of the Uckfield / Lewes link, but there is little mention of the hinterland. It is difficult & expensive to visit more of the places mentioned in this plan.

Reason for comment:
I agree with the statements, but I don't think that this will reflect reality come 2026.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

106621 Resident

Part of document: □ document □ chapter □ section ✔ option
Question 31b

Section of Document:

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:

Have I missed the section on the importance of identifying potential windfall sites at the outset? If we knew about them know then they would count towards the governments targets, but if we don't then they will be additional developments, on top of everything already discussed. Have you advertised for people to contact you if they have land which they might want to sell for development? There may be a number of small plots around, & if you are serious about meeting the 400 houses per year, every opportunity to add a house here or there needs to be taken. It would be a terrible waste if, in 5 years time, someone asks for permission to develop a paddock or old yard.

Consultee ID: Ms Dobell
106621 Resident

Part of document: □ document □ chapter □ section ✔ option
Question 32a

Section of Document:

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:

I agree with 1 but not 2 - I don't like the idea of having to build 40% of the new properties on greenfield sites. I agree with 3 & 4 but not 5 - I don't trust that the economics of the plan. I partly agree with 6, but I don't agree with second properties or large developments (e.g. static caravan parks, large hotels) I hope 7 means an improvement, not a change for the worse. I agree with 8 & 9. number 10 could be good or bad - depending on which retailers are involved. Generally speaking a small local retailer is better than a big one which employs lots of people at low wages, has no ties to the community, increases traffic flow from outlying areas. I don't know enough about no. 11 & 12 to know if I agree or if it is feasible. No. 13 - yes, open spaces are good, but we have lots of open space in Sussex. We will have less once all the developments are in place. Parks in towns are good, but being able to wander round a small forest or meadow are just as good. No. 14 is good, but how are you thinking of being carbon neutral - concrete, bricks & steel aren't the most carbon neutral things, and carbon off-set is just paying money to try & sweep the problem under the carpet.
Reason for comment:

1. Poor and limited employment opportunities in Wadhurst, therefore out-commuting increased. Roads, buses and trains already at capacity. Railway station is definitely not easily accessible to those without a car - a half hour walk from the centre of the village (and uphill on narrow, poorly lit pavement from station to village). ‘Rider’ bus service between Ticehurst and railway station is unreliable. Car park at railway station already full. Very poor bus service into Tunbridge Wells, run by ESCC, who have already cut one bus per day each way at busy work times. Road through village is congested and gets blocked during school run and commuter periods. Already inadequate parking facilities in village. 2. Schools (primary and secondary), one doctors' surgery and play facilities would be extremely stretched with an increase in housing development of this size. 3. Infrastructure would not support extra development. 4. Large amount of development would not be sustainable. 5. Wadhurst in AONB: therefore development should be limited to retain the natural beauty of its surroundings and contain the potential sprawl.

Reason for comment:

We are fortunate in Wealden to have such lovely picturesque villages in the shadow of some remarkable natural features. To build new developments near the South Downs would be desecration of our heritage. It would also impact negatively on the Cuckmere river, a site of great importance to both humans, for water, and wildlife. The infrastructure would not cope - the roads are already congested. Both Polegate and Lewes are difficult to get to using the A27 at rush hour. Building near an existing railway link would not mean the majority would use the train - there is no train to Hailsham and it's quicker to get to Crowborough by car. Keep the development around areas already served by transport and facilities.

- No opinion
- Disagree

**Reason for comment:**
The area of 12c would appear suitable because: 1 The school is within walking distance. 2 The town center is within walking distance. 3 The market, cafe and public house are within walking distance. All the above would ease the volume of car movements. The site would also have direct access to the main arterial route through the town, reducing traffic movements on more minor roads to the main road. A similar estate has just been completed in Ringmer. The area would be an obvious "fill in zone" along the main road. The area would allow a significant volume of houses to be built to help alleviate the pressure on the local housing supply.

Consultee ID: 106625  
Mr Muddiman

Part of document:  
☐ option

Option 7a

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

This is a sensible approach because society demands the infrastructure to support modern living and many of the villages are unable to meet these aspirations. Expansion of rural sites will have a large impact on the road system which is not designed for a large increase in population.

Consultee ID: 106625  
Mr Muddiman

Part of document:  
☐ option

Option 7c

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

The some of the sites proposed will encroach on the green sites, will provide a blot on the National Park when viewed from the Downs which in turn will impact on tourism, one of the larger earners in our area. slow careful expansion will keep the balnce of development and green currently enjoyed from the Downs and preserve the area as one worth viewing.

Consultee ID: 106625  
Mr Muddiman

Part of document:  
☐ option

Option 7c

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

Little thought seems to be placed on the viability of the village to sustain its own organic growth it focuses on the thought that the rail link will provide the savour for all. The major roads are currently a driving challenge with peak times becomming a no go zone, the schooling, water, mains services, dental and medical services stretched with the real prospect of our local hospital becomming a sattelite of Brighton or Hastings. both of these areas are almost a no parking zone and poorly serviced by public transport.
Option 8a

Clearly the author of this report does not travel on the A22 which is as congested as the A27 outside the small dual carriageway area. At peak times it can be very difficult to enter or cross the carriageway. The report talks about regenerating Hailsham which is already a vibrant Country Town which will be blighted by the impact of the proposed Tesco Supermarket and the inevitable demise of the smaller shops.

Option 15f

This will lead to the expansion of the Hailsham boundary which the A22 provides a natural boundary line. This will impact on the green and ancient wooded areas.

Question Ten

The total number of increase for a village cannot be generalised because the impact will vary on the size and construction of the village. For some this will be okay but for many it will be unsuitable.

**Option 18i**

**Section of Document:**
- [ ] Agree
- [ ] No opinion
- [x] Disagree

**Reason for comment:**
The only attraction here is the railway. It would blight a village that has character, some development would be of value but not to the extent envisaged. Tourism may suffer as those visiting the National Park and the Long Man would not expect urban sprawl.
Option 18j

Reason for comment:
The railway is a bottleneck for traffic when the barriers are down and they are down for considerable periods. The station is an obvious attraction but a new settlement would have an adverse impact on the surrounding village creating rat runs in an already busy road network. Although the infrastructure is envisaged, but what would come first, the housing or the future society need? Sadly I suspect the housing with the rest following at a later date. This proposal will not meet local needs but will provide for cheap houses for Londons residents who will find it cheaper and perhaps quicker to commute from here rather than in town. I fail to see how this will generate the society the area needs to be vibrant.

Option 27d

Reason for comment:
They said this at Winchester we cannot live in a time warp we can have moving traffic or choked single carriageway, both have an environmental impact

Option 28a

Reason for comment:

Option 28b

Reason for comment:
In regard to option 12e, we have particular concerns on the overdevelopment and detrimental impact to the character and natural beauty of this area. We are concerned about loss of privacy and safety due to adverse traffic generation. We are also concerned about potential flooding. It is also in contradiction to the Council's own planning policy eg EN6 regarding development within the AONB, and only being permitted if it conserves or enhances the natural beauty etc., it clearly would be detrimental to the AONB. Policy EN17 applies to countryside gaps and firmly resists development that would reduce these gaps. This proposal represents a reduction of the Heathfield and Maynards Green gap. Policy GD2 states it seeks to resist development outside of development boundaries and Paragraph 15.31 of the Local Plan clearly illustrates why Sandy Cross Lane marks the edge of the boundary. Policy EN2 concerns the efficient location of development in relation to appropriate infrastructure. Sandy Cross Lane is clearly unable to accommodate the travel movements that would be generated by the proposal and Policy EN2 recognises that any new road provisions must be sensitive to their landscape, this proposal would certainly have an adverse environmental impact on the area alone.

As long as only in very small numbers,

House's should be spread over a wide area.

**Question 11h**

**Section of Document:**

**Reason for comment:**
Crowborough should not have any more major developments until there is enough infrastructure to sustain it, the roads will not take much more traffic. What about schools etc. sewage and the like. Crowborough is short on land for sport, recreation, allotments and burial ground (as reported in the "Wealden Open Space Study") and if all the houses suggested in the consultation are built more open space will be needed and the short fall become greater.

**Option 2b**

**Section of Document:**

**Reason for comment:**
All developments should incorporate renewable energy sources. If Wealden can develop these resources to this level then it is to be applauded. The availability of utilities should not be taken for granted and water especially needs close attention.
Consultee ID: Mr Field
106628

Part of document: ☑ option
Section of Document:

Your View ☑ Agree ☐ No opinion ☑ Disagree

Reason for comment:
I am concerned that Farms are specifically mentioned in this section. Whilst it is essential that farmers can diversify to stay economically viable, if there is not a market for industrial units in their area, then they need other options, not automatically offer up the land for housing. We need to consider the huge impact that commuting has on each area. There are a few large Brownfield sites left in Wealden, we do need to use those first and they should be mixed use and not just used to build homes for the wealthy who want isolation.

Consultee ID: Mr Field
106628

Part of document: ☑ option
Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
We need to retain commercial property and ensure that it is affordable, which I believe is a major problem in this area.

Consultee ID: Mr Field
106628

Part of document: ☑ option
Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Generally in agreement but with reservations, farming should be the main industry in this area. We are not capable of feeding ourselves as a nation any more. Why? The economy may be global but is this policy of freighting in food sustainable? We do need a mixed industry base, just like we used to have. If the areas are very carefully chosen to improve existing facilities then that is acceptable.
Consultee ID: Mr Field
Consultee ID: 106628
Agent ID:

Part of document: Option 3d
Section of Document:

Reason for comment:
Sorry but have issue here. All the new houses in my locality are being bought by people retiring to the area from London, Birmingham, Sheffield, Croydon etc. They don't want jobs and are driving house prices sky high. What is needed is stimulation of current population with organic growth in industry and housing. This is more difficult to pull off as developers can't make big bucks at it and it requires effort. It also stops huge swathes of countryside disappearing under concrete.

Consultee ID: Mr Field
Consultee ID: 106628
Agent ID:

Part of document: Option 4a
Section of Document:

Reason for comment:
In case you hadn't noticed we are grid locked in Polegate. The roads in the area are already congested. Unless you are planning to build a new road network, and I hope you aren't, we cannot cope with more traffic at peak times which is exactly what we will get.

Consultee ID: Mr Field
Consultee ID: 106628
Agent ID:

Part of document: Option 4b
Section of Document:

Reason for comment:
Virgin countryside, there is only a narrow buffer left between Polegate & Hailsham which should be left undeveloped.

Isnt this area at risk of flooding?

Consultee ID: Mr Field 106628

Part of document: Option 4d

Section of Document:

Your View  ☑ Disagree

Reason for comment:
Already too much traffic in this area, virtually a car park already and I dont want to see more countryside disappear under roads

Consultee ID: Mr Field 106628

Part of document: Question 4e

Section of Document:

Your View  ☑ Disagree

Reason for comment:
To be honest I would rather not see any development in this area at all. We are a very urban area now with few green corridors left to separate towns & villages. I dont want to see this area become a mass urban sprawl. The Hellingly hospital site is huge, and when it was operational contained a mix of industrial and residential dwellings as well as the hospital itself. This is the area that should be considered for mixed development and would complement Hailsham and its environs. BUT I fear it will be used for premium housing to the detriment of the area.

</tr>
</thead>
<tbody>
<tr>
<td>106628</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Question 6d**

**Section of Document:**

**Reason for comment:**
If Wealden is 50% rural & 50% in towns then plans should reflect that. Housing for the local population that is affordable is what is required. I bet we get 3, 4, & 5 bedrooms whose price is beyond reach for many, and only serves to encourage commuters who take no active part in the local community.
Option 7a

Reason for comment:
Aging population and affordability issues prevent young families staying in villages. If this policy ensures villages don't die then it should be regarded as a good thing. It must be strictly controlled & monitored though to ensure that the quality of the community isn't lost. Services also need to be available & the County Council need to be pushed to provide them.

Option 7d

Reason for comment:
However it is essential that the businesses can afford to trade. What incentives are there to encourage shopkeepers to open in rural area? If we want communities to have services then we need to help with beneficial rates for those brave enough to risk their own money & provide them. How about encouraging the entrepreneurs you so bemoan the lack of.

Option 8a

Reason for comment:
Already overdeveloped
Option 8b

Reason for comment:
Polegate is a very busy thoroughfare already. There is immense pressure for the town to accept almost the entire housing being imposed on the district. This is ridiculous. All the land proposed is greenfield, with a network of springs and streams, which acts as a sponge containing heavy rainfall. We need to keep this land unbuilt on. Polegate should take some growth but not build a new town next door.

Option 8c

Reason for comment:
As mentioned before, overdeveloped & traffic congestion

Option 8d

Reason for comment:
Fail to see how this area meets any of the criteria previously referred to in this plan. Sheer lunacy
Option 9a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Whilst Uckfield town itself is blighted by congestion, so are all of the districts towns. However it has the rail link, with the possibility of the Lewes link reopening. The town has utilised many of its brownfield sites already and has a thriving town centre. The river runs through the bottom of the town and careful development at peripheral edges to the north & south would not be affected or subject to flood risk.

Option 9a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Whilst Uckfield town itself is blighted by congestion, so are all of the districts towns. However it has the rail link, with the possibility of the Lewes link reopening. The town has utilised many of its brownfield sites already and has a thriving town centre. The river runs through the bottom of the town and careful development at peripheral edges to the north & south would not be affected or subject to flood risk.

Wealden's Places

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Whilst I feel that the drive for housing is being driven by flawed Government policies, some expansion is vital for organic growth. Its a shame that it seems that the whole world wants to retire to Wealden, perhaps thats why we look so backwards when you compare us to the rest of the nation. After all when did you last meet a 70 year old entrepreneur still looking to start the next big thing. You have painted a picture of a stagnant district which will die without new blood which I believe is far from the truth. We are out here its just you chose not to see it. When you build those new houses I wager that over 50% of them get bought by people retiring to the area.
Option 16a

Reason for comment:
This area is totally disconnected from Polegate Town, it's very difficult crossing those roads on foot, I do it every day. There are too many cars already...... madness.

Option 16b

Reason for comment:
There is an issue with the proposed development becoming a 'Township', a phrase bandied about within the plan itself. If you've ever been to a Township you would understand why I have a problem with this. Was the Town Farm estate in Hailsham a Township? After all it was built with its own shops (vandalised and long out of business), school (Marshlands) Is this supposed to encourage me?

Option 16c

Reason for comment:
Risk of a monstrous urban sprawl joining Hailsham, via Polegate & Willingdon right through to Eastbourne

Option 20a

Section of Document:

Your View □ Agree □ No opinion □ Disagree
Reason for comment:

Rotherfield can ill cope with an additional 150 houses. Additional housing should be in towns and definitely not greenfield sites outside village envelopes. It is vital to continue existing planning policy which advocates the continued separation of Rotherfield and Town Row especially New Rd.

**Part of document:**
- Option 6a
- Option 6b
- Option 6c

**Reason for comment:**
There should not be a proscriptive figure for the allocation of development. Delays in sites coming forwards, reliance on enabling development and other factors are all likely to distort where housing is eventually provided. Some villages/local centres may be well placed to take additional development and reliance on an arbitrary figure will prejudice the ability of the LPA to deliver new housing in a flexible and appropriate manner.
There should not be a proscriptive figure for the allocation of development. Delays in sites coming forwards, reliance on enabling development and other factors are all likely to distort where housing is eventually provided. Some villages/ local centres may be well placed to take additional development and reliance on an arbitrary figure will prejudice the ability of the LPA to deliver new housing in a flexible and appropriate manner.

Classification should be based on the ranking of current services (4.8 of the background paper for Draft Settlement Strategy for the Villages) and not be distorted by estimates of population based on Census data from 2001. Allocations should be based on a village’s ability to accommodate additional development, and this is directly related to how many services benefit a particular village. For example, whilst East Hoathly is ranked 4th in the LPA’s table with regard to services, it is defined “only” as a Smaller Local Service Centre” when its ranking is weighted by population figures. The test should be accessibility to local services, not historic estimates of population.
Section of Document:

Consultee ID: Mr Bareham
Agent ID: Mr Bareham
106632 Lewis and Co Planning
102487 Lewis and Co Planning

Part of document: Option 7d

Your View: 
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

East Hoathly should be designated as a Larger Local Centre and as a Village With Growth Potential. The village scores highly in the Council's ranking of villages (in terms of access to services) meaning that the village is well placed to accommodate additional development in a sustainable manner.

Section of Document:

Consultee ID: Mr Bareham
Agent ID: Mr Bareham
106632 Lewis and Co Planning
102487 Lewis and Co Planning

Part of document: Question 7e

Your View: 
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

The proposed restriction on any further allocations over and above those contained in the Adopted and Non Statutory Wealden Local Plans ignores the fact that East Hoathly scores highly in terms of its access to services. Whilst we do not believe that an assessment of potential for growth should be distorted by population figures (access to services should be the main arbiter - meaning that East Hoathly should be identified as a village with Growth Potential), it can be seen that the Council's assessment of population as 923 persons only falls short of its arbitrary 1000 persons threshold (for being suitable for further growth) by about 7%. All other villages identified as being suitable for growth or limited growth appear to have provision made for new dwellings in the hundreds. There is no logic in therefore placing a restriction on East Hoathly to take no further dwellings above those already allocated in historic plans.
Option 25b

Section of Document:
Reason for comment:
Whilst the need for affordable housing is obviously accepted, extreme care should be taken in terms of adopting thresholds and ratios for the provision of affordable housing that may prevent sites being brought forwards for development. The Council's research for affordable housing relates solely to housing need. However, the Council should also robustly identify what impact its policies are likely to have on developers and landowners bringing sites forward for housing.

Option 2b

Section of Document:
Reason for comment:
Subject to restrictions on highly visible energy saving methods in sensitive areas.

Option 3d

It is creeping into the countryside

Option 4b:
It is creeping into the countryside

Option 5a:
Boundaries should be maintained and any development confined in order to try to protect open countryside

Option 5b:
Only when absolutely essential
Consultee ID: Mr Willson

Part of document: □ document  □ chapter  □ section  ✔ option

Section of Document:

Your View   □ Agree   □ No opinion   ✔ Disagree

Reason for comment:
Development in the villages should be severely restricted otherwise the nature of the village will be destroyed.

Consultee ID: Mr Willson

Part of document: □ document  □ chapter  □ section  ✔ option

Section of Document:

Your View   ✔ Agree   □ No opinion   □ Disagree

Reason for comment:
Subject to the infrastructure being in place to support any development. New towns should not be created from the villages.

Consultee ID: Mr Willson

Part of document: □ document  □ chapter  □ section  ✔ option

Section of Document:

Your View   □ Agree   □ No opinion   ✔ Disagree

Reason for comment:
This is wholly inappropriate for a development such as that proposed. Wilmington is an ancient settlement at the foot of the South Downs and is clearly visible from the Downs. The proposal would ruin the character and setting of the existing village which is for the main part a conservation area and is set in an AONB and the Heritage Coast area. If the National Park proposal becomes effective then Wilmington would be in the National Park and the new development immediately adjacent. There is no infrastructure to support any new development. Any new housing would add to the current traffic congestion on the A27 which is already over capacity. There is no need for a new railway station. The housing proposed would not justify it and so it would have to rely on people travelling from out of the immediate area to use it. This would necessitate a large car park which would be highly visible from the Downs and detrimental to the area generally.
Consultee ID: Mr Tate

106635

Part of document: ☐ document ☐ chapter ☐ section ☑️ option

Option 11d

Section of Document:

Reason for comment:

This is a massive proposed development, and would disturb the balance of the town. There would have to be considerable infrastructural development to support such a plan, including new young peoples’ facilities--the Council has only just disposed of the Aldene Centre--: a considerable increase in medical facilities; and the local roads eg Western Rd (which would have to be a major access route) are totally inadequate, and appear difficult to upgrade) The recent rail upgrading has already put big new pressures on that line, with inadequate parking even for the current passenger load.

Consultee ID: Mr Tate

106635

Part of document: ☐ document ☐ chapter ☐ section ☑️ option

Option 11e

Section of Document:

Reason for comment:

Road access is poor, and land configuration unsuitable. The land around the Alder Brook must be kept clear of development. Any loss of recreation space must be resisted--there is a shortage of such space on this side of town already.

Consultee ID: Mr Tate

106635

Part of document: ☐ document ☐ chapter ☐ section ☑️ option

Question 11f

Section of Document:

Reason for comment:

Any developments must not intrude on to the AONB. The East Sussex countryside is made unique by its land configurations and natural wooded cover, resulting in narrow lanes, steep inclines, with quite small fields and and sudden intimate views. Even outside the AONB, developments must be of a scale to fit in to the surrounding countryside.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Ms Theroux
Agent ID: 106636

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18i

Section of Document:
Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
A new village in the Wilmington Green area is an extremely bad idea. Not only would it spoil part of the nearby AONB, it would also destroy a tranquil rural area which has its own quiet beauty. And it makes little practical sense when there is no infrastructure, no nearby employment opportunities and already too much traffic on the A27.

Consultee ID: Feltham
Agent ID: 106637

Consultee ID: Feltham
Agent ID: 106637

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 11d

Section of Document:
Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
The area cannot handle more traffic congestion that the proposed development would create. Roads such as Western Road are already made unsafe by the high volume of traffic combined with on-street parking which would only be made worse by these proposals. These proposals would also destroy wildlife, fields and hedgerows in this area.

Consultee ID: Feltham
Agent ID: 106637

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 11e

Section of Document:
Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Reason for comment:
1. The whole town would benefit from development in the town centre especially with the proposed
spacial objectives. Crowborough desperately needs to become a more vibrant and interesting town
particularly for its young poplulation. 2. The basic infrastructure around the 11.d proposals could not
cope with more development. Particularly transportation e.g., poor links to Tunbridge Wells from this
area, problems with the Jarvis Brook railway bridge, safety issues arising from HGVs using
surrounding residential streets instead (Western Road, Walshes Road, Fermor Road etc).

Reason for comment:
Regarding the 1000 + new homes proposal in and around Crowborough 11b, 11c, 11d and 11e - I
object very strongly to this proposal. The congestion it will cause traffic wise and total destruction of
the areas of outstanding natural beauty will be devastating. I moved to Crowborough 2 years ago
because I wanted to live in an open beautiful part of the county, and have enjoyed the natural and
unspoil area immensely. I object to the gridlock caused by the extra traffic, I object to the destruction
of wildlife, fields and hedgerows which all make up the beauty of our area. I object to the industrial site
being moved and housing being allowed to be built on the site. It may keep the traffic away from the
town but will cause congestion and gridlock in Jarvis Brook, and Western Road, which is at times
heavy with traffic already. To suggest building to this massive scale is complete madness and with no
consideration what so ever to the local residents who enjoy living in Crowborough and Jarvis Brook.

Your View  Agree  No opinion  Disagree
Reason for comment:
think a high quality build sensitive to the areas other houseing[ so it blends not sticks out ] could be good for the long term future of the town, however think that the qantity of housing maentioned is too many mainly because ;- wildlife impact, sewage, increased number of vehicles on the road.

Consultee ID: miss harkness
106639

Part of document:  Option 15b

Section of Document:
Your View  Agree  No opinion  Disagree
Reason for comment:
but think the number f houses would need to be reduced and the issue of bothe the sewage works with odour and the number of vehicles would need to be adressed before. also the proximity to farea prone to flooding.

Consultee ID: miss harkness
106639

Part of document:  Option 15c

Section of Document:
Your View  Agree  No opinion  Disagree
Reason for comment:
again question the number of dwellings, as re traffic, primary care services, wildlife impact in that area
Option 15e

Reason for comment:
but think the number of houses is far too many for this area, with impact on services required, ie primary care etc, road access not after but before houses etc built and wildlife.

Option 15h

Reason for comment:
think the spatial objectives are not now achievable, which is a pity as some of them are good, but allowing tesco into the centre will, I believe and from past experience finish off the centre. roads should have been sorted out in the past and not now as an after thought. how are primary care services going to cope, they are almost at capacity now. You looking to significantly increase a population.

Option 16a

Reason for comment:
seems to be a reasonable choice

Option 16b

Reason for comment:
impact on ANOB and a flood plain, no point having houses that insurers won't insure

**Part of document:**

- Option 24b

**Section of Document:**

**Your View**

- Agree
- No opinion
- Disagree

**Reason for comment:**

higher the density the more problems you have. this is well documented maybe you should look at the research more and less at the £'s involved.
Option 24b

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

Consultee ID: miss harkness Agent ID: 106639

Part of document: □ document □ chapter □ section ☑ option

Agent ID:

Reason for comment:

Option 24c

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

already given in previous 24 questions

Option 24d

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

A good, reliable, public service should not be dependant on the number of people living in one place. People use this ie buses for two reasons have no choice in which case it doesn’t matter where you live you have to put up with what you get or the best reason is that the service is fast, reliable, at times when people want and need them, timetable doesn’t change every few months, however this is not what happens now if you are outside of Eastbourne

Option 25a

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Consultee ID: miss harkness  
106639

Part of document:  ☑ option  
Option 25a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
but not high rise flats 2 or 3 stories so that they can be integrated into the community and not be apart from it

Consultee ID: miss harkness  
106639

Part of document:  ☑ option  
Option 25b

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
affordable housing should be in response to demand and not set targets.

Consultee ID: miss harkness  
106639

Part of document:  ☑ option  
Option 25c

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
should be in response to demand not targets, proper assessment needs to be carried out.

Consultee ID: miss harkness  
106639

Part of document:  ☑ option  
Option 25d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
between only where there is a demonstrated need and not for targets, but the infrastructure also needs to be in place
Consultee ID: miss harkness
Agent ID:

Part of document: □ document □ chapter □ section ✓ option
Option 25f

Reason for comment:
with proper controls in place

Consultee ID: miss harkness
Agent ID:

Part of document: □ document □ chapter □ section ✓ option
Option 25g

Reason for comment:
as long as the proper controld are in plcae together with the means to enforce them

Consultee ID: miss harkness
Agent ID:

Part of document: □ document □ chapter □ section ✓ option
Option 26a

Reason for comment:
should be spaced more evenly through county,

Consultee ID: miss harkness
Agent ID:

Part of document: □ document □ chapter □ section ✓ option
Option 26b

Reason for comment:
all of east sussex should share the responsibily or burden depending on your point of view

existing stations should not be reduced, all you do is increase traffic between these areas and in some cases people dont bother and continue to use cars.

Elaine Wintle & Bryan Wintle aggress with the core strategy document for Wealden but all the previous points and representations that have been made by current residents of all areas must be taken into account. Areas must be considered very carefully, thus not intruding on current residents as in the East of Shepham Lane, Polegate (Wimpey) and North of Dittons Road, Polegate (Gldadel). This land was allocated by out so called Town Council for building, or was it Wealden District Council who allocated it? Anyway, a total of 510 homes plus a so called 'up market Business Park', if passed by the Planning Committees will have a huge detrimental impact on the 90% of retired residents in the immediate locality. And to the community as a whole if the correct infrastructure is not in place before any building commences. Thank you for the opportunity to comment but will our small punitive voices make any difference - we doubt it. Elaine & Vryan Wintle

Part of document: □ document □ chapter □ section □ option
Part 4

Section of Document: Wealden's Settlement Pattern

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

The Cuckmere Valley Society strongly believes that both housing and commercial development along the River and in the Valley should NOT be allowed for the following reasons: The Core Strategy document fully acknowledges the unspoilt nature of the river and valley. The area is one of tranquility, rural in nature and has picturesque views, both to and from the South Downs. Wealden opposed a building development by ESCC in the 1990s for similar reasons. The river is unspoilt from its source to the sea. The area floods. The quantity and quality (flows orange out of domestic taps) of the water supply is insufficient to sustain further development. Development will prove to be an ecological disaster to several species local to this area: birds, mammals and moths. The proximity of housing to the SSSI at the reservoir must be avoided. Any major settlements will see traffic congestion through local villages such as Alfriston, Arlington, Ripe & Chalvington, and vehilces taking an alternative route to Eastbourne via Littlington Ancient historical sites of Sessingham Moat and farmhouse, both mentioned in the Domesday Book, as well as Claverham Manor and moat would be equally threatened by developments.
Option 5b

Section of Document:

106642  
Cuckmere Valley Society

Part of document:  

Section of Document: What Happens Next?

Your View  

Reason for comment:
The Cuckmere Valley Society is concerned that the statistical analysis of the consultation may not take into account the potential skew between town and rural communities, especially in the matter of new settlements. This potential skew could result in a small community having its way of life destroyed because it was numerically insignificant compared to a nearby town.

Part of document: ☐ document ☐ chapter ☐ section ✓ option  
Question 4e  

Section of Document:  

Your View ☑ Agree ☐ No opinion ☐ Disagree  

Reason for comment:  
The Association DOES NOT AGREE with the proposals for the Eastbourne / Hailsham Triangle. The principle reasons are the unneeded and unwanted expansion of Eastbourne, as well as the general urbanisation and commercialisation of rural areas. The proposal for the Triangle is at complete odds to the statement, in the Consultation document, stating ‘the Cuckmere Valley, the last unspoiled river estuary in the South East, near the famous cliffs of the Seven Sisters’. The Triangle will have precisely the opposite effect.

Part of document: ☐ document ☐ chapter ☐ section ✓ option  
Question 6d  

Section of Document:  

Your View ☑ Agree ☐ No opinion ☐ Disagree  

Reason for comment:  
• The Association DOES AGREE with the development of small amounts of housing spread throughout the villages of the whole of Wealden where this can be achieved so as to protect and enhance the countryside as well as the character of the village. The strategies to be used in placing such housing should be to minimise the adverse impact on schools and roads, and to support community facilities such as shops.
Option 15f

Reason for comment:
The Association DOES NOT AGREE with any business / commercial / industrial development to the west of the A22 as proposed in Option 15f. The proposal represents a significant departure from the rationale behind the existing development boundary to Hailsham. It runs counter to the reasons as to why this part of the countryside has been recently moved into the Arlington Parish. There is no proof of need. There is likely to be an effect on the water table and increased likelihood of pollution to the nearby water courses.

Question Thirty

Reason for comment:
The Association DOES NOT AGREE with Options 30K or 30L in Table 15. Both will have a serious deleterious impact on the countryside and neither is based on need. The Association deplores the inadequate level of consultation available through Question 30 which attempts to summate four and half pages of options into a single Yes / No answer. Given the enormous adverse impact that some of the options could have on the countryside this is seen as a significant flaw in the process.

Arlington Road West, the Glade, Robin Post Lane (north) Residents’ Association

Part of document: □ document ☑ chapter □ section □ option

Part 9
Section of Document: What Happens Next?
Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
The process of consulting on the strategy options is essential to ensure democratic participation. WDC has singularly failed to provide an inclusive process. The reasons are: • Timing and length of period of consultation • Failure to pro-actively promote non-internet based submissions The Association is also concerned over the statistical bias which may exist in the analysis of the consultation submissions. If unadjusted totals are to be used without consideration of the respondents’ geographic location, it is entirely possible to see a large urban town outvoting a small rural community with disastrous results to the latter’s way of life and a concomitant failure to protect and enhance the countryside.

Section of Document: Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
As set targets rarely are met it would seem appropriate to set a target higher than the minimum required.
Option 3c

Reason for comment:
With the proviso that the use of the term "suitable" needs to be defined carefully. What is deemed suitable by a developer would probably not be in the interests of the local community!

Option 5a

Reason for comment:
If expansion is necessary then developments should allow for green spaces, ie gardens, to retain the essential countryside nature of villages, but such developments should be such as to be affordable for young people and first time buyers. When considering development the need of the local community should be paramount, not some imposed figure to meet the targets set by central government.

Question 6d

Reason for comment:
The question should not offer a choice between urban/rural placements, but rather be concerned with the infra structure of the area. This year there have been floods, due to water running off tarmac areas and not being absorbed into the ground, last year many areas were faced with drought conditions, due to water not being absorbed earlier in the year or the previous year. More thought concerning drainage and water provision needs to be given, as also do such issues as transport, community facilities, hospitals, doctors’ surgeries and schools. It would be more appropriate to ask whether the government targets set for Wealden are realistic and seek to find ways of continuing to challenge these!
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Stone

Part of document: Option 7d

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

If villages are to become living units, and not just dormitory spaces far from changing existing facilities, which I understand to mean discontinue their present function, it would be preferable to include expansion of such facilities as an integrated part of any plan.

Consultee ID: Mr Stone

Part of document: Option 9b

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

Crowborough is already the largest town in East Sussex, and recently experienced floods, with surface water not being absorbed and running into the Jarvis Brook valley. Concreting over another large area, thus reducing water absorption still further seems to be short sighted. Last year there was insufficient water for the existing houses in Crowborough, so with additional housing making further demands whilst at the same time covering land which currently can absorb rainfall, inhabitants of Crowborough will face increased risks of either flood or drought on a regular basis.

Consultee ID: Mr Stone

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

Housing should be based on the criteria of local need and be such as to meet the demands of present inhabitants. If additional housing simply creates properties for use as second homes or holiday use then any development is to be avoided. If there is a strong growth of young people within an area then properties should be made available at a suitable cost, and limits should not be set.
All these options suggest that there should be an expansion of Crowborough. There are many issues that need resolving before this can be taken as a fact.

Any improvement to transport links would be welcome, especially if the freight potential is considered. Removing lorries from rural roads would enhance village and town life, as well as helping to reduce pollution.

I feel that the purpose of this plan is to meet targets imposed by central government, and that Wealden is not fulfilling its role as representative of the needs of its own community.
Developers should acknowledge the needs of the local community, reducing profit margins if necessary to ensure costs of dwellings are kept at a level to meet local needs, and not just to produce properties that appeal to speculators.

Reason for comment:

Any new provision should seek to improve what is being replaced, not simply provide like for like.

Whereas I agree with some of these objectives, to ask for a simple agree/disagree response covering 14 statements seems to be an attempt to manipulate data for your own ends, and in some cases would over ride views expressed earlier.
Option 18i

Reason for comment:
Any development here will be in full view of the proposed National Park, and potentially restrict future plans for the A27. The proposal is in direct contradiction to Para 6.77 of WDC Local Development Framework, Core Strategy, Issues and Options Background Paper, 'Draft Settlement Strategy for the Villages' (this comment also applies to Berwick) Additionally, as was cited in the Pellam Homes application at Polegate the infrastructure for growth in the area is lacking in any surplus capacity, with particular reference to water. The WDC Core Strategy documents recognise this in the comments relating to the raised levels of pollutants in local water courses.

Option 18j

Reason for comment:
We are agreeing to this with major conditions. We entirely understand the advantages of new settlements in meeting the target of 4600 new homes to be built within the SCPA by 2026 however, as you state in para 5.39 of this document, growth at Berwick Station and Wilmington Green will impact on the already congested A27. If a new settlement were sited at either of these two locations, then the main requirement would be the wholesale upgrading of the A27 between Lewes and Polegate. This Parish supports the need for improvements to the A27, indeed they are long overdue even without new housing. We would also vigorously object to any new settlement unless the Highways Agency first commits to the upgrading of the entire stretch with the route and design clearly defined. Also this vital element of infrastructure must be in place before any new homes are built. Finally, as stated, these comments are based on the total of 4600 homes targeted by 2026 for the SCPA. If the figure of 4700-7000 new dwellings is proposed (as mentioned in 18(j) for Berwick Station, then obviously not only is the A27 upgrade even more important, but also a whole new series of objections would be forthcoming, concentrating on the impact on the South Downs coastal area generally. Alciston Parish Meeting.

- [ ] No opinion
- [x] Disagree

**Reason for comment:**

This Parish strongly disagrees with this statement because, as previously submitted we support the wholesale upgrading of the A27 between Lewes and Polegate, whether or not new houses are built along this dangerous stretch of road. The past 12/18 months have seen a significant increase in the number of accidents and fatalities and this cannot be allowed to continue. We also believe that if, as part of the upgrade, the road were taken around Selmeston to join up with the Cophall roundabout at Polegate, then the Downland villages from Selmeston to Polegate would benefit hugely and the number of accidents would be dramatically reduced. The upgraded infrastructure would also allow for sensitive consideration of new houses which would go some way to meeting the target of 4600 for this area by 2026. Alciston Parish Meeting

**Question Thirty**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

This Parish wholeheartedly supports the major upgrading of the A27 from Lewes to Polegate and in the meantime, the adoption of a blanket 50mph limit along this stretch (with existing lower limits retained) and the extension of the 40mph limit eastwards from Selmeston to Drusilla's roundabout to include Alciston corner which is particularly dangerous when entering the village travelling west. Alciston Parish Meeting
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
What does 'some' development mean?

Option 20b

Reason for comment:
The infrastructure of Wadhurst village is already overburdened, particularly the highways. This must be addressed before new building can be considered. The B2099 through the village is impassable during termtime. Parking appears to be at capacity in both the village and at the station. How does the council intend to provide for the needs of the proposed additional 320 households?

Details of How to Comment

Reason for comment:
We write as the joint owners of the parcel of land at Coopers Croft known as Coopers Croft Garden Centre. We would suggest that our land can have an important and beneficial part to play in any development to the East of Hailsham. Mr Stuart Goslin & Mrs Maureen Thompson Coopers Croft Garden Centre New Road Herstmonceux BN27 1PX
Option 11d

Section of Document:

Reason for comment:
Traffic problems; full traffic survey is essential. Creation of road link between Walshes Road and Forningham Road to be considered (Commercial vehicles could be banned from Western Road). Area is prone to flooding. Sewage system is already overloaded. Infrastructure and services would be required.

Option 11e

Section of Document:

Reason for comment:
Traffic problems; full traffic survey is essential. Creation of road link between Walshes Road and Forningham Road to be considered (Commercial vehicles could be banned from Western Road). Area is prone to flooding. Sewage system is already overloaded. Infrastructure and services would be required.

Part 1

Section of Document: Context

Reason for comment:
Concern expressed at the level of growth being proposed within Wealden District which, although very largely outside the Sussex Downs AONB, will still impact upon it through infrastructure requirements and recreational pressure.
Reason for comment:
The South Downs Joint Committee is particularly pleased to note the references to the South Downs and High Weald Management Plans.

Reason for comment:
Agree in part. The Committee believes that limited development can be appropriate, but only if necessary to meet local socio-economic needs. Any development must comply with the High Weald Management Plan Objective ‘To protect the historic pattern of settlement’.

Reason for comment:
Given the range of assets within the District, a higher target would seem appropriate. However, this should be subject to sensitive siting – in particular avoiding large-scale wind turbines within or adjacent to the AONBs.
Part of document: Option 3a

Section of Document:

Your View ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Partially agree, but what timescale is to be applied?

Part of document: Option 3b

Section of Document:

Your View ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
If there is evidence of market need, then premises should be protected. Again, the issue of the timescale applied is questioned by the Joint Committee. If there is no evidence of a current need, but there is a predicted need within a certain length of time, then such premises should be protected.

Part of document: Option 3c

Section of Document:

Your View ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Evidence seems to show that this is the type of employment space that is required. However, it is essential that great weight is given to the assessment of the suitability of any such locations.
Mr. Belderson, South Downs Joint Committee

Option 3d

Reason for comment:
Agree, but only if there is a need for such business development in the area (the needs vary between the north and south of the District)

Option 4a

Reason for comment:
The Joint Committee objected to a housing allocation in this area in the Wealden Local Plan, and also to a planning application (over a wider area than the allocation) in 2006 on the grounds of visual impact. As the current consultation does not identify a specific boundary (this would be the subject of a more detailed site allocation), it is not clear if the proposal would be limited to the area of the current housing allocation (which would have a more limited impact on the AONB). The Joint Committee therefore disagrees with the Option, unless it is limited to the area currently allocated for development.

Option 4b

Reason for comment:
As for Option 4a, development within this general area has the potential to have a detrimental impact on views from within the Sussex Downs AONB. SENSITIVELY located development may be acceptable, but as the exact site cannot be identified at this stage in the LDF process, the Joint Committee disagrees with the allocation.
| Consulatee ID: | Mr Belderson | Agent ID: | 106652 | South Downs Joint Committee |
| Part of document: | ☑ option | Option 5a |
| Section of Document: | | |
| Your View | ☑ Agree | ☐ No opinion | ☐ Disagree |
| Reason for comment: | The Joint Committee cautiously agrees (subject to appropriate public consultation), although the potential to tighten boundaries around some other settlements should also be considered (see the Joint Committee’s answer to 5c). |

| Consulatee ID: | Mr Belderson | Agent ID: | 106652 | South Downs Joint Committee |
| Part of document: | ☑ option | Option 5b |
| Section of Document: | | |
| Your View | ☐ Agree | ☐ No opinion | ☑ Disagree |
| Reason for comment: | This could weaken controls on development in the countryside. Existing policy allows exception sites to provide affordable housing where needs are identified. If the option is to be pursued, one criterion should be that the site is not within an AONB/National Park. |

| Consulatee ID: | Mr Belderson | Agent ID: | 106652 | South Downs Joint Committee |
| Part of document: | ☑ option | Question 5c |
| Section of Document: | | |
| Your View | ☑ Agree | ☐ No opinion | ☐ Disagree |
| Reason for comment: | It may be appropriate to draw tighter boundaries in some circumstances. For example, to exclude lower density plots along Old Willingdon Road, Friston, or to exclude rear garden land where it backs onto open countryside. |

Question 6d

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Rather than a relatively arbitrary split, the apportionment of planned growth should be based, initially at least, on the needs of the communities within the District for new development and their capacity to absorb that development. Any residual planned growth should be distributed on the basis of the sustainability of settlements. If an urban/rural split approach is adopted, it is suggested that there could be a higher proportion allocated to urban areas in that part of the District within the Sussex Coast Sub-Region (to reflect the requirements of the South East Plan) than in the rest of the District. Crucially, whatever the approach, any development within the AONBs should only be that necessary to facilitate the economic and social wellbeing of a settlement.

Part of document: [ ] document [ ] chapter [ ] section [ ] option

Section of Document:
Option 8a

Reason for comment:
The expansion of Hailsham could have less of a direct impact on the Sussex Downs AONB than further expansion of Polegate. In addition, the A22 has less congestion problems than the A27, which may reduce pressure for a new A27 relief road to the west of Polegate. The main disbenefit is the distance from railway stations, but there is the potential to overcome this through the extension the proposed Polegate-Eastbourne bus corridor to Hailsham.

Reason for comment:
The inclusion of this site would result in an unacceptable landscape impact on the South Downs.

Consultee ID: Mr Belderson
106652
South Downs Joint Committee

Part of document: ☑ option
Option 16b

Section of Document:

Your View ☑ Disagree

Reason for comment:
Although further away from the South Downs, and better screened than site 16a, it is still visible from the South Downs Way, and access issues may result in construction of a link road to Folkington, which would have a negative visual impact on the Sussex Downs AONB/National Park.

Consultee ID: Mr Belderson
106652
South Downs Joint Committee

Part of document: ☑ option
Option 16c

Section of Document:

Your View ☑ Agree

Reason for comment:
Providing development does not extend westwards beyond the A22, development would be appropriate in terms of the effect on the AONB.
Mr Belderson  
South Downs Joint Committee

**Option 16d**

**Reason for comment:**
This option would seem to read as a logical extension to Polegate, although proximity to the A27 and high voltage power lines would suggest a mixed employment/residential development is the best option.

**Option 16e**

**Reason for comment:**
Development of this area would seem appropriate in terms of the effect on the Sussex Downs AONB.

**Option 16f**

**Reason for comment:**
Despite the size of the allocation, this would appear to comply with the proposed spatial objectives of protecting Willingdon’s village-like character (due to being on the other side of the A2270), and conserving the AONB, and so development would seem appropriate.
Consultee ID: Mr Belderson
106652 South Downs Joint Committee

Part of document: □ document □ chapter □ section ☑ option
Option 16g

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
This would only meet a small proportion of housing requirement, but is supported by the Joint Committee. The proximity to the station and town centre location would suggest that the site could be developed to reduce the reliance on private cars (e.g., through reduced parking requirements).

Consultee ID: Mr Belderson
106652 South Downs Joint Committee

Part of document: □ document □ chapter □ section ☑ option
Question 16h

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
It would seem preferable to limit development to within (south of) the A27 at Polegate and the east of the A22 at Hailsham.

Part of document: □ document □ chapter □ section ☑ option
Question 16i

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Assuming this refers to the Spatial Objectives given in this document, The Joint Committee agrees, with the exception of references to the A27 Polegate bypass completion (due to the potential visual impact of some options on the Sussex Downs AONB/National Park).
Consultee ID: 106652  
Mr Belderson  
South Downs Joint Committee  

Part of document:  
- Option 18h
- Option 18i
- Option 18j

Section of Document:

Option 18h

Your View: Disagree

Reason for comment:
This site is partly visible from within the Sussex Downs AONB, and would lead to erosion of open gap between Polegate and Hailsham.

Option 18i

Your View: Disagree

Reason for comment:
Although the argument is given that this proposal could meet some of the needs of villages in the South Downs, genuine need should be met within the villages themselves. This area is very visible from the higher land of the AONB to the south, and reads as part of the same landscape when looking from this higher ground. This is also one of the additional areas that the National Park Inspector has recently recommended for inclusion within the National Park.

Option 18j

Your View: Disagree

Reason for comment:
The principle of a more limited development on the former brickworks and other land on north side of railway line may be acceptable to the Joint Committee and the principle of exploiting the railway (with matching disincentives for car use) is welcomed. However, the sheer scale of the option, combined with proximity to the South Downs, means that this cannot be supported. Any genuine need of villages within the South Downs should be met within the villages themselves.
It is important to maximise development outside the Sussex Downs AONB (to reduce pressure on the protected landscape) subject to the approach proposed by the Joint Committee in response to question 6d, and compliance with the settlement strategies proposed elsewhere in the paper.

Reason for comment:
It is important to maximise development outside the Sussex Downs AONB (to reduce pressure on the protected landscape) subject to the approach proposed by the Joint Committee in response to question 6d, and compliance with the settlement strategies proposed elsewhere in the paper.

Reason for comment:

Reason for comment:
It is important to maximise development outside the Sussex Downs AONB (to reduce pressure on the protected landscape) subject to the approach proposed by the Joint Committee in response to question 6d, and compliance with the settlement strategies proposed elsewhere in the paper.

Reason for comment:
It is important to maximise development outside the Sussex Downs AONB (to reduce pressure on the protected landscape) subject to the approach proposed by the Joint Committee in response to question 6d, and compliance with the settlement strategies proposed elsewhere in the paper.

Reason for comment:
The Joint Committee disagrees with all options. Rather than seeking a mean across the whole District, densities should vary according to location (eg Lewes District Councils proposal to seek a minimum of 30 dph, but with 40 dph or more in built-up areas).
Reason for comment:
The Joint Committee disagrees with all options. Rather than seeking a mean across the whole District, densities should vary according to location (eg Lewes District Councils proposal to seek a minimum of 30 dph, but with 40 dph or more in built-up areas).

Reason for comment:
The Joint Committee disagrees with all options. Rather than seeking a mean across the whole District, densities should vary according to location (eg Lewes District Councils proposal to seek a minimum of 30 dph, but with 40 dph or more in built-up areas).

Reason for comment:
Providing other criteria are met and the developments include disincentives to reduce car use. Should actively encourage higher densities in locations accessible by public transport, not merely permit.
Section of Document:

Option 25a

Reason for comment:
The Joint Committee generally agrees. The break up of families, longer life expectancy, and the number of concealed households in the area all suggest that smaller dwellings are in highest demand. Additionally, the construction of smaller dwellings leads to the more efficient use of land. However, there are lifestyle aspirations that will need to be overcome (ie the desire for additional spare rooms and multiple bathrooms). In the case of affordable housing provided by Housing Associations, there may often be a need for larger (3-bedroom) homes for families. Therefore, although more housing should be in the form of smaller dwellings, this must be subject to the caveats that (a) lifestyle aspirations will need to change, and (b) affordable housing provision should be a mix of sizes based on assessments of the local need. General point: any encouragement or requirement for the provision of smaller houses must be accompanied by a policy in the Core Strategy or General Development Control Policies DPD by a policy restricting extensions so as to retain a stock of smaller dwellings.

Option 25b

Reason for comment:

Option 25c

Reason for comment:
The Joint Committee agrees, but what is the definition of a ‘scheme’? What happens when a single market house is proposed?

**Reason for comment:**

**Your View**

**Reason for comment:**

The Joint Committee cautiously agrees, but would wish there to be an emphasis on the provision of appropriate controls, in order to prevent the creation of independently-habitable dwellings. In rural areas it may be appropriate to seek such ancillary provision as conversion of outbuildings (eg from garages) rather than newbuild wherever possible. Is this not an issue that can be determined (in rural areas) on a case-by-case basis?

Reason for comment:
Any enabling development should NOT take place prior to reinstatement being confirmed.

Your View  Agree  No opinion  Disagree

Consultee ID: Mr Belderson  
106652 South Downs Joint Committee

Part of document: option

Reason for comment:
Although the principle may be acceptable, such a park and ride station would be likely to be to the west of Polegate and therefore in close proximity to the South Downs (as suggested in option 18i). In addition to the station itself, there would be a landscape impact in the form of large parking areas. It could also be counter productive as reducing stopping services at existing stations could lead to increased reliance on the car in those areas. If a park and ride is to be developed, evidence should be provided to show that it would not result in increased reliance on cars and reduced use of local shops.

**Question 31a**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

The Joint Committee agrees in principle, although if a park and ride is to be developed, evidence should be provided to show that it would not result in increased reliance on cars and reduced use of local shops. There is potential to site a park and ride at the A22/A27 junction, linking in with the proposed Polegate-Eastbourne bus corridor, and this would seem appropriate.
For example car ownership levels are lower for those living in flats and rented affordable dwellings. New developments should include disincentives to reduce reliance on cars. Parking standards should also derive from location, particularly proximity to facilities and services or public transport.

The Joint Committee particularly welcomes the statement that “development of new parks/country parks at easier gradients outside but close to the South Downs can ease visitor pressure on the Downs and provide a more accessible and sustainable recreational experience for the local population”.

The Joint Committee particularly welcomes the statement that “development of new parks/country parks at easier gradients outside but close to the South Downs can ease visitor pressure on the Downs and provide a more accessible and sustainable recreational experience for the local population”.

The Joint Committee particularly welcomes the statement that “development of new parks/country parks at easier gradients outside but close to the South Downs can ease visitor pressure on the Downs and provide a more accessible and sustainable recreational experience for the local population.”

Question Thirty

Section of Document: Infrastructure Requirements

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

30a - Disagree - potential visual impact on the South Downs. 30b - Agree in part. If a roundabout at the entry of the A27 into Polegate would improve traffic flow along the A27 from Wilmington (and therefore air quality) then it would be welcomed, but options for a link road further westwards at Folkington would be of more concern. 30d - The discharge of treated wastewater to the Cuckmere would appear to be more sustainable, but this should only take place if the water is treated to a standard that would not degrade the quality of the river and would not exacerbate flooding within the valley. 30i - Agree 30k - No comment regarding general principle, but disagree with options that would affect flooding in Cuckmere River. 30n - Agree. Such improvements should be tied in with disincentives to reduce car use. 30o - Agree with town centre station, but not park & ride proposal (see comments elsewhere). 30s - Agree.

South Downs Joint Committee

Part of document: ☑ option
Question 32a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
The South Downs Joint Committee Agrees with all objectives, and particularly welcomes Objective SO1 “To protect, properly manage and enhance the nationally designated landscapes .... Whilst appropriately integrating development to meet local needs”. The Joint Committee would, however, suggest an additional Objective that development be designed to reduce reliance on private car, including improved public transport provision, where appropriate.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
I agree that some development, particularly of affordable housing, should be allowed in areas of ANOB but it must be sympathetically designed and sited and must be strictly regulated to ensure that it is available for local people only.

Section of Document: Option 16c

Your View: Agree

Reason for comment:

Option 16 b) seems most acceptable site for development being in a vasin and thus being much less obtrusive to observers high on the South Downs. The environment of residents should take precedence over those of visitors to neighbouring beauty spots.
Reason for comment:
Development would destroy an open area of beautiful countryside which forms a significant part of the countryside gap between Polegate and Hailsham. The environment of this area has already been marred by industrial development on the other side of Dittons Road and the remaining open aspect should be retained.

Part of document: Option 20b
Section of Document:
Your View: Agree
Reason for comment:
Developement within walking/cycling distance of mainline train station at Wadhurst should be prioritised so as to help reduce traffic increases from developement.
As a matter of principle settlement boundaries are a significant benefit in establishing the extent of policy provisions within any document seeking to establish appropriate new development locations. The practice should therefore be pursued in future, but only if it is handled in a far more pragmatic manner than in the past. Past practice has been to draw boundaries not only around the principle development areas (existing and proposed) of towns and villages but also to draw those boundaries so tightly that in some cases every potential piece of land such as rear and side gardens is specifically excluded from the development area so as to prevent development. This has often resulted in a situation that a village is stated to be appropriate for development but there is absolutely no possibility of such development occurring. If the Core Strategy is to allocate land for village development (and I consider that it should) then it should do so by establishing a development framework based on existing boundaries and other defensible lines and that where appropriate this should specifically include gardens of properties and other peripheral land considered suitable for development. The extent of such sites and available land falls to be considered on a strategic basis (the urban/rural split) but it should be possible on the basis of given need and agreed split to deal with village development in a much more suitable manner than in the past. In some villages merely allowing development on garden land currently excluded from the settlement boundary could provide for appropriate growth for the village - that is sometimes the extent of the lack of realism previously employed.
The purpose of the Core Strategy is to set down the council's strategic approach to development allocations and therefore it is agreed that it is necessary in an overall sense to decide generally on the balance to be drawn between urban and rural development. Question 6 is therefore fundamental to the approach to be adopted in the Strategy and the Council is entirely correct to seek the views of consultees on the general level at which the split should occur. That approach would in any case allow a degree of flexibility throughout the District to vary the local relationship between development - the Core Strategy is in any case intended as a policy overview within which local allocations will be made. There are considerable difficulties in a District such as Wealden in establishing appropriate locations for larger scale development and there is no doubt that that should be within or adjacent to the urban areas. There should be a balance between development in the Sussex Coast Policy Area and the Rest of Wealden and there should be recognition that in the latter there is pressure for development that should be met. There is undoubtedly potential for further growth at Uckfield and there is a greater justification for additional growth at Crowborough that would reflect and build upon its scale and status. There are however villages where additional development is equally needed to provide adequate housing for local people and the setting of a target for a proportion of village housing in the Strategy is the only realistic way of this being achieved. Unless there is a target local parish politics will always seek preservation, as evidenced by the variety of comments made in response to question 6 that seek no development at all. The purpose of the Core Strategy is to direct development overall and the basic approach is therefore appropriate. As to the proportion I consider that 20% - 25% of development in villages is appropriate, but in reaching a decision I would urge the Council to have regard to the responses to the suggestions in Part 5 as to potential village growth, to reach a realistic view as to the level of village development achievable and to build this proportion into the final figure. That would give the percentage a context and credibility to achievement of the percentage figures selected.
Option 9b

Reason for comment:
The most appropriate allocation of provision for new housing in the Rest of Wealden Area is between Uckfield and Crowborough because both are major settlements with good credentials for development as set out elsewhere in the consultation document. In particular Crowborough has in the past taken proportionately less development that is appropriate to its scale and status and as a result it has lacked the critical mass to enable the provision of adequate services and facilities commensurate with the local population needs. There is considerable land on the periphery of the town that would be suitable for development although there needs to be care taken as to access in particular. At present the employment development in Crowborough is inappropriately located, both on established sites and those currently being developed. There is other land that is much more suitably located to the A26 that should be considered for development ahead of other areas of the town that suffer from relative inaccessibility, but if the town is selected for development to meet the needs of the District a very sustainable and well located new neighbourhood could be created. While the relationship of the town to the AONB is clearly an important issue the land north of the town would provide such significant benefits without unacceptable adverse effect either on the landscape or, particularly, on established residential areas and main traffic generators that the advantages would clearly outweigh any disbenefits.

Question Ten

Reason for comment:
I agree that there is a need to ensure that the planning process is efficient and pays regard to the manner in which need for new dwellings will be fulfilled. The thresholds suggested are set at a paragmatic level and should ensure that the allocation stages of the plan process are completed more efficiently. Many respondents seem to misunderstand the nature of the question, and of course the possibility of smaller sites coming forward without being specifically allocated remains, allowing smaller settlements without allocations to grow at a smaller rate. The allocation thresholds are supported.
Option 11c

Section of Document:

Reason for comment:

For many years the difficulty with allocation of land for development at Crowborough has been that the location of land considered to have potential is located in a place where access is very poor and where the prospect of large scale development could not be successfully promoted for that reason. Option 11d therefore remains inappropriate and there is no prospect of that situation changing because of the impossibility of encouraging large scale increases in traffic through the town between the site and the A26. It is therefore refreshing to see that the Council is prepared to consider other development options without the landscape status of the land being taken as an immoveable constraint to development. In this respect it is agreed that land at Steel Cross is in an excellent location in terms of access and it is considered that there is sufficient land available that could be promoted as a mixed commercial and residential site. This includes land that is former orchards and further land fronting Palesgate Lane in easy reach of the junction with Green Lane. The land is already in proximity to recreation uses and more could be included as proposed. The area has good access to the A26 and to Beacon School and there is no reason why additional bus service could not be created. This is an excellent opportunity and is the best of the options for development set out in the document.

Option 11d

Section of Document:

Reason for comment:

This level of development in an area of the town that has such poor accessibility (traffic to 1000 additional homes along Western Road!) is simply not a sensible option.
Reason for comment:
The development boundary of Crowborough at Steel Cross has long been a strange anomaly. The boundary follows Eridge Road along the frontage of houses east of the road and then inexplicably plunges eastwards, excluding the rest of the ribbon of development that is of entirely the same character and a lot of other land before joining Green Lane. Bizarrely the Council has granted planning permission for an island of development in the excluded area, confirming its suitability for development. It would be entirely logical, sensible and appropriate to redraw the development boundary so that it continued northeastwards along Eridge Road to Steel Cross Road, turned east along Steel cross Road and the turned south down Green Lane. In that simple process the boundary would become logical and would include other land suitable for development without any encroachment on the further outlying areas at all. It is precisely this sort of boundary correction that can enable the Council to increase housing provision without actually changing its basic policy approach.

Reason for comment:
The option to focus new development in the Sussex Coast Policy Area in Polegate/Willingdon and on the edge of Eastbourne is considered appropriate in view of the proximity to the higher level services and facilities of the town, and is an approach that has been very successful in the past, for instance with the expansion of Stone Cross. This is an area in which new housing provision would accord well with the advice in PPS3. There is land at Stone Cross that is appropriate for new development that is well related to the existing settlement, in particular on the northern side where there is land adjacent to the settlement boundary that could be included. It is noted that in Figure 13 Stone Cross is identified as both a larger Service Centre and a village with Growth Potential and these designations support further growth as suggested. The would ensure that the Core Strategy met sustainability credentials in a manner that would be more acceptable than with the other options.
Crowborough is not a 'high density' place and there is more than sufficient empty space in the town centre to meet 'local retail needs' without building more in a location that is poorly related to the High Street and would create a new town centre based on Morrisons. Think about more community space.

Increased community facilities are the most important of the options and should be given the greatest priority. More retail development is, however, the least sensible option because the centre of the town is all but dead already through lack of demand and the Morrison's and Lidl developments are so remote that they are never going to be of any assistance to the smaller retailers in the town centre - the retail policy of the Council for Crowborough seems to be to encourage shoppers to Tunbridge Wells for all non food development. Action is needed for town centre promotion, not more empty retail space out of the town centre that, if it benefits anyone, will only serve to increase the business of the supermarkets to which it will be closest. New business locations with good access would potentially be the greatest impetus for growth and improvement in Crowborough and therefore the proposed development at Steel Cross is the most important possible strategy for the town. I do not think that high tree cover and the network of Twittens area 'Spatial Objectives' - they should surely be at the heart of the development control process anyway. Jarvis Brook could also be improved with some benefit to the town overall but again there is the difficulty of access.
Question 17e

**Section of Document:**

**Reason for comment:**
Stone Cross is an excellent location for new development and this has been shown by the success of the recent developments in the area. There is additional land north of the settlement that is appropriate for further development. Two locations have been included in the document but there is land between the two that would be suitable for further housing, albeit on a smaller scale. This is land fronting the west side of Hailsham Road, north of existing development at The Crossways and St Michaels Close and south of the bypass. It is eminently suitable for development with either (or both) of the other options for development north of Stone Cross or indeed separately. It is sufficient in size to accommodate at least 30 dwellings and is therefore an appropriate site for allocation within the terms of the Council's proposed allocation thresholds.

**Reason for comment:**
Consultee ID: Mr Wollaston  
106661 Michelham Farm  

Section of Document: Question 32b  

Reason for comment:  
1. I disagree with the concept that local housing policy should be dictated by central government, who are not local and do not understand the pressure on land in the South East. 2. The infrastructure of the South East is under massive strain. Develop in the North of England instead. I would support new arrivals and inward immigration to settle in the North only (coming here taking our jobs). 3. I am dissatisfied with the way this questionnaire has been designed. It gives the impression that major housing projects have already been approved (I didn't vote for them). 4. It is high time that local civil servants listened to the voice of the (socially acceptable) grassroots people and their democratically elected representatives (who hold the same views as me). 5. I want to and paid to live in a rural environment (what about what I want)! 6. Your website is terrible, I spent nearly two hours attempting to find this survey online. I failed and its your fault! 7. What about Brown Field Sites (Arlington Stadium)?

Consultee ID: Mrs Bassnett  
106663  

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty  

Reason for comment:  
We should protect the AONB and use all available brownfield sites in surrounding areas before destroying the heritage of the next generation.

Consultee ID: Mrs Bassnett  
106663  

Section of Document: Option 2a  

Reason for comment:  
Increased insulation and solar panels together with good housekeeping will all save energy. Wind farms on the High Weald will destroy the ANOB.

#### Reason for comment:
Reason for comment:
I support comments of Mr Neil Rose: Local employment opportunities fragile and limited, so any development will increase commuting in particular to Tunbridge Wells and London. Wadhurst railway station parking now full to capacity and no room to expand. Road infrastructure is poor, very congested at times. B2100 link road from Tunbridge Wells towards A21 and A268 to Rye (used as A21 diversion when shut): B2099 cross country route from Crowborough towards Ashford: both roads neglected by ESCC. Kent Public carpark taken over by Uplands Community College in term time, so only parking available is kerbside. Water supply poor (on top of a hill we have no water pressure and situation worsens with any development). One stretched doctors' surgery with limited vehicular access. Bus service to Tunbridge Wells but only of use to those within walking distance of routes. Wadhurst is a ridge village in an AONB. One of its pleasures is occasional fields breaking up existing developments. If these disappear then the village will lose much of its character.

Reason for comment:
House building should reflect local need.

Part of document: □ document □ chapter □ section □ option
Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View  □ Agree  □ No opinion  □ Disagree
Reason for comment:
Largely disagree, development within the ANOB should only be allowed if it is intended to supply the needs of the local community not the developers. All buildings should be designed to have minimal environmental and visual impact on the landscape. The presumption should be against such development with the onus being on developers to both show a genuine need for local housing and meet it.

Consultee ID: Wright
Part of document: □ document □ chapter □ section □ option
Option 2a
Section of Document:
Your View  □ Agree  □ No opinion  □ Disagree
Reason for comment:
As an absolute minimum, the standard is far too low.
Developers should be required to incorporate best available technology into all new homes. This will include but not be limited to; photovoltaics and solar hot water on all south facing roofs, passive solar heating designed into the buildings, combined heat and power boilers, micro wind turbines where conditions are suitable. All these technologies are mature enough to be used and there should be a requirement for the developer to demonstrate that the technologies are not suitable if they do not wish to incorporate them. This would add to the cost of the housing but is far cheaper than retrofitting to existing stock, would pay for itself relatively quickly and would allow residents to sell back to the grid. There is no excuse given the imminent global warming crisis for councils and developers not to take this seriously.

With reservations- this should not be used as an excuse for planting housing on land which may be used for creating employment in the medium term.

With reservations- this should not be used as an excuse for planting housing on land which may be used for creating employment in the medium term.

106664

Part of document:  ☑ option
Option 3d

Section of Document:

Reason for comment:
We need sustainable communities with local employment and facilities not car dependent commuter dormitories.

Consultee ID: Wright
106664

Part of document:  ☑ option
Option 4a

Section of Document:

Reason for comment:
If there is a need for development this area has the best transport links.

Consultee ID: Wright
106664

Part of document:  ☑ option
Option 4b

Section of Document:

Reason for comment:
This area will create an out of town development with limited access except by car and risks creating ribbon development linking Polegate and Hailsham.

Consultee ID: Wright
106664

Part of document:  ☑ option
Option 4c

Section of Document:

Reason for comment:
Option 4d

Reason for comment:
Could create much needed local employment in hailsham

Option 5a

Reason for comment:
with reservations. development should be needed locally and any expansion must be consulted on. This should not be used to create high density housing developments with no gardens or open space in order to hit quotas for number of households "if we build rabbit warrens we will create people with a rabbit warren mentality" we must avoid creating future social problems by building slums.

Option 5b

Reason for comment:
Broadly disagree-this may be desirable within strict limits but establishing it as a general principle would lead to abuse.

Option 6a

Reason for comment:
the decision should be made on a case by case basis without proscribing. All development should be sustainable and made with regard to local housing need and availability of public transport.

Reason for comment:
Should help protect village infrastructure and communities. However it is pointless to protect amenities which are not economically viable in the long term.

Option 8a
Section of Document:
Your View  ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:
But only if public transport links can be much improved—Hailsham needs local development.

Option 8b
Section of Document:
Your View  ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
Runs the risk of creating continuous strip development along the railway line. Focus should be on reducing transport needs by developing sustainable towns and improving public transport rather than shoe horning in development where links already exist. This plan risks protecting the countryside by producing extensive suburban belts. People in the Polegate/Willingdon area need space to breathe between built up areas.
Part of document: Option 8c
Section of Document:
Reason for comment:
Would create a continuous strip development along the A22 splitting development means both areas would suffer additional development without gaining enough benefits and infrastructure to support them.

Part of document: Option 8d
Section of Document:
Reason for comment:
If there is a possibility of creating limited and carefully planned development while reducing pressure on other areas it should be considered but exploring the possibility should not automatically lead to it going ahead if it is found to be unsuitable.

Option 16b

Section of Document:

Reason for comment:
creates strip development from Polegate to Hailsham. Poor public transport links.

Option 16c

Section of Document:

Reason for comment:
Again spreads Polegate too far north towards Hailsham. Access to this area would be a problem.

Option 16d

Section of Document:

Reason for comment:
This area has very limited access to the rest of Polegate and would need Shepham Lane to be much larger to provide access with knock on effects to people living along the access routes there is not enough drainage or water treatment, the site is highly visible and would degrade the amenity value of a wide area. This is the least viable option of all the suggestions for Polegate and would not provide very much housing unless the density were unacceptably high.

Option 16e

Section of Document:

Reason for comment:
We should not infill to the bypass just because it is there. This area already has some industrial use set aside no housing should be built alongside it.
Option 16f

Reason for comment:
Closes the open space between Eastbourne and Polegate, the area is becoming overdeveloped as it is.

Question 16i

Reason for comment:
Broadly agree. Bear in mind that much expansion beyond the present boundaries will be visible for long distances either from the downs or across the levels. Polegate should not have large developments attached to it purely to protect its neighbours from expansion. There has not been a rail junction at Polegate for many years - it is unfortunate that the consultation document did not get this basic fact right.

Option 18h

Reason for comment:
This would link Polegate and Hailsham as a single urban corridor. Unacceptable.
Risks spreading Polegate towards Lewes. Both the road and railway services would need to be drastically improved before this became an option.

Have you gone completely mad?

Option 27c

Reason for comment:
The rail services are congested already any park and ride services must be additional. Perhaps there should be a dedicated shuttle between parkway and eastbourne if this plan goes ahead.

Option 27d

Reason for comment:
Your View

Option 27f

Reason for comment:
Parking standards should attempt to drive down the amount of car use. If people wish the community to bear the costs of more than one car in terms of congestion etc. they should expect to pay excess to park them.

Option 28a

Reason for comment:
Para. 1.20 We neither agree nor disagree. Clearly the Panel’s recommendations and Secretary of State’s Proposed Changes to RSS9 will need to be reflected in forthcoming stages of the Core Strategy. Given recent Govt. announcements with regard to the provision of housing it seems highly likely that housing requirements will generally be increased across the South East, including Wealden District.

Part 1

Section of Document: Context

Your View  
- Agree  
- No opinion  
- Disagree

Reason for comment:
1.24 The housing requirement figures set out in this paragraph are confusing as is the use of terminology. Housing land must be allocated to ensure the required annual level of provision; this may well require a greater level of allocation than would be derived from a simple multiplication of that annual rate over the remaining years of the plan period. In a similar vein the figures noted are not clearly derived from the referenced background paper.

- Section  
- Option

Part 1

Section of Document: Context

Your View  
- Agree  
- No opinion  
- Disagree

Reason for comment:
1.29 We neither agree nor disagree. Simply to note that RSS9’s proposed definition of small towns (Section D8 - paragraph 6.1) of 3,000 – 10,000 population, would suggest that all of the listed towns, but for Heathfield, are larger than ‘small towns’ as defined in draft RSS9.
2.16 It is clear that there are considerable environmental constraints that impact upon Wealden. However, insofar as the Council is consulting upon options for a new settlement in the Low Weald, this would suggest that there is potential for the accommodation of strategic scale development in the District.

2.27/2.28 We neither agree nor disagree. In the circumstances outlined and in order to meet the vision and aspirations for the Sussex Coast Policy Area (RSS9) and the Hailsham / Eastbourne / Polegate / Willingdon Triangle; it will be essential for WDC to take a strong lead in the delivery and implementation of new WTW to serve the area. This should include mechanisms to bring forward planning and funding for the required infrastructure in conjunction with development at the earliest opportunity.
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
We neither agree nor disagree. The approach to housing delivery in the AONB should accord with national guidance and policy, unless WDC are able to strongly justify an alternative approach based on local circumstances.

Option 2a

Reason for comment:
There are many variables that will impact upon a development’s particular ability to meet its energy requirements from renewable sources. This is also an area of considerable change in terms of emerging national planning policy guidance; the recently published Green Paper points towards a review of Building Regulations as the most appropriate mechanism for addressing energy efficiency and the use of renewables; it also indicates that further guidance will be contained in the supplement to PPS1 on climate change. In this context and given the early stage in the process, the Council should review its options on targets for renewable energy in the light of the guidance that emerges.
Reason for comment:

We support all of the proposed ‘options’ identified in this question. There is little purpose in retaining sites identified for employment use if there is no realistic prospect of it coming forward (a); existing employment premises should be retained for employment uses where there is evidence of need (b) albeit individual site circumstances should be taken into account, e.g. local amenity and redevelopment for alternative employment uses should not be precluded; the type of new provision should be led by policy requirements, albeit not to an extent that disregards the needs of existing businesses (c); finally, land should be identified and allocated to meet the prospective employment needs of the occupiers of new housing, although slow delivery in this regard should not be seen as a reason to slow down housing provision, only a proportion of new jobs are delivered on land specifically allocated for B Class uses and the delivery of housing can be a means of securing other important policy objectives that are not directly related to employment provision, e.g. new and improved infrastructure.
We support all of the proposed ‘options’ identified in this question. Option 4a

Reason for comment:
This question deals with the four broad locations as alternatives, our inference being that the identification of one will preclude the identification of any of the others. This is not a sound basis on which to progress, the simple fact of the matter is that the Council has already identified the need for different types of employment land provision and it may well be the case that more than one of the broad locations will be necessary to meet differing land requirements of different business sectors. Much more work needs to be undertaken, including an Employment Land Review in accordance with Govt. guidelines if one is not in hand, before choices should be posed about differing locations for new employment development. Having said this, we are of the view that employment land provision should relate well to wherever new housing development is to be focussed. One of the options proposed later in the Issues & Options report identifies a Hailsham / Polegate / Willingdon axis for development. In this context it would seem appropriate to make provision for employment land at Hailsham and Polegate / Willingdon in the A22 corridor.

Option 4b

Reason for comment:

Reason for comment:

4.16 PPS7 does not ‘require’ certain villages to be classified as ‘local service centres’, paragraph 3 notes that such a function may be delivered by a small town, a village or a group of villages.

Reason for comment:

4.25 The final sentence of this paragraph notes that a Hailsham / Polegate axis would result in the reduction of gaps between the towns. However, this is a criticism that might be levelled at a Hailsham focus that sought to locate the bulk of development to the south of the town; or a Polegate / Willingdon focus that sought to locate development generally to the north of the urban area.
4.50 We would support this 'direction of travel', which has been reinforced by the publication of the recent Green Paper.

4.9 We neither agree nor disagree. See our comments in response to 1.29 above.

4.2 The interpretation of PPS12 Annex A guidance is not correct. The Core Strategy proposals are to be shown on a Key Diagram in the Core Strategy itself (para A1) the Proposals Map will be the mechanism by which Core Strategy proposals are shown on an OS base (A2) but this can only be once the detailed boundaries of the Core Strategy proposals have been considered and determined through an appropriate allocations / area action DPD. This Core Strategy should not be endeavouring to deal with such detailed issues as site boundaries for urban extension areas.
Option 5a

Reason for comment:
We would support Option 5A. The definition of settlement boundaries is a generally a well understood and unambiguous policy mechanism for the application of appropriate development plan policies. The Core Strategy, however, should provide some indication of the basis on which such boundaries may be subject to review for the purposes of the LDF; secondly, it should identify the settlements where those boundaries will be reviewed with the specific objective of accommodating land to be allocated for housing and / or employment growth through an allocations or area action DPD.

Option 6a

Reason for comment:
In our view the proposed options promoting alternative urban / rural splits to housing provision would be both simplistic and mechanistic; and are not a reasonable response to the debate set out in the supporting text. Sustainable development principles and RSS9 dictate a predominantly urban focus to the delivery of housing and employment development. However, this has to be balanced against other competing policy objectives, e.g. affordable housing provision and access to employment opportunities in rural communities, as well as the maintenance of an even supply of housing over the plan period and the need to address infrastructure requirements, which will also dictate certain locational aspects of development. The implications in terms of housing and / or employment land distribution of alternative splits in provision (which are unlikely to be that significantly different in any event, given the narrow 10% band) should be presented as options, rather than crude percentages.
Reason for comment:

The implications in terms of housing and / or employment land distribution of alternative splits in provision (which are unlikely to be that significantly different in any event, given the narrow 10% band) should be presented as options, rather than crude percentages.

We consider the emerging approach to be a sound basis for the classification of towns and villages within a hierarchy.

In a similar vein we also agree with the emerging approach to classifying villages insofar as they may well display growth potential. However, we do not consider that the suggested ‘capping’ is a suitable mechanism for controlling that growth. This would be a difficult policy to operate from a development control perspective. The most sensible approach to this issue, in our view, will be the specific allocation of land for development purposes through a suitable allocations / area action DPD.
Option 7c

Section of Document:

Reason for comment:
See our response to Question 6 above. The choice proposed is not dissimilar. In short the distribution of development must respond to a myriad of competing policy objectives and only in arriving at decisions in respect of these will a cogent understanding of the relative merits of distributing development be possible.

Option 7d

Section of Document:

Reason for comment:
Such policies are common currency in many rural LPA policy documents. Provided that they are appropriately justified and applied accordingly they are a useful weapon in the armoury of policy approaches to the maintenance of rural services.

Part 5

Section of Document: Wealden’s Places

Reason for comment:
5.10 We neither agree nor disagree. See our comments in response to 1.29 & 4.9 above. WDC must establish a clear vision for the Core Strategy's content and direction. It may be inferred from aspects of the Issues & Options report that it will serve to allocate specific sites for development purposes. This is not the case, unless they are of a scale and location over which there can be little argument given constraints elsewhere; and even then the Core Strategy should not endeavour to define site boundaries. That is not to say that the Core Strategy should not be giving a strong lead in the levels of development that should be allocated to individual settlements, only that in doing so, it should not endeavour to allocate sites other than in exceptional circumstances, i.e. where the scale and location of growth are most appropriately determined at the strategic level.
Reason for comment:

We would strongly support a Hailsham / Polegate axis of development. We believe that this will maximise opportunities to address infrastructure constraints in the A22 corridor, both in terms of waste water treatment and highways; we also consider that such an approach will maximise housing delivery over the plan period, by introducing a degree of choice to the market with housing sites at either end of the corridor. We do not consider that a focus at one or the other end of the A22 corridor will maximise opportunities for housing delivery or to address infrastructure constraints most effectively. A new settlement option is not a credible short or medium term alternative to the expansion of existing settlements, given the very long lead in period to delivery, once a choice of location has been settled upon. Inevitably the infrastructure costs associated with a new settlement and a scale of development to ensure adherence to sustainable development principles will dictate a scale of development that will contribute to housing requirements beyond the current plan period. In this context, i.e. a long term development option for the period beyond 2021, a new settlement option in the Low Weald may be worthy of pursuit.

Reason for comment:

Possible Spatial Objectives for Hailsham We question the need for spatial objectives for Hailsham or indeed any of the five towns to be included in the Core Strategy. This is a level of detail that would most appropriately be included in a area action DPD for the town. The Planning Officers' Society publication Policies for Spatial Plans refers at 4.5 to spatial objectives being derived from the spatial vision and identified issues. We note that Spatial Objectives for Wealden are set out later in the Issues & Options report. It is these that should be included within the Core Strategy, not settlement specific spatial objectives as may be inferred from the Issues & Options report.
5.33 We neither agree nor disagree. We generally acknowledge that should significant development be introduced at Hailsham an additional review of the existing local highway network will be required. That said, East Sussex County Council Highways have confirmed in the past that provided the LATS improvements identified within the current Non-Statutory Local Plan are implemented, then there will be additional capacity on the local highway network for a proportion of any future development. It is therefore important that existing highway infrastructure is fully utilised in any sequential ranking process when reviewing potential development areas. This will ensure development will proceed in a sustainable and deliverable manner.
This approach would be confusing, for the public, developers and anyone else who needs to be involved in the development process. The Core Strategy should be capable of giving a strong steer on the levels of growth to be sought from individual settlements, whether towns or villages suitable considered suitable for growth. WDC’s responsibility must then be to allocate sufficient land to meet that identified level of housing growth through appropriate allocation site / area action DPD. To do as suggested flies in the face of PPS3 guidance, effectively the Council would be endeavouring to meet its housing requirement in part through a criterion based ‘windfall’ approach. This will lead to uncertainty and quite probably a significant level of planning through appeal.

We neither agree nor disagree. • Developable but not deliverable within short term • Reliant on office relocation • Doubt marketability of high density development in this location

• Impact upon AONB, landscape character and setting of Crowborough • The relocation / replacement of the formal open space may have an impact upon deliverability
**Consultee ID:** Hallam Land Management Ltd  
**Agent ID:** Mr Hyde  
**Part of document:** ☑ option  
**Section of Document:** Option 11c

**Reason for comment:**  
- Impact upon AONB and Landscape Character  
- Impact upon Ancient Woodland  
- Difficulties surrounding accessibility to the Town Centre and local facilities  
- Loss of recreation allocation – although acknowledge that this could be delivered as part of the scheme.

---

**Reason for comment:**  
- Impact upon AONB and Countryside Gap  
- Coalescence Issues  
- Difficulties securing access into the site  
- Local highways safety issues  
- Loss of employment space  
- Setting of listed buildings  
- Detached from main built up area boundary: beyond countryside gap which abuts built up area

### Option 12e

**Consultee ID:** Hallam Land Management Ltd  
**Agent ID:** 106665  
**Reason for comment:**  
- Part within AONB and part within Countryside Gap  
- Landscape impact – particularly long distant views  
- Difficulties surrounding accessibility to town centre / services  
- Difficulties with access into the site
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

**Option 14d**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
- We neither agree nor disagree.
- Distance from existing services and facilities
- Continues expansion to the south will result in development being remote from the existing town centre, areas of employment etc.
- Consideration needs to be given to lead in times and realistic annual deliverability rates
- Impact upon aquifer

**Option 15a**

**Section of Document:**

**Your View**
- ☑️ Agree
- ☐ No opinion
- ☐ Disagree

**Reason for comment:**

> With reference to our earlier representation. In terms of the capacity of the water treatment plant:

- The assessment of the existing capacity should be made on the basis of current commitments not allocations in the Non Statutory Plan which may not be delivered.
- The Water Industry Act requires water companies to fund improvements to Sewage Treatment Works through the AMP process to meet development growth and environmental improvements. On this basis the existing capacity should not be used to constrain development and growth to the North of Hailsham.

**Reason for comment:**

- Countryside Gap between Uckfield and Maresfield
- Impact upon Historic Park and Garden
- Impact upon SSSI
- Divorced from existing built up area
- Impact upon setting of listed building
Consultee ID: 106665  Hallam Land Management Ltd
Agent ID: 102489  DLP Planning Ltd

Option 14c

Section of Document:

Your View  ☒ Disagree

Reason for comment:
• Impact upon important view of old town and river valley • Sensitive topography and landscape impact
• Capacity of existing road network • Physically divorced from the existing built up area

Consultee ID: 106665  Hallam Land Management Ltd
Agent ID: 102489  DLP Planning Ltd

Option 14e

Section of Document:

Your View  ☒ Disagree

Reason for comment:
• Limited capacity having regard to landscape sensitivity • Impact upon aquifer

Consultee ID: 106665  Hallam Land Management Ltd
Agent ID: 102489  DLP Planning Ltd

Option 14f

Section of Document:

Your View  ☒ Disagree

Reason for comment:
• Impact upon the landscape – visually prominent • Poor access into the site • Difficulties regarding landownership and impact upon deliverability • Impact upon aquifer • Odour problems associated with adjacent sewage works
Consultee ID: Hallam Land Management Ltd
Agent ID: Mr Hyde
106665 Hallam Land Management Ltd 102489 DLP Planning Ltd

Part of document: Option 14g

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
We neither agree nor disagree. • Developable but not deliverable within short term • Reliant on relocation and replacement of existing employment premises • Issues surrounding land ownership and impact upon deliverability • Marketability of high density development • Impact upon conservation area • Area of flood risk

Consultee ID: Hallam Land Management Ltd
Agent ID: Mr Hyde
106665 Hallam Land Management Ltd 102489 DLP Planning Ltd

Part of document: Option 15a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
• Potential to accommodate development on land adjacent to the Cuckoo Trail including new areas of public open space adjacent to the Cuckoo Trail as part of a comprehensive scheme without serious impacting upon the landscape character of the area or biodiversity. • Potential to use and enhance the Cuckoo Trail as a sustainable pedestrian and cycle route linking the site to Hailsham Town Centre and to the railway station at Polegate. • Potential to accommodate either a modest sustainable urban extension or a comprehensive scheme, which delivers a northern relief road if the need is proven. • Potential to deliver a new primary school site / doctors’ surgery and other community uses as appropriate. • Accessible to existing local services and facilities • Potential to sustain new and improved public transport routes. We reiterate our comments to paragraph 5.3.17 above, particularly with regard to quantum of development. We suggest that when reviewing the actual quantum of housing in Hailsham, a sensitivity analysis is carried out to test the actual threshold of development numbers that would be viable across Hailsham before major highways infrastructure is required in the form of relief roads etc.
Option 15b

Section of Document:

Reason for comment:

- Impact upon ecology – adjacent to SSSI
- Local highway safety issues and impact of additional traffic routing through the town centre in the absence of a northern relief road
- Proximity of sewerage works
- Limited opportunities to introduce sustainable transport provision
- Flood risk potential
- Impact upon landscape setting of the town.

Option 15c

Section of Document:

Reason for comment:

We neither agree nor disagree:
- A significant development in this location a detrimental impact upon the landscape character of the area
- Impact upon ecology – adjacent to SSSI
- Impact on archaeology
- Local highways safety issues particularly in the absence of a northern relief road
- Impact on the setting of listed buildings and the conservation area
- Constraints on deliverability
- Marketability of high density development

Option 15d

Section of Document:

Reason for comment:

- Detrimental impact upon landscape character
- Impact upon ecology – adjacent to SSSI / affect on Ramsar levels
- Local highways safety issues and impact of additional traffic routing through the town centre
- Close proximity to wastewater treatment works

**Section of Document:**
- Question 18k

**Reason for comment:**

See our comments in response to Question 8 above. A number of the 'new settlement' options would not, in our view, constitute sustainable developments, as they are of insufficient scale to provide a suitable degree of self-containment. In our experience anything less than 5,000 units is unlikely to provide an adequate range of services and community provision (‘critical mass’) to meet sustainable development principles.

**Section of Document:**
- Wealden's Communities

**Reason for comment:**

6.41 We would support the principle of a high quality bus corridor linking Hailsham with Eastbourne via Polegate / Willingdon. This corridor should serve potential and existing development areas to the north of Hailsham, thereby maximising potential patronage. Hence allowing any service to be self sustaining and viable in economical terms.

- [x] option

**Section of Document:**
- Option 24a

**Reason for comment:**

PPS3 para 47 sets a national minimum density of 30 dwgs/ha. However, in our experience, a range of 35 – 40 dwgs/ha would be an appropriate assumption for large scale housing development areas. Higher densities may well be appropriate in locations well served by public transport, but this is unlikely to approach 50 dwgs/ha other than in suitable town centre locations.

**Agent ID:** 102489

**Hallam Land Management Ltd**

**Mr Hyde**

**DLP Planning Ltd**

**Option 25b**

**Section of Document:**

**Reason for comment:**

Policy H4 of the emerging RSS9 seeks 35% affordable housing provision, whilst Policy SCT8 of the Sussex Coast Sub-Region sets a target of 40%, adopting a site threshold of 15 units. Any policy requirement for affordable housing provision must be founded on a suitable evidence base, but furthermore targets should also be tested against the advice contained in PPS3 (para 29) particularly if higher levels of provision or lower thresholds than contained in emerging guidance are proposed.

</tbody>
</table>

**Consultee ID:** 106665

**Agent ID:** 102489

**Hallam Land Management Ltd**

**Mr Hyde**

**DLP Planning Ltd**

**Option 25c**

**Section of Document:**

**Reason for comment:**

We neither agree nor disagree. In a similar vein, whilst it is acknowledged that Govt. guidance may allow for much lower thresholds in rural areas, PPS3 (para 29) guidance must be reflected, particularly issues of viability, in the development of a sound evidence base.
Option 25d

Reason for comment:
The ‘allocation’ of sites for affordable housing is relatively untried and tested, whereas ‘exceptions scheme’ policies have operated relatively successful for nearly twenty years. If the former is to be pursued, we would suggest that it should not be at the expense of a policy provision that also allowed for exceptions schemes to come forward where need could be demonstrated.

Option 27a

Reason for comment:
We support the need for development to be located where viable bus services can be sustained between and into town centres.

Option 27d

Reason for comment:
The potential for dualling of the A27 (T) west is welcome. It is important to confirm to the community that the highway improvements are not just for future development, but also to assist in resolving existing congestion scenarios.
We believe that deriving parking standards from current car ownership levels is a step in the right direction. However we do express our concern that this is not applied consistently as per the 1.5 average suggested in the PPG13. We believe it is important to review local conditions while identifying ways of encouraging the use of other forms of sustainable transport while not taking away the perceived right of owning a motor vehicle.

We would generally support all three ‘options’ subject to the caveat that proposals were supported by a suitable evidence base that would at the very least include a PPG17 Open Space Assessment.

We would generally support all three ‘options’ subject to the caveat that proposals were supported by a suitable evidence base that would at the very least include a PPG17 Open Space Assessment.
Option 28c

Section of Document:
Housing Delivery

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
We neither agree nor disagree. The Council appears to be proposing a broad swathe of control / intervention measures to address the perceived difficulty in housing delivery. Whilst in some respects their introduction might well be an appropriate response to an identified difficulty, it would appear that the principal blockage to delivery has already been identified by the Council in paragraph 7.6, i.e. the unlocking of infrastructure barriers. These are matters that can only be addressed by the public authorities / statutory undertakers, although Circular 5/2005 does envisage circumstances where monies secured through S106 Obligations might be utilised to ‘unlock’ programmed infrastructure. However, in terms of several of the approaches suggested the Council should be cautious, there is little purpose in stepping beyond the bounds of current practice and guidance in the absence of support from Govt. for the simple fact that to do so is likely to lead to challenge and further delay.
We neither agree nor disagree. We understand and agree with the need for improved infrastructure in terms of highways, public transport and traffic management improvements. We do, however, recommend that the authorities review this more closely than in the previous local plan requirements and ensure that each development contributes to improvements that have a direct benefit to them together with a reasonable proportion of appropriate contributions. For example we believe that developments north of Hailsham will obtain little, if any, benefit from highway improvements as far as Polegate such as (30b) A27 (T), but will benefit from the A22 (T) link and/or other junction improvements together with (30h) Hailsham Town Centre traffic relief and traffic management. As stated previously, the question of development within the various locations should be addressed. Furthermore utilisation of the additional capacity created in the non statutory local plan LATs studies should be given priority ahead of new highway schemes in the first instance. Thus a sequential ranking study of sites should be undertaken before moving forward with the LDF.

Reason for comment:

We would acknowledge that the setting of a ‘Vision’ for Wealden should be a matter that is heavily influenced by local views. However, the draft that has been prepared for inclusion in the Issues & Options report, at face value, seems lengthy and tending towards the inclusion of jargon. We are very surprised that the identified themes do not explicitly address housing issues, in particular affordable housing.

- Chapter: [ ]
- Section: [ ]
- Option: [✓]

**Section of Document:**

**Reason for comment:**

We neither agree nor disagree. SO2) The requirement to deliver 75% of new residential development at a density of at least 40 dwgs/ha will be very difficult to achieve. It is noted that this is not expressed as an average density across the District and that it is well above the national minima established in PPS3 and would have considerable character implications for the District’s towns and villages given that the bulk of new housing planned for will have to be in greenfield locations. The Council should not underestimate the consequent implications for the delivery of public open space within housing development areas in useable formats and such initiatives as SUDS. A more credible approach would be to achieve an average density of 35 dwgs/ha across all new greenfield site development. SO11) Jargon that will go over the heads of most readers. SO14) This should be expressed as an objective to move towards the carbon neutrality of all new development, but within the context of Govt. guidance and emerging regulations.

**Section of Document:**

**Reason for comment:**

To get from Crowborough to Gatwick and the M23 (where most of us go when going anywhere west) the roads are crowded and inevitably mean more traffic on the Ashdown Forest. There is no public transport link in that direction. New housing should go where the transport links are sufficient.

I am opposed to increasing the size of villages at all.

Consultee ID: 106667 Mr Morley

Part of document: Option 26a

Section of Document:

Your View: Agree

Reason for comment:
Option 7b

Section of Document:

Reason for comment:

It is appropriate when considering the possibility of development in villages that the first consideration should be the potential for growth that exists, based upon an analysis of the scale, location and ability to absorb growth that exists. It does not automatically follow that villages with a good level of services will have appropriate land or that or vice versa, and a balanced view in respect of each village needs to be taken. In all cases the level of growth should be commensurate with the scale of the existing settlement. The biggest benefit of establishing growth potential is that where opportunity is identified on a sufficient scale it is possible to include provision of affordable housing for local village need. On this basis the opportunity for additional development for Groombridge is considered to be appropriate in terms of both scale and general location and identification of the village as having potential for intermediate growth is appropriate.

Option 7c

Section of Document:

Reason for comment:

The approach to village development needs to be reasonably flexible to support a range of new housing from this source. In the past there has been a rigid approach to the range and disposition of village development based on the premise that further development will be allocated to places where there is already development, thus increasing the diversity of villages and perpetuating a 'have and have not' approach to affordable housing and other village services. While that has in some cases been acceptable to those who move to villages with a view to closing the door to others behind them it has failed to support the needs that all viable settlements have for organic growth at appropriate levels. If Wealden is to be a vibrant District throughout instead of an area of suburban 'countryside' surrounding the towns then development at villages is going to have to continue. If there is appropriate land available then development should be permitted at an acceptable rate compatible with the ability of the village to absorb it.

- [ ] Disagree

**Reason for comment:**

Groombridge is an excellent location for modest new development of the scale envisaged, which would greatly assist in the maintenance of and improvements to community infrastructure, including the school. While there are constraints to development as a result of the setting of the village it is agreed that land south and east of the village is the most suitable for new housing. There is an area here that has access to the village and particularly to the school via bridges over the railway track adjacent to the school and via Back Lane and this would encourage residents to walk rather than use their cars - an important consideration in view of the comment in the document regarding the nature of the roads, although at the level suggested it is not considered that there will be such an increase in traffic that there should be any concern over this aspect. It is possible to access the land easily from Station Road. The land is available for development and should be allocated as soon as possible.

**Question One**

**Section of Document:** Settlements in the High Weald Area of Outstanding Natural Beauty

**Your View**  
- [ ] Agree  
- [ ] No opinion  
- [x] Disagree

**Reason for comment:**

Central Government guidance on development in the AONB’s is clear. PPS7 states that AONB’s have the highest status of protection in relation to landscape and scenic beauty, and the conservation of such areas should be afforded great weight in planning policy. It continues that major developments should not take place in AONB’s, except in exceptional circumstances, following their most rigorous examination, which must demonstrate that they are in the public interest before being allowed to proceed (paragraphs 21 and 22 refer). On this basis, no significant new development should be provided for within the settlements and wider area of the High Weald and Sussex Downs AONB.
Reason for comment:
The preferred approach would be the maintenance of settlement boundaries, with any change considered, having regard to the full range of alternative options for providing land for additional housing growth. This could include the provision of significant growth in any self-contained new settlement and settlement boundary extension.

Reason for comment:
The use of defined settlement boundaries is a nationally-recognised, effective tool for guiding and controlling development. The abolition of this approach in favour of a criteria-based policy would result in a rush of applications, against which it would be difficult for the Local Authority to ensure a consistency of decision-making whilst delivering appropriate levels of growth, set against annual housing targets. Delivery of development can be best achieved by the preservation of settlement boundaries and the allocation of specific development through the LDF process.

Reason for comment:
Land to the East of Pevensey would be suitable for development and the alteration of the settlement boundary. Whilst the area has flooding issues the land could include flood storage and other mitigation measures in accordance with paragraph D9 'Exception Test' set out in PPS25 that together with new development will help to elevate some of the problem in the area. Additionally, Berwick offers the opportunity for a new settlement centred on and around the train station. New development can be sensitively landscaped on the south side of the railway land new development can proportionally contribute toward the cost of improving to the A27. New development in this location will help to serve the needs of the south downs villages in this area.
Option 6a

Section of Document:

Reason for comment:
This approach fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District's towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision with the remaining level of development going to villages that could benefit from additional development to make them more sustainable.

Option 6b

Section of Document:

Reason for comment:
This approach fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District’s towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision with the remaining level of development going to villages that could benefit from additional development to make them more sustainable.
Option 6c

Reason for comment:
This approach fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District’s towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision with the remaining level of development going to villages that could benefit from additional development to make them more sustainable.

Question 6d

Reason for comment:
The focus should not be on defining a specific percentage of new development provided just around the existing towns by whatever degree. Assessment should be made of the location of new development with regard to the benefit it can have on the District rather than through additions to exiting settlements. It should also consider a significant amount of the requisite new development being provided in the form of a new settlement, to enable benefit from the ability to plan for new housing growth with an appropriate level of employment infrastructure and service provision. Once an appropriate-size growth of new settlement has been identified, the remaining available requirement for housing growth can more readily be identified and planned for across the District’s towns and villages.
PPS3 requires Local Development Documents to set out their strategy for the planned location of new housing to contribute to the aims of sustainable development, including providing housing in rural areas, not only in market towns and local service centres, but also in villages, in order to enhance their sustainability. Whilst the proposed settlement classification broadly accords with this aim, the strategy does not go far enough. It should be expanded to take account of the benefits to services, accessibility and sustainability that could result from identifying areas for development that might currently not score highly against sustainability matrix. By doing this, rather than maintaining areas which might not score well in sustainability terms, they could be positively enhanced and made more sustainable. The settlement classification should emphasis those areas that score low on the existing checklist and what deficiencies they have in order to prescribe a level of development that will make them more sustainable.

It is acknowledged that village classification should be broadly based on provision of services and accessibility. However, to truly accord with PPS3, the classification should also consider the enhancement in services and accessibility that might result from identifying currently less well-served villages as suitable for significant growth.

The distribution of development in villages should take account of the benefit that might result from significant growth in villages that currently score less well in sustainability matrix, via the enhancement in services and accessibility that would result from significant development. Conversely, those villages that already benefit from such services might not necessarily benefit from further growth, where such services be actually placed under stress.
Reason for comment:
Local village services should, as a general rule, be preserved and enhanced wherever possible. The Plan should acknowledge that this may sometimes require significant additional development to maintain and improve services, which would be better than allowing existing services to be lost through alternative re-use.

Reason for comment:
The settlement classification fails to refer to Berwick, thereby failing to reflect the significant provision a railway station would have on meeting sustainable development objectives should the village be allowed to grow. The settlement strategy should acknowledge villages that would benefit from growth and become vibrant following additional development.

Reason for comment:
Hailsham should be allowed a period of assimilation, prior to consideration of further development. Infrastructural capacity will be placed under further stress through windfall development. The town should only have limited extensions in accordance with the aims of the regeneration of the town, which can be achieved without the requirement for significant additional development. As a result, there should be no Hailsham focus within the emerging LDF Core Strategy.
Option 8b

Section of Document:

Reason for comment:

In Polegate/Willingdon the Core Strategy acknowledges that both of these places would be likely to lead to commuting to Eastbourne for accessing jobs and services. This does not foster the creation of vibrant and self-sufficient communities. As a consequence, there should be no Polegate/Willingdon/edge of Eastbourne focus for significant residential development. Any new development in this area should be employment focused to address this balance.

Option 8c

Section of Document:

Reason for comment:

Significant development on this axis would, as admitted in the Core Strategy, reduce the gaps between 2 towns. Whilst this should not always be seen as a bar to development, concern is raised in this instance given the existing coalescence of towns, comprising the conurbation of Eastbourne/Willingdon/Polegate/Stone Cross etc. In the interests of creating identifiably different communities, this should not be encouraged to coalesce further. Furthermore, significant development between the two towns is likely to encourage out-commuting to the existing centres, rather than encourage development around a new development focus, failing to create vibrant communities. On this basis, there should be no Polegate/Hailsham axis.
Option 8d

Reason for comment:
The Low Weald does not benefit from the same protective landscape designation that covers much of the remainder of the District to the north and south. It is therefore correct that significant development should be focused within this landscape area where Greenfield allocations are required. Given the significant growth experienced in the existing Low Weald towns over the current Local Plan period, this should be given the opportunity of assimilation into the respective communities prior to assessment for the potential for further growth. It is equally true for the provision of services so that these can be balanced to meet the needs of the existing expanded population, and possibly allow the employment and service sector to now expand following the recent growth in population. As such, whilst the focus of significant development should be on the Lower Weald, this should be focused away from the existing towns in the form of a new settlement. This would enable an appropriate quantum of development to be brought forward that would provide for self-sufficient, vibrant and balanced community, providing for the relevant needs of housing, employment, service provision and infrastructure. It is considered that this settlement should be located to the south of Berwick Station.

Option 9a

Reason for comment:
In Uckfield, the Core Strategy acknowledges that the town suffers from significant infrastructure problems, including flooding and travel congestion, which is currently blocking all major development. Even if solutions could be found for this, it is likely to lead to a contrived form of development, and one that absorbs such significant expenditure that insufficient funds are left over from development to ensure satisfactory provision of the full range of services required for successful integration of significant development. As such, there should be no Uckfield focus for major development.
A split of development between Uckfield and Crowborough would be likely to lead to significant development, either within or affecting the High Weald AONB. PPS7 makes clear that the greatest level of protection is afforded to these statutory protected landscape designations, and significant development should only be allowed in exceptional circumstances. Land exists outside of the AONB within the High Weald to cater for the requisite development, and consequently there can be no justification for significant development around the fringes of Crowborough.

Both Crowborough and Uckfield are tightly constrained by the High Weald AONB designation. As such, any development which is part split between these two towns is likely to result in development either within or on the edge and affecting the AONB. PPS7 makes clear that the statutory protected national landscape designations are afforded the greatest protection, where development should only be allowed in exceptional circumstances. Land beyond the AONB in the Low Weald exists to provide for the requisite development within the Core Strategy, and there can be no justification for significant development using an Uckfield/Crowborough/Heathfield focus.
Setting size thresholds for housing allocations of 30+ dwellings in or on the edge of towns, and 15+ dwellings in or on the edge of villages is tantamount to seeking significant amounts of housing development to come forward in the form of windfall sites. Such an approach directly conflicts with PPS3, which states that allowances for windfalls should not be included in the first 10 years of land supply unless LPAs can provide robust evidence of genuine local circumstances that prevent specific sites being identified. No such circumstances exist in this instance, as land can be identified, particularly in the Berwick area, to meet the requisite development requirements of the strategy.

Crowborough is tightly constrained by the High Weald AONB. Significant development is likely to be located in or on the edge of the AONB, resulting in harm to this nationally-protected landscape. Such development is contrary to the aims of Central Government as set out in PPS7, which should only be permitted in exceptional circumstances. Alternative locations for development are available within the Low Weald, which would not be harmful to the AONB.

Significant development in or around Uckfield is likely to be required to be located either within or impacting on the AONB. This is contrary to Government guidance which states that significant development in such locations should only be granted in exceptional circumstances, as alternative land is available to meet the requisite development needs of the District within the Low Weald.
Question 12i

Section of Document:
Reason for comment:
Significant development in or around Heathfield is likely to be required to be located either within or impacting on the AONB. This is contrary to Government guidance which states that significant development in such locations should only be granted in exceptional circumstances, as alternative land is available to meet the requisite development needs of the District within the Low Weald.

Question 13b

Section of Document:
Reason for comment:
Whilst a small section of the District to the south-east of Tunbridge Wells is countryside, but outside the High Weald AONB, it is closely bordered by this national landscape designation. Significant development in this location is likely to impact on the AONB, contrary to the aims of PPS7, which affords such areas the highest protection. Added to this, the draft Core Strategy acknowledges there are access problems over the sensitivity of the setting of Tunbridge Wells, and impact on biodiversity, which would further weigh against development in this area. There are other locations for development, particularly within the Low Weald part of the District, which would meet the requisite development needs of the District without compromising the aims of the AONB.

Question 14k

Section of Document:
Reason for comment:
Crowborough should not be identified for significant further residential development. It has been the subject of significant development during the current Local Plan period, and there should be a period of assimilation to enable this housing to mesh into the town and ensure services and infrastructure are adequate, prior to consideration of further significant development in or around the town. Furthermore, many parts of the town are subject to limitations due to traffic congestion and flooding issues, which may well be prohibitively expensive to prevent adequate delivery of housing development with requisite services and provision to meet the needs of future residents. As such, there should be no significant development identified within Uckfield.
Consultee ID: 106669

Part of document: ☑ option

Section of Document: Question 15i

Reason for comment:
Whilst it is considered the Low Weald should be considered for significant development in principle, it is considered this would be better achieved via a new settlement, followed by incremental development around the edge of the town. A new development would afford the opportunity to balance the needs for housing, employment and infrastructure provision in a single location. The remaining development should be in those location that could benefit from development to improve facilities and service making them more sustainable.

Consultee ID: 106669

Part of document: ☑ option

Section of Document: Question 16j

Reason for comment:
Whilst the Low Weald is considered suitable for significant residential development in principle, it is considered this should not be located within and around Polegate/Willingdon. Significant development has been identified in the current Local Plan period in this area, and this should be given the opportunity of assimilating prior to consideration of future significant development to meet the requisite needs of the emerging Core Strategy. Furthermore, the areas broadly experience a period of coalescence with each other and the town of Eastbourne to the south. Further development would be likely to further erode the identity and vitality of each individual area. It is considered that significant development can be successfully located, but this should be in the form of a new settlement preferably in the Berwick area south of the railway line, followed by identification of settlements that require additional development to improve facilities and services such as Pevensey.
Whilst the Low Weald is considered suitable for significant residential development, it is not considered that it should be located within or around Stone Cross. The area has experienced significant residential development in recent years, and further period of assimilation is required before significant additional development is considered. Furthermore, this location is close to the existing built-up areas of Polegate/Willingdon/Eastbourne, and further development here could encourage the coalescence of these areas, failing to provide a satisfactory identity and self-containment to Stone Cross.

The principle of providing a significant contribution to the development needs of the District over the Plan period in the form of a new settlement is strongly supported. It is considered that this would enable development to be provided at such a scale as to ensure the appropriately balanced mixed community, providing housing, employment, services and infrastructure provision, which could readily assimilate into its own character. Such self-containment would also positively contribute to the aims of sustainability. It is considered that the area of Berwick, and in particular to the south of the railway line should be identified for significant development that will incorporate appropriate landscaping. A new settlement in this location would benefit from proximity to Berwick Station with good access to high order facilities at Brighton and Eastbourne. It is also well removed from AONB designations to the north and south, ensuring no impact on the statutory protected landscapes. A new settlement would provide the LPA with the best opportunity of ensuring an adequate level of housing provision and an appropriate mix, at an appropriate level of phasing, to meet the requirements of the emerging Regional Spatial Strategy. Meeting such targets would be considerably more difficult with a more dispersed housing strategy. It is therefore considered that the strategy should identify land to the south of Berwick.
Section of Document:

Reason for comment:

Whilst the concept of village categorisation is supported, it is considered the assessment should consider the potential benefits that would result from identifying strategic development in a wide range of villages. In particular, those villages which may not initially score well on a sustainability matrix, in terms of access to services and facilities. They could benefit greatly from allocation of significant development to improve the vitality and viability of these communities.

Section of Document:

Reason for comment:

The use and expansion of existing train line services should be promoted along with the use of new bus services.

Section of Document:

Reason for comment:

Why have this designation if a Local Authority can ride rough-shod over it? The High Weald AONB is stated as being unique in Britain and Europe and, possibly, worldwide; it has represented the best protection our communities have. Paragraph 2.3 specifically calls for Landscape Conservation; paragraph 2.6 points to national policy PPS7 specifically calling for protection of AONB's; paragraph 2.14 to AONB's being very sensitive to cumulative and small-scale change. The only development that should be considered within the AONB should be confined to infill sites of no landscape impact.
Either settlement boundaries are maintained or they should be re-drawn, surely. Allowing for 'expansion where necessary' obviates the necessity for a policy, surely.

**Reason for comment:**
SEERA Consulting forecasting model 2004 shows that businesses consider road infrastructure to be inadequate - this number of dwellings so close to a major site for business expansion and fronting an already congested road would be a disaster, even if this area did not encroach into the AONB adjoining a Park of national significance.
Consultee ID: Mr Mackenzie  
106671 Old Heathfield & Cade Street Society  

Option 12d  
Section of Document:  
Reason for comment:  
Paragraph 4.8 states that ridge-top development has a detrimental visual impact. This site is unrelated to any settlement and would comprise a prominent intrusion into the AONB, let alone the proximity of Heathfield Park (contradicting the spirit of paragraph 5.6 relating to the exclusion of historic parks and gardens from development proposals). Furthermore, this proposal goes against all previous planning policy and would be totally unsustainable due to lack of infrastructure (public transport, shops, services) in everything but the nearby College.

Consultee ID: Mr Mackenzie  
106671 Old Heathfield & Cade Street Society  

Option 12d  
Section of Document:  
Reason for comment:  
It is incorrect to describe this site as 'already part urbanised land with good potential access'; the site is a green field in the AONB and the only access is from a notoriously fast and dangerous stretch of the B2096 Heathfield - Battle road. What is described as 'potential for small well designed linear cluster of housing of Cade Street-like form' would be better described as 'ribbon development', completely changing the present pleasant rural character of the area.

Consultee ID: Mr Mackenzie  
106671 Old Heathfield & Cade Street Society  

Question 12g  
Section of Document:  
Reason for comment:  
Infrastructure for the town and surrounding area is woefully inadequate now - let alone if 600 -1,000 new dwellings were to be allowed. Paragraph 5.21 details the very poor transport links - no railway and very limited bus service. Development as suggested in 12c, 12d or 12e would be in sites remote from the town centre and in locations prominent within the High Weald AONB; development should be firmly resisted.
In general agreement, but if a 'new multi-purpose community facility' is not to include a new swimming pool to which most residents of the town could walk (which is now proposed to be built one mile east of the town on the Leisure Centre site, inaccessible by public transport), we question what it will comprise and what land 'it will free for affordable housing'. Mystifying.

I wish to make a general comment. I believe that the publicity surrounding the issue of development in Wealden is not well understood. I believe that many people are not familiar with the concept of the square kilometre. My calculations tell me that 863 sq km = 207 272 acres. I understand, from the document, that we are talking about 8000 homes in Wealden by the year 2020. This works out at about 4 additional homes per 100 acres. I accept that the Downs and the High Weald make up a large part of the total area, but we are still talking about a relatively low density of dwellings. I believe that much of the current unease that is exploited by various sectional interests could be eased if the public were better informed about proposed developments. Today I have read about 846 homes in the Hailsham area - how does that fit into the overall plan?

Question One

Consultee ID: Hallings-Pott

Part of document: Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Disagree
Reason for comment:

The Council’s approach to providing housing in the AONB should reflect Central Government guidance. PPS7 states that AONBs have the highest status of protection in relation to landscape and scenic beauty, and the conservation of such areas should be afforded great weight in planning policy. It continues that major developments should not take place in AONBs, except in exceptional circumstances, following their most rigorous examination, which must demonstrate that they are in the public interest before being allowed to proceed (paragraphs 21 and 22 refer). On this basis, no significant new development should be provided for within the settlements and wider area of the High Weald and Sussex Downs AONB.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Part of document: □ document □ chapter □ section □ option
Option 3a

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

It is acknowledged that PPS3 (para 44) indicates it is appropriate to consider whether sites that are currently allocated for industrial or commercial use could more appropriately be reallocated for housing development, as amplified by guidance set out in Employment Land Reviews: Guidance Note ODPM – 2004. However, the key issue is whether these sites could “more appropriately” be reallocated. It is considered inappropriate therefore to apply a test of whether there is “a realistic prospect of employment development coming forward”. The LPA are unlikely to be in the best position to judge the prospects of employment land development. Furthermore, reaching such judgements within the context of the current Local Plan, the potential for such areas to come forward as part of future development, in conjunction with other land being allocated for housing development. On this basis, the approach should be to retain existing land identified for employment use, where there is a need for this, particularly in conjunction with housing development allocated in close proximity such that this linkage would provide balanced and sustainable communities as required by paragraph 10 of PPS3.

Part of document: □ document □ chapter □ section □ option
Option 3b

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Paragraph 10 of PPS3 fosters housing development in locations which offer a good range of community facilities, with good access to jobs etc. Given the RSS targets for additional housing growth within Wealden, the quantum of employment land will need to be increased. To ensure an appropriate level of supply and provision to balance housing growth, existing employment premises should be protected from alternative forms of redevelopment, except in exceptional circumstances. Evidence of “market need” should take account not only of existing circumstances, but planned levels of growth within the emerging LDF.
Paragraph 10 of PPS3 promotes housing development in locations which offer a good range of community facilities with good access to jobs. On this basis, new housing development should be balanced with an appropriate level of new business development. Furthermore, emphasis should be towards providing new housing development in close proximity to existing or allocated employment sites to maximise the synergy of sustainable travel movements, and ensure the likelihood of the maintenance and delivery of employment sites.

Comment – the identification of additional land for new employment / business development should not be at the expense of existing and allocated employment sites. The emphasis should be on retaining existing locations, prior to the expansion of alternative locations, particularly where these might be less sustainable locations, or have greater environmental impact.

The implication of this question is that whilst settlement boundaries should be maintained, they should generally be expanded to provide for growth throughout the District on a dispersal-based strategy. The most appropriate approach would be the maintenance of settlement boundaries, with any change considered, having regard to the full range of alternative options for providing land for additional housing growth. This could include the provision of significant growth in any self-contained settlement.
Reason for comment:
The use of defined settlement boundaries is a nationally-recognised, effective tool for guiding and controlling development. The abolition of this approach in favour of a criteria-based policy would result in a rush of applications, against which it would be difficult for the Local Authority to ensure a consistency of decision-making whilst delivering appropriate levels of growth, set against annual housing targets. Delivery of development can be best achieved by the preservation of settlement boundaries and the allocation of specific development allocation sites through the LDF process.

Reason for comment:
The provision of 80% of the District’s housing development needs within and around existing towns fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District’s towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision.

Reason for comment:
The provision of 75% of the District’s housing development needs within and around existing towns fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District’s towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision.
Option 6c

Section of Document:

Reason for comment:
The provision of 70% of the District’s housing development needs within and around existing towns fails to recognise the potential negative impacts that such housing development could have on the character and service provision that exists within the District’s towns, particularly given that many have experienced significant housing growth through the last Local Plan period, and require a period of assimilation prior to any decision-taking on any further phased growth. Instead, the focus should be on delivering a planned new settlement which can more readily provide the balance between housing, employment and infrastructure, and services provision.

Question 6d

Section of Document:

Reason for comment:
The focus should be on a significant amount of the requisite new development being provided in the form of a new settlement, to enable benefit to be taken of the ability to plan for new housing growth with an appropriate level of employment infrastructure and service provision. Once an appropriate-size growth of new settlement has been identified, the remaining available requirement for housing growth can more readily be identified and planned for across the District’s towns and villages.
PPS3 requires Local Development Documents to set out their strategy for the planned location of new housing to contribute to the aims of sustainable development, including providing housing in rural areas, not only in market towns and local service centres, but also in villages, in order to enhance their sustainability. Whilst the proposed settlement classification broadly accords with this aim, the strategy does not go far enough. It should be expanded to take account of the benefits to services, accessibility and sustainability that could result from identifying areas for development that might currently not score highly against sustainability matrix. By doing this, rather than maintaining areas which might not score well in sustainability terms, they could be positively enhanced in sustainability as required by PPS3. The settlement classification should therefore take account of the contribution to sustainability, particularly for existing residents, that might result from identifying lower-category villages as suitable for significant growth.

It is acknowledged that village classification should be broadly based on provision of services and accessibility. However, to truly accord with PPS3, the classification should also consider the enhancement in services and accessibility that might result from identifying currently less well-served villages as suitable for significant growth. The distribution of development in villages should take account of the benefit that might result from significant growth in villages that currently score less well in sustainability matrix, via the enhancement in services and accessibility that would result from significant development. Conversely, those villages that already benefit from such services might not necessarily benefit from further growth, where such services be actually placed under stress.
Local village services should, as a general rule, be preserved and enhanced wherever possible. The Plan should acknowledge that this may sometimes require significant development to maintain and improve services, which would be better than allowing existing services to be lost through alternative re-use.

The settlement classification fails to refer to Lower Dicker, thereby failing to reflect the significant provision of employment and services that exist in this area. The settlement strategy should acknowledge these existing services, and the synergy that would result from identifying significant growth potential for this area, not only in ensuring the maintenance and enhancement of these services, but also in the sustainability that would flow from a balanced community of housing, employment and service provision.

Hailsham has already experienced significant housing development in recent years, and should be allowed a period of assimilation, prior to consideration of further development. Coupled with this is the stress currently being placed on local services, including highway infrastructure capacity and the impact further development within the town may have on this. The aims of regeneration of the town can be achieved without the requirement for significant additional development. As a result, there should be no Hailsham focus within the emerging LDF Core Strategy.
Option 8b

Section of Document:

Reason for comment:
Polegate/Willingdon and the edge of Eastbourne has experienced significant development as part of the current Development Plan. It should be given a period of assimilation prior to consideration of further significant additional development. The Core Strategy acknowledges that both of these places would be likely to lead to commuting to Eastbourne for accessing jobs and services. This does not foster the creation of vibrant and self-sufficient communities. As a consequence, there should be no Polegate/Willingdon/edge of Eastbourne focus for significant development.

Option 8c

Section of Document:

Reason for comment:
Significant development on this axis would, as admitted in the Core Strategy, reduce the gaps between 2 towns. Whilst this should not always be seen as a bar to development, concern is raised in this instance given the existing coalescence of towns, comprising the conurbation of Eastbourne/Willingdon/Polegate/Stone Cross etc. In the interests of creating communities, this should not be encouraged to coalesce further. Furthermore, significant development between the two towns is likely to encourage out-commuting to the existing centres, rather than encourage development around a new development focus, failing to create vibrant communities. On this basis, there should be no Polegate/Hailsham axis.
Reason for comment:
The Low Weald does not benefit from the protective landscape designation that covers much of the remainder of the District to the north and south. It is therefore correct that significant development should be focused within this landscape area. Given the significant growth experienced in the existing Low Weald towns over the current Local Plan period, this should be given the opportunity of assimilation into the respective communities prior to assessment for the potential for further growth. It is equally true for the provision of services so that these can be balanced to meet the needs of the existing expanded population, together with maybe a period of new character for these towns to emerge. As such, whilst the focus of significant development should be on the Lower Weald, this should be focused away from the existing towns in the form of a new settlement. This would enable an appropriate quantum of development to be brought forward that would provide for self-sufficient, vibrant and balanced community, providing for the relevant needs of housing, employment, service provision and infrastructure. It is considered that this settlement should be located to the north of the Lower Dicker/A22.

Reason for comment:
The representation is Uckfield has experienced significant development in recent years, and should be allowed a period of assimilation prior to assessment for significant further development. Added to this, the Core Strategy acknowledges that the town suffers from significant infrastructure problems, including flooding and travel congestion, which is currently blocking all major development. Even if solutions could be found for this, it is likely to lead to a contrived form of development, and one that absorbs such significant expenditure that insufficient funds are left over from development provide to ensure satisfactory provision of the full range of services required for successful integration of significant development. As such, there should be no Uckfield focus for major development.
A split of development between Uckfield and Crowborough would be likely to lead to significant development, either within or affecting the High Weald AONB. PPS7 makes clear that the greatest level of protection is afforded to these statutory protected landscape designations, and significant development should only be allowed in exceptional circumstances. Land exists outside of the AONB within the High Weald to cater for the requisite development, and consequently there can be no justification for significant development around the fringes of Crowborough.

Both Crowborough and Uckfield are tightly constrained by the High Weald AONB designation. As such, any development which is part split between these two towns is likely to result in development either within or on the edge and affecting the AONB. PPS7 makes clear that the statutory protected national landscape designations are afforded the greatest protection, where development should only be allowed in exceptional circumstances. Land beyond the AONB in the Low Weald exists to provide for the requisite development within the Core Strategy, and there can be no justification for significant development using an Uckfield/Crowborough/Heathfield focus.

Both Crowborough and Heathfield are tightly constrained by the High Weald AONB designation. As such, any development which is part split between these two towns is likely to result in development either within or on the edge and affecting the AONB. PPS7 makes clear that the statutory protected national landscape designations are afforded the greatest protection, where development should only be allowed in exceptional circumstances. Land beyond the AONB in the Low Weald exists to provide for the requisite development within the Core Strategy, and there can be no justification for significant development using an Uckfield/Crowborough/Heathfield focus.
Section of Document: Site Allocation Thresholds

Reason for comment:
Setting size thresholds for housing allocations of 30+ dwellings in or on the edge of towns, and 15+ dwellings in or on the edge of villages is tantamount to seeking significant amounts of ?? housing development to come forward in the form of windfall sites. Such an approach directly conflicts with PPS3, which states that allowances for windfalls should not be included in the first 10 years of land supply unless LPAs can provide robust evidence of genuine local circumstances that prevent specific sites being identified. No such circumstances exist in this instance, as land can be identified, particularly in the Low Weald, to meet the requisite development requirements of the strategy.

Section of Document: Crowbroough

Reason for comment:
Crowbroough should not be identified as a location for significant residential development. It is tightly constrained by the High Weald AONB. Significant development is likely to be required to be located in or on the edge of the AONB, resulting in harm to this nationally-protected landscape. Such development is contrary to the aims of Central Government as set out in PPS7, which should only be permitted in exceptional circumstances. Alternative locations for development are available within the Low Weald, which would not be harmful to the AONB.

Section of Document: Uckfield

Reason for comment:
Significant development in or around Uckfield is likely to be required to be located either within or impacting on the AONB. This is contrary to Government guidance which states that significant development in such locations should only be granted in exceptional circumstances, as alternative land is available to meet the requisite development needs of the District within the Low Weald.
Question 12i

Significant development in or around Heathfield is likely to be required to be located either within or impacting on the AONB. This is contrary to Government guidance which states that significant development in such locations should only be granted in exceptional circumstances, as alternative land is available to meet the requisite development needs of the District within the Low Weald.

Your View  ■ Agree  □ No opinion  □ Disagree

Reason for comment:
Significant development in or around Heathfield is likely to be required to be located either within or impacting on the AONB. This is contrary to Government guidance which states that significant development in such locations should only be granted in exceptional circumstances, as alternative land is available to meet the requisite development needs of the District within the Low Weald.

Question 13b

Whilst a small section of the District to the south-east of Tonbridge Wells is countryside, but outside the High Weald AONB, it is closely bordered by this national landscape designation. Significant development in this location is likely to impact on the AONB, contrary to the aims of PPS7, which affords such areas the highest protection. Added to this, the draft Core Strategy acknowledges there are access problems over the sensitivity of the setting of Tonbridge Wells, and impact on biodiversity, which would further weigh against development in this area. There are other locations for development, particularly within the Low Weald part of the District, which would meet the requisite development needs of the District without compromising the aims of the AONB.

Your View  ■ Agree  □ No opinion  □ Disagree

Reason for comment:
Whilst a small section of the District to the south-east of Tonbridge Wells is countryside, but outside the High Weald AONB, it is closely bordered by this national landscape designation. Significant development in this location is likely to impact on the AONB, contrary to the aims of PPS7, which affords such areas the highest protection. Added to this, the draft Core Strategy acknowledges there are access problems over the sensitivity of the setting of Tonbridge Wells, and impact on biodiversity, which would further weigh against development in this area. There are other locations for development, particularly within the Low Weald part of the District, which would meet the requisite development needs of the District without compromising the aims of the AONB.

Question 14k

Crowborough should not be identified for significant further residential development. It has been the subject of significant development during the current Local Plan period, and there should be a period of assimilation to enable this housing to mesh into the town and ensure services and infrastructure are adequate, prior to consideration of further significant development in or around the town. Furthermore, many parts of the town are subject to limitations due to traffic congestion and flooding issues, which may well be prohibitively expensive to prevent adequate delivery of housing development with requisite services and provision to meet the needs of future residents. As such, there should be no significant development identified within Uckfield.

Your View  ■ Agree  □ No opinion  □ Disagree

Reason for comment:
Crowborough should not be identified for significant further residential development. It has been the subject of significant development during the current Local Plan period, and there should be a period of assimilation to enable this housing to mesh into the town and ensure services and infrastructure are adequate, prior to consideration of further significant development in or around the town. Furthermore, many parts of the town are subject to limitations due to traffic congestion and flooding issues, which may well be prohibitively expensive to prevent adequate delivery of housing development with requisite services and provision to meet the needs of future residents. As such, there should be no significant development identified within Uckfield.
The town has experienced significant development under the current Local Plan period, and should be allowed an opportunity for this to assimilate into the fabric of the town prior to consideration for future significant development. Whilst it is considered the Low Weald should be considered for significant development in principle, it is considered this would be better achieved via a new settlement, rather than incremental development around the edge of the town. A single new development would afford the opportunity to balance the needs for housing, employment and infrastructure provision in a single location.

Whilst the Low Weald is considered suitable for significant residential development in principle, it is considered this should not be located within and around Polegate/Willingdon. Significant development has been identified in the current Local Plan period in this area, and this should be given the opportunity of assimilating prior to consideration of future significant development to meet the requisite needs of the emerging Core Strategy. Furthermore, the areas broadly experience a period of coalescence with each other and the town of Eastbourne to the south. Further development would be likely to further erode the identity and vitality of each individual area, and encourage dormitory-style settlements commuting to the centre of Eastbourne to the south. It is considered that significant development can be successfully located, but this should be in the form of a new settlement.
Reason for comment:

Whilst the Low Weald is considered suitable for significant residential development, it is not considered that it should be located within or around Stone Cross. The area has experienced significant residential development in recent years, and further period of assimilation is required before significant additional development is considered. Furthermore, this location is close to the existing built-up areas of Polegate/Willingdon/Eastbourne, and further development here could encourage the coalescence of these areas, failing to provide a satisfactory identity and self-containment to Stone Cross.
The principle of providing a significant contribution to the development needs of the District over the Plan period in the form of a new settlement is strongly supported. It is considered that this would enable development to be provided at such a scale as to ensure the appropriate balanced mix community, providing housing, employment, services and infrastructure provision, which could readily assimilate into its own character. Such self-containment would also positively contribute to the aims of sustainability. It is considered that the area of Lower Dicker, and in particular to the north of the A22 and east of the Hackhurst Lane Business Area should be identified for significant development. This area comprises a Low Weald landscape, which is typically flat and uninteresting. Furthermore, it is characterised by ribbon development along the A22 to the south, and the existing business area at Hackhurst Lane to the west. The A267 is located to the east. There is an existing range of employment provision and services within the area, which would benefit from significant development to improve their viability and vitality. This is particularly true for the Hackhurst Lane Business Area which has been allocated but undeveloped in the last Local Plan period. The enhancement of these services would strongly foster and contribute to the self-containment and sustainability of the settlement, setting this new settlement option above the others identified for consideration. Development on a significant scale could readily meet the infrastructure requirements to ensure adequate highway capacity, and would be of a scale to ensure adequate provision of non-car modes of public transport. Given the existing provision of employment, and its remote proximity from Eastbourne, it is considered there would be no undue risk of out-commuting, as may exist with alternative options to the south. It is also well removed from AONB designations to the north and south, ensuring no impact on the statutory protected landscapes. A new settlement would provide the LPA with the best opportunity of ensuring an adequate level of housing provision and an appropriate mix, at an appropriate level of phasing, to meet the requirements of the emerging Regional Spatial Strategy. Meeting such targets would be considerably more difficult with a more dispersed housing strategy. It is therefore considered that the strategy should identify land to the north of the A22 at Lower Dicker and to the east of the Hackers Lane industrial area for significant dwellings, preferably at the upper end of the identified range (ie 1950) or beyond this figure for development over the Plan period.
### Reason for comment:

Whilst the concept of village categorisation is supported, it is considered the assessment should consider the potential benefits that would result from identifying strategic development in a wide range of villages. In particular, those villages which may not initially score well on a sustainability matrix, in terms of access to services and facilities, could benefit greatly from allocation of significant development to improve the vitality and viability of these communities. Conversely, those villages which are already of a critical mass to benefit from such services, may not be best suited for further additional strategic development.

---

### Reason for comment:

The decision on the most appropriate location for development should not be solely on the desire to improve bus services to and between towns. Towns already benefit from good levels of non-car modes of travel, and the District should give equal weight to consider improving accessibility of other areas to non-car modes of transport. Furthermore, the key aspiration of development should be to ensure that in its own right, it is or can be made accessible by non-car modes of transport. Development should not therefore be a tool merely to improve bus services generally. This would not otherwise be a sensible or logical location for development.

---

### Reason for comment:

Whilst the reinstatement of the Lewes/Uckfield/Tonbridge Wells train service is laudable, the allocation of development at certain sections along the route help fund missing links, should not in its own right be a reason for development in these locations. The most appropriate location for development must be based on a wide range of issues, and inappropriate weighting to the benefit of a new railway link could result in the identification of land for development that would otherwise be considered inappropriate.
The objections of SO2a are not supported. Development should not be allocated on previously-developed land if it is not otherwise the most suitable location. In particular, achieving a target of 60% of housing on previously-developed land is likely to be difficult in a District which does not benefit from a heritage of derelict industrial and other-used land. This could result in allowing development in locations that are not otherwise appropriate, merely to meet an arbitrary target. The location for development should be based on a set of spatial criteria, not on the existing land-use of areas alone. Similarly, a target of 75% of new residential development at a density of at least 40 dwellings per hectare is unnecessarily arbitrary. The aim should be to achieve high design quality at the national minimum target of between 30-50 dwellings per hectare. This will enable a range of housing forms to come forward to meet all the development needs of the District, and not a narrow sector, by setting an arbitrary target.

The roads around this area are already congested and this will only add to the problem.

### Question One

#### Section of Document:

- **Your View**
  - [ ] Agree
  - [ ] No opinion
  - [x] Disagree

#### Reason for comment:

Housing need should be met outside the AONB. Once small developments are allowed it encourages more and the area is reduced in size. We need to protect our beautiful landscapes.
Option 2a

Reason for comment:
It is good to use renewable sources but we need to be careful that we do not put an ugly blot on the landscape. For example wind farms are ugly and noisy and need to be avoided.

Option 3a

Reason for comment:
It is pointless to have land/buildings deignated if it is clear there is little demand for them.

Option 3b

Reason for comment:
What is a 'suitable' area needs to be considered very carefully.
Option 3d

Reason for comment:
It is a waste of time to build houses in an area where there are no jobs. It's not a good idea to build houses on the supposition that businesses will want to locate there.

Option 5a

Reason for comment:
One must be very careful when seeking to expand. Pressure from developers is not an adequate reason.

Option 5b

Reason for comment:
One should be able to keep within specified boundaries.

Question 5c

Reason for comment:
There are problems with Travellers who want to live in the most beautiful parts. It is unfair that they should be given preferential treatment. Where the general populous is concerned they have to pay significantly more to live in a more desirable area. This should apply to all people.

Part of document: ☑ option
Option 9a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:

Hailsham has potential for growth.

Too close to Eastbourne to be a separate entity.

Uckfield can sustain more development. Centrally placed within the county.
Crowborough has developed substantially in recent years. It's good to keep its small town ambience. It is too close to Tunbridge wells for it to develop many shops as shown by many of them converting to charity shops or estate agents. Uckfield is further from other big towns resulting in more shops.

The development of Crowborough is limited by its proximity to Ashdown Forest. Heathfield and Uckfield would both benefit from more development.

To encourage tourism Crowborough is in need of a decent hotel. I am doubtful if many shops will be encouraged to come here. It is too close to Tunbridge Wells and its extensive shopping area for people to think Crowborough might be profitable. Internet shopping will also have an impact. Many in recent years have closed down.
Option 11b

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Crowborough benefits greatly from the position of its leisure centre and I would be very opposed to it being demolished. Participants have excellent and therapeutic views over the countryside. Its closeness to the A27 is emphasised but to put a commercial/industrial area there would not enhance visitors' entrance into the town and would destroy the magnificent views across to the North Downs. Children would lose their excellent facilities. There are better areas to put housing.

Question 11g

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
I am doubtful that many new shops will appear in Crowborough.

Option 24a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Overdevelopment isn't healthy.

Option 24d

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
It doesn't follow that such people will use public transport.

Part of document: □ document □ chapter □ section □ option 
Option 25c  
Section of Document:  
Reason for comment:  
However when the relative died it should be the choice of the houseowner not the council who should live there.
Reason for comment:
It is unfair that there should be a preponderous of such sites in AONB. Many people cannot afford to live in the north of Weald so why should Travellers be regarded as a special case.

Reason for comment:
This is much fairer.

Reason for comment:
Sensible idea. It would mean people from Crowborough could go by train to the coast.

Your View: Disagree
Reason for comment:

Consultee ID: Miss Edwarde
Part of document: question one
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View: Agree
Reason for comment:
I only agree to the redevelopment of brown field sites within the AONB. Even within the villages it would be possible to achieve this, especially if it were to be affordable housing for local people.
Option 2a
Section of Document:
Reason for comment:
This target seems reasonable especially as Wealden has a greater potential for success than some other areas.

Option 2b
Section of Document:
Reason for comment:
Too high. Let's see how we get on with 10% first.

Option 3a
Section of Document:
Reason for comment:
Land allocated for employment was done so for a reason. Sometimes the take-up might be slow but once it is given to mixed use, the possibilities of a balanced development of housing and employment are lost.

Option 3b
Section of Document:
Reason for comment:
But this is difficult to achieve when the premises are privately owned and includes private accommodation. Often the income from a shop, for example, would not pay the motgage of a new buyer and the retiring shop keeper cannot be compelled to continue business.
If the settlement boundaries are to be redrawn, this should be a coherent process, not piecemeal as perceived need arises. There should be consultation with the local communities at all stages and, once redrawn, they should be strictly maintained.

There is already too much erosion of green-field.

Infrastructure and amenities are all important and it must be more economic to build on the edges of towns.

Seems to be the better option but it would have to be reviewed regularly as the local bus service, for example, could alter as could "the compelling local need for some growth to boost local services..."
Consultee ID: Miss Edwarde

Part of document: Option 9c

Section of Document:

Your View: ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
None of these towns could absorb expansion with existing infrastructures but it seems the best option in a bad situation. The pressure on infrastructure which development brings will not only impact on the towns. Increased population in the area will impact on us all, as newcomers seek to use the wider road network and leisure activities in and beyond the area.

Consultee ID: Miss Edwarde

Part of document: Option 19e

Section of Document:

Your View: ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
If the two current proposals for affordable housing were to go ahead, this would provided the majority of houses proposed. If the remainder were also on brown field sites, the number proposed is achievable.

Consultee ID: Miss Edwarde

Part of document: Option 25d

Section of Document:

Your View: ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The cost of housing in the villages is creating a poor social mix of residents. Affordable housing schemes would help to redress this balance and attract low income people, including those in low paid professions like young teachers, nurses and care workers. In time, it might be necessary to review this policy as the balance of social diversity is achieved.

Consultee ID: 106679

Part of document: Option 6d

Section of Document: Your View

Reason for comment:
Distance travelled to work should be a minimum. Country villages should be conserved and not expanded with new development.

Consultee ID: Mr. Lyons
Consultee ID: 106680

Part of document: Option 14a

Section of Document: Your View

Reason for comment:
Consultee ID: Mrs Kentish Barnes
Agent ID: 106681

Part of document: ☑ option

Reason for comment:
There should not be development in an area of outstanding natural beauty. The whole point of the latter is to keep it thus.

Consultee ID: Mrs Kentish Barnes
Agent ID: 106681

Part of document: ☑ option

Reason for comment:
This would be over development, there could be drainage problems and there is not the infrastructure. The road is already busy and not in good shape, more houses would prove hazardous.

Consultee ID: Mrs Kentish Barnes
Agent ID: 106681

Part of document: ☑ option

Reason for comment:
Most unsuitable for further houses. The road is already narrow and there are enough houses in this area.

Consultee ID: Mrs Kentish Barnes
Agent ID: 106681

Part of document: ☑ option

Reason for comment:
There are enough houses already in this area and it would be overcrowding. The road is not suitable and is already busy enough. It is also a rural area and an area of outstanding natural beauty.
Option 20a

Reason for comment:
It would be highly unsuitable to have more houses in Rotherfield. Already the road is congested and there is not enough room to accommodate more housing, nor is the infrastructure adequate.

Option 20c

Reason for comment:
This village is not suited to more housing, there would be overdevelopment and the infrastructure is not adequate.

Option 21c

Reason for comment:
Buxted has already grown enough and has already taken more housing. More housing would be overdevelopment and again the infrastructure would not be adequate.

Option 21d

Reason for comment:
Framfield is large enough already and is in an area of outstanding natural beauty. More houses would spoil the character of the village, it would be over development and again the infrastructure would not be adequate.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 106681  Mrs Kentish Barnes
Agent ID: 

Part of document: Option 21e

Section of Document:

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
Blackboys is in an area of outstanding natural beauty. To allow the village to grow would completely spoil the character of the village, it would be over development and again the infrastructure is certainly not adequate.

Consultee ID: 106681  Mrs Kentish Barnes
Agent ID: 

Part of document: Option 22a

Section of Document:

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
It would be totally unsuitable to have more housing in Cross in Hand. There is a rising accident rate on the A267, there is the busiest Esso station in the south east, it would be over development, the infrastructure is not adequate, there would be problems with drainage and surface water.

Consultee ID: 106681  Mrs Kentish Barnes
Agent ID: 

Part of document: Option 22c

Section of Document:

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
There is a fault in the escarpment of the village, the land moves and there would be terrible drainage problems. There are already enough houses in Broad Oak. Further housing would be overdevelopment.

Consultee ID: Mr Garland  
Part of document: Question 17e  
Section of Document:  
Your View  ✔ Agree  ☐ No opinion  ☐ Disagree  
Reason for comment: 
Land known as Standard Green Field, Rattle Road, Stone Cross We have been instructed by the owners of the land to promote part or all of it for residential development. Further details in submitted supporting statement, map and letter submitted to WDC Planning Policy.
Reason for comment:
The AONB is such a large area that it is difficult to see how the required number of houses can be built without encroaching on it. Additional housing should consist of small developments around many existing settlements, rather than just a few large new developments.

Reason for comment:
The 10% target seems low. We should at least aim higher.

Reason for comment:
Aim high. This will mean lifestyle and environmental change, but we must bite the bullet.

Reason for comment:
However, attracting jobs should still be a priority. Employment is provided by many other types of organisation as well as factories and offices, e.g. tourist attractions, shops, charities, schools, churches, restaurants, etc.
Reason for comment:
However, the redevelopment should be permitted if it leads to greater employment.

Reason for comment:
This is too narrow a description of the type of business. Many organisations create employment, not just factories and offices.

Reason for comment:
Definitely. Unless there is local balance between new housing and well-paid employment opportunities, the consequence will be a large increase in commuting travel.

Reason for comment:
Development in this area would fill in the quadrant between Lewes Road and the old Polegate bypass, once occupied by the honey farm and now by a haulage yard. It would be the "least worst" extension to the present built up area. It must include the folkington link part of the Polegate by-pass.

### Option 16a

**Section of Document:**

**Reason for comment:**
Extends development less far into open countryside than some other options. Must include the Folkington link part of the Polegate bypass.

### Option 16b

**Section of Document:**

**Reason for comment:**
Encroaches too far into open countryside.

### Option 16c

**Section of Document:**

**Reason for comment:**
Encroaches too far into open countryside.

### Option 16d

**Section of Document:**

**Reason for comment:**
Difficult access through existing narrow residential roads.
Consultee ID: Cooper

Part of document: Option 16e
Section of Document:
Reason for comment:
Prefer growth east from Polegate towards Stone Cross, rather than extending the built-up area north.

Consultee ID: Cooper

Part of document: Option 16f
Section of Document:
Reason for comment:
Keep most of Hindslands playing fields as a public access parkland area. Polegate and Willingdon needs this "green lung".

Consultee ID: Cooper

Part of document: Question 16i
Section of Document:
Reason for comment:
Polegate town centre shops need to be somewhat larger to provide more viable retail businesses. All utilities, public services and transport facilities must match enlarged housing.

Consultee ID: Cooper

Part of document: Question 16j
Section of Document:
Reason for comment:
Consider the area south of Dittons Road and north of the railway to Hampden Park, but preserve the cycle track to Eastbourne.

106683

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18g

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Opportunity to use a brown-field site.
Consultee ID: 106683

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18h

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
The open countryside that exists between Polegate and Hailsham should be retained.

Consultee ID: 106683

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18i

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Some scope for small scale development.

Consultee ID: 106683

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 18j

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Good development potential provided considerable improvements are made to the A27 and rail services at Berwick.

Consultee ID: 106683

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 23a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Herstmonceux is reasonably convenient for Eastbourne and reasonably scaled development could bring improved village facilities.
Reason for comment:
This is too simplistic. A mix of affordable housing for local people and larger housing attractive to quality employment is needed.
Consultee ID: 106683
Agent ID: Cooper

Part of document: Option 25a
Section of Document:

Your View: Agree
Reason for comment: Extensons to accommodate elderly or disabled residents should be encouraged.

Consultee ID: 106683
Agent ID: Cooper

Part of document: Option 25b
Section of Document:

Your View: Disagree
Reason for comment: 50% of new dwellings should be aimed at low-middle income people.

Consultee ID: 106683
Agent ID: Cooper

Part of document: Option 25f
Section of Document:

Your View: Agree
Reason for comment: Extensons to accommodate elderly or disabled residents should be encouraged.

Agent ID: Cooper

Part of document: Option 26a
Section of Document:

Your View: Agree
Reason for comment:
Option 27a
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:
Extend parking facilities (north side of Black Path) at the present Polegate station. Build on the present station rather than establishing a Parkway station.

Option 27b
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:

Option 27c
Your View ☐ Agree ☐ No opinion ☑ Disagree
Reason for comment:
Extend parking facilities (north side of Black Path) at the present Polegate station. Build on the present station rather than establishing a Parkway station.

Option 27d
Your View ☐ Agree ☐ No opinion ☑ Disagree
Reason for comment:
Dualling and consequent access and safety improvements on the A27 are more important than the visual effect from the South Downs.
Consultee ID: Cooper  
Agent ID:  
106683

Part of document:  
Option 27e

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Unrealistic. Almost no-one uses park and ride facilities unless the facilities are free of charge and the "ride" is quick and very frequent.

Consultee ID: Cooper  
Agent ID:  
106683

Part of document:  
Option 28a

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
It is most important for built up areas to include public "green lung" areas. Several small open areas provide better public access than one large area.

Reason for comment:
Option 11b

Reason for comment:

Massive congestion exists now. Why add to it?

Option 11c

Reason for comment:

Any encroachment on the recreation area should be resisted at all costs. The area is already desperately short of open play spaces. To increase the population would seriously overstretch the already creaking infrastructure.
Consultee ID: PROBERT

Section of Document:

Reason for comment:
Take the Mill Brook and Farningham Road Industrial Estates up to the Army Camp on the A26 and build houses on the vacated site. This will give easy access to the Railway Station and remove lorry movements from the residential area. This option should be supported by careful planning for the increased traffic.

But only in terms of flats for Town Centres.
High density building near Railway Stations will attract a community of commuters. High density building should be restricted to affordable homes for local people and key worker.
We need more starter homes.

Settlements in the High Weald Area of Outstanding Natural Beauty

Your View
☐ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Country side is finite, the insane need to build on it sadly isn't. People should be questioning whether we do, actually need as many homes as we're told we do (see the report issued by the CPRE prepared by Europe Economics). This showed that the Barker review does not offer compelling reasons to show there are too few houses built in the UK. This aside, lets not forget who are the prime motivators behind all this, the property developers. They and the government they are hand-in-hand with. The whole issue is about City boys and sleazy politicians lining their pockets at the expense of our once 'green and pleasant land'.

Consultee ID: Mr Swan
106685

Part of document: Option 11b

Section of Document:

Your View: ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

This area already suffers from excessive traffic; Western Road and Walshes Road, a relatively narrow residential route, is in effect, a main road, with HGV's part of a constant stream of vehicles. This is of concern to parents with children visiting the local school at Jarvis Brook. Any increase in traffic, which would surely arise from this proposed development, would make matters worse. There are no traffic controls in place here, the increase in vehicles would increase the risk of accidents. No likely house purchaser would consider this a benefit. Parking in the area is already difficult; the lower cost of travel from Crowborough over Tunbridge Wells attracts out of town commuters, further parking and cars would mean gridlock. The excessive rain this year has caused localised flooding in the area, exacerbated by the area being at the bottom of the hill and the locality of various watercourses. Wildlife in the locality, already impacted by human activity would be affected. The surrounding countryside is rich in unique flora and dependent fauna that would, as usual when development occurs, suffer. Given the sensitivity of such issues at present, this enough should be a major factor in rejecting this proposal. Despite this areas proximity to picturesque countryside, it can not be considered attractive visually. The industrial nature of it's past, together with ill conceived building practices in the past would no doubt deter potential buyers anyway.

NARROW UNSUITABLE LANE FOR HEAVY TRAFFIC AND NO FOOTPATHS FOR THE MAINY PEOPLE WHO WALK [ WE ARE BEING ENCOURAGED TO WALK AND USE PUBLIC TRANSPORT !!] THE LANE CERTAINLY CAN'T COPE WITH MORE TRAFFIC FROM 120 - 200 NEW HOMES. DO WE WANT CHILDREN AND ADULTS LIVES TO BE PUT AT RISK !!. SERVICES AND FACILITIES IN THE AREA WOULD BE UNABLE TO SUPPORT THE EXTRA DEVELOPMENT AND THE LAND WOULD BE MORE LIABLE TO FLOODING BECAUSE RAIN SOAKS INTO SOIL BUT NOT CONCRETE AND TARMAC WHEN GREEN LANE WAS DEVELOPED THERE WERE PROBLEMS WITH FLOODING AND DRAINAGE. ON TOP OF ALL THIS IT IS AN AREA OF OUTSTANDING NATURAL BEAUTY WHICH SUPPORTS AN ARRAY OF BEAUTIFUL WILDLIFE WHICH ARE ALREADY UNDER THREAT IN OUR COUNTRY. ANY FUTURE DEVELOPMENT TO THE AREA IN TERMS OF THESE HOUSES WILL SEROUSLY EFFECT A LOCAL COMMUNITY AS WELL AS THE WIDER COMMUNITY AS SANDY CROSS DOES NOT HAVE THE FACILITIES AVAILABLE HEATHFIELD DOES NOT EVEN HAVE A BUS SERVICE SUNDAYS OR BANK HOLIDAYS.

Agreement: 
Reason for comment:
 Whilst a modest amount of development at Berwick may be acceptable, the scale proposed (4 700 - 7 000 houses) would be extremely detrimental to the landscape and character of the surrounding area. It does not seem sensible to build on land with such a high water table. Creating a small town at Berwick is likely to increase demands for the A27 to become a dual-carriageway. This would drastically change the character of the surrounding countryside. The road that runs through Berwick is currently a country lane. Transforming Berwick into a town will increase traffic levels which will inevitably lead to this road being "upgraded". This will be the final act of urbanising this attractive Low Weald landscape at the foot of the South Downs.

Consultee ID: Mrs Macro
Agreement: 
Reason for comment:
 I live on Western Road which is already heavily used and generally congested, obviously peak times are the worst but congestion can be a problem throughout the day! Heavy vehicles and buses frequent this road. I believe that the proposed sites:11d and 11e will greatly add to traffic problems around this area of Crowborough, it would mean the loss of fields therefore destroying the habitat of many types of wildlife, also if the riding school were forced to close we would lose a valuable asset to the community. The riding school will soon be the only one in Crowborough! It is very popular and a great many adults and children would lose out without this valuable local facility. With regard to the town centre, there are so many empty units and charity shops! Shouldn't businesses be attracted to these rather than expanding it further?! 

Consultee ID: Mr Cruse
Agreement: 
Reason for comment:
 Any developments in ANOB's should be very carefully monitored but not necessarily discounted as development over the years has already taken place to a certain extent.
Any developments in ANOB’s should be very carefully monitored but not necessarily discounted as development over the years has already taken place to a certain extent.

With the current environmental problems this has got to be the way to go.

Short term snap decisions could permanently change the nature of an area, (closure of Polegate to Tunbridge Wells rail line).

Option 4d

Section of Document:

Reason for comment:
There is a serious question of need, commercial development is imminent at Hackhurst Lane. There are also many commercial premises on Diplocks and Station Roads industrial estates with 'for sale' or 'to let' signs in evidence. Hailsham high street is littered with empty shops and office premises. The chemical depot opposite Chandlers Mini showroom has been empty and disused for several years. If any commercial development were to take place in this area the Bushy Wood Scout camp would be impacted and also any pollution/spillages would drain into the Cuckmere half a mile away then to Arlington reservoir.

Reason for comment:

See my comments in 7b.

Growth potential on any area be it village or town should be very carefully handled so as not to destroy or unbalance the type of community that has developed there. "Growth potential" is probably not the best approach in many villages or towns if it comes to that.
Your View [ ] Agree  [ ] No opinion  [x] Disagree

**Reason for comment:**
All the usual questions of need, water supply, waste water treatment and disposal coupled with the loss of acres of perfectly productive farmland frequently overlooked in all planning questions and one which will come back to haunt us in not too many years distant. Floods in Northern England and loss of up to 25% of this country's pea crop highlight how little we already grow. A bad harvest from one of our foreign food suppliers and we will rue the day so much badly planned and unneeded development has taken place in Britain.
This poorly publicised document would appear to be politically motivated. Britain is losing the biggest percentage of its core producers and exporters, the best way to keep unemployment down would be to propose lots of building required thereby keeping lots of the populace employed not just in building but products for building. The ultimate short termism. Maybe Wealden District council would be better employed questioning this policy on our behalf!

- **Option 23a**
  
  Some very carefully controlled development only to settle unsatisfied local need.

Wilmington is not suitable for growth, any station and housing North of the Village would ruin this village and also the character of Arlington to the North which are jewels in the local landscape.

Consultee ID: Mrs Isepp

Option 18j

Section of Document:

Reason for comment:
Although Berwick has some good services in place, the village is highly visiable from the downs and would be quite unable to take the volume of housing suggested without ruining the rural areas to east and west of it, and also old Berwick Village to the South.

Consultee ID: Matson

Option 14a

Section of Document:

Reason for comment:
How can anyone believe that the destruction of this beautiful and peaceful area is acceptable?
In landscape terms any development here would cause unacceptable harm to the rural setting of Uckfield and Maresfield and the visual quality, continuity and rural character of the surrounding villages and countryside. This area provides the strategic countryside gap between Uckfield, Maresfield, Five Ash Down and Buxted. The proposed site is clearly visible from 2 AONBs (South Downs and Ashdown Forest). The area is a highly biodiverse ecologically valuable habitat including ancient woodlands, ghyll woodland, old herb-rich grassland, ponds, streams, ancient common. Development would result in the unacceptable loss of ancient woodland (an irreplaceable resource for its diversity of species and longevity as woodland), and wetland habitats, lead to unsustainable biodiversity and habitat degradation, and the unacceptable fragmentation, isolation and disturbance of natural habits of acknowledged nature conservation importance. The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern.
Your View □ Agree □ No opinion □ Disagree

Your View: Agree

Reason for comment:

It is desirable to aim for the higher target of 20% use of renewable energy use, given Wealden resources for wood burning and wind energy.

Consultee ID: Mr Smith
106695

Part of document: Option 3d

Section of Document:

Your View: Agree

Reason for comment:

Housing should be located where there are existing or new employment opportunities.
Option 4a

Reason for comment:
Option a is not desirable: It is preferable that business developments in the Hailsham-Eastbourne triangle are located east of the A22. Development to the west would threaten wildlife in the adjacent woodland areas and is likely to trigger proposals (as in 16a and 16b) to extend housing into the greenfield areas to the west.

Option 5a

Reason for comment:
It is preferable to maintain development with settlement boundaries.

Option 6a

Reason for comment:
It is preferable that 80% of new housing should be located within and around existing towns, rather than a lower percentage. Housing should be close to employment. To do otherwise is to impose further strain on our overcrowded transport links, and contribute additionally to global warming.
Option 15f

Section of Document:

Reason for comment:
Development west of the A22 is not desirable as it would be a threat to nature conservation in the ancient woodland areas.

Option 18j

Section of Document:

Reason for comment:
Among the new settlement options in the Sussex Coastal Area, the priority should be to avoid those that are close to the proposed National Park, and favour those that offer the possibility of local employment. These criteria favour 18d, e or f, around Lower Dicker, or 18h. All of these options threaten major difficulties for road transport and all development at any of these sites should therefore be on a very modest scale unless there were cast-iron guarantees that the local infrastructure could be improved enough to cope with the increased housing in the area. The proposed development 18j at Berwick is particularly unwise for all of these reasons, plus the scale of development proposed, the inadvisability of development close to a reservoir and a river, and the threat to nature conservation, with the reservoir and Middle Gate marsh being SSSIs, plus the distinctive wildlife in the former Berwick brickworks, and in the ancient woodland in Ludlay Copse, which is a site among other things for dormice.

Option 25a

Section of Document:

Reason for comment:
More housing in the form of flats and terraced housing is highly desirable, given the need for affordable accommodation.

<td>Selmeston Parish Meeting</td>
</tr>
</tbody>
</table>

**Option 25d**

**Section of Document:**

**Your View**  
- Agree
- No opinion
- Disagree

**Reason for comment:**

Rural sites should have provision for affordable housing but should not be solely in that category. A mix is preferable.

**Question One**

**Section of Document:**  
Settlements in the High Weald Area of Outstanding Natural Beauty

**Your View**  
- Agree
- No opinion
- Disagree

**Reason for comment:**
The development of 20-25 houses in this 'AREA OF OUTSTANDING NATURAL BEAUTY' is inappropriate. An additional 25 houses in the village would put strain on resources. The infrastructure for example current education and primary health care is near to capacity. In practical terms there is no provision of mains gas, there are no shopping facilities within walking distance and very little public transport. To add to this economically there are few opportunities for employment within this area. The impact of these houses would increase the carbon footprint of this area as extra vehicles on the roads would be enevitable. The proposed area would have an impact on community safety with access on to a road to which the 40MPH speed limit is rarely adhered to. Also crossing a footpath used by primary school children. This is a rural area with no street lighting creating problems in the winter months. This proposed development would also have a devastating affect on the landscape and environment. At present this area is inhabited by badgers,hedgehogs, field mice, snakes, owls, bats, woodpeckers and many other birds that are named on the RED/AMBER LIST SPECIES of the Birds of Conservation Concern. The development would distroy a natural habit and increase noise and pollution.

Development of exisiting properties and some in-fill could be acceptable if in character, aesthetically compatible and where property values are maintained.
Reason for comment:
The key identity marker for a district such as Wealden is sustainability - particularly energy and environment. It will produce, at the very least a solid platform for future business opportunities.

Reason for comment:
The basis of business/employment development is not entirely because of available land. Given a full set of appropriate incentives the market forces will drive the allocation of employment opportunities within the guidelines set. ie sustainable development with a pro-active consideration for the environment.

Option 4d

Your View ✔ Agree □ No opinion □ Disagree
Reason for comment:
Strict criteria is the key. What strict criteria? If it were along the lines eco housing based on aesthetically compatible designs ie materials, house shapes etc then development of new housing would be acceptable. There have been many developments in the past of affordable housing. There is no reason similar designs could not be used with a contemporary input. The central issue is of not disturbing but rather complementing the character of the district's villages and hamlets. In Wiltshire there is development in keeping with the old buildings which positively enhances the traditional character.

Villages and hamlets are communities. Parishes should decide what level of development they will accept and what criteria they wish to apply to that development.

Part of document: Option 18j
Section of Document: Your View
Reason for comment:

The villages of Alfriston, Wilmington, & Litlington would be overwhelmed with traffic; imagine several thousand families heading for the seaside on a summer day; the foundations and structure of medieval buildings damaged and the character of these villages ruined for all time. The proposed development is totally unacceptable, and the AONB will be no more than a narrow strip of green between urban developments.

Agent ID: 

Reason for comment: Otherwise what is the point of this entire exercise?

Reason for comment: Unreasonable to group together so many diverse proposals. We agree generally but with the exception of 30a - dualling of the A27 would have an adverse impact on the South Downs AONB.

Reason for comment:  
Reason for comment: Once again this is impossible to answer Yes or No. We agree with SO1-4. We disagree with the continuous development and expansion of the South East; more businesses encourage more people, more people means a requirement for more housing, thus more traffic, more pollution, more infrastructure and thus the irreversible deterioration of this AONB.

Reason for comment:
Question 6d

The balance of the population is currently split 50% between towns and rural parts. We would like this balance to be retained.

Reason for comment: We wish to see growth where there is proven local need.
Option 7d

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

We consider that the classification of villages might be acceptable to form a basis for improving infrastructure BUT we do not support this for method for controlling development. We believe development should only be in areas where there is proven need and should be for affordable housing only. We wish to see organic growth in all villages. Development should be controlled to ensure that villages can grow but can retain their character.

Option 8a

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

Option 8b

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
Option 8c

Section of Document:

Reason for comment:
There is already significant development

Option 8d

Section of Document:

Reason for comment:
We agree that we would like Wealden to explore the potential for a new settlement within a suitable location where there is good transport access either by road or transport.

Option 9c

Section of Document:

Reason for comment:
But we prefer to see the growth shared across the District to meet proven local need

Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
BUT the strategy must contain clear policy to encourage smaller sites for affordable housing where there is a proven need
Consultee ID: Mrs Clark  Libeeral Democrat Group
Part of document: ☑ option
Section of Document:
Your View ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:
We do not support residential development but the site allocated in the Non Statutory Local Plan for sports development should be reinstated

Consultee ID: Mrs Clark  Libeeral Democrat Group
Part of document: ☑ option
Section of Document:
Your View ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
We support development on Kemps Farm side of Walshes Rd but there must be NO roundabout as this will add to the intrusion of urban development in a rural setting. There must be very careful protection of the landscape. Any development would have to address the retention of a gap between the villages of Jarvis Brook and Crowborough
Consultee ID: Mrs Clark
Liberal Democrat Group

Part of document: Option 11e

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
This area is too far away from any facilities

Consultee ID: Mrs Clark
Liberal Democrat Group

Part of document: Question 11f

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Can we have a serious look at the traffic issues facing Crowborough? Is there a possibility of a one way system?
Reason for comment:
Largely Community facility - while we agree that community facilities need to be increased, especially places for young people - we expect THE Community Facility in the town centre to be provided before the Core Strategy is approved. Quality and mix of shops. A great aspiration but how is this to be achieved. We welcome the retail study findings. We would like a study to investigate the pedestrianization of the High St to be a priority. Tourism. We would like the provision of a museum to be addressed. Crowborough has a significant history. Business provision. We do not support further business growth in JB, because of the poor access especially along Western Rd. Future business development should be encouraged along the A26 to the south of Crowborough Respecting the existing character. Twittens are much valued and need to be kept clean and clear of undergrowth. They should be seen as providing an opportunity for safe walking - links to health, sustainability etc We wish to see the existing trees and hedges retained and more planted to enhance and retain in future the arcadian feel to the Town. We refer you to the "pride in Crowborough aspirations" of the Crowborough healthcheck EN1 Jarvis Brook Gateway. We are unclear what this means? We are unclear as to what development could take place to enhance it. Currently development has made it a much worse place to live. Please note EN3 in the Crow Healthcheck. Other gateways to the Town are important and are very poor. They do not reflect the aspirations of the residents as evidenced in the Crow Health Check nor the High Weald Forums stated objectives. The routes from the public car parks into the town are not inviting. There is no mention of the cultural or spiritual needs of a growing populations. Currently much is provided out of Crowborough.

Reason for comment:
The small industrial estate off Western Rd could be developed for housing with a link to the Station. It's presence exasperates the heavy traffic along Western Road. It has good access to public transport. Stone Cross Road and Rochester House should be looked at for redevelopment, better use of land and for enhancement. We support the reopening of the Uckfield -Lewes line and support a community bus that goes around Crowborough. This might reduce traffic. Traffic issues need to be addressed. The pedestrian is given a very low priority. We do not support greater urbanization of Crowborough but believe many issues of access can be achieved by imaginative design not with harsh hard landscape engineering solutions..

Question 14i

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:
We believe that Uckfield can take no more development except in the Town Centre. There are severe problems with the infrastructure- no defense works carried out to prevent future flooding, the secondary school needs a new site, there needs to be radical reform of the health service to meet need. We support future housing in Uckfield that meets proven local housing needs for affordable homes.

Consultee ID: Mrs Clark

Liberal Democrat Group

Part of document: option
Option 15a

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:
The area is close to the Cuckmere floodplain and further development will exasperate flooding elsewhere. It is important to keep the gap between Hailsham and Hellingly.

Consultee ID: Mrs Clark
Agent ID: 106703
Liberal Democrat Group

Part of document: option
Option 15b

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:
We oppose further development which would inevitably result in the merging of Hailsham and the Hellingly hospital development.
Consultee ID: Mrs Clark  
Agent ID: 106703  
Liberal Democrat Group

Option 15c

Section of Document:

Your View  ☑ Disagree

Reason for comment:
We disagree with any further development in the area south of Amberstone/Battle. This area is part of a wildlife corridor linking Park Wood to the Pevensey Levels, is close to SSI, on the edge of the Pevensey Marsh and close to the flood plain.

Consultee ID: Mrs Clark  
Agent ID: 106703  
Liberal Democrat Group

Option 15d

Section of Document:

Your View  ☑ Disagree

Reason for comment:
We oppose further development as it would have a significant impact upon Hialsham Town Centre. It lacks infrastructure to deal with present development let alone any more.

Consultee ID: Mrs Clark

Reason for comment:

Consultee ID: Mrs Clark  
Agent ID: 106703  
Liberal Democrat Group

Option 16e

Section of Document:

Your View  ☑ Disagree

Reason for comment:
But we do not support any development West of the A22. Hailsham should be allowed to develop as Hailsham and not as part of an artificial greater Eastbourne. There is extremely poor infrastructure in this area. We do not believe that Southern Water will be able to cope with the demand from currently agreed development let alone future development.

Consultee ID: Mrs Clark  Agent ID: 106703  Liberal Democrat Group
Part of document: Option 16h

Section of Document:
Your View  Agree  No opinion  Disagree
Reason for comment:
Willingdon should not be linked with Polegate. They have different characters. This was well argued during the debates on the non statutory plan and it is disappointing to find the towns linked again together with this consultation. We seek improvements of the rail link to solve parking problems in Polegate. It is imperative that there is regeneration of the High St in Polegate.

Consultee ID: Mrs Clark  Agent ID: 106703  Liberal Democrat Group
Part of document: Option 16j

Section of Document:
Your View  Agree  No opinion  Disagree
Reason for comment:
5.36 implies that land in Willingdon and Polegate may be used to meet Eastbournes needs for employment and housing. We have grave concerns about this.

Reason for comment:  

Disappointed that not more evidence has been placed on the healthchecks or parish plans. There is little attention addressed to the spiritual or cultural needs of the communities. For example, in a recent survey, Crowborough was identified as a place where there was very little tranquility and that this was spreading out. And yet Crow is a market town surrounded by AONB. How can we plan in some peace? How can we ensure that those living in the town can access areas of quiet within walking distance of the towns. Much of the surrounding areas are AONB or SSSI or quiet countryside.

106704  housewife  

Part of document:  
☑ option  

Section of Document:  

Your View:  
☑ Agree  
☐ No opinion  
☐ Disagree  

Reason for comment:  

Only very limited building should be allowed to maintain the way of the countryside. Crowborough's envelope should not be extended into the AONB. Any building that is permitted should be architecturally sympathetic and build in the wealden styles e.g. timber framed, sandstone, tile hung or wooden boarded. The AONB is there for a reason, to protect our countryside and above all this should be adhered to.
Reason for comment:
I thing this is a very low threshold and it would be quite easy for building regulations to stipulate a much higher use of renewable energy, for example triple glazing, very good insulation. A method of re-using water for flushing the toilet and a way of storing rain water for domestic use for say the toilet and washing machine. If we are to have as much building in the south east as government says we will come to a point where there is a permanent water shortage and with global; warming - hotter drier summers this things will have to be taken into account.

Reason for comment:
As in my answer to 2A I think that 20% is low and could easily be improved by using better building methods that incorporate the latest in insulations and ways of re-using and storing water

Reason for comment:  
I feel each settlement should be taken on its own merit, however trying to balance the High weald as a whole, for instance large settlements in the AONB should not be extended, but small hamlets could be extended to include six to ten affordable houses for the young of that area.

Reason for comment:
There are a number of criteria that have to be taken into account when working out distribution, for example, infrastructure - are there enough school places, doctors, dentist etc., if not then a section 106 must be implemented and made to be carried out that these are provided in some way by developers. Also public transport has to be looked at, if large settlements are extended access to shops and trains would have to be taken into account. I don't think a definite overall percentage can be implemented, each settlement having its own.

Option 11a

Reason for comment:
In principal this seems alright but what about the wooded area such as Blue Bell Wood, these areas must be retained to keep the character of Crowborough centre.

Option 11b

Reason for comment:
development of this size should not encroach on the AONB, it is there for a purpose so that designation must be recognised and maintained.

Option 11c

Reason for comment:
This is a very large amount of housing, if the proposal is for family housing they need decent gardens not pocket handkies. Also this means enlarging the building envelope into the AONB which is not good practise. The designation is there for a purpose.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mrs. Selby
106704 housewife

Part of document: Option 11d
Section of Document:

Your View: Agree

Reason for comment:
i agree with this with reservations, it is an awful lot of housing that encroaches on 'countryside'. There would need to be good public transport to the town, there would need to be infrastructure of school, doctors, shops etc., which must be catered for. Family houses need reasonable garden. This would be an opportunity for a reasonable number of affordable houses, not just the odd one or two.

Consultee ID: Mrs. Selby
106704 housewife

Part of document: Option 11e
Section of Document:

Your View: Disagree

Reason for comment:
It is not necessary to encroach on ancient woodland (there's hardly enough as there is) and the steep ghyll land is gradually being used as it is - so no to this area.

Consultee ID: Mrs. Selby
106704 housewife

Part of document: Question 11g
Section of Document:

Your View: Agree

Reason for comment:
A community centre at Pine Grove is long over due. Crowthorugh need to go on the road signs from Lewes. When I moved here ten years ago there was a comprehensive range of shop, that has now gone, a boost to the shops is needed and i think an opportunity lost with the Morrisons development as it could have enhanced the high street by incorporating the old Fernbank into the high street in a better manner.

---

Consultee ID: 106717  Mr Clark  

**Option 18a**

**Section of Document:**

Your View  ☑ Agree  □ No opinion  □ Disagree

**Reason for comment:**

This would allow the Wealden area to provide most of the new houses it needs, although there will still be a need for limited development in the major towns, especially in affordable housing. The new settlements would have new infrastructure and not over stretch the existing towns. The development at Isfield could also force the extension of the Crowborough/Uckfield railway line resulting in a better service.

---

Consultee ID: 106717  Mr Clark  

**Option 18c**

**Section of Document:**

Your View  ☑ Agree  □ No opinion  □ Disagree

**Reason for comment:**

This would allow the Wealden area to provide most of the new houses it needs, although there will still be a need for limited development in the major towns, especially in affordable housing. The new settlements would have new infrastructure and not over stretch the existing towns.
Consultee ID: Mr Clark 106717

Consultee ID: Mr Upton 106719

Part of document: ☑ option Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

An Area of Outstanding Natural Beauty is defined by the National Association for AONBs as "a precious landscape whose distinctive character and natural beauty are so outstanding that it is in the nation's interest to safeguard them". Surely any development in an AONB reduces this national (not just local) interest, both for the current population and also for future generations? I want my children and my children's children to have access to this invaluable resource. There are only 35 AONBs in England (representing just 18% of the finest countryside in England) - we should do all we can to protect this scarce resource. Once developed upon, these areas will be lost forever.
Option 8b

Reason for comment:

This site is highly visible from the South Downs. Any building development here would have a significant impact on the area of natural beauty and diminish the quality and attractiveness of the local valley.

Option 16a

Reason for comment:

This site is highly visible from the South Downs. Any building development here would have a significant impact on the area of natural beauty and diminish the quality and attractiveness of the local valley.

Option 16b

Reason for comment:

Any building development here would have a significant impact on the area of natural beauty.
1. Development in this area will seriously undermine the unique heritage of the village of Wilmington. Furthermore, the impact the beauty of the Downs, with the world famous Long Man, would be shattered. This area of the South Downs is recognised as one of the most important chalk landscapes in England. Maintaining the quality of the aspects from the Long Man and Wilmington Hill must be key in any decision making process. 2. Any development in this area will contravene the South Downs Draft Management Plan Objectives regarding "an unspoiled landscape", "an historic and cultural heritage conserved for posterity as an essential component of local distinctiveness", "a serene and peaceful landscape with extensive dark night skies" and "pure and unpolluted air". 3. Any development in this area will reduce the ability of the land to soak up rainwaters, resulting in a potentially significant impact on the flood water levels in the Cuckmere valley. This area is already identified as at risk from flooding. 4. Attracting further pedestrians to walk up the unlit Street in Wilmington, which does not have a pavement is likely to increase the accident rate in this area. 5. The "steep topography" of the AONB (ref. 2.15 in the Issues and Consultation Paper) accentuates the negative visual impact of any proposed development at the foot of the Downs.
Consultee ID: Mr Upton
106719

Part of document: □ document □ chapter □ section ✓ option
Question Thirty

Section of Document: Infrastructure Requirements

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
A27 - Additional road building will have a dramatic effect on the AONB and the South Downs. Additional road capacity is quickly matched with new-found demand. Significant potential impact on the environment both as a result of construction and pollution following higher usage.

Consultee ID: Mr Ferguson
106720

Part of document: □ document □ chapter □ section ✓ option
Option 12c

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Of all the areas around Heathfield this seems the area which could most easily be developed with these least impact upon the surrounding countryside. It is a natural extension of the existing town and gives easy access to educational and local amenities.

Consultee ID: Mrs Myers
106721

Part of document: □ document □ chapter □ section ✓ option
Option 18c

Section of Document:

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
Option 18e

Section of Document:

Reason for comment:
The A22 is already congested and unable to cope with the amount of traffic. The road leading to th A27 would be through Upper Dicker which is already used as a race track. The recent Safety and Environment Group survey caught people going as fast as 67mph in a 40mph zone. The road is unsuitable for the amount of traffic a development like this would create. The doctors surgeries in Hailsham are already overloaded and it is difficult at best to get an appointment to see a GP the day you call. I strongly disagree to this proposal. We must protect our rural environment. If we continue to spoil our villages all we will be left with is urban sprawl. Our countryside is beautiful and the villages within it must be protected from being ruined by housing estates and busy roads.

Option 18f

Section of Document:

Reason for comment:

Option 18i

Section of Document:

Reason for comment:
Option 18j

Your View: Disagree

Reason for comment:

Berwick is not the ideal site as the roads leading to Berwick are not suitable to support this amount of housing. It would completely ruin the surrounding villages which would become rat runs. It would require the A27 to be made into dual carriageway to support this amount of housing and the route to the A22 would be through Upper Dicker. The road in Upper Dicker which is currently 40mph already has numerous people speeding through the village as recorded by the Safety and Environment Group using the East Sussex Speed Indicator Device. We must protect our rural environment or we will be left with no beautiful countryside. Berwick is a close community which would be lost with this kind of huge development. I strongly disagree with this proposal.

Option 23e

Your View: Disagree

Reason for comment:

The statement that there is a need for housing by St Bedes is confusing as they have just completed building new housing for staff and students. I believe there is an agreement in place that the school will not purchase further housing within the village as there is a feeling by some of the people who live there that the school is overdeveloping and taking over the community of Upper Dicker. In my opinion no need for housing in Upper Dicker as there are no daily bus links, the roads are already dangerous for our children and pets due to people speeding through the village. The park is used as a car park during cricket matches as the road is thought to be to dangerous to park on. We should be protecting this village and preserving it not developing it further.

Question One

Your View: Agree

Reason for comment:

Some housing could be allowed - but only to meet genuine LOCAL needs. Increasingly that means affordable homes - that stay affordable after the first occupants move on. So either for Housing Association or Local Authority tenants or - if shared ownershi - with a formula that allows the next buyer also to be a low income buyer.
but only if it really adds to the renewable energy totals. Wind power needs conventional backup - so should not count.

unless it is really renewable and cost effective [ie does not need conventional back up]

Mixed use if realistic

Rebuilding FOR EMPLOYMENT PURPOSES should be allowed
Option 3c

Reason for comment:
All but individual developments should be associated with employment possibilities to decrease the need for commuting.

Option 5a

Reason for comment:

Option 5b

Reason for comment:
provided that the criteria are strict - and preserve the AONB environment

Your View [ ] Agree [ ] No opinion [ ] Disagree
Reason for comment:
So far as it goes. Wadhurst scores highly on every count - as it should. BUT there is no measure in the current methodology of the extent to which the local services are fully utilised. For Wadhurst, sewage, water, car parking - in the centre and at the station, schools, medical etc are all full or overflowing. Any further expansion therefore must be matched IN ADVANCE with more service provision.

Option 20b

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
Wadhurst cannot cope with what would be a 20% increase; it would cease to be Wadhurst - even if the infrastructure issues [sewage, water, schools, medical, car parking etc] were fully satisfied. A limited development of genuinely [and continuing] affordable housing for locally employed key workers is all that should be contemplated.

Reason for comment:
Reason for comment:
Reasons to disagree to NW Uckfield (Downlands farm/Budletts Common) in landscape terms any development here would cause unacceptable harm to the rural setting of Uckfield and Maresfield and the visual quality, continuity and rural character of the surrounding villages and countryside. This area provides the strategic countryside gap between Uckfield, Maresfield, Five Ash Down and Buxted. The proposed site is clearly visable from 2 AONBs (South Downs and Ashdown Forest). The area is a highly biodiverse ecologically valuable habitat including ancient woodlands, ghyll woodland, old herb-rich grass land, ponds, streams and ancient common. Development would result in the unacceptable loss of ancient woodland (an irreplaceable resource for its diversity of species and longevity as woodland), and wetland habitats, lead to unsustainable biodiversity and habitat degradation, and the unacceptable fragmentation, isolation and disturbance of natural habits of acknowledged nature conservation importance. The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern.

</table>
THE ROAD - The entire lane is narrow and winding and there is no scope for widening it without removing trees and hedges and intruding on residents' gardens. - There are no pavements in the lane, which is extremely busy in the week with commuters and school traffic. Any additional traffic resulting from new development will make safety a big issue, particularly because the lane itself is used by children walking to school. - The only way to alleviate these problems would be to build new roads to allow access to the proposed development, further impacting on the AONB. AONB - The area to the south of Sandy Cross Lane is an AONB and is used daily by residents, locals and dog walkers accessing the many public footpaths in the AONB. HOUSES - Development south of Sandy Cross Lane will have a negative impact on views and landscape, which are the principle distinguishing features of the area. - When moving into the lane in 2006 we were assured by Wealden Council that the area south of Sandy Cross Lane would not be developed. - We live in one of the many 19th century houses on the lane and we believe that the impact of altering the landscape, the increased traffic and the erosion of the semi-rural charm of the area will significantly decrease the value of our home. Wealden Council themselves summarised our objections perfectly in the 1998 Adopted Local Plan, where they explain that no development of land south of Sandy Cross Lane should be considered due to "...the rural character of the gently undulating landscape beyond Sandy Cross Lane." They also state that: "The rural character of the lane itself is emphasised by its narrowness, and the mature tree cover and hedgerows. It therefore forms a well defined southerly edge to development beyond which any intensification of development would not be appropriate." We believe that this remains true today.

**Reason for comment:**
Consultee ID: 106730  
CPRE Wealden NORTH District Group

**Option 11a**

**Reason for comment:**
Town centre - this would be the most appropriate site in terms of any negative impacts on the rural-urban fringe since this is a brownfield site with good overall access and high density housing would be appropriate in the CBD.

**Option 11b**

**Reason for comment:**
North west/north A26 - visual impact in a beautiful landscape would be threatened and there would be a loss of AONB.

**Option 11c**

**Reason for comment:**
Area north of Crowborough cross - Serious threat to the rural-urban fringe and loss of AONB, some ancient woodland and visual amenity. Building to the east should be discouraged.
Option 11d

Section of Document:

Reason for comment:

SE of Crowborough between Alderbrook and Jarvis Brook - traffic key problem. Western Road and Walshes Road are narrow and suffer from high levels of on-street parking. Current volume of traffic is high including commercial vehicles and is a rat run for traffic joining the A26. Rotherfield road would also receive extra traffic in the area already congested near to the station in Jarvis brook. Any development should be limited to the area north of Walshes Road - the area to the south of Walshes Road lies "more" in the rural - urban fringe and any development there would have a visual impact.

Option 11e

Section of Document:

Reason for comment:

Not in AONB but some wet woodland and ancient woodland would be threatened - hence some loss of rural character - also flood risk and poor access makes this area unsuitable. Possible quiet lanes issue in part of area.

Question 11f

Section of Document:

Reason for comment:

Visually-intrusive incursions into the AONB being in a ridge-top position.

**Part of document:**
- Question 12h

### Section of Document:

**Your View**
- ☑ Agree
- ☐ No opinion
- ☐ Disagree

**Reason for comment:**
We are however concerned that the existing SNCI is protected and managed properly. The areas have also had significant brownfield development and infill in recent years which has placed increasing pressure on the local infrastructure, particularly roads. These areas need to be addressed if the site is to be developed.
Option 14b

Section of Document:

Reason for comment:
Framfield Road suffers badly with congestion. The other sites have access to the A22, Framfield Road does not. The impact of traffic on the local lanes network would be detrimental as not only does Framfield Road lead to outlying villages, the local lanes are already used as rat runs to bypass/access to the A272 and A267.

Option 14c

Reason for comment:

Option 14e

Reason for comment:

Option 14f

Reason for comment:
Option 14g

Section of Document:

Reason for comment:
New development in Uckfield Town Centre must be conditional upon major flood relief works being carried out.

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
New development in Uckfield Town Centre must be conditional upon major flood relief works being carried out.

  - ☐ Disagree

- **Reason for comment:**

#### Question 32b

- **Part of document:**
  - ☑️ document
  - ☐ chapter
  - ☐ section
  - ☑️ option

- **Section of Document:**
  - Question 32b

- **Your View:**
  - ☑️ Agree
  - ☐ No opinion
  - ☐ Disagree

- **Reason for comment:**

Settlements in the High Weald AONB - Development allowed in the AONB to meet housing need should, however be restricted to that necessary to satisfy only the requirements of those settlements that are within the AONB. **Renewable Energy** - Although new development should meet ever more stringent requirements for energy saving, it should not be linked to micro-generation from renewable sources. Site suitability and planning controls relevant to the various types of energy generation are entirely different to that for residential development.

#### Question One

- **Part of document:**
  - ☑️ document
  - ☐ chapter
  - ☐ section
  - ☑️ option

- **Section of Document:**
  - Settlements in the High Weald Area of Outstanding Natural Beauty

- **Your View:**
  - ☐ Agree
  - ☐ No opinion
  - ☑️ Disagree

- **Reason for comment:**

Whilst I do not want to see further housing in the AONB, I consider that it is essential that some areas of the AONB be properly designated for public recreation and sports. Land is very valuable in Wealden and by allowing development, particularly for selective and public sports facilities in the AONB, it means that clubs will be able to afford the necessary land to provide these much needed additional recreation. In particular, where there are area where sports clubs are already in situ (such as the area around Steel Cross, north of Crowborough), consideration should be given to allowing further development so that clubs can share some facilities, such as clubhouses.
Consultee ID: Mr clark 106734 elysium ltd

Part of document: Option 2a

Section of Document:

Your View: Agree

Reason for comment:
I think that for any housing or business development in the AONB, a mandatory use of renewable energy sources is required. Housing in particular should require proper insulation and other careful attention, and the continued development of low grade farm buildings which do not have credentials in this respect should be actively discouraged.

Consultee ID: Mr clark 106734 elysium ltd

Part of document: Option 2b

Section of Document:

Your View: Agree

Reason for comment:
It should be possible to build a limited number of small-scale exemplar residential units with (say) higher than 30% use of renewable energy sources in areas (for example in accessible new sites within the AONB) where otherwise development would be forbidden by planning policy, in order to encourage this policy.

Consultee ID: Mr clark 106734 elysium ltd

Part of document: Option 3a

Section of Document:

Your View: Agree

Reason for comment:
I think that whilst this is broadly acceptable, there should be a lot of weight given to what the acceptable 'mixed use' is, with high priority given to usage that provides facilities for general public usage, such as cinemas, sports facilities, surgeries, dentists etc. It is unacceptable to take a source of land that was used to employ people in Wealden and simply replace it by housing, which then means a further drain on the already poor availability of the suggested public facilities mentioned within Wealden. Any housing allowed on a large site should be required to have a measured level of these public facilities included, to provide some planning gains.
Part of document:  
Option 3b

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Otherwise we will lose the few remaining facilities such as dentists, cinemas, theatres etc that we already have...

Part of document:  
Option 3c

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
These should however be in appropriate places, where there is access from public transport, and employees have access to shops etc on foot. Continued development of brown and green field sites in the AONB for this purpose should be highly discouraged. The word "suitable" in the question should have examples cited.

Part of document:  
Option 3d

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Here new business should have a defined meaning, with additional weight given to important (and likely to be lacking) facilities such as dentists, surgeries, post offices, general stores, newsagents, play schools etc.
Option 5a

Section of Document:

Reason for comment:
However particular support should be given to adding facilities that are of use and relevance to the local settlement, such as small shops, play schools, dentists, surgeries etc., and may have been missed out when the original planning application was decided.

Option 5b

Section of Document:

Reason for comment:
It is essential to permit public sports and recreation facilities to be recreated in the area just outside settlement boundaries, where they are easily accessible (for example to children on foot or with bikes), and are still affordable to sports clubs and the like that have very restricted funding, costs being lowered because they could not otherwise be developed (for example because of AONB restrictions). The area around Steel Cross, north of Crowboprough is a good example where such development is already happening.

Question 6d

Section of Document:

Reason for comment:
A key factor in permitting small scale local development should be the presence of a local school. Many rural schools have difficulty in finding enough numbers to be viable, and additional development of (ideally low-cost) family units in villages such as Buxted and High Hurstwood should be encouraged, to keep these excellent schools viable.
Consultee ID: Mr clark
106734 elysium ltd

Part of document: □ document □ chapter □ section ✔ option
Option 7a

Section of Document:

Your View ✔ Agree □ No opinion □ Disagree

Reason for comment:
Firstly can I say the use of an SVG based popup to disguise the suggested growth potential (almost unreadable on my screen) is a disgrace! This should have been in free text like the remaining document. A key criteria should be the local school, and ensuring its viability. I would however have included High Hurstwood (why is this missing on the map, I wonder??) as having limited growth potential - it has an excellent school and church and could easily accommodate some more family units to keep these viable.

Consultee ID: Mr clark
106734 elysium ltd

Part of document: □ document □ chapter □ section ✔ option
Option 7c

Section of Document:

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:
All villages with schools with open school rolls should be encouraged to have more small family units in order to keep these schools viable. An overall priority should be given to these, not just linking them to villages with 'limited growth potential'

Consultee ID: Mr clark
106734 elysium ltd

Part of document: □ document □ chapter □ section ✔ option
Option 7d

Section of Document:

Your View ✔ Agree □ No opinion □ Disagree

Reason for comment:
Essential - and adding an emphasis on low-cost family units would probably make these more viable. Local industry needs to be able to house its staff, and there is very little affordable housing for young couples in north Wealden.
Consultee ID: Mr clark
106734 elysium ltd

Section of Document: Option 9c

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
The best choice of the three in my view. We need to have locally based staff, and the poor availability of low cost family units is a great disincentive to running a business in Crowborough, which as noted is the best base to allow us to support clients in a wider area, including London.

Consultee ID: Mr clark
106734 elysium ltd

Section of Document: Option 11a

Your View ☑ Disagree

Reason for comment:
This implies that the Library and WDC offices would disappear. It is difficult enough getting policy changes, which benefit business in Crowborough with half WDC based here. If it all moves to Hailsham, as this implies, I can see Crowborough policy becoming totally irrelevant to Wealden. And we would lose yet another amenity, no doubt replacing it with more housing.

Consultee ID: Mr clark
106734 elysium ltd

Section of Document: Option 11b

Your View ☑ Disagree

Reason for comment:
Total disgrace! "potential loss of existing recreational facilities" - these are poor in Crowborough in any event. We do not need to lose more...
Option 11c

Section of Document:

Reason for comment:
The comment "identified in Non-Statutory Plan for recreation, but which has not come forward" is factually incorrect, and should never have been made in my opinion. A planning application submitted for a tennis and sports club (moving the existing club to much better facilities) was rejected by WDC on technical grounds, and has as I understand it been resubmitted. CADSA and others have continually tried to get further development, as have Boars Head GC (lighting) and the rugby club (new clubhouse) so far as I am aware. This whole area is ideal for sports (attracting out of Wealden users as well as Wealden), has existing sporting facilities (BHGC, rugby, Bowles, Jarvis Brook juniors etc), and would benefit significantly from a coordinated policy to improve sports facilities here (eg in sharing some facilities such as car parking). If housing is allowed, the surrounding land will become unaffordable to sports clubs. It should be dedicated to improved sporting facilities only, ideally with additional public transport at weekends, and improved cycleways.

Option 11d

Section of Document:

Reason for comment:
This seems the best area for development - it is a natural fill in and is convenient for the Station etc. However significant improvement to access through Western Road (one way system possible?) and improved public transport (particularly to the station) are key.

Option 11e

Section of Document:

Reason for comment:
Completely inappropriate. Alice Bright Lane has minor accidents on almost a daily basis, the ghyll floods regularly, and has ancient woodland, and the area is not accessible to the rest of town. This is a quiet lane (or should be) and the area is not naturally part of Crowborough. Disruptions to the new recreation ground are inappropriate, and the housing would not match or fit in with the neighbouring properties.
Reason for comment:
Please use the word Arcadian correctly... From the standard Oxford dictionary "arcadian" means "Of, pertaining to, or furnished with arcades". Whilst the new Morrisons give Crowborough this distinct aura, I suggest you meant "Arcadian" (the capital letter is significant) which means "Of or pertaining to Arcadia; ideally rustic". Arcadia is a mountainous area in Greece, and not tree-lined as far as I know. And Crowborough is anything but "ideally rustic". If you are going to use such floral language, at least get it right!

Reason for comment:
Improvements to Palesgate Lane (to allow better access to the industrial estates from the A26) could permit development to the South of Palesgate Lane, moving Jarvis Brook football club to the North of the lane for example as part of the planning gain, with better facilities, or even linking it into the other sports facilities at Steel Cross. This would also allow for properties in range to the station to be developed, and the whole large area in the triangle between Palesgate Lane, Green Lane and Crowborough Hill to be given some sensible consideration.

Reason for comment:
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.

Reason for comment:
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.

Reason for comment:
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.

Reason for comment:
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.
Question 19f

Reason for comment:
Why is High Hurstwood not included - it has good facilities (school, church, pub etc) and seems most appropriate to receive its full allocation of new units? The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations. Fairwarp too could perhaps have some small extension?

Option 20a

Reason for comment:
The traffic situation in Rotherfield alone should dissuade planners from adding any new property here

Option 21a

Reason for comment:
The need for low cost family units in Wealden means that all local villages with schools should be given appropriate allocations.

Option 21b

Reason for comment:
The need for low cost family units in Wealden means that all local villages with reasonable amenities should be given appropriate allocations.

Much better than having to provide alternate care facilities. However should not be seen as a way to increase housing that would not otherwise be permitted - unit should form an integral part of an existing accommodation and should not be allowed to be separately re-sold (or as a way to get around agricultural property restrictions!)

Option 27b

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

It would be good to provide effective park and ride facilities that covered more than just Tunbridge Wells - for instance both Eridge and Tunbridge Wells could be covered by a Park and Ride scheme based at Goldsmiths - this would help significantly with the problems at Eridge with overparking in the lanes around the station. Especially if the buses actually met the trains - with an hourly service it would be much more important to link this to the Eridge train timetable than the T Wells one (where commuters could shop etc briefly)

Consultee ID: Mr clark
106734 elysium ltd

Part of document: ☑ option 28c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
There appears to be no appropriate place to make a general comment in this section! I think the suggestion that priority should be given to opening up school courts should be challenged. Whilst schools may be fine for their indoor facilities, these outdoor courts are typically used as playgrounds, and are often low grade surfaces, with poor netting, marking etc and might even be dangerous for higher level sports usage. The changing facilities (and the ability for any social contact after a game (drinks, food etc)) are very limited too. Much better to provide these through a properly managed and funded sports club in my opinion. The report that is referred to is one of the worst pieces of writing I have seen in a long while. There is no need for indoor tennis courts because of the effects of global warming? No wonder we produce so few tennis players of international merit in this country..

Section of Document:  Context

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The bulk of future development needs to be in the Coast sub-region, but some must be in the rest of Wealden. This may require some development at the margins of the AONB, but that must be very carefully planned and controlled.

Question 12g
Section of Document:

Your View □ Agree □ No opinion □ Disagree
Reason for comment:
Because of Heathfield's poor transport links, pressure on schools and medical facilities, poor employment opportunities, and valued rural surroundings, development should be on a small scale and tightly controlled.
The area at the North West corner of Heathfield Park, next to Tower Road, would be a logical additional location to consider. The infrastructure problems would be less than elsewhere and it could be associated with public access to Gibraltar Tower (if refurbished).

Insufficient knowledge of Uckfield to comment in detail.

Question 32b

Section of Document:  

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:  
I am not at all sure that all these objectives are fully reconcilable, but good luck!

---

Consultee ID: Mrs Monk  
106736

Part of document: □ document □ chapter □ section □ option

Option 14a

Section of Document:  

Your View  □ Agree □ No opinion □ Disagree

Reason for comment:  
The traffic situation in Uckfield is already stretched to it's full capacity, by adding further to the housing and resultant population, it will only get worse.
Consultee ID: Mrs Monk

Part of document: ☑ option
Option 14b

Section of Document:

Your View ☑ Disagree

Reason for comment:
The area in and around Ringles Cross is a haven for wildlife, and a joy for ramblers. By increasing the amount of housing the balance of natural habitats will be depleted.

Consultee ID: Mr Millett

Part of document: ☑ option
Option 12e

Section of Document:

Your View ☑ Disagree

Reason for comment:
The idea of developing 120 to 200 houses in this area totally ridiculous and would create many more problems than it aims to resolve. From a practical point of view the country lanes that would connect this development with local amenities would not be able to support any further growth in traffic, which could be an additional 400 cars. Such a situation would no doubt bring with it additional pressure to widen roads or create new ones which would totally disrupt what is already classified as an AONB. The English countryside is under serious threat from ill conceived developments affecting our wonderful biodiversity and rural history. The area under question is an AONB for good reason. Let us not destroy this valuable asset for ever just to meet some government housing target.
Option 14a

Reason for comment:
In landscape terms any development here would cause unacceptable harm to the rural setting of Uckfield and Maresfield and the visual quality, continuity and rural character of the surrounding villages and countryside. This area provides the strategic countryside gap between Uckfield, Maresfield, Five Ash Down and Buxted. The proposed site is clearly visible from 2 AONBs (South Downs and Ashdown Forest). The area is a highly biodiverse ecologically valuable habitat including ancient woodlands, ghyll woodland, old herb-rich grassland, ponds, streams, ancient common. Development would result in the unacceptable loss of ancient woodland (an irreplaceable resource for its diversity of species and longevity as woodland), and wetland habitats, lead to unsustainable biodiversity and habitat degradation, and the unacceptable fragmentation, isolation and disturbance of natural habits of acknowledged nature conservation importance. The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern.

Option 14b

Reason for comment:
This area bordering the old A22 is relatively attractive countryside forming a gap between Uckfield and Maresfield. Extends a ribbon development on Eastern side of road creating a "dog leg". Impacts on historic park to East. Overloads the road infrastructure into and away from Uckfield. Infrastructure of Uckfield (water, sewage, drainage, medical cover, social services) totally inadequate for ANY further residential development, let alone one of this size.
Option 14c

Section of Document:

Consultee ID: Mr Harland
Agent ID:

Part of document: ☑ option

Reason for comment:

With the bypass running to the west of Uckfield, development should be confined to sites that have direct access to it; not areas to the east of the town. Development along the Framfield Road - itself narrow and parked up - would see additional traffic added to the already congested junctions of the lower High Street or forced onto narrow country lanes. To suggest access from the north doesn't seem realistic. This would simply shift the traffic problem to the unsuitable roads of the Hempstead Fields or Manor Park estates. Or, it would require a lengthy eastern bypass that would blight the Uck valley and Buxted Park.

Consultee ID: Mrs Roberts
Agent ID: Mrs Roberts

Part of document: ☑ option

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:

• There are locations within the ANOB that could possibly be enhanced by future development. This might be the case, for example, where previous developments have become run down or have been carried out inappropriately. There also may be locations within or attached the ANOB that are questionably labelled ANOB; these may be possible sites for development. The availability of appropriate services may, of course, make some such sites inappropriate. • So, our considered opinion is that in the ANOB some development that would not necessarily conflict with the areas' status could take place.

Consultee ID: Mrs Roberts
Agent ID: Mrs Roberts

Part of document: ☑ option

Section of Document: Option 3d

Reason for comment:
Option 2a

Reason for comment:

- Should every new development include a source of renewable energy? Yes, that seems a good idea. This renewable energy could be obtained from an on-site or local source or it could be obtained by developing a remote power source that feeds into the national grid. Maybe the inclusion of the latter in the quoted percentage is not intended. Could you clarify this point.
- It is very difficult to know whether 10%, 20% or any other percentage is a reasonable figure to achieve but assuming the 'experts' consider that 10% is reasonably achievable then we would agree with the above requirement.

Option 2b

Reason for comment:

- We would not know whether 20% is a practically achievable target at present. One assumes that the 'experts' consider it is a possibility. Presumably there is an issue of increasing cost issue as the percentage increases. Also current technology will impose its limits. So, without investigating the detail, we cannot say whether 20% is a reasonable target to set at present. It is likely that the achievable target will change with time and our view is that the target would be better reviewed periodically.

- Option 4d
- Question 4e
- Option 5a

**Section of Document:**

**Reason for comment:**

**Option 4c**

**Reason for comment:**

This road already has severe access problems with the capacity of the road nearly at maximum. There are no options to redevelop this road to make it more suitable for increased vehicle numbers therefore development along this road would only increase traffic congestion, pollution and create severe bottle necks.

**Option 4d**

**Reason for comment:**

We see no further areas suitable for development within the parish or surrounding areas.

**Option 5a**

**Reason for comment:**

This would allow towns and villages to develop naturally as they have done historically, while maintaining control over the development to ensure aspects such as flooding and infrastructure are taken into consideration.
Establish a new settlement with access to the eastbourne - Lewes Rail link (Berwick Area). Forming a new station up the line from present station providing adequate parking facilities. In addition a by pass of the existing village could then be created. The A27 would be far easier to redelvelop/upgrade than the A22

**Reason for comment:**

The Town centre needs regeneration with incentives for larger national chains selling clothes. One of the supermarkets established or proposed could be encouraged to move to any new village development freeing up buildings for some of the larger clothing chains.
