Summary of Individual Representations made in Response to the Issues and Options Consultation Paper (Pursuant to Regulation 25).
Wealden made a complete hash in the consultation and adoption of the 2005 Non-Statutory Wealden Local Plan. Hopefully this next stage will be an improvement and bring with it sustainable development through to 2026.

Option 2a

Reason for comment:

Wealden should aim for an even higher target if possible - say 25-30%. Use and management of energy is a crucial factor in reducing global warming.

Option 2b

Reason for comment:

Maresfield Industrial Park is a prime example of why land allocated for employment purposes should not be left unused indefinitely but there needs to be strict control on alternative uses to prevent landowners and developers maximising profits at the expense of employment potential e.g. planning permission for affordable housing only if land not required for employment.
But only if there is documented evidence of a market need. Employment premises are required to support employment needs within the district - but it is pointless having empty premises if there are no jobs or people to use them.

Reason for comment:

It would seem to be an obvious choice except for one major problem. The road network. The A27, and the A22 are the two primary routes in and out of the area. Both are below acceptable standards for major routes and need upgrading. In the case of the A27 an additional factor is the possibility that the boundary to the proposed South Downs National Park will include sections of the A27 making improvements and development adjacent to it in the Polgate area very difficult.
Option 4a

It would seem to be an obvious choice except for one major problem. The road network. The A27, and the A22 are the two primary routes in and out of the area. Both are below acceptable standards for major routes and need upgrading. In the case of the A27 an additional factor is the possibility that the boundary to the proposed South Downs National Park will include sections of the A27 making improvements and development adjacent to it in the Polgate area very difficult.

Option 6c

Reason for comment:
Although 70% would be preferable to 80% or 75% it still pre-judges the issue of where houses should go without reference to need and demand.

Option 4d

Reason for comment:
It would seem to be an obvious choice except for one major problem. The road network. The A27, and the A22 are the two primary routes in and out of the area. Both are below acceptable standards for major routes and need upgrading. Development should be limited to expanding existing industrial sites.
There is the potential for a small/medium sized increase to the Industrial Estate at Ridgewood, Uckfield, if land was made available.

Make your mind up. You can't establish settlement boundaries and then say you'll ignore them if the need arises. That will take away any control you are trying to enforce, and I can hear Developers laughing all the way to the Bank. Have you learnt nothing from the mess the Non-Stat Plan has got you in?
This policy would allow judgments to be made on a case by case basis without giving carte blanche to developers. The criteria should not be so strict as to make incremental growth impossible.

All boundaries should be reviewed, taking into account such factors as infrastructure, sustainability, size and shape of individual settlements and their proximity to other settlements.

settlement boundaries must be maintained very strict. Criteria must be applied if these boundaries have to be changed.
Reason for comment:

If there are to be restrictions on development inside the AONB this rules out quite a number of towns and villages. Any distribution of development is therefore not between urban and rural areas in general but between urban and rural areas outside the AONB. This would result in an even greater urban focus. There is both a need and a demand for housing in the villages which would not be met with this distribution. At the same time, focusing 80% of planned development in the few towns within the Low Weald would lead to large-scale growth that would change the nature of the existing communities.

Reason for comment:

This question needs to be viewed in tandem with question 6a, and in context of other policies. If there are to be restrictions on development inside the AONB this rules out quite a number of towns and villages. Any distribution of development is therefore not between urban and rural areas in general but between urban and rural areas outside the AONB. This would result in an even greater urban focus. There is both a need and a demand for housing in the villages which would not be met with this distribution. At the same time, focusing 75% of planned development in the few towns outside the AONB would lead to large-scale growth that would change the nature of the existing communities.
Reason for comment:
You seem to have ignored other alternatives to this % approach; e.g the development of a new settlement on greenfield land within the Low Weald area to take the majority of the planned growth (with all it's required infrastructure) and alloing only sustainable development for affordable housing in the villages and ANOB.

Option 7b

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

The principle might seem like a good idea, but not the criteria proposed. Classifying villages within 5km of towns as having more growth potential is inviting the suburbanisation of the countryside and the spread of ‘urban sprawl’ as towns and villages grow towards each other.

Reason for comment:

We seem to have not learned from past mistakes here. Wealden has already discovered that planning housing development is easier said than done. Development must be sustainable and fit around local needs - not national or regional ‘targets’. These are likely to change over the next twenty years so planning according to a strict criteria is doomed to failure.

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
(a) Isfield should be included as a village suitable for Intermediate growth potential. (b) In view of the planning permission now granted as a result of the appeal that was upheld for development on the former Grampian site at Five Ash Down, bearing in mind that the ‘build out’ will probably be well underway by the time final allocations to villages is agreed I feel it should be removed from the Core Strategy as a village with growth potential. The development of that site is enough.

Section of Document: Option 9c

Reason for comment:
Although growth in Heathfield is constrained by the AONB it should take an allocation to ease the burden on Uckfield and Crowborough.

Section of Document: Site Allocation Thresholds

Reason for comment:
The reason given for these thresholds is that ‘There is a risk of the examination into site allocations becoming bogged down with hundreds of small site omission objections.’ One suspects the real reason is that larger sites will generate higher infrastructure provision and affordable housing. There are also other reasons against such a policy. Smaller, more distributed sites may be preferable in terms of their impact on the landscape, infrastructure and character of a town or village. They also tend to be more deliverable. If sites are not included on the proposals map it should be made clear that the housing nevertheless counts towards any overall target for an area – and that pro-rata developer contributions to infrastructure development will be expected. But of course the whole thing hangs on the assumption that land will become available, and brought forward for development by land owners. If the economics don’t add up for Landowners and Developers, it ‘aint going to happen.

Housing development to the west of the A22 would breach the boundaries of the town allowing subsequent unchecked expansion. However, a tightly defined area for a well designed, well landscaped 'hi-tech' business park may be a possible option with access onto the A22 at this point could be considered.

**Question 13b**

**Section of Document:**

**Your View**  
- □ Agree  
- □ No opinion  
- □ Disagree

**Reason for comment:**
Reason for comment:
Downlands Farm. This site was proposed as a potential allocation for development under the Wealden Non.Stat. Plan. Although rejected then, it has been subject to planning applications and is currently the subject of a judicial review brought by the major potential Developer for the site. What will happen to this site will depend on the judgement given from that review. Large scale development in this area is unacceptable for all the reasons put forward by the very vocal, local objectors. However housing development of around 70 to 100 dwellings with access from Snatts Road is sustainable.

Reason for comment:
Unless, and until, infrastructure development takes place, sites to the north of the town centre are preferable to those to the south. There would be good access off the A22 and moderately good access to the town centre. Nevertheless the scale of development would exacerbate current traffic congestion problems and town centre road improvements to alleviate these would be required. The extent of development should be confined to those areas closest to Ringles Cross so as to maintain the gap between Uckfield and Five Ash Down and Coopers Green.

Reason for comment:
Two sites to the North and South of Bird-in-Eye Hill were considered as suitable sites for development in the draft Non-Stat. Plan, though were rejected in the final adopted plan. One of those sites is currently under appeal by a Developer against a refusal to allow development. The result of that appeal will decide what happens to this area, and will occur long before any Core Strategy is finalised. All the current Goverment guideance and policies on development match the development potential for these sites, and are going to be 'nigh impossible for us to ignore. A little lateral thinking by ESCC Highways Department, and another road crossing of the Framfield Stream from a new access from the South would solve the problem of the Framfield Rd. bottleneck and open up these sites.
The siting of 1,000 to 1,780 dwellings in this area of Uckfield is not sustainable. Although there would be good access to southern road networks the scale of this development would exacerbate traffic congestion problems in the town centre even if road improvements to alleviate these would be forthcoming. There are also concerns that the ‘long term gradual extension of the town Southwards’ would lead to urban sprawl and change the current compact nature of the town. If the development linked through to Ridgewood Road, Ridgewood village, which is now on the fringe of Uckfield, would be completely swallowed up and lose its separate identity. Land north of Eastbourne Rd. is already allocated for major development, and any extension of that will close the gap between Ridgewood and Palehouse Common leading to even greater urban sprawl Horstedpond Farm and Ridgewood House are other potential sites in this grouping, but development there should be relatively small in order to protect the visual impact of the landscape through the valley formed by the Ridgewood stream. Very visible from the A22, it would require removal of hedgerows and mature woodland in what is a rural setting and a fine example of the rolling pasture land and small vallays typical of the Low Weald. Ridgewood House in particular should remain undeveloped as it is a Grade II listed building and an important feature within the old village of Uckfield which needs to be protected from any development and maintain it's unique rural aspect within the Uckfield town setting.

There is not ‘Good access via Ridgewood to Uckfield’ as claimed in the consultation paper. Ridgewood Road is already congested and access to the town via the High Street would cause increased congestion at the Framfield Road and Bell Lane traffic lights. Development of this site would change the nature of Ridgewood from that of a rural village to that of a suburb of Uckfield. This is the highest point above Uckfield, and the landscape of the north and south slopes is worthy of preservation.
Option 14f

Section of Document:

Reason for comment:
Ideal infill site. Good access onto A22. No particular landscape issues, sustainable and quite capable of taking at least 1,000 houses.

Option 14g

Section of Document:

Reason for comment:
The redevelopment of brown-field sites in the town centre to provide mixed retail, community and residential use is a good option. A regeneration and redevelopment of this area would provide services for any planned increase in houses and population, with the opportunity for road improvements to ease town centre traffic congestion. However, residential development on the floodplain could only take place if flood prevention measures are in place and/or appropriate building design is used. But these problems are not unsurmountable.

| Reason for comment: |
Reason for comment:
The approx potential scale of development would overwhelm and destroy the existing village if it is sited around the 'Lavender Line' and east towards Little Horsted. However, worthy of consideration should the Uckfield/Lewes rail link be restored is development off the A26 in the Rose Hill, Clayhill area with a strategic green buffer zone between that development and the orginal village of Isfield. A working partnership between Wealden DC and Lewes DC as part of their combined housing requirements should be seriously considered.

Reason for comment:
Option 18e

Section of Document:

Your View: ☑ Agree, ☐ No opinion, ☑ Disagree

Reason for comment:

Of all the options along the Dicker for a new settlement this is the best one. The land around this area has very little visual interest, and is in need of a major regeneration. Quite capable of absorbing up to 2,700 houses with associated services and infrastructure.

Option 18h

Section of Document:

Your View: ☐ Agree, ☐ No opinion, ☑ Disagree

Reason for comment:
I detect a strong sense of NIMBYism in a lot of the responses to this option. In fact phased, longterm expansion is a very sustainable option for this area. Improvements along the A27 will happen, there is a good main line rail link and good services, schools etc. in both Eastbourne and Lewes. However it’s close proximity to the new South Downs National Park and the fact it could be seen from the northern slopes of the Downs in that area will probably kill any development stone dead - so residents of Berwick you can rest easy in your beds.

<td>Generally support the concept of a 'new settlement' approach as it may provide a quantum of housing and reduce pressure on other sensitive areas. If well planned and designed, perhaps conforming to the village concept it could be an asset to the particular area it is sited. My own concern is that the option of new settlements will be later dropped - I have considerable scepticism about any real commitment to this approach by Planners due to the sensitivity and volume of objections that will arise when these options become site specific.</td>

Option 24b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

35 to 40 is now the expected norm on new development on greenfield sites.

Option 24c

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

To high. 40 to 45 in development on brownfield sites in town areas can be accepted provided they are of good quality and design, with green open areas incorporated within any overall scheme. On new developments in greenfield sites 35 to 40 should be the max. We all need green spaces, and families need gardens.

Option 24d

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:

In the case of Wealden, first get a good intergrated public transport system in place. Then ask the question again. I would agree if I was living in Brighton and Hove - they have an excellant public transport system - but I live in Uckfield and we don't.
Option 25a

Section of Document:

Reason for comment:
This has to be balanced against need and should not be adopted as a general policy. Must be decided on a site by site appraisal. Developers prefer to build large numbers of flats and terraced housing because they can get a greater density of units on the available land. Acceptable if they are of good visual and internal design combined with integrated green spaces and landscaping, something we have yet to achieve within Wealden.

Option 25b

Section of Document:

Reason for comment:
All developments of 10+ units should have a 40% element of affordable housing. In addition to that there should a 'sliding scale' of affordable housing in developments of less than 10 units, e.g between 3 and 5 of which 1 unit is affordable, between 6 and 9 of which 2 units should be affordable.

Option 25c

Section of Document:

Reason for comment:
Reason for comment:
There are other rural areas outside of the AONB, where it would be appropiate to integrate affordable housing with other types of housing in small developments of 10 to 15 units. e.g. Palehouse Common, Blackboys, Isfield Village, Ringles Cross, Halland, Little Horstead to name but a few.

Reason for comment:
But the criteria and the current boundaries need reviewing and adjusting where appropiate.

Reason for comment:
There is a need for supporting elderly/disabled relatives in their own or relatives homes due to the increasing removal of support from Social Services and the NHS. However any development must be viewed on an individual basis and subject to very strict conditions and control.

Reason for comment:
But only if strict enforceable controls and conditions are in place, and Wealden are prepared to apply enforcement much more then they currently do.

Part of document:   Option 26a
       □ document   □ chapter   □ section   ☑ option

Section of Document:

Your View   □ Agree   □ No opinion   ☑ Disagree

Reason for comment:
sites should be evenly spread between North and South of the District

Consultee ID:         Agent ID:

Part of document:   Option 26b
       □ document   □ chapter   □ section   ☑ option

Section of Document:

Your View   ☑ Agree   □ No opinion   □ Disagree

Reason for comment:
Land adjacent to Hamilton Place is one suggested site that could be appropriate.

Consultee ID:         Agent ID:

Part of document:   Option 27a
       □ document   □ chapter   □ section   ☑ option

Section of Document:

Your View   □ Agree   □ No opinion   ☑ Disagree

Reason for comment:
You are asking the wrong question here. With every large development there should be a travel plan submitted as part of the application. The provision of bus services (subsidised if necessary) should be part of the development - not the other way around.
Section of Document:
Option 27b

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
A sad fact but true that large scale development will take place anyway, regardless of any possible rail link. ESCC are committed to having integrated travel services in the County, and this link is part of that scheme. Development will help to fund it but it should not be dependent on prior development. In addition to that it should be an immediate not a long term priority, once the feasibility studies are completed and a route established.

Section of Document:
Option 27c

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Your View

Section of Document:
Option 27d

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
The real question here is who carries most political weight with the Government and where is the funding coming from? It's perfectly clear the A27 needs up-grading, so let's stop all this argument, bite the bullet and get on with it.

Section of Document:
Option 27e

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Would ease town centre congestion.
Section of Document:

Reason for comment:

Unrealistic in light of the publics love affair with the motor car. A standard 2 spaces (includes garages) per. unit on any new development be it a five bedroomeed house or a 1 bedroomeed flat, either in a town or out. In addition to that a condition against converting garages into living space should be standard on all new development, with enforcable controled parking restrictions on estate roads.

Section of Document:

Reason for comment:

Everybody needs large and small open spaces

Section of Document:

Reason for comment:

This already happens in S106 agreements. What needs to happen is to allow a much more flexiable, imaginative use of the money.
Question Thirty
Section of Document: Infrastructure Requirements
Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
However It is unclear how WDC would be in a better position to resolve these issues and secure funding to pay for major infrastructure improvements to enable new housing development to be even remotely viable. The government steadfastly refuses to pay and there are limits on what the private sector will fund, (Uckfield Town Center traffic management scheme being a prime example). Developers are already required to provide a percentage of affordable homes within their developments, which affects their profit margins and which they try to avoid having to comply with. Their only remit is to their shareholders, they have little concern regarding the environment or infrastructure unless forced to do so.

Question 31a
Section of Document:
Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Wealden had better get it right. There are bound to be 'winners' and 'losers' over the next 20 years, The Core Strategy is the foundation for the future. The decision makers (Planning Officers and Councillors) must not be guided by their own personal immediate prejudices or preferences, or bow down to Government pressures. This is still a green and pleasant land - let's not completely destroy it for future generations.
Consultee ID: Mr Turner

Part of document:  
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
There is a need for viable communities within the High Weald ANOB and in order to facilitate this some limited development may be necessary. Ideally this should strengthen existing communities - e.g. changing the use of existing buildings and developing within their environs - there must not be development in currently undeveloped areas.

Consultee ID: Mr Turner

Part of document:  
Section of Document: Option 3c

Reason for comment:
Aim to strengthen existing business areas and avoid spread onto green field sites

Consultee ID: Mr Turner

Part of document:  
Section of Document: Option 2a

Reason for comment:
There are many acres of un-managed woodland in Wealden district most of which was copiced in earlier times. Consideration should be given to bringing this back into production as a source of renewable fuel for power generation. Care will need to be taken to ensure that the production of energy takes place locally and does not involve transporting the fuel many miles to the nearest suitable power station. Serious consideration must also be given to harnessing the power of waves. Wind turbines within the High Weald should not be an option.
Option 2b

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Only once a satisfactory solution has been found for the initial 10% the experience gained can then be used to increase the percentage of renewable energy produced.

Option 3a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Option 3b

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Local employment is essential to maintain viable local communities.

Option 3d

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Essential to create/maintain viable local communities.
Option 5a

Reason for comment:
Development outside the boundary should only take place when all possible areas within the boundary have been developed fully and then only for affordable housing for local people both young and old.

Option 5b

Reason for comment:
Control must be strict and any development must be for local people and used solely to sustain the viability of the local community.

Option 6a

Reason for comment:
Expansion of towns is to be preferred to expansion of villages but wherever new development is sited it must be supported by an adequate development of the infrastructure required to support it.

Option 7a

Reason for comment:
Consultee ID: Mr Turner

Part of document: Option 7b

Section of Document:

Your View: Agree

Reason for comment:

But only when all aspects of the local infrastructure have developed to support it.

Consultee ID: Mr Turner

Part of document: Option 7c

Section of Document:

Your View: Agree

Reason for comment:

This should not be considered until all other options have been fully exploited and the necessary upgrade of the infrastructure has taken place.

Consultee ID: Mr Turner

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Your View: Disagree

Reason for comment:

Wadhurst may be the largest village in the High Weald ANOB but no development on the scale stated can begin to be considered until the whole infrastructure, and especially roads (traffic volume), parking, and train services, have been fully addressed.
Consultee ID: 102674
Mr Cox

Part of document: Option 8a

Section of Document:

Your View: Disagree

Reason for comment:
Isfield is an attractive, historical, rural community and would be totally destroyed by this enormous proposed settlement.

Consultee ID: 102674
Mr Cox

Consultee ID: Miss Dennison
102813 RSPB
Part of document: □ document ✔ chapter □ section □ option
Section of Document: Part 2
Your View □ Agree ✔ No opinion □ Disagree
Reason for comment:
Support Spatial Objective 3 to enhance sites designated for their biodiversity value. Supports the need for the Council to undertake and appropriate assessment of the LDF as required under the Habitats Directive 92/43EEC following the ECJ judgement in October 2005.
RSPB believes that climate change is the main threat to biodiversity in the long term, and reducing reliance on fossil fuels is necessary to combat it.

The RSPB has concerns regarding a new settlement near Arlington Reservoir SSSI - a nationally important ornithological site. Development nearby could range from a direct disturbance of wintering birds to a negative effect on water quality.

The RSPB has concerns regarding the potential increase in housing development within the district, especially near to Ashdown Forest, as the Lowland Heath is one of the South-East's most threatened habitats. Urban development and its ancillary infrastructure increased disturbance and predation from both domestic and wild animals. Where development is unavoidable, the RSPB would expect high standards of mitigation, such as open space provision.
Consultee ID: Miss Dennison
Agent ID: RSPB
Part of document: option 23c
Section of Document:
Your View: No opinion
Reason for comment:
Concerns for development potentially within a high flood risk area. Such as option 23c Westham, in the areas around Pevensey Levels Ramsar.

Consultee ID: Mrs Creed
Agent ID: 102819
Part of document: option 27a
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View: Agree
Reason for comment:
Locating new areas of development in areas accessible to good public transport links should help to reduce the emissions generated by private vehicles. A transport audit of the District may be necessary.

Consultee ID: Mrs Creed
Agent ID: 102819
Part of document: option 3c

Area of natural outstanding beauty

Consultee ID: Mrs Creed  
Agent ID: 102819

Part of document: □ document □ chapter □ section ✓ option

Option 18j

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Agree to small settlement 15-20 houses, but area cannot withstand small town
Consultee ID: Mrs Creed
Agent ID: 102819

Part of document: □ document □ chapter □ section ✔ option
Question 18k

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
I agree to small settlements but the A27 and A22 cannot cope with more traffic. This is an area of outstanding beauty over development would ruin this forever. Would there be another reservoir, hospital, schools etc? What about drainage? Building more industrial units would not necessarily create enough work for such an influx of people.

Consultee ID: Mrs Creed
Agent ID: 102819

Part of document: □ document □ chapter □ section ✔ option

Part of document: □ document □ chapter □ section ✔ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
No area should be totally exempted from sensitively designed development so long as it is in keeping with its surroundings and in no way detracts from the natural beauty which may exist in many differing forms. There will always be areas that will benefit from a little improvement at least and these might be exploited to spread the burden of new housing across the whole District.
Consultee ID: Mr Marshall  
Agent ID: 102856

**Option 2a**

**Section of Document:**

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

But each building and site will be more or less amenable to a specific target. The aim should be to maximise within the constraints of site, building and area.

---

**Option 2b**

**Section of Document:**

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

“But each building and site will be more or less amenable to a specific target. The aim should be to maximise within the constraints of site, building and area.”

---

**Option 3a**

**Section of Document:**

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

So long as it is a "brownfield site".
Consultee ID: Mr Marshall  
102856

Part of document:  
Option 3b

Section of Document:  
Reason for comment:  
But "development to modernise" should not be prevented

Consultee ID: Mr Marshall  
102856

Part of document:  
Option 3d

Section of Document:  
Reason for comment:  
To agree would merely "ratchet up" the demand for further development

Consultee ID: Mr Marshall  
102856

Part of document:  
Option 4a

Section of Document:  
Reason for comment:  
The area west of the A22 and north of the A27 is, for many reasons, unsuitable for development and should be removed from consideration.

Consultee ID: Mr Marshall  
102856

Part of document:  
Option 4b

Section of Document:  
Reason for comment:  
The area west of the A22 and north of the A27 is, for many reasons, unsuitable for development and should be removed from consideration.

The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. The added advantages of such a policy will do much to reduce the need for large new infrastructure projects, will reduce "nimbyism" and antagonism between communities and drive decision making down to the lower level of town and parish councils which will have less contentious decisions to make as a result. It will also reduce the currently perceived power of developers who so often appear to drive planning decisions! One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!

Option 6a

Your View: Agree

Reason for comment:
This proportion is most likely to accord with (a) the demands of the growing population and (b) the least impact on new infrastructure requirements. Wealden should have the confidence to make its own plan for development and not quote endlessly from plans dreamt up by non statutory bodies with no knowledge of the area. Stand up for yourselves - plan and be damned.

Option 6b

Your View: Disagree

Option 6c

Your View: Disagree

Question 6d

Your View: Agree

Reason for comment:
Aim to maximise within the constraints of infrastructure and local demand. Wealden should have the confidence to make its own plan for development and not quote endlessly from plans dreamt up by non statutory bodies with no knowledge of the area. Stand up for yourselves - plan and be damned.
Option 7a

Reason for comment:
You may have your own views on such classifications but individuals councils may well not agree. The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!
Option 8d

Reason for comment:
The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. The added advantages of such a policy will do much to reduce the need for large new infrastructure projects, will reduce "nimbyism" and antagonism between communities and drive decision making down to the lower level of town and parish councils which will have less contentious decisions to make as a result. It will also reduce the currently perceived power of developers who so often appear to drive planning decisions! One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!

Option 9a

Reason for comment:

Section of Document: Question 16i

Reason for comment:
You have not stated a list of "Priorities", merely some aims which could contradict one another. Let us have a clear list of priorities at the next iteration please. Polegate Town Centre needs a full makeover to increase its attraction as an important local town. This will require careful project planning using a number of your aims but containing development within a strict boundary that does not encroach on the adjoining rural amenities and attractions. Much could be achieved by some lateral thinking about the land upon which the railway sits. Multi storeying could provide an integrated hub of transport, shopping, community facilities etc. which would make the town thrive. The hint that Polegate might become a centre for new civic facilities (East Sussex County Council perhaps?) is of concern and any such proposal should be very strongly resisted on the grounds of inadequate infrastructure.
The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. Reason for comment:

Very Strongly. Quite inappropriate on the boundary of an Area of Outstanding Natural Beauty, in a position to further overstretch unsatisfactory infrastructure (in particular the road system) and with thinly thought through implications for proposed commuting hub. All the comments you make about this proposal militate against it. And what is meant by "serving the needs of downland villages"? They have their well established services and a further connurbation would only add to local problems with infrastructure. As for providing a parkway for Polegate! Polegate has its station and every effort should be made to enhance it in order to cope with the perceived need.

- ☑ Disagree

**Reason for comment:**
Densities should be appropriate to the locality, the nature of the housing (a condominium in a town will have a much higher density than an infill in an AONB for example). The council might set a range for guidance only.
Reason for comment:
This is a false consideration since the nature of housing should be commensurate to the dignity of the householder. Just because a bus runs past the front door should be no reason to live in an otherwise cramped environment. Densities should be appropriate to the locality, the nature of the housing (a condominium in a town will have a much higher density than an infill in an AONB for example). The council might set a range for guidance only.

Reason for comment:
Only where appropriate to the need for, say, affordable and "essential to need" housing in locations where people are required to support essential services.

Reason for comment:
Proportions must be demand led.

Reason for comment:
Proportions must be demand led.
Option 25d

Reason for comment:
Sites solely for affordable housing should be allocated in rural aras where real need is identified

Option 25e

Reason for comment:
But, sites solely for affordable housing should be allocated in rural aras where real need is identified

Option 25f

Reason for comment:

Option 25g

Reason for comment:
There is too much evidence to show that this potential loophole can be abused. For any established business, considerations of staff housing will have been addressed already. For new and developing businesses, housing can be considered within the totality of the application.
Consultee ID: Mr Marshall

Part of document: ☑ option

Option 26a

Section of Document:

Reason for comment:
The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!

Option 27b

Reason for comment:
Quite the WRONG approach. Sort Polegate station and the adjacent town centre out. Parkway for what? I suspect this is the beginning of a scheme to centre East Sussex County Council in the environs of Polegate with all the disruption and eyesore that that will bring without any benefit to the settled local community. A bonanza for developers and their adherents.
Option 27e

Section of Document:

Reason for comment:

These towns must sort their own traffic problems out without burdening vulnerable settled communities outside their borders.

Option 27f

Section of Document:

Reason for comment:

A confusing question. Are you talking about the design of the house or the nature of the people living in it? Better to match, and this is far from perfect, the number of parking slots to a proportion of bedrooms perhaps?

Option 28a

Section of Document:

Reason for comment:
Section of Document:

Reason for comment:
This is a deceptive ploy which can only encourage underhand dealings in the planning process. Ultimately the house buyers will pay, either through their house prices or the rates. Far better to place responsibility where it lies - with the Council - so that costs are more transparent. It will also encourage a healthier debate across the District as to where facilities, and at what quality, should be sited.

Section of Document:

Reason for comment:
This is self evident in a well run district. Only genuine extenuating circumstances should become a reason to delay a development beyond the timescale imposed by the council. And lack of homework by developers would not be an admissible reason!
Question Thirty
Section of Document: Infrastructure Requirements

Reason for comment:
Clearly there is always a need to develop and improve the infrastructure but do not forget the chicken and egg dilemma. Should you pursue my proposal: "The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. The added advantages of such a policy will do much to reduce the need for large new infrastructure projects, will reduce "nimbyism" and antagonism between communities and drive decision making down to the lower level of town and parish councils which will have less contentious decisions to make as a result. It will also reduce the currently perceived power of developers who so often appear to drive planning decisions! One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!" then the the need for large scale infrastructure projects will be reduced and the Council can make developments incrementally where services and facilities can cope and then complete the planned development as other authorities bring their services on line. Development must not race ahead of the necessary infrastructure so there will be a need to iterate between authorities early to establish the overall development project plan.

Question 31a

Reason for comment:
Almost in its entirety although it is a tall order which will require you to be strong minded, ignore most of the non statutory directives and obey the principle: "orders are for the guidance of wise men and the blind obedience of fools". Be imaginative and do what is best for Wealden and not for central government and the quangos. I would not support, however, the "Eastbourne Hailsham Triangle" being an area for investment and development. SPREAD THE LOAD.
Question 31b

Reason for comment:
The Council should be pursuing a policy of "burden sharing" whereby every single community/settlement has, however small, some housing added to its current numbers. Clearly, there will be some sites where greater numbers of houses can be easily absorbed without real detriment to the "ethos of the locality" but by spreading the load, these impacts will be significantly reduced. The added advantages of such a policy will do much to reduce the need for large new infrastructure projects, will reduce "nimbyism" and antagonism between communities and drive decision making down to the lower level of town and parish councils which will have less contentious decisions to make as a result. It will also reduce the currently perceived power of developers who so often appear to drive planning decisions! One small downside might that your planners will have rather more planning applications to deal with but they should be of a lower order of complexity and, after all, that is what we pay you to do!

Question 32a

Reason for comment:
It is impossible to agree to a statement which has a number of contradictory aspirations. Please analyse the rest of my responses to identify my view.

Part of document: □ document □ chapter □ section ✓ option
Option 19a
Section of Document:
Your View □ Agree ✓ No opinion □ Disagree
Reason for comment:
Whilst I agree with the comment in the LDF Issues and Options paper regarding Forest Row traffic problems, viz: "Roads. Lots of out commuting. Though commuting ambient road noise and pollution. Lack of Bypass. Lots of AONB used as excuse for not building relief roads. Villages are used as rat-runs. The Box A27 A23 does not help us in the north." As a resident of Wall Hill, I believe that the whole of Wall Hill should be subject to a speed restriction. For much of its length it has no pavement and there is a childrens playground near a sharp bend to the top (north) of the hill within the derestricted zone. Additionally I have often followed traffic which has turned into Wall hill from the South (village end) all the way up the hill, into Hammerwood Road and back onto the A22. A similar situation happens in reverse when the A22 is conjestued. Additionally, I also believe that the 30 MPH limit should be extended North on the A22 to slow traffic as it approaches the village and the the remaining stretch of the A22 should be restricted to 40 MPH (as in the West Sussex section). I have previously written to both Wealden and East Sussex concils but have had no response from East Sussex. Prior to any further development in the village the traffic issues should be addressed. Consider traffic calming measures to the South and North of the village with priority given to traffic leaving the village.

Reason for comment:
Consultee ID: Mr Kember
Part of document: Option 7c
Section of Document: Agent ID:

Reason for comment:
Will lead to sprawl of villages and eventual join up into larger areas. Village identities (and therefore identifiable communities) are more likely to be lost. This option might be more palatable if "affordable housing" wasn't just a re-badged version of social housing which most people associate with anti-social behaviour (which breaks up communities).

Part of document: Option 8c
Section of Document: Agent ID:

Reason for comment:
Would eventually lead to Hailsham and Polegate merging.
Option 23b

Reason for comment:
Horsebridge is a small rural community. That level of additional housing is hugely excessive. In addition, the local primary school is nowhere near large enough to accommodate the additional intake.

Option 25d

Reason for comment:
Rural areas do need affordable housing and if it was made available for purchase for first time buyers (i.e. not second homes etc), then it would be acceptable. However, "affordable housing" is a pleasant name for what is largely social housing. The government’s own web site talks about social landlords being the main keeper of houses built for affordable housing. Most people associate social housing with anti-social behaviour. Who wants that brought to their area?

Option 27d

Reason for comment:
Dualing the A27 will only lead to even bigger housing developments (i.e. the area becomes more attractive for house building due to better transport links).
Part of document: Wealden’s Places

Your View
☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:
With regards to potential building across the bottom of my garden - my answer is a definite no and will always be. I have spent a very large sum on landscaping my garden to put it back as it used to be 40 years ago. I have just retired and enjoy my garden as it is now and would not change my mind for any reason. If I am stuffed with 65 shoe boxes to one side of my garden, I certainly don't want any more at the bottom of it.

Part of document: Option 9b

Your View
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
If Wealden carried out a public survey in the town, and surely they represent the people of Crowborough, they would soon realise how strong public feelings are against this ridiculous housing boom especially in an area which is not structured to cope with it.

Comments similar to those for option 9b
Consultee ID: Mr Bligh
103011

Part of document: Option 11e
Section of Document:

Your View

Reason for comment:
The grounds on which the Frontages of High Broom Lane - representing eleven households - have opposed the commercial development at both Brook Farm and Rocks Farm, apply equally to any large scale residential development in the area described as "South of Whitehill and Alderbrook". Viz the unrestricted (speed) access roads, Alice Bright lane and High broom Road are simply NOT capable of accepting any more traffic, be it commercial or domestic. The presence of two old people's homes and the equestrian traffic from the stables at Brook Farm present exceptional risks.

Section of Document:

Your View    ☑ Agree    □ No opinion    □ Disagree

Reason for comment:

This would be an especially good idea if the Lewes-Uckfield rail link were re-opened and service on towards London improved. However, if the proposal also envisages Uckfield residents travelling to work in East Grinstead it would also require a more 'joined-up thinking' approach to that town's proposals for its own housing development and the town's relief road. Vetoing any suggestions by East Grinstead that would 'increase Forest Row's traffic flows by more than 5%' is unhelpful.

**Reason for comment:**
The numbers are too high.
Reason for comment:
Agree to all parts on the basis that all amenities (other than a community centre) already exist and there is adequate road and rail infrastructure links (although the latter would benefit from improvements and an onward link beyond Uckfield to Lewes).

Section of Document:  Potential for a New Settlement or Concentrated Growth
Your View  □ Agree  □ No opinion  ✔ Disagree
Reason for comment:
Disagree to all. Given the total lack of supporting infrastructure for these substantial developments, I 
assume that this question is only being posed for the purposes of completeness. If funding on the 
scale necessary to meet these infrastructure needs were to become available, it would have far more 
impact being applied to options presented elsewhere where the facilities already exist.

Last paragraph concerning ‘a safer and less congested’ A26 and A22 (although desirable) sits at odds with much that has gone before this document.

Section of Document: Possible Spatial Objectives for Wealden

Reason for comment:
Your View ☑ Agree ☐ No opinion ☐ Disagree

Agree to all, excluding SO10.
The High Wealds historic dispersed settlement pattern, including historic farmsteads is a fundamental feature of the High Weald landscape and a component of natural beauty. Small scale development in these locations may provide a sustainable option to meet local needs and provide some key worker style housing for land based workers. This would assist in building the skills base to support traditional land management, a fundamental requirement of conserving and enhancing the AONB. If housing has to be allowed in the AONB due to regional requirements a dispersed policy focussing on this key feature of dispersed settlement may be development that can contribute to the character of the AONB as opposed to stock housing extensions to villages and service centres. Carefully controlled development to provide local housing particularly to support land based activities and to reconnect residents to the countryside, can be beneficial to the landscape, rather than just allowing stock housing developments, however carefully controlled the locations.

The spatial portrait identifies that wealden has a small scale industrial / employment base and experience such as the Ashdown business park suggest that large scale industrial estate are not viable in this area, and thus it make sense to focus on small scale business opportunities, which can often serve local areas more closely and provide local employment opportunites thus supporting sustainable objectives.
Reason for comment:
Targets for renewable energy generally supported, but need to consider what forms of generation are appropriate for the area. Are wind speeds suitable and regular enough for turbines, are they efficient and is the 'cost' of their development balanced by the return? Solar, ground heat pumps, district heating etc are all viable technology with few impacts on the environment. Woodfuel is supported especially for the AONB which has abundant sources of wood, in woodland that requires management to maintain its quality. Other biofuels are possible but need to be aware of the possible impacts on landscape and land use for instance changing the visual quality of the AONB by new and unfamiliar crops and farming/management techniques. The important consideration is determining what types of renewable sources are appropriate and efficient and provide a desired level of return on the investment and impacts on landscape. A calculation is required that judges the gain from the renewable source against the cost to landscape and the wider environment, in order to justify the development. All renewables have a cost and impact, the question is does the return justify that cost?

Reason for comment:
If viable and achievable then a higher aspiration target would give a strong positive signal to developers and could be associated with the eco-homes - eco-newtowns ideas. As noted in comments on 2A, the renewable source must be shown to provide sufficient benefit to outweigh the impact and cost of it on the environment and landscape - it is no good erecting wind turbines if the wind speeds aren't constant enough. All renewables have significant impacts on the environment and landscape and a higher target needs to be justified against the increased risks, costs and impacts of achieving a higher level, and possibly be part of a wider strategy to develop carbon neutral housing and ecohomes/villages.
### Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

**Consultee ID:** 103076  
Mr Shaw  
High Weald AONB Unit,  
Woodlands Enterprise Centre

**Part of Document:** Option 3a

**Section of Document:**

**Reason for Comment:**
Such brownfield sites may help deliver the high housing figure requirements and reduce pressure on the AONB, however employment space is still a prime requirement. Given the small scale nature of employment in the district then some mixed use type development or a more scattered and small scale employment provision policy will help balanced the equation of jobs vs homes, i.e. release large brownfield sites for housing but encourage and promote more small scale sites for small employment and mixed use activity to provide more local employment. Such small local mixed use type developments could contribute to AONB objectives by delivering more sustainable patterns of rural live-work if focussed on the traditional dispersed settlement pattern of the High Weald.

---

**Consultee ID:** 103076  
Mr Shaw  
High Weald AONB Unit,  
Woodlands Enterprise Centre

**Part of Document:** Option 3b

**Section of Document:**

**Reason for Comment:**
Protection of existing employment uses should be a central plank of employment use policy.

---

**Consultee ID:** 103076  
Mr Shaw  
High Weald AONB Unit,  
Woodlands Enterprise Centre

**Part of Document:** Option 3d

**Section of Document:**

**Reason for Comment:**
Employment provision is vital and ideally popualtion growth should be balanced by employment opportunities. However careful consideration to where and how these jobs are provided is necessary. Not all areas can accommodate the required levels of growth and the type of employment necessary needs to be appropriate to the area. The High Weald AONB needs small scale local employment opportunities, with a proportion related to local land based commercial activites to support traditional land management of the High weald landscape. Such focussed small scale employment provision is also a key factor in developing sustainable communities.
Option 5a

Section of Document:

Reason for comment:
Settlement are a convenient planning tool but it is not clear on what basis the boundary has been drawn, and whether it reflects the historic character and previous growth and change in the settlement, all of which have grown organically over centuries. Boundaries that are too rigid, tight and do not reflect the historic patterns and character of the village will be as harmful to its character as removing them entirely. A rapid characterisation of the villages could inform the future growth and constraints within them and reflect how the settlements fit within the landscape, and how they can be allowed to develop in keeping with that character. That character may also inform how the settlement relates to and interacts with its rural hinterland. Villages do not exist in isolation and smaller hamlets and farmsteads have a functional relationship with the villages, particularly in the High Weald AONB. In turn villages have a relationship with the towns. Where a village is constrained by its character and landscape alternative development in the immediate neighbourhood may provide an alternative to support the local needs and sustainable needs of the smaller communities which are so important in Wealden.

Option 5b

Section of Document:

Reason for comment:
As noted in response to 5A the dispersed settlement pattern surrounding the villages is a key feature of the High Weald AONB, and where development can support AONB objectives for traditional land management and sustainable rural communities these dispersed farmsteads and hamlets could provide locations for development that respects the character of the AONB. Such small communities also have a functional relationship with the villages, forming clusters with the village as a nucleus that provide a wide range of sustainable benefits, whilst also providing local housing. Any development in these locations would have to meet strict criteria and should not be completely free market housing but be controlled to provide local homes for local people and support local based and land based industry and overall demonstrate a contribution to the conservation and enhancement of the AONB.
Reason for comment:
The issues of split should relate both to local character and the attributes of each area - a single target for a diverse district such as Wealden is too crude. Both the AONB's have different demands and features that will probably require different approaches / ratios. Similarly the non AONB rural area and towns may require a different split. As noted 50% of the population is already rural and this should be reflected in the figures. Generally in the High Weald AONB a target for brownfield housing is going to be hard to achieve which will place a greater burden on other areas to achieve the same overall target figure. For the High Weald conversely because of its special qualities a higher proportion should be rural to prevent large scale or major housing development occuring simply to meet a target figure that doesn't reflect the sustainable nature of this area.

Reason for comment:
Village and settlement hierarchy should be based on a wider range of factors and respond to a local definition of sustainability that reflects local distinctiveness. For instance the commuting patterns in Wealden mean that most residents commute in certain patterns and any accessibility criteria should reflect this as well as the geography of the small towns. Wealden lacks a major central service centre and relies on large service centre's beyond the district boundaries. The hierarchy should reflect this. Additionally the hierarchy does not take account of the local character and landscape setting of the various settlements and how they contribute to the setting of the AONB. Some settlements may be constrained by the landscape and local character so that while they may score well on basic accessibility and services the immediate local conditions may mitigate these conditions.

#### Part of document:  
- ☑️ option
- Option 7b

#### Section of Document:

**Your View** ☑️ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**
Agree in general but classification should take account of landscape and local character and the human geography of the settlement - what its area of influence is, what area/zone around it that it forms a cluster with, where people relate to and travel to for goods and service, TTW patterns etc. The landscape designation should also be reflected and perhaps rather than just a major restriction as indicated, an additional or more stricter criteria based approach to reflect, reinforce and respond to the local character could serve the areas better.

#### Section of Document:

**Your View** ☐ Agree  ☐ No opinion  ☑️ Disagree

**Reason for comment:**
Only where a complete and robust assessment of the potential - including landscape and local sustainability indicators - have been taken into account. The present analysis is statistically correct but fails to take a wider range of factors into account. The assessment of growth opportunities is therefore not sufficient to make these judgements on. Again, a blanket approach does not reflect local circumstances and character.

**Question 18k**

**Section of Document:**

<table>
<thead>
<tr>
<th>Your View</th>
<th>✔ Agree</th>
<th>☐ No opinion</th>
<th>☐ Disagree</th>
</tr>
</thead>
</table>

**Reason for comment:**

General support for the concept of a new settlement approach as it may provide a quantum of housing and reduce pressure on other sensitive areas. If well planned and designed, perhaps conforming to the eco home - village concept, it could be an asset to the district. No comments on individual locations as these are beyond the remit of the High Weald AONB (given that they are all sited outside of the AONB!) Concern that the concept may be pursued as a 'ghost' option and later dropped - their is some scepticism about the commitment to this approach due to its potential sensitivity on locations identified.

Until someone publishes information on pay back time, in toher words publish how much energy is used in constructing the various projects and how long the project will take to pay back the energy used in construction Until then it would be far better to improve building regulations on insulation, draughts etc. It would also be useful if Wealden published its views on energy pricing; currently it gets cheaper the more you use; in a sustainable economy it should get more expensive the more you use,

Consultee ID: Mr Pierson Agent ID: 103089

Part of document: Option 4b

Section of Document: 

Reason for comment:
I am worried that urban sprawl will be unstoppable into the rural countryside for any areas north of A27. I quote from the report: ‘An unspoiled landscape of the highest quality and diversity reflecting its historic evolution An historic and cultural heritage conserved for posterity as an essential component of local distinctiveness A serene and peaceful landscape with extensive dark night skies’ or are these put in just for reassurance and not to be acted on.

Consultee ID: Mr Pierson Agent ID: 103089

Part of document: Option 4c

Section of Document: 

Reason for comment:
would not create any new planning precedents

Consultee ID: Mr Pierson Agent ID: 103089

Part of document: Option 4d

Section of Document: 

Reason for comment:
again it would start urban sprawl into areas that have no natural I quote from the report: ‘An unspoiled landscape of the highest quality and diversity reflecting its historic evolution An historic and cultural heritage conserved for posterity as an essential component of local distinctiveness A serene and peaceful landscape with extensive dark night skies’ or are these put in just for reassurance and not to be acted on.
Mr Pierson

Option 5a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
The boundaries should be maintained. No qualification. I refer again to 'An unspoiled landscape of the highest quality and diversity reflecting its historic evolution. An historic and cultural heritage conserved for posterity as an essential component of local distinctiveness. A serene and peaceful landscape with extensive dark night skies' or are these put in just for reassurance and not to be acted on.

---

Mr Pierson

Option 5b

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Unless of course the existing planning procedures and green belt policies are weakened

---

Mr Pierson

Question 6d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
All of Q6 is very poor and seems to be pushing developments rather than the plan stated aims of 'pure unpolluted air, soil and water to allow the landscape and wildlife of the South Downs to be maintained Sustainable Management of the Land Supported by the necessary Skills and Expertise A buoyant local economy supported by and directly contributing to the management of natural beauty and its enjoyment' These aims should be paramount rather than making up figures about splits. Wide ranging opportunities for countryside recreation and access respecting the natural beauty of the South Downs and avoiding conflicts with other uses.
Question 7e

Reason for comment:
I think all q 7 takes our focus away from the stated aims of An unspoiled landscape of the highest quality and diversity reflecting its historic evolution An historic and cultural heritage conserved for posterity as an essential component of local distinctiveness A serene and peaceful landscape with extensive dark night skies A landscape rich in wildlife with extensive swathes of interlinking habitat managed to maximise benefits for nature Pure unpolluted air, soil and water to allow the landscape and wildlife of the South Downs to be maintained Sustainable Management of the Land Supported by the necessary Skills and Expertise A buoyant local economy supported by and directly contributing to the management of natural beauty and its enjoyment Wide ranging opportunities for countryside recreation and access respecting the natural beauty of the South Downs and avoiding conflicts with other uses.

Question 15g  
Section of Document:  
Your View:  
Reason for comment: 
alot of Hailsham is below sea level and so unsuitable for development from a flooding issue. The table confirms that all development areas are unsuitable if Wealden is seri0us about preserving its special character. If development has to occur somewhere then 15c would seem the best option because it is infilling Haisham's boundaries and wouldn't extend urban sprawl into undeveloped countryside
Consultee ID: Mr Pierson
103089

Part of document:  
Option 16b

Section of Document:

Reason for comment:
create urban sprawl in an AONB

Consultee ID: Mr Pierson
103089

Part of document:  
Question 16h

Section of Document:

Reason for comment:
Polegate, apart from 16g would seem unsuitable because all sites would contribute to urban ribbon development. 16 f would seem to be the best bet as there are natural barriers and provide infill. But what a shame to lose that lovely of green space

Consultee ID: Mr Pierson
103089

Part of document:  
Question 17d

Section of Document:

Reason for comment:
Stone cross has already been developed horrendously and unsensitively so any future development can't make things much worse. I think it is important that the A27 is the boundary ie all development is south of it
Question 6d

Reason for comment:
Some new building should take place in the villages to enable them to remain viable and to provide housing for local young people, particularly affordable housing. There should be no fixed percentage because some villages have a greater need and greater ability to absorb more houses.

Option 18j

Reason for comment:
With transport links as they are in this area I believe the only option is to provide an entirely new settlement with easy access to the railway. Berwick is the only settlement which fits this criteria and could be used for a new town. Berwick is also not in an area subject to any degree of flooding. Berwick also has reasonable access to the A27 and A22.

Transport Needs

Reason for comment:
Our main problem in wealden is infrastucture with 4 extremely inadequate A roads. It is unlikely that the transport links will be improved and this discourages business from locating here, leading to even more commuting. Upgrading the A27 is vital, but unlikely to happen.
Consultee ID: 103121

Field End Residents Association

Section of Document: Location Plan

Your View: Agree

Reason for comment:
Whilst 10% is good to achieve why no try to reach a higher level if possible
### Option 3c

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree  
**Reason for comment:**

For precisley the reason stated. Close liason in communities involved is essential and a proper explanation of the benefits and also balancing side effects.

### Option 4b

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree  
**Reason for comment:**

### Option 5a

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree  
**Reason for comment:**

### Option 6a

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree  
**Reason for comment:**

It is clear that an urban location is a better in particular for Low Cost and affordable rentable homes. Although some new development in rural locations is highly desirable to maintain expansion for the economic feasability of local services and the maintenance of family links again in the affordable rentable, and low cost homes category.
Option 7a

Reason for comment:
Whilst villages may have the "local services" that are described it may be that those are badly operated or not being of sufficient standard that the community does not actually use them and I think that an additional criteria should be added to judge these to see if they are effective.

Option 7b

Option 7d

Reason for comment:
If those premises are not protected then villages will die. Of course we must accept that there might be some difficulty in finding operators for them and if it can be proven that sufficient effort has been made to find an operator then it may be it can no longer be protected.

Reason for comment:

Sustainability and may help with attracting a better local services ie Surgery, school improvements, bus service etc.
Option 21a

Reason for comment:
As already said the land is available and there is no other perceived use of it. It is derelict and unsightly. This would give the opportunity to create a development of exemplary design and complimentary to the village centre. There would also necessarily be the opportunity to design through traffic from the village. It would enable the Conservation Area to be expanded and improved. Some access could be off the A22 but no egress. Additional access and egress could be via modifications at the beginning of School Hill and direct access to the village centre via School Hill could be prevented making it unattractive for through traffic. A strict limit on development numbers and a new sustainable development boundary could be made and the development which emerged could be contained to blend into the Historic centre of the village and an extended recreation ground and being surrounded on three sides with accessible open space. Further comments: We agree with this. However we would want to emphasise that no more than about 300 homes of mixed dwellings including affordable for rent, buy and market units of various sizes. This 300 should include the 80 that already have outline planning on Park Farm. this should be amalgamated into a larger plan and we would like to encourage those developers to join into a working relationship with the landowners planners and the design consultants for a larger scheme beyond but including Park Farm. We feel that for this site a scheme should be produced that will take the whole of the land available to build a permeable development for pedestrian and cycle access but using an imaginative traffic scheme designing through traffic out of the village with only 40% developed and the remaining 60% as usable public space with access to and over it from several points in the village. The public land being held in a trust in perpetuity. We also think that the rentable homes in the Housing Association sector should be limited to a proven local need but that low cost or part share ownership should form a larger percentage than the norm to bring in younger residents and give them an opportunity to experience and make a contribution to rural life. Additionally this particular site we feel is an opportunity to create a development of exemplary design integrated sympathetically with an expanded Maresfield Conservation Area (currently too tightly drawn). To also include an extension to the recreation ground and a footbridge over School Hill giving direct access to the school and other footpaths from the development and planned open space.

Adverse impact on existing employment premises which are important for Heathfield. Suggest need for designating key office frontages.
Landowner is promoting land east of Station Road and south of the Waste Water Treatment plant.

An area of land is proposed for development as part of this area of search. It is argued that otherwise this area will become urban fringe.

Respondant owns some 8 acres of land within area 17a and wishes to promote development.

**Question One**

**Section of Document:** Settlements in the High Weald Area of Outstanding Natural Beauty

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

The settlements that the Strategy must protect got there by a process of development. They are living organisms and will become as lifeless as any museum piece if preserved in some kind of planning amber. Obviously any development proposals will require tight development control procedures with special reference to location, scale, texture and all the rest, including the "genius loci".

Consultee ID: Mr Holmes-Siedle  
Agent ID: 103136

**Part of document:**  
☐ document  ☐ chapter  ☐ section  ☑ option

**Option 2a**

**Section of Document:**

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

While 0% (yes, nought) would be preferable, the South East Plan is presumably enforceable. Significant human-generated carbon contribution to climate change is a myth. For as long as renewables are uneconomic, inefficient, unsightly and subversive of orthodox generating systems their use is profoundly harmful.

---

Consultee ID: Mr Holmes-Siedle  
Agent ID: 103136

**Part of document:**  
☐ document  ☐ chapter  ☐ section  ☑ option

**Option 3a**

**Section of Document:**

**Your View**  
☑ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**

The first essential of any policy is that it should be realistic.
Consultee ID: Mr Holmes-Siedle 103136

Part of document: □ document □ chapter □ section  ✓ option
Option 3b

Section of Document:

Your View  ✓ Agree  □ No opinion  □ Disagree

Reason for comment:
Assuming that the reference to "market need" in the question is to a continuing need for employment.

Consultee ID: Mr Holmes-Siedle 103136

Part of document: □ document □ chapter □ section  ✓ option
Option 3d

Section of Document:

Your View  ✓ Agree  □ No opinion  □ Disagree

Reason for comment:
Provided that "appropriate" means avoiding the past miscalculations as to light industrial and business park demand to which your text refers. The whole work-life balance thing depends on maximising locally available work for residents to the extent that a locality can attract residents and work opportunities which are compatible.

Section of Document:  Infrastructure Requirements  Agent ID:

Your View  Agree  No opinion  Disagree

Reason for comment:
Mrs Goodchild 103137

Question 31a

Agree

Villages need to expand in order to preserve heritage.

Mr Watkins 103140 Kitewood Estates Ltd

Question One

Settlements in the High Weald Area of Outstanding Natural Beauty

Agree

Additional development is appropriate in view of infrastructure and highway capacity constraints. Support development in Crowborough, Heathfield and periphery of Tunbridge Wells. Limited development appropriate at Wadhurst and Forest Row.
Option 2b

Reason for comment:
Disagree with higher energy target of 20% in light of limitations on Wealden’s potential.

Option 3a

Reason for comment:
Existing allocations should for business parks at Maresfield and Polegate should not be limited to B1a uses only, but should be capable of accommodating the full range of employment uses including B1, B2 and B8 uses and other employment uses such as motor dealership, and trade counter facilities.

Option 3b

Reason for comment:
Clear need for additional employment premises, but if sites are not coming forward they should not necessarily be protected but alternative sites should be found.

Option 3c

Reason for comment:
For new business development the focus should be securing the full range of business spaces but we can concur that there is significant shortage of premises suitable for small and medium size business in the County.
Mr Watkins
Kitewood Estates Ltd

Option 3d

New housing development should be balanced with the appropriate level of new business development across the whole district. It is not necessarily for the balance to be by town-by-town because some communities will be created by development in various parts of the district and indeed by adjoining towns and settlements.

Mr Watkins
Kitewood Estates Ltd

The Sussex Coast Economy

Disagree with development of north west of Polegate. Development of Polegate should take place towards Stone Cross (1968 plan). Concept of strategic gap between Polegate and Stone Cross is no longer a tenable proposition.

Mr Watkins
Kitewood Estates Ltd

Option 4a

Disagree

Mr Watkins
Kitewood Estates Ltd

Option 4b

Disagree
Option 4c

Settlement boundaries should be maintained but expanded around those settlements, which are seen to be suitable for further expansion. Should still permit development for affordable housing beyond settlement boundaries in those areas which have identified local housing need as per the existing local housing policy of the non-statutory plan.
Section of Document:

Reason for comment:
Extent of development already allocated for Uckfield, Hailsham and Polegate means a greater burden should be placed on other towns/villages in the district.

Section of Document:

Reason for comment:
Market towns of the High Weald AONB are severely constrained by the AONB policies. If scale of development proposed in the Local Plan is to be accommodated, some further growth of these settlements must be accepted. We would see Heathfield expanding and Crowborough.

Section of Document:

Reason for comment:
Do not believe that the planning policies can create the provision of village services. The viability of shops for example is outside of control of the local planning authority.
Option 8b

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Next range of development should be in Polegate, Willigdon and the edge of Eastbourne area. Opposed to development of west Polegate as it intrudes into area of South Downs. Demand for a new rail halt in Stone Cross.

Option 9c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Uckfield should be the focus particularly to the north of the town due to flooding reasons and the proximity of the secondary school. Significant constraints on large-scale development at Uckfield and therefore some additional growth should be accommodated also at Crowborough and Heathfield.

Option 11d

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Area off 11d to the south east of Crowborough between Allbrook and Jarvis Brook is the most sustainable location. Most convenient area for access to railway station, is self enclosed and principally outside AONB.
Wherever development takes place in Heathfield area there will be an effect on AONB. Significantly self contained sites to east of the town and to the north of Heathfield Park. This will impinge on this strategic gap, but we do not believe the strategic gap can be contained in the context of the significant development that the District needs to accommodate.

Support a natural extension of the town outside of the AONB boundary- most sustainable location for development in the District.

Surface water retention concerns- future flooding. Development to north of town has good access to existing school and has land suitable for a new sixth form college. Ringles Cross area for further residential development. Park and Ride facility at Buxted could alleviate traffic in Uckfield town centre.
Option 15e

Reason for comment:
New link road between South Road and Ersham Road. May require an enlarged roundabout. We would envisage 1,500 dwellings needed to accommodate the infrastructure required.

Option 16a

Reason for comment:
Intrusion into open countryside- context of seeking a road link through this area, crossing the railway line together with a possible new railway station presents major difficulties and should not be entertained.

Option 16b

Reason for comment:
Intrusion into open countryside- context of seeking a road link through this area, crossing the railway line together with a possible new railway station presents major difficulties and should not be entertained.

Option 16d

Reason for comment:
Consultee ID: Mr Watkins  
103140 Kitewood Estates Ltd

Option 16e

Section of Document:
Your View ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:

Option 17a

Section of Document:
Your View ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:
Propose a modified 17A, which incorporates the area around the junction of the Dittons Road A22 and A27.

Question 18k

Section of Document:
Your View ☐ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
Peripheral development to exist in settlements is a much better alternative as it enables sequential growth to be undertaken over time which serve existing facilities as and when new houses are built in large estates all at once which causes significant problems of providing adequate facilities.

Question 19f

Section of Document:
Your View ☐ Agree  ☑ No opinion  ☐ Disagree
Reason for comment:
Forest Row could accommodate some development- although would be an intrusion into adjoining AONB. Nutley and Dane Hill have few facilities and so would be inappropriate locations. Groombridge is significantly constrained, however it does have some facilities so could accommodate some affordable housing. Similarly Hartfield could accommodate some additional affordable housing.
Option 20b

Section of Document:

Reason for comment:
Wadhurst one of most appropriate villages with opportunities for future development. Due to nature of town, we would suggest the area between the village and the railway station where there is currently a gap- possible creation of pedestrian/cycle links from village to railway station.

Option 21g

Section of Document:

Reason for comment:
Maresfield and Five Ash Down not sustainable locations for development. Buxted is on railway and has reasonable village facilities, so further development should be considered. In regard to surrounding villages, we do not support significant development, other than in the context of the affordable housing provision.

Option 23a

Section of Document:

Reason for comment:
We support Option 23.
Consultee ID: Mr Watkins  
103140 Kitewood Estates Ltd

Part of document:  
Option 24a

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
It is appropriate that the development should try and be sympathetic in relationship to their surroundings and therefore we contend that density should be maintained in the district of between 30 and 35 dwellings per hectare on Greenfield extension sites.

Consultee ID: Mr Watkins  
103140 Kitewood Estates Ltd

Part of document:  
Question 23f

Section of Document:

Your View  
☐ Agree  ☒ No opinion  ☐ Disagree

Reason for comment:
Most significant village is Herstmonceux and should accommodate further development- even though AONB will be intruded. Lower Horsebridge, Westerham, Ninfield, and Upper Dicker are all suitable for some affordable housing, but they could be undertaken by proposed extensions beyond the urban areas as exception sites.

Consultee ID: Mr Watkins  
103140 Kitewood Estates Ltd

Part of document:  
Option 24c

Section of Document:

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
In more urban locations densities of 40 to 45 dwellings per hectare are more appropriate.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Watkins
103140 Kitewood Estates Ltd

Part of document: ☑ section
Section of Document: Housing Needs - Affordable Housing

Reason for comment:
Development should principally be a mix of housing and flats providing the full range of development from one to five bedroom properties. Market demand in Wealden is principally for 3 and 4 bedroom homes. Affordable housing should be 30% of the total development. Support the principle of larger exception sites on the periphery of towns to provide more affordable homes.

Consultee ID: Mr Watkins
103140 Kitewood Estates Ltd

Part of document: ☑ option
Option 25a

Section of Document:

Reason for comment:
The units should be of all types.

Consultee ID: Mr Watkins
103140 Kitewood Estates Ltd

Part of document: ☑ option
Option 25b

Section of Document:

Reason for comment:
Threshold for all units should be 24 units or more above which 30% should be in the form of affordable housing. In villages this could be reduced, but not on a one to one basis. Threshold in villages could be reduced to 10 dwellings or more requiring 30% affordable dwellings.

Consultee ID: Mr Watkins
103140 Kitewood Estates Ltd

Part of document: ☑ option
Option 25d

Section of Document:

Reason for comment:
We believe that full exceptions sites for some of the towns should also be entertained as after all these are the principle sustainable locations for development.
Option 25e

Section of Document:
Consultee ID: Mr Watkins
Kitewood Estates Ltd

Part of document: Option 25e

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
Sustainability of development should relate to the location of bus facilities and the railway facilities, we therefore support option 25e new development in many cases actually supports facilities which are marginal and increases the services which in turn increases their use.

Option 25f

Section of Document:
Consultee ID: Mr Watkins
Kitewood Estates Ltd

Part of document: Option 25f

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:

Option 27a

Kitewood Estates Ltd

Part of document: Option 27d

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
Consultee ID: Mr Watkins 103140 Kitewood Estates Ltd

Part of document: Option 27c

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Suggest that this need not be in Polegate but should be at Stone Cross.

Consultee ID: Mr Watkins 103140 Kitewood Estates Ltd

Part of document: Option 27e

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
The park and ride facility should be provided in Wealden to serve Tunbridge Wells and Eastbourne. Tunbridge Wells in particular needs new additional park and ride facilities and there should be joined up thinking regarding the two Districts. Parking standards should be applied as per the Government current guidance seeking to reduce parking standards.

Consultee ID: Mr Watkins 103140 Kitewood Estates Ltd

Part of document: Question Twenty Nine

Section of Document: Housing Delivery

Your View ☐ Agree ☑ No opinion ☐ Disagree

Reason for comment:
We do not believe it is appropriate for the LDF to seek to change the existing planning law with regards to the limitations on planning permissions. They should be maintained at the existing time consents and clearly we see no reason or justification how or why the Local Planning Authority should force development, which is often constrained by many other reasons than planning consents. We disagree strongly with the proposals therefore set out in Section 7.1 to 7.11.

Section of Document:
Your View ☐ Agree ☐ No opinion ☑ Disagree
Reason for comment:
Consultee ID: Mr Barratt OBE FCIOB

Part of document: Option 32b

Section of Document:

Your View: Agree

Reason for comment:
Existing infrastructure must be taken into account during the development planning stage; furthermore the cost of further development must be taken into account and the financial strain upon both developer and tax payer considered. Secondly safe access to the A279 should become a priority. Residents of Wilmington are at increased risk of accidents when attempting to access this A road.

Consultee ID: Mrs Akehurst

Part of document: Option 12e

Section of Document:

Your View: Disagree

Reason for comment:
The lane is currently at full capacity with lorries travelling to 2 industrial sites. Future developments should be along the ridge east to west. Part of the area is thriving with wildlife.

Question Twenty Nine

Section of Document: Housing Delivery

Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:

future developments need railway links to allieviate overburdened road systems.
We moved into this area as a result of the reorganisation of the company for which I worked some twenty years ago. Halland was chosen for its rural location and small community, as we have always lived in the country and would prefer to do so. We live on the A22 and have over the years found it an increasing problem to get out of our drive onto the main road. Like most residents we are on a bend and have limited vision. We often find frustrated motorists driving within inches of our rear thinking we have pulled out in front of them and should be moving much faster, even when we are on the speed limit. The speed camera at the eastern end, near the Black Lion, as helped, but the speeding from the western end is often extreme and the need for another camera is obvious. Your preferred solution I am sure is a bypass and if the developers are allowed to build 1800 to 2800 housed then they will fund the bypass. If such a bypass is anything like the one around East Hoathly you will have planned yet another death trap. This road is not either a dual carriageway or a good standard single road—it's something in between. It encourages motorists to drive down the centre at high speed in order to overtake what they feel are slow moving vehicles. The speed limit is very often ignored and this has resulted in many accidents. I don't blame the frustrated motorists: I blame the planners for what is a cheap and shoddy bypass. This road has become such a problem that the police now use mobile cameras, at what must be a very high cost, in an attempt to slow the traffic down. The A22 throughout its length is what can only be described as a poorly maintained country road. The vast majority of these proposed new Halland residents will, as I am sure you are aware, not be working in the local area and therefore will commute. This means probably another 5000 cars clogging up the local roads. The nearby station of Uckfield has poor services and no car parks that could take any more commuters. Lewes station has good services but parking there is also a problem. My understanding is that the local population who can find work within the area is not about to rise dramatically. We must need some growth in housing and we are not against that if it is for the local workers. Your aim as planners should be to reduce unnecessary commuting and not to encourage it. We assume that the excuse for this proposed massive quantity of houses in Halland is that the developer will be forced to provide some much needed "low cost" houses for local workers. You must be aware that private developers are in the business of making money and their track record on providing low cost housing is poor. We have at the moment two newly built so called "low cost" houses in Halland which have been on the market for a considerable time and have still to be sold. Their situation having been built on part of the Black Lion car park is a planning joke. The local residents could not believe such a development would be allowed. The parking for their future occupants is a tiny space cordoned off on the Pub car park. This parking space has poor access and is totally inadequate. In addition the Black Lion car park was never large enough for its customers before this travesty of planning was allowed. The probably result of this decision is to make this Pub's viability questionable in the longer term. Perhaps the best plan is to demolish the only Pub in the village and build more so-called "low cost" housing. A few other problems with Halland are perhaps relevant to any proposed plan. 1. There is no locally pumped gas supply. 2. The electricity supply consists of three phase and neutral, bare copper, wire running down the main road suspended between telegraph poles. This is both dangerous and unreliable. 3. The water supply is also poor and unreliable. I am sure any developer will be happy to sort these problems provided he can lose the cost and not reduce the profits they will be making.
### Consultee ID: Ms Edwards, Agent ID: 103185

**Part of document:**  
☐ document  ☐ chapter  ☐ section  ✓ option

**Section of Document:** Settlements in the High Weald Area of Outstanding Natural Beauty

**Your View**  
☐ Agree  ☐ No opinion  ✓ Disagree

**Reason for comment:**  
AONB’s are precisely that, and should be maintained. Once you allow "some development" within them, it sets a precedent for further development.

### Consultee ID: Ms Edwards, Agent ID: 103185

**Part of document:**  
☐ document  ☐ chapter  ☐ section  ✓ option

**Section of Document:** Option 2b

**Your View**  
✓ Agree  ☐ No opinion  ☐ Disagree

**Reason for comment:**  
Surely an effective way to reduce our carbon footprint is to specify higher standards in building construction and to encourage a new way forward in energy consumption.

### Consultee ID: Ms Edwards, Agent ID: 103185

**Part of document:**  
☐ document  ☐ chapter  ☐ section  ✓ option

**Section of Document:** Question 5c

**Your View**  
☐ Agree  ☐ No opinion  ✓ Disagree

**Reason for comment:**  
“Village boundaries must be maintained. In the larger towns, if the amenities can support further growth and AONBS are not affected then sensitive expansion could be considered. The need for affordable housing is being used too often to destroy beautiful countryside. In reality, often only a tiny fraction of the development is affordable, the rest equals yet more big profits for developers and investors.”
Option 6a
Reason for comment:
A town has more infrastructure to absorb the expansion.

Consultee ID: Mr Smither
103203

Part of document: ☑ option
Option 18a

Section of Document:

Your View ☑ Disagree

Reason for comment:
- Any new settlement would necessitate considerable investment in infrastructure.
- A continuation of organic expansion around conurbations would seem both sensible and achievable.
- A key issue for any future development is the critical necessity to locate business parks in and around towns. Easy access to available labour and supporting service facilities are vital.
- Given current target of 400 new homes per annum; c. 80 of which could be rural, it is my contention that small scale development of many villages within rural Wealden is both feasible and desirable, and a wide spread would easily achieve the overall target number with minimal change to the rural character. The above are summary points. Full comments are as included within sent letter.

Consultee ID: Mr Smither
103203

Part of document: ☑ section
Section of Document: Housing Needs - Affordable Housing

Your View ☑ Agree

Reason for comment:
Housing developments should have a significant proportion of low cost and/or housing association homes.

</tbody>
</table>

**Part of document:**
- option 11c

**Section of Document:**

**Your View**
- Disagree

**Reason for comment:**
A development of anything like this size would be highly damaging to the AONB and would reduce any prospect of attracting tourist interest in the town and its surrounding countryside. It would also be too far away from the town centre to have any positive impact upon the lack of facilities for the existing population there.

**Part of document:**
- option 11e

**Section of Document:**

**Your View**
- Disagree
Question 11f

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

Options 11(b) and (c) present unacceptable risks to the AONB. The AONB must be preserved in order to maintain the character and attractiveness of the town and any possibility that it might attract tourist interest as a gateway to the Ashdown Forest and High Weald. New housing should be limited to the central locations 11(a) and 11(d) where there is existing urban development that could benefit from the linked provision of missing community facilities and accessible shops. Any large-scale development north of the town is also unlikely to result in regeneration of the central shops, since if you have to travel, it is just as easy to drive to Tunbridge Wells.

Question 11g

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:

Generally agree, in particular linking development in the town centre and around Jarvis Brook with the provision of missing community facilities and so as to enable advantage to be taken of the improved rail service through Jarvis Brook. But disagree with any large scale residential developments around the edge of the town in areas of AONB and the ghyll areas. These would not bring any increased business provision and would spoil any chance of achieving increased outside interest in the town as an attractive gateway to the surrounding countryside.

Option 13a

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:

Obvious place for consideration provided that AONB maintained.
Mr Jessup  Bells Yew Green Society

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Option 2a

Reason for comment:

I would object to wind farms, particularly on the South Downs and in the High Weald AONB. I think there is scope for solar panels to be used on new industrial/commercial buildings/flats and most new houses, but not in convseration areas or on listed buildings.

Consultee ID: Mr Jessup
Bells Yew Green Society

Part of document: □ document □ chapter □ section ✔ option

Section of Document: Infrastructure Requirements

Your View ✔ Agree □ No opinion □ Disagree

Reason for comment:

I agree Local Spatial Objectives, SO1, SO3, SO4, SO6, SO7, SO8, SO9, SO10, SO12, SO13 and SO14, but not SO2, SO5, SO11. SO2 - density of 40 dwellings per hectare is too much for rural areas. SO5 - I think the development requirements laid down by the South East Plan to be excessive as we need to protect our landscapes. SO11 - I simply do not know what 'Super Output Areas' means. They are not listed in the glossary.

Section of Document:
Your View
Consultee ID: Mr Bryant
Part of document: Option 16d
Section of Document:
Your View: Disagree
Reason for comment:
I looked at your plans in the local library and, although I think Polegate area is getting overcrowded with houses, so is everywhere else. I realise no more building is not an issue but I personally think villages like Polegate should have countryside around it to stop it being joined to other places like Willingdon/Wannock and Hailsham.

Option 18h
Section of Document:
Your View ☑ Agree ☐ No opinion ☑ Disagree
Reason for comment:
I heard a possibility of Summer Hill. This idea should be stopped in its tracks. If building started there it would ruin a beautiful area and before you know it Polegate will be joined to Hailaham. We have to think of the flora and fauna and not Human greed.
Consultee ID: Mr Proudfoot  
103333  
Proudfoot Properties  

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Question 20d

Section of Document:

Your View  
☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:
Request to have land at Briar House farm in Rotherfield placed on list of potential development sites. Background information and reasons for inclusion as described within the letter.

Consultee ID: Mr Edwards  
103338  

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Question 15h

Section of Document:

Your View  
☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:
Questions: Where are people going to find work? (travel to London difficult from Hailsham) Where are the new schools, doctors, dentists? Not even a Health Centre, let alone a hospital to cope with the increase in population. DGH at full capacity now! One department demanding we build more houses and the NHS want to reduce the capacity of the one and only hospital in this catchment area!!

Consultee ID: Mr Osman  
103354  

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Option 13a

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
1. Size of proposed development 2. Schools and Education. 3. Health facilities. (I would like assurance that adequate resources would be available if this development were to go ahead.) 4. Libraries / Community facilities. 5. Water and drainage. 6. Electricity. 7. SSSI status. 8. Roads and transport links. This is the most significant reason why this proposal should be dropped. I question the validity of the statement that capacity on Benhall Mill Road is not an issues. I seek confirmation or requirement to improve local access roads and assurance that funding for bus services would be in place.
Consultee ID: Mr Osman
Agent ID: 103354

Part of document: ☑ option
Section of Document: Question 13b

Reason for comment:
I suggest that land either side of A26 at Strawberry Hill or on the A267 just south of Tunbridge Wells could be used for development. Both would allow development contiguous with existing development in Tunbridge Wells and would afford direct access onto existing 2 lane highway.

Consultee ID: Mrs Coleman
Agent ID: 103375

Part of document: ☑ option
Section of Document: Question 6d

Reason for comment:
Small number of mixed housing in each local community

Consultee ID: Mrs Coleman
Agent ID: 103375

Part of document: ☑ option
Section of Document: Option 18j

Reason for comment:
Infrastructure - district hospital, congested roads, high rail fares and over crowded, lack of employment, water, schools, recreation facilities, phone lines, doctors, drainage

Consultee ID: Mrs Coleman
Agent ID: 103375

Part of document: ☑ option
Section of Document: Question 23f

Reason for comment:
Few houses on derelict land by railway station for local people

Strong objection to the inclusion of Easbourne-Hailsham triangle. Arlington parish is clearly included within triangle yet has no inclusion within discussion. Eastbourne's problems should be soted out within its own boundaries.

Regarding SO3 alone, the Conservators of Ashdown Forest support the aims for the Forest regarding the enhancement of biodiversity, the meeting of local BAP targets and the protection of its site as a whole.
An increase in dwellings of 15% in this village cannot be justified other than by the pure contrivance of "sharing services with other settlements within a five minute drive" and the convenient assumption that they are easily accessed by residents via their own private transport. Very environmentally sound! An hourly bus service during weekdays, an oversubscribed primary school, no open post office within 4 miles, no realistic employment opportunities and poor electricity supply and an exhausted sewerage/drainage system does not reconcile with the so-called sustainability criteria highlighted in the consultation paper. 40 dwellings is a recipe for more traffic, more pressure on the school capacity and potential overload of the sewerage infrastructure.

Larger densities leads to less integration with the receiving settlement.

The criteria for available public transport needs to be defined. Two public transport journeys per day is an example of poor provision.
Purpose built modern flats are not conducive to integration within the community and as such they usually become hot spots of antisocial behaviour.

I can see no safeguards in this paper in relation to local people getting priority of opportunity or of post implementation maintenance of the sites. This just looks like another attempt to get the discredited HOPE initiative off the ground.

My experience of councils use of this option is not encouraging. Pressure to hit central targets results in officers allocating "protected space" without proper consultation with the affected community.
Consultee ID: Mrs Lydford

Part of document: [ ] chapter [ ] option
Part 1

Section of Document: Context

Reason for comment:
Generally well considered but: The Core Strategy in no way addresses the fundamental question - do we need this level of development? This directive has come from a government that has drawn up many flawed policies and is even now abandoning many of these, along with their creators. Do these development figures represent the real needs of Wealden or are they part of Prescots dubious legacy?

Consultee ID: Mrs Lydford

Part of document: [ ] chapter [ ] option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
We are the guardians of this country, we have no right to irrevocably spoil this landscape.

Consultee ID: Mrs Lydford

Option 2b

Reason for comment:

Consultee ID: Mrs Lydford

Part of document: [ ] chapter [ ] option
Option 3d

Reason for comment:
Option 4b

Reason for comment:

The size of population will influence the volume of services that will be offered, smaller villages with a poor infrastructure could greatly benefit from an increase in population because this will encourage provision of the services that they desperately need.

Option 5a

Reason for comment:

Each application should be carefully evaluated and the longterm nature of the village considered. As commuting becomes more expensive and detrimental to the environment so village communities should incorporate retail outlets etc.

Option 7a

Reason for comment:

The size of population will influence the volume of services that will be offered, smaller villages with a poor infrastructure could greatly benefit from an increase in population because this will encourage provision of the services that they desperately need.

Option 7d

Reason for comment:

Each application should be carefully evaluated and the longterm nature of the village considered. As commuting becomes more expensive and detrimental to the environment so village communities should incorporate retail outlets etc.
Option 9c

Section of Document: Site Allocation Thresholds

Reason for comment:
Small scale development on brownfiled sites should be encouraged. Larger scale developments should be quantified to ensure that they create a number of affordable houses for rental and also cheaper houses for purchase by first time buyers and single people.

Option 19a

Section of Document: Site Allocation Thresholds

Reason for comment:
The Core Strategy claims to protect the unique quality and character of the area. Forest Row is currently a village with character and a sense of community, the proposed 20% population increase would undermine this. More significantly the development of hundreds of houses - situated as they can only be to the north and west of the village - will effectively turn Forest Row into a residential suburb of East Grinstead - whilst West Sussex council is busy turning East Grinstead into a suburb of Crawley - the village will become part of one huge urban sprawl.

Part of document:  □ document  □ chapter  □ section  ✔ option
Option 25d

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
Rural areas desperately need affordable housing, for rental but primarily for purchase.

Consultee ID: Mr Salmon
Agent ID: 103508

Part of document:  □ document  □ chapter  □ section  ✔ option
Question One

Section of Document:  Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
Every new dwelling will have an impact on our sustainability regardless of where it is positioned, unless of course it is built sustainably! There may be scope for dwellings built to the highest standards of sustainability and of minimum visual impact, built from organic materials and without any motor vehicle facilities (driveways or garages). A good example of situations when this may be appropriate would be Ben the woodman's timber home on Ashdown Forest (Grand Designs, Channel 4).

Consultee ID: Mr Salmon
Agent ID: 103508

Part of document:  □ document  □ chapter  □ section  ✔ option
Option 2a

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
If we are to be sustainable then all energy to developments needs to be from renewable energy sources, with quality energy conservation enabling vast reductions in energy consumed. This figure should be much higher and I would argue that no development should be allowed unless it can meet this higher figure. It may not be possible to generate enough renewable energy on-site, however, using the national grid, energy could come from renewable sources elsewhere in the country. Is it possible to put a condition on developments that all of its energy supplied must come from a renewable source?
Option 2b

Reason for comment:
Please refer to my answer to 2a in which I basically say the figure should be set at 100% renewable energy.

Option 22a

Reason for comment:
Area to the north of Cross as identified on submitted map is suitable, as it is a brownfield site. The second site could be used as all main services are available including the main drainage as it runs through the land.

Question One

Reason for comment:
Areas of outstanding natural beauty should never be built on. If we start allowing this we will eventually lose our beautiful countryside and then there is no turning back.

Option 5a

Reason for comment:
Settlement boundaries should be maintained. Making exceptions is a slippery slope and we will eventually lose our countryside completely.

#### Part of document: Option 18i

**Section of Document:**

- Your View: [ ] Agree  [ ] No opinion  [✓] Disagree

**Reason for comment:**
The Cuckmere Valley is unique in the way it links the sea with the High Weald.
The Cukmere Valley is unique in the way it links the sea with the High Wealden. Very soon Berwick Station will be an important gateway to the proposed South Downs National Park - already many people walk and enjoy the area.

- protection and enhancement of Wealden's environmental assets should remain a key focus when identifying suitable sites to meet development needs. -respondent acknowledges multiple benefits that can be achieved through planning gains (PPS9 and associated good practice guidance). -Welcomes comments in para. 2.18. Strongly support approach of "enhancing and reconnecting BAP habitats by landscape scale design." -respondent cites UK Biodiversity target "there should be no loss of ancient semi-natural woodland." -respondent acknowledges Wealden's identification of the need to understand the District's water cycle and to protect form flooding/provide quality/quantity of supply (2.19-2.36). -SWT would like the following key principles to be taken into account in allocating sites for development: 1. policies and decisions area based on up to date information 2. policies and decisions should seek to sustain and enhance biodiversity (use of planning obligations if necessary) 3. policies should take a strategic approach to the conservation and enhancement of biodiversity within the District 4. proposed development should be accommodated without causing harm to biodiversity and reasonable alternatives should be considered 5. beneficial biodiversity features should be promoted within new development. -environmental features listed below should be taken into account when assessing each individual site. SWT would object to any proposals that would impact negatively on these natural resources: 1. International sites 2. National sites (inc. AONB designations) 3. Regional and local sites (SNCI) 4. Ancient woodland/important natural priority habitats (BAP) 5. Networks of natural habitats 6. Greenfield 7. PDL 8. Biodiversity within developments 9. Protected species/species of principal importance for biodiversity conservation

Respondent highlights importance of networks of natural habitats (PPS9, draft SEPlan) SWT strongly recommend inclusion of policy such as that produced by partnership working between SWT and Sussex Environmental Partnership for establishing an ecological/multifunctional green network to conserve and enhance priority natural areas and the connections between them.
Consultee ID: Miss Watson 103581  
Sussex Wildlife Trust

Part of document: □ document  ✔ chapter  □ section  □ option

Part 5

Section of Document: Wealden's Places

Your View  □ Agree  ✔ No opinion  □ Disagree

Reason for comment:
strongly support the need for such a policy as detailed in para. 5.7:"need for strong green infrastructure...and the protection of that infrastructure through design, management and planning agreements."

Consultee ID: Miss Watson 103581  
Sussex Wildlife Trust

Part of document: □ document  □ chapter  □ section  ✔ option

Option 14a

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
disagree on environmental grounds. Reiterate the importance of using up to date information for planning decisions.

Consultee ID: Miss Watson 103581  
Sussex Wildlife Trust

Part of document: □ document  □ chapter  □ section  ✔ option

Option 15a

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
disagree on environmental grounds. Re-iterate importance of using up to date information for planning decisions.

Consultee ID: Miss Watson 103581  
Sussex Wildlife Trust

Part of document: □ document  □ chapter  □ section  ✔ option

Option 16b

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
disagree on environmental grounds. Re-iterate importance of using up to date information for planning decisions.
### Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

<th>Agent ID:</th>
</tr>
</thead>
<tbody>
<tr>
<td>103581</td>
<td>Sussex Wildlife Trust</td>
</tr>
</tbody>
</table>

#### Section of Document: Infrastructure and Phasing

**Your View**: No opinion

**Reason for comment:**
Provision of green infrastructure alongside the delivery of other infrastructure requirements would help ensure sustainable development in the District.

<table>
<thead>
<tr>
<th>Consultee ID: Miss Watson</th>
<th>Agent ID:</th>
</tr>
</thead>
<tbody>
<tr>
<td>103581</td>

Strongly oppose development on unspoilt low weald. Landscape at the foot of the downs would be seriously compromised and road infrastructure plus services insufficient to support this proposal.

Question 32b

Section of Document:  

Your View  ☑ Disagree  

Reason for comment:
Mr West 103584

Question 32b

Section of Document:

Reason for comment:
I feel the character of the lower Weald is of unique character and every effort should be made to protect it. Any new green field site development would be intensely destructive. With the possibility of a National Park being created all areas adjacent to it should be extremely carefully used in regards to development. The roads infrastructure in this area is already over used and any further major increase in population would have serious effects. Existing brown field sites should bear the major development with the minimum expansion in existing rural settlements. Wealden must be preserved for future generations.

Consultee ID: Miss Kuppers Rydon Homes Ltd 103606

Part of document: Part 1

Section of Document: Context

Your View  ☑ Agree

Reason for comment:
Rydon supports the consideration of development in the AONB in appropriate locations adjoining the development boundaries of Heathfield and Nutley as it believes there are no suitable alternative locations for housing outside of the AONB. As the core strategy identifies the need for growth related to the scale of existing population in these locations it is correct to undertake a sustainability assessment in order to determine the most suitable sites. However, Rydon does not believe that it is necessary to seek development within the AONB on the edges of Crowborough as opportunities for development at the scale considered necessary exist on greenfield sites outside of the AONB.
Wealden's Economic Challenges

Reason for comment:
The council should be seeking to formulate an economic strategy as part of the core strategy following production of an employment land study in order to determine the availability and suitability of existing employment land and allocations, and identifying whether any redundant/vacant sites would be better suited to different forms of business space for which demand is greater, or possibly alternative land uses such as housing. The results of such a study will identify locationally specific issues and decisions on the sites' retention or redevelopment will be influenced by the spatial objectives and economic regeneration policies for that area. If opportunities for redevelopment of existing employment sites to residential arise then this should feed into the councils urban potential study and if considered deliverable may be identified as a housing allocation in the site allocations DPD. However, there needs to be robust evidence to suggest that such a loss of employment land is appropriate. As paragraph 3.15 of the core strategy states, the limiting factor to take-up of employment space may be hindered by constraints such as road infrastructure and traffic congestion. If future investment in these locations is an objective then these influences should be rectified rather than see the loss of employment land to alternative uses. Proposed strategic allocations for large-scale housing could also include the requirement for provision of employment land to meet any identified shortfall, specific to the type of business to be encouraged to that area, in order to meet the spatial objectives for future investment.

Your View: No opinion
Reason for comment:

Whilst we would welcome the ability to develop on suitable small scale sites outside but on the periphery of settlement boundaries not formally identified as housing locations in the LDF, we would question how this could be effectively managed.
Settlement boundaries (formerly Development Boundaries) should be maintained, but should be expanded or redefined around the towns and villages identified in the Core Strategy as having growth potential to allow for natural, limited expansion, either to encompass allocated sites in the Core Strategy/Site Allocations DPD or to follow defined boundaries on the ground. Many existing development boundaries are drawn too tightly to even allow for the logical development of small plots of land well related to the built-up area and outside of significant landscape designations, i.e., back gardens. Settlements boundaries could be revised to enable small scale growth, the detail and design of which would be governed by development control policies.

Instead of applying a broad percentage split, the settlement strategy which seeks to identify areas for growth capped to levels having regard to existing or planned infrastructure seems to be a logical and defined approach. If an urban/rural split is applied it should be as a guide but should not be imposed as a target due to the varying nature of Wealden's circumstances across the district. In this instance RYdon would propose a 75% focus in and around towns across both north and south of the district (option 6b).
The emerging core strategy identifies Buxted as a smaller localservice centre. However, Rydon has made earlier comments in its response seeking re-categorisation of Buxted as a larger service centre due to its ability to share services and facilities with neighbouring towns and villages including Uckfield and therefore meeting all the necessary criteria. An irregular bus service operates through the village, however, Buxted has the benefit of a railway station which offers half hourly services along the Uckfield to London line. Rydon's sustainability plan for Buxted illustrates the extent of local services and facilities available in the village as well as proximity to public transport links serving the wider area. Rydon agrees that this is an appropriate settlement to enable growth.

A split between Polegate and Hailsham is the most appropriate. It will enable the necessary improvements to infrastructure in both locations without total dependancy on one location to deliver the majority of the housing requirement for the southern part of the district.

A split between Polegate and Hailsham is the most appropriate. It will enable the necessary improvements to infrastructure in both locations without total dependancy on one location to deliver the majority of the housing requirement for the southern part of the district.
Option 9c

Section of Document:

Reason for comment:
A split between Uckfield/Crowborough/Heathfield is the most appropriate. Each town has its own constraints and opportunities. Dividing the requirement between the three main towns ensures consistency with sustainability objectives, a manageable delivery of supply and would meet demand for growth at each location.

Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
Until the Council is able to clarify how it would plan, monitor, manage, and bring forward smaller greenfield sites being considered through criteria based policies in the absence of a specific allocation, it is questionable whether it is acceptable to rely on this method of delivery for sites below 30 dwellings. Rydon would normally expect a higher threshold for identification of specific greenfield sites in the Core Strategy; those of a more strategic nature with longer lead in times, dependant on/linked to the provision/enhancement of infrastructure. The remainder could come forward as areas of search with boundaries being defined at the Site Allocations DPD stage.
Option 11d

Section of Document:

Reason for comment:
Although the area of search lies to the south east of Crowborough it has good accessibility to the town centre and its range of retail services. In addition, it has the benefit of being located in close proximity to all the local services and community facilities offered by the Jarvis Brook neighbourhood centre. The area is well served by public transport with bus services from Walshes Road, enabling regular and easy access into town, as well as the railway station at Jarvis Brook on the Uckfield to London line, providing regular half hourly services. Large scale employment opportunities exist at Wealden industrial Estate as well as other surrounding B1-B8 uses. A small parade of shops is located on Walshes road and a wider selection of shops is available within the neighbourhood centre on Crowborough Hill. A primary school, doctors and dentist surgery, church, public open space, pubs and bus stops all serve the local community. In addition the area lies outside of the AONB and outside of the flood risk area. Within the identified area of search, Rydon homes wishes to support in particular the development of land south of Walshes road for residential allocation in the Core Strategy. The sustainability plan included in this document illustrates the sites ability to integrate into the local community by utilising nearby local services and facilities surrounding the site. It is within walking distance (approx 15 mins) to Jarvis Brook railway station, employment sites, neighbourhood centre and health centre. Other shops, pubs, recreation grounds and a primary school are all within only a few minutes walk of the site. The site plan identifies the potential area for allocation. The parcel of land to the west of the track leading to Walsh Manor Farm is circa 4 hectares and the land to the east of the track is circa 7 hectares. Together they could yield around 385 dwellings at a density of 35dph, however, there is scope for increasing the average density if considered appropriate. There are no overriding highway constraints to development on this land as access can be taken direct from Walshes Road. The topography of the land lends itself well to development across the site without impacting on wider views. Limited local views can be minimised with enhanced screening. Appropriate and carefull landscape mitigation and a sensitive design-led approach can ensure that this area could be assimilated into the adjoining urban area.

Option 12a

Section of Document:

Reason for comment:
Until robust employment and urban potentisl studies are produced, sites such as these should not be relied upon as deliverable.

Part of document: □ document □ chapter □ section ☑ option  
Option 12c  

Section of Document:  
Your View □ Agree □ No opinion ☑ Disagree  

Reason for comment:  
This area to the north east of the town lies within the AONB, and adjoins Heathfield park and a SSSI. In terms of topography the area’s prominence on higher ground along the ridge line makes it visible in the wider landscape. The setting of the town would be compromised by ribbon development in this location. This is not acceptable when a less sensitive alternative, closer to the town centre is available.

Consultee ID: Miss Kuppers  
103606 Rydon Homes Ltd  

Part of document: □ document □ chapter □ section ☑ option  
Option 12d  

Section of Document:  
Your View □ Agree □ No opinion ☑ Disagree  

Reason for comment:  
Area of search 12d, North of Heathfield College and Leisure Park is separated from the town by Heathfield Park. Although it has good access to the secondary school and leisure centre, other remaining facilities based in the town are approximately 1.7km away. Development of this site would not constitute an urban edge extension and would not be in compliance of National Guidance.
Option 12e

Reason for comment:
The area of search 12e at Sandy Cross South East of Heathfield has poor access into the town centre due to the narrow lanes. The area is at the most southerly part of Heathfield, which is some considerable distance from facilities and services that are located to the north of Heathfield, along the High street, Sheepsetting lane and station road. Although the majority of this site is outside the AONB, development will have a negative impact on the landscape due to long distance views to the south and the south east. There are more sustainable alternative areas of search.

Option 12f

Reason for comment:
The area of search is well related to the western edge of Heathfield situated on Ghyll road. It adjoins existing development to the south east and the north. The cross in hand primary school is located only 300 metres to the north of the area on Sheepsetting lane. The Heathfield Community Hall is also located on Sheepsetting lane. This provides a range of services and facilities such as a preschool group, a clinic, a recreational ground with football pitches and a range of social events. The high street that provides a good range of shops and services is less than 800 meters north east of the search area. The nearest bus station is situated next to the fire station and is approx 500 meters away. From here a school bus service runs to the Heathfield Community College. Ghyll road business area is located just 1km away providing local employment. It is therefore suitably located to reduce the need to travel by car and encourage walking or cycling. Of the options for expansion of Heathfield proposed in the Issues and Options paper, an urban extension to the south of Tilsmore is the most sustainable option for development (as is evident from the enclosed sustainability plan) and is supported by regional and national guidance. Rydon homes wishes to promote the suitability of land within the area of search as shown on the enclosed site plan. The site comprises approx 4.28 hectares of unmanaged grass and scrub land on the south west side of Ghyll road. Existing residential land lies to the north, and south east of the site. The site also adjoins the Jubilee park to the north west which is owned and managed by the parish council. The land South West of Heathfield, South of Tilsmore is well located to local facilities and services and benefits from reasonable public transport connections resulting in a positive impact on social objectives. Development within this area of search will help promote the viability and vitality of the town and maintain and enhance the function of Heathfield as an employment, shopping and service centre. This area is the most appropriate location of all the alternative options due to its proximity to the town centre. PPS7 enables development in the AONB where it can be demonstrated that it facilitates the economy and social wellbeing of the community. In this situation, the need to provide housing at Heathfield and the highly sustainable location overrides the AONB designation when considered against the potential alternatives.

Option 14d

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Further growth in this location may be better suited to employment floorspace, however, this could form part of a mixed use allocation
Option 14e

Section of Document:

Your View  ✓ Agree  □ No opinion  □ Disagree

Reason for comment:

The area of search to the west of Ridgewood represents an appropriate location and size of site for further consideration and identification in the Preferred Options report. Whilst there may be potential for housing provision at locations 14d & 14f, these would be larger in scale, requiring infrastructure improvements and longer lead-in times. The council should be seeking to identify a site at Uckfield which would not materially impact on the existing town centre highway problems, whilst meeting some of the housing land supply shortfall in a shorter timeframe. Planning policy guidance requires development to be well located in terms of accessing local services and facilities by non-car modes, or be accessible to passenger transport routes to provide sustainable means of travel to destinations further afield. This location meets such criteria. As with Sandpits, area of search 14e presents a real opportunity for new development to be integrated in a sustainable manner into the existing urban area of Uckfield. A wide range of services and facilities such as town centre retail, primary and secondary schools, employment, recreation and railway station are all within a two kilometre walking distance of the site. A regular bus service runs along Lewes Road providing a convenient service to the town centre and rail station. The bus stop is just outside the entrance to the Sandpits site. The site being promoted by Rydon Homes (see plan of area) is currently the curtilage of the property known as Thorncrest and is therefore deemed to be previously developed land. The site lies between Ridgewood Farm to the west and south west, existing and proposed housing to the east, and Ridgewood Manor Nursing Home to the north. There is an area of woodland within the site which is proposed for retention. The site has a developable area of circa 1.15 hectares and could yield around 40 dwellings at a density of 35dph. In addition, a small area of land to the north of Sandpits, within the settlement boundary, could be developed for about 7 dwellings. Vehicular access to both proposed sites is achievable via the adjoining Sandpits development. New housing on Thorncrest would not be visible from the A22 as it would be well contained through retention of woodland and within existing and enhanced landscaping.

Option 14f

Section of Document:

Your View  □ Agree  ✓ No opinion  □ Disagree

Reason for comment:

Availability and deliverability of land for housing in this area is questionable. The majority of the land is within one ownership. Approaches made by Rydon Homes were rejected suggesting an unwilling landowner.

Question 15i

Section of Document:

Your View  [ ] Agree  [ ] No opinion  [ ] Disagree

Reason for comment:
Rydon Homes wishes to draw to the attention of WDC the availability of an additional piece of land at Woodholm Farm, as shown on the attached plan. Rydon Homes has secured outline planning permission for the development of Woodholm and Welbury Frms under the non-statutory Local Plan Policies HA3 and HA4. There is a remaining area of developable land without planning permission which adjoins the southern side of the proposed Woodholm allocation which is equally suitable for residential development. This parcel of land is well related to existing developed areas. It no longer has any beneficial use due to the surrounding planned development of Woodholm and Wellbury Farms. This additional development would be well screened by new and existing development as well as extensive landscape buffer planting as part of the Woodholm & Wellbury development schemes. It has been agreed with the environment agency that this area of land lies outside of the Cuckmere river flood risk area. Therefore, there is no physical constraint to development on this land. Vehicular access is easily achievable via adjoining parts of the consented Woodholm Farm development or via Stroma Gardens to the east. The sites location provides sustainable links to local services and facilities in and around the town of Hailsham. The site is close to an existing bus route on Anglesey Avenue which provides a non-car based alternative travel option, with regular services to nearby schools, shops, employment and community facilities. Good public transport links are also available serving the wider area including Polegate and Eastbourne. The location of the site enables convenient and immediate access to an existing children's playground, as well as informal and formal public open space and new community facilities to be provided as part of the neighbouring development schemes. The site is approx 0.7 hectares and could yield circa 20-25 dwellings.

Part of document: Option 16d

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

These locations may have potential for residential development, however, this is subject to highway assessment to ensure that the impact of significantly increased traffic movements onto Shepham Lane can be accommodated. As Rydon's sustainability plan for Polegate shows, the proposed area of search is well related to the northern edge of the main town. It is contained by existing development to the south and the A27 to the north. The area is within 400 metres, 5 minutes walking distance of the primary school, playground, library and the community centre. The high street including the medical centres, banks, post office and railway station are within 1km, approx 12 minutes walk. The nearest bus station is approx 700 metres away to the south of School Lane. This bus stop serves routes to Lewes, Hailsham, Eastbourne and Langley. Approx 2km to the east of Polegate, on Dittons Road, is the Chaucer Industrial estate and Dittons business park, providing an area of local employment. It is therefore, suitably located to reduce the need to travel by car and encourage walking and cycling. The nearest secondary school is Willingdon Community School which is located approx 2km north of the site. There is a school bus service which runs directly from School Lane Polegate to Willingdon School which takes approx 10 minutes. A school bus service also runs from Dittons Road to Heathfield School which takes approx 30 minutes. Development within this area of search would occur without intrusion into the visibly open countryside between Hailsham and Polegate. Rydon Homes has acquired an interest in land at Grenleaf Gardens, Polegate which is suitable to accommodate some of the housing requirements for Wealden District. The site is identified on the attached plan. The site has a developable area of approx 1 hectare which is located between the A27 and Greenleaf Gardens. Development of this site could yield approx 35 dwellings. The site is not subject to any national planning designations and lies outside the flood risk area as defined by the Environment Agency. Development will have minimal impact on the wider landscape as it is well screened by existing trees and hedgerows to the north and east, and mature hedgerows to the south, which would be retained and improved as part of any landscaping of the proposed development. The Cuckoo trail runs through the east of the site. Due to the importance of this trail, Rydon proposes a landscape buffer along the eastern stretch of the site to help screen the development from the track. There is also the ability to provide open space to the south east of the site close to the Cuckoo Trail.

Question 16h

Rydon Homes supports the identification of growth in Polegate and Willingdon. Polegate is one of the low weald towns in Wealden. With a joint population of 13,700; 7,800 in Polegate and 5,900 in Willingdon, it has administrative, commercial and educational facilities, social and civic functions and is well served by a local network of roads and rail. Due to these facilities and services it is classified as a main town in Wealdens settlement hierarchy and is recognised as a sustainable location for significant development. The submitted south east plan has identified a need for further focusing provision in the Eastbourne-Hailsham area. Focus is to optimise the areas potential to provide employment space and associated housing in sustainable and strategic accessible locations along the A22 corridor, specified on Policy SCT6. Therefore, strategic locations should be allocated in the Polegate/Willingdon area due to its sustainability, accessible location along the A22 and its proximity and relationship with Eastbourne. As a location it is well served by both rail and road networks. It is situated 5 miles (8km) north from the centre of Eastbourne and 4 miles (6.5km) south from the market town of Hailsham and lies at the junction of the A22 main Eastbourne to London road, and the A27 Folkestone to Honiton Trunk Road. The rail link provides good and regular services to London, Eastbourne and Brighton. It is also easily accessible by bus as services from Eastbourne to Hailsham, East Grinstead, Uckfield, Heathfield and Tunbridge Wells all pass through. There is a wide range of facilities and services in Polegate, situated primarily along the high street. These include medical centres, an optician, banks, a railway station and a large number of retail outlets ranging from convenience stores to gifts, homeware and sports retailers. There is a large Co-op convenience store with a Post Office situated opposite the station and a Somerfields supermarket with a petrol station is provided at the Cophall roundabout north of Polegate. As such it is a sustainable community and an appropriate location for new residential development in accordance with national guidance; PPS 1 Delivering Sustainable Development and PPS 3 housing.

Option 17a

This area of earth is visually exposed from Hailsham Road, Dittons Road and the A27(T). Development of this scale seems excessive for the existing size of settlement and level of population
Option 17b

Reason for comment:
Development on this rising land would be extremely visible from the A27(T).

Option 17c

Reason for comment:
Development within this area of search is not related to Stone Cross as it adjoins the edge of Eastbourne. It is separated from the local service centre by the railway line. Such large scale development would require significant infrastructure improvements in this location and would not necessarily serve the needs of Stone Cross.
Rydon Homes supports the identification and ranking of Stone Cross in the Draft Settlement Strategy for the villages. Outside of the 5 main towns, it has the third largest population in the district after Wadhurst (including Durgates & Sparrows Green) and Forest Row. Stone Cross has been categorised as a Larger Local Service Centre with growth potential, as it meets all the criteria for provision of local services and facilities. The council recognises that where Stone Cross is not able to provide its own facilities it is well located in close proximity to the services of Polegate, Eastbourne and Hailsham. It is able to access local schools, shops, employment and recreation within walking distance or via good bus services. Rydon considers that the proposed areas of search in the Issues and Options paper fail to meet the need for housing in the most sensitive and sustainable manner. It believes that a more appropriate alternative to the south of Rattle Road could deliver the required housing without any significant limitations. The attached sustainability matrix and sustainability plan demonstrate how well located the site is in terms of accessibility to the facilities of Stone Cross and the surrounding locality, enabling new development to integrate effectively into the existing urban area. The majority of daily services are within acceptable walking distances/times. Stone Cross has a childrens nursery and a primary school, a doctors and dentists surgery as well as a dispensary. Its local convenience store is a Tesco. Community facilities include the church, community hall and public house. Childrens playspace and public open space are also close by to the town centre and to the proposed housing site. Local employment opportunities exist at small businesses around the village, as well as more significant opportunities at Dittons Park, about 2.6km away, approx half an hours walk. Langney, immediately to the south of Stone Cross, provides additional services in the way of secondary schools, a shopping centre and more formal recreation. Where journeys further afield are required to be made there are bus stops on the edge of the site on Rattle Road which provide access to routes serving the surrounding areas of Langney, Eastbourne and Polegate, including stops at Eastbourne hospital, Eastbourne & Polegate railway stations and a number of major supermarkets. Pevensey & Westham railway station is the closest railway station, providing a direct link to Eastbourne. It lies approx 1.85km from the site and can either be reached by walking in just over 20 minutes or by a regular bus service at peak times taking no more than a few minutes. The land being promoted by Rydon Homes, as shown on the attached site plan, is triangular in shape with strong tree screening along its south-eastern and south-western boundaries preventing views in or out of the site from a southerly direction. The northern side of the site is contained by Rattle Road with existing residential development on the other side. Existing housing is also located along the sites south western boundary and in part along its northern edge. Tree and hedgerow screening along the Rattle Road boundary will be enhanced as part of any development proposals. The site is approx 3.6 hectares of open, unused agricultural land which could yield 126 dwellings at a density of 35dph.

Question 18k

Section of Document:

Your View □ Agree ✔ No opinion □ Disagree

Reason for comment:

The concept of a new settlement is not supported by the South East Plan and is not therefore appropriate for further investigation for the plan period.
Nutley meets the criteria set out in Wealdons Draft Settlement Strategy for the villages, as a small local service centre and is identified as having intermediate growth potential. With an estimated population of 1,151 it is the 13th largest village in the district. It has a defined settlement boundary and certainly suitable for some expansion. In terms of services, the village is relatively well provided for. It has a convenience store, a petrol station, a place of worship, a nursery/pre-school, a primary school, village pubs, two restaurants, social club and several small enterprises providing significant employment. There is a large village green with an enclosed childrens play area and a sports pavilion catering for a range of sports & clubs. Nutley is well served by the A22. It lies about 4 miles/6.5km north east of Uckfield, 6 miles/9.6km south east of East Grinstead and 8 miles/13km south west of Crowborough which all provide regular bus and train services between the main towns and the village. Growth of Nutley will boost and support local services, provide opportunities for those who wish to stay in the village and help maintain its sustainability. Development within the area of search specified as land to the west of Nutley in the Core Strategy Issues and Options would be far more detrimental to the existing character of Nutley and the AONB. The area to the west slopes gently southwards and contains a significant number of open agricultural fields creating long distance views. Development of this site would create a larger impact on the countryside and cause far more harm to the surrounding High Wield AONB. Land to the north east of Nutley is the most appropriate location due to its relationship with the existing settlement and built form. The site is bounded by the A22 to the west and Crowborough Road to the north. A mature hedge and tree line extends along both road frontages. The rear gardens of dwellings within the existing development boundary for Nutley adjoin the southern boundary of the site, whilst a number of former agricultural buildings partially define its eastern boundary. Given the relationship of the site to the settlement boundary, the existing natural screening of mature hedges and trees and the residential development of the north, south and north west, the site is well contained and development would not represent an excessive intrusion into the countryside or be considered detrimental to the setting of the village. The development of this area would respect a natural extension of the existing linear development of the village. Rydon Homes wishes to promote the suitability of land within the area of search shown on the attached plan. The land known as Nutlin Nursery lies to the north east of Nutley and should be subjected to full SA/SEA as part of the core strategy process. The site comprises approx 2.3 hectares of nursery land and buildings and is suitable to accommodate the planned growth for Nutley. The site will be developed in a manner that respects the local character and distinctiveness of Nutley. Existing trees and hedgerows would be retained and enhanced as part of any landscaping of the proposed development. In conclusion, Rydon Homes supports the growth of Nutley. Development would boost and support local services, provide opportunities for those who wish to stay in the village and help maintain its sustainability. Land to the north east of Nutley, at Nutlin Nursery, is the most appropriate location for development which would contribute towards meeting locally generated housing need and as well as demand by the provision of suitable open market and affordable housing.
Rydon Homes Ltd

Part of document:  Option 21c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Rydon believes that the most appropriate location for development would be as an extension to the existing non-statutory Local Plan Policy V3 to the north of the high street. Development can be sensitively incorporated with a landscaping scheme which minimises impact on local and more distant views. This extension is approx 1 hectare and could yield around 30 dwellings in this village setting. However, additional scope for further expansion northwards could be considered by the council as part of its SA/SEA in order to accommodate larger numbers if determined to be appropriate as a subsequent phase of development.

Question 22e

Section of Document:

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:
Small scale growth in these locations may be appropriate in order to maintain the level of existing services and facilities. These settlements are also able to look to Heathfield for the majority of their daily needs. These villages are also constrained by AONB. Support has already been expressed for the identification of some development in the AONB in order to meet the strategic housing requirement in the most suitable manner. However, if such a landscape designation is to be compromised then this should be at the main town of Heathfield rather than less sustainable locations such as Cross in Hand, Horam, Broad Oak and Punnets Town.

Question 23f

Section of Document:

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:
Limited expansion of these villages may be acceptable, however, the results of the Strategic Flood Risk Assessment may impact on these settlements' ability to deliver development.
Part of Document: Wealden’s Communities

Reason for comment:
The character of towns and villages across Wealden District vary greatly, therefore, the appropriate density for new development is specific to its location. As a starting point it would be appropriate to apply a density of 35 dwellings per hectare. However, there needs to be flexibility in the application of density as this could range upwards or downwards depending on proximity to public transport nodes or existing lower density areas.

Reason for comment:
A policy specifying dwelling mix will need to be sufficiently flexible enough to take account of local distinctiveness, circumstances, markets and demands. Rydon supports balanced communities. See response to question 19 which seeks the ability to provide the appropriate mix of dwelling types and sizes to meet local demand for open market housing. It is not considered that the demand is for small dwellings in all cases.

Reason for comment:
Objective SO2 is too prescriptive at this stage until density policies have been determined elsewhere within the Core Strategy.

<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>

### Option 6a

**Section of Document:**

**Consultee ID:** 103729  
Mr Cumming

**Agent ID:**

**Reason for comment:**

This partly depends on what you count as a town, but many villages are at bursting point and can only be expanded significantly by spoiling their character. Hence major towns such as Crowborough, which can support growth should be targeted first.

<table>
<thead>
<tr>
<th>Part of document:</th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>

### Option 7a

**Section of Document:**

**Consultee ID:** 103729  
Mr Cumming

**Agent ID:**

**Reason for comment:**

The system seems to be very mechanical and bears no relationship to the established character and needs of smaller communities. If every medium sized village and town is turned into a dry exercise in town planning you will destroy much of what makes the Weald so special.

Page 443 of 6217
Consultee ID: Mr Cumming

Agree

I am very concerned that WDC are setting off on a journey that will see significant encroachment on AONBs. In particular, as a resident of Wadhurst, I do not believe that the council has realised the existing strains in the village. In order to support more development there would need to be wholesale upgrading of sewers, water mains, schools, doctors etc. Village car parks would need to be expanded and the railway station would need to be upgrade too. This is all completely out of keeping with a contained village in an AONB. I realise that there is much pressure being exerted from Whitehall on these matters but this is the time to resist and protect what makes our district special.

Consultee ID: Mr Wishart

Disagree

Largely disagree - traditional building will seriously affect these areas and accelerate the urbanisation of our countryside. A very limited programme of self sufficient and sustainable 'off-grid' dwellings may be acceptable provided that they are built using locally sourced, renewable materials.

Consultee ID: Mr Wishart

Disagree

We must target higher levels of sustainable and renewable energy resources.
The higher the target the better, though this should not simply be focused on wind / solar but on all forms of sustainable energy.

Town infrastructure must be considered - a town is no more suitable for development than a village if there is no capacity or no suitable infrastructure available to support the increase in demand for services.
Consultee ID:  Mr  Wishart  
103749

Part of document:  □ document  □ chapter  □ section  ✔ option

Option 11a

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
- with reservations. It would seem that a town centre location will give an opportunity to provide higher density housing with good facilities nearby, however this may serve to increase town centre morning and evening congestion as those living in the development commute to their workplaces - there seems to be little employment opportunities in Crowborough.

Consultee ID:  Mr  Wishart  
103749

Part of document:  □ document  □ chapter  □ section  ✔ option

Option 11d

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
- Western Road is already dangerous for pedestrians due to pavement parking and HGV traffic, any increase in traffic flow along this road is inappropriate. - Increase in traffic will further deter families from walking to and from the local schools - Jarvis Brook already has a school why not extend this instead of justifying a new build? - the railway line is already a 'victim' of it's own success with many peak time services getting overcrowded. Any development must be accompanied by a significant increase in rail capacity including extended service hours, peak time frequency, car park capacity and bus services to the station. - Crowborough and Jarvis Brook do not have adequate public transport links to the main centres of employment and without these links any development here will be reliant on the car; there simply isn't enough employment locally to support this size of development. - What leisure facilities will be built to support this development? There must be some thought given to the requirements of both primary and secondary school age children who will live in and around this proposed development.

Consultee ID:  Mr  Wishart  
103749

Part of document:  □ document  □ chapter  □ section  ✔ option

Question 11f

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
Any of these developments will serve to highlight the inadequacies of the town transport and community infrastructure. There must be serious investment in the town not just house building. As it stands Crowborough has the infrastructure of a village with a population of a large town - where are the cinema, theatre, hotel, tourist information, cycle trails, youth clubs, etc. that will support the new homes and the tourists enticed to the ‘gateway’ to Ashdown Forest?
Reason for comment:
The sentiments are admirable BUT all of the 'promises' rely on funding from developers, in my opinion this is a wholly unsustainable position - it virtually guarantees facilities that are designed to appease the planners and not to serve the community on who the development has been imposed.

Reason for comment:
Define: 'affordable' 'viable'

Reason for comment:
Have to agree with the sentiment of this but in reality this is pointless - I would not consider any area mentioned in this document as having good public transport. In most of Wealden the bus service provision starts too late in the day for people to get to work and ends before they can leave work to get home; the rail service is adequate to get in and out of London but poor for commuting within Wealden. On the whole public transport is too infrequent and expensive.
Consultee ID: Mr Wishart 103749

Part of document: option 27b

Section of Document:

Reason for comment:
The opening of this section should not be dependent on development and should be accompanied by an increase in capacity to ensure that commuters 'upstream' of Uckfield don't see a degradation of service levels or are forced to stand all the way to London.

Consultee ID: Mr Wishart 103749

Part of document: option 27f

Section of Document:

Reason for comment:
No matter how many spaces are provided it won't be enough.

Consultee ID: Mr Wishart 103749

Question 12h

Section of Document:

Your View         □ Agree   ✓ No opinion   □ Disagree

Reason for comment:
this is a bit of a catch all! If a new multipurpose community facility is not to include a swimming pool, to which to the majority of locals can walk then what is envisaged? Any pool should not generate additional traffic in outlying villages. Rest of vision seems reasonable.

Your View  □ Agree  □ No opinion  □ Disagree
Reason for comment:

Section 1.23 states “The housing requirements are driven by several key factors including household projections, demographic characteristics, infrastructure and environmental constraints. Economic regeneration and growth and identification/release of urban potential are also major drivers. Influences on demographic characteristics include factors such as reductions in household size and increased life expectancy. An increase in the instances of ‘concealed households’ (where people are forced to share or to stay with parents due to affordability) also impacts on overall housing requirements”. Despite these words, the impression is that the target housing figures are top-down coarse projections imposed by government on the area without any consideration of actual needs on a community by community basis. The figures are treated as an unarguable “given” and the consultation exercise only tries to deal with how they can be met (or exceeded) rather than dealing with what they mean. I feel that the Development Framework would work much better in the context of a serious bottom-up examination of each community’s current real needs in terms of facilities, infrastructure and additional (and particularly affordable) housing and extrapolate these sensibly over the next 20 years. Having established this baseline requirement, seek to understand how or if this could be implemented locally within each community and only then deal with the distribution of any excess development requirements between other communities. A final phase of this process would be to examine projections of any net movement of populations into the area and determine a policy that will balance this against infrastructure and environmental constraints and the danger of fundamentally changing the character of the area. If necessary this would entail imposing an appropriate cap on the scale and rate of implementation of new developments rather than trying to address gung-ho targets.

Section of Document:  
Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  √ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Provided this is limited to small developments within existing settlements, determined in response to immediate expressed local needs and strictly maintaining the character of those settlements. This to some degree will help ease the development pressure on other villages that deserve to maintain their character but are not blessed with AONB status.

103759

Part of document:  
☐ document  ☐ chapter  ☐ section  √ option

Option 2a

Section of Document:

Your View  ☐ Agree  ☐ No opinion  √ Disagree

Reason for comment:
Whilst advocating aiming high and applying the full scrutiny of sustainability analysis to any new development, “10% of its energy generation” seems to me an arbitrary numerical value. It is not clear here what represents 100%. We should be concerned with all energy and environmental "costs", not just what the dwellings consume. Therefore, such costs associated with construction, infrastructure enhancement, occupants’ transport requirements etc are all part of the equation. It is not going to be feasible or visually desirable to provide local energy generation in all instances. Better to concentrate on well understood methods of limiting energy consumption.

103759

Part of document:  
☐ document  ☐ chapter  ☐ section  √ option

Option 2b

Section of Document:

Your View  ☐ Agree  ☐ No opinion  √ Disagree

Reason for comment:
See response to Option 2b
Settlement boundaries should in general be maintained to retain the overall character of the area. Any expansion should be the exception and needs to be justified on the basis that this will accommodate development needs identified by and approved by that community. It should not be seen as a means of addressing externally imposed targets. In some circumstances, it may be appropriate to contract settlement boundaries to protect an area from unnecessary development.

The percentages expressed in Questions 6a, 6b, 6c are meaningless if applied as a target to the whole area. Better that all necessary (i.e. needed) developments are appropriate to each community and therefore generally meet with local approval. The percentage split between towns and villages will then be what it will be if it is the product of a bottom-up planning process.

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Option 7c  

Section of Document:  

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree  

Reason for comment:  
Disagree on the basis that growth potential is currently poorly defined. Incorporate growth in villages where a strong local need is identified. If that growth cannot be fully accommodated within that village, then consider distribution of the excess requirement between other settlements with a surplus of potential development space over immediate local needs. Again too much emphasis on meeting targets rather than addressing needs.
Option 9a

Reason for comment:
Uckfield has reached (or exceeded) sensible critical mass. The town centre and road systems need a massive rethink to properly serve the existing population. If this were done, in conjunction with a flood relief scheme and the re-opening of the railway to Lewes (WITHOUT a town centre level crossing, which is not beyond the wit of man), then an appropriate level of further development might be acceptable.

Option 9b

Reason for comment:
Looks like Uckfield is always in the mix despite its problems. As stated elsewhere, you should be looking at the needs for each community, not trying to accommodate externally imposed targets.

Option 9c

Reason for comment:
See response to Question 9b. If the needs of each community were used to drive the planning process, the level of development in each town and village stands a chance of being appropriate and acceptable to most residents.
Reason for comment:
All the ecological/environmental arguments listed by others. Location prevents proper integration with existing town but increase in population will impact on ability of highways and services within Uckfield to cope. Infrastructure currently inadequate. Likely significant increase in commuting by car to other centres within and outside Wealden with associated environmental impact.

Reason for comment:

Consultee ID: Mr Burgess

Part of document: Option 21a

Section of Document:

Reason for comment:

Any such settlement would still be too far from Uckfield town centre to be sensibly integrated but the increase in population will impact on ability of highways and services within Uckfield to cope. Infrastructure currently inadequate. Likely significant increase in commuting by car to other centres within and outside Wealden with associated environmental impact. What are the actual needs of Maresfield? Apparently 20 units of “affordable housing” appear to be required according to Matrix B of the Draft Settlement Strategy.

Consultee ID: Mr Burgess

Part of document: Option 21b

Section of Document:

Reason for comment:

Precisely where up to 430 dwellings could be accommodated within Five Ash Down is not clear, especially as this would be in addition to any homes built on the Grampian site. Any such settlement would still be too far from Uckfield town centre to be sensibly integrated but the increase in population will impact on ability of highways and services within Uckfield to cope. Despite the lack of integration with Uckfield, this development will inevitably close another rural gap between settlements and more wildlife corridors will be lost. Infrastructure currently inadequate. Likely significant increase in commuting by car to other centres within and outside Wealden with associated environmental impact. Five Ash Down currently has its own identity which will be utterly obliterated by an increase in size of between 105% and 174% (based on your figures of 247 current dwellings). How does this square with the notional 20% increase through development proposed in the Draft Settlement Strategy? Admittedly this cap can be raised due to “urban design-led opportunities” (and what are those?), but we’re talking here of a proposed growth of nearly nine times the notional “acceptable” figure. What are the actual needs of Five Ash Down? Apparently NO “affordable housing” is required according to Matrix B of the Draft Settlement Strategy.

Option 25a

Section of Document: 

Your View   □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
Not clear what is meant by "more housing should be in the form of small dwellings". More than what? (More than 50% of all new housing? More than has been provided elsewhere?). Obviously a proportion of smaller dwellings is desirable to meet local needs/demands but understanding whether this is "more" or "less" is down to an appreciation of each community's needs.

Reason for comment: Densities should be determined on a site by site basis taking into account local needs and demands and the nature of existing dwellings.

Consultee ID: Mr Burgess  
Consultee ID: 103759

Part of document: Option 24d
Section of Document: Agent ID: Disagree
Reason for comment: Densities should be determined on a site by site basis taking into account local needs and demands and the nature of existing dwellings. Proximity to public transport facilities is unlikely to make people give up their cars and associated garaging space. However, a percentage of the population would be quite happy to live in urban surroundings with a minimal provision of garden space. If such a demand is significant, then address it through areas of higher housing density.

Consultee ID: Mr Burgess  
Consultee ID: 103759

Part of document: Option 25b
Section of Document: Agent ID: Disagree
Reason for comment: Proportions of affordable housing should be determined through an assessment of real needs/demands for each community. Little point in having a vote on percentages.

#### Reason for comment:

Agree that the re-instatement of the railway between Uckfield and Lewes should be a long term priority but not at the expense of a massive new development in the Isfield area. A properly developed scheme with doubling of the existing railway, electrification and re-opening from Eridge to Tunbridge Wells would sensibly enhance the local rail network to a level that would encourage people to use it. Note that the relatively simple measure of the introduction of modern diesel rolling stock on the Uckfield Line has created a massive increase in usage. Ideally, the level crossing in the middle of Uckfield should be avoided. Any major civil engineering works in Uckfield could be planned in conjunction with flood management measures and town centre road scheme. Possible consideration for an Uckfield Parkway station off the bypass?

#### Reason for comment:

Hard to disagree with most of the sentiments expressed. How it will work out in practice is another matter. What is Wealden's interpretation of "necessary development for homes"? Government targets?
Looking at the comments made by others, I would like to bet that most of your respondents were NOT in the 18 to 49 age range. If this is so, you have failed to get input from those people who are going to be most affected by future developments. If nothing else, check on the ages and occupations of all those who have replied, then consider how you fill the gaps. Though I would wish it otherwise, there's a fair chance that many of those who have replied won't even see 2026.

Heathfield is a very small town sitting on very a poor road network which cannot easily be improved, so any development of the suggested areas will turn the roads from very difficult to impossible, as the large majority must travel by road to find employment. At present the A267 is at a standstill from Broad Oak in the east to beyond Cross In Hand in the west each morning from 7.30 to 9.00 and each evening between 4.30 to 6.30 and backed up on the A265 Little London Road forcing many motorists to race along totally unsuitable country lanes with the inevitable results. So until the road network is improved it cannot take any more development in and around the Heathfield and Cross In Hand area without causing total misery to the people already living there. The first thought of new planning to any area should take into account those already living there and deal with their needs, ie roads, open park areas, shops, employment, public services and transport. None of these are adequate at the present time. All of these points should be addressed before any more development takes place.
Option 22a

Option 19a

Section of Document:

Your View

Reason for comment:
Concern about land between Priory Road and Brambletye Bends and impact on AONB, wildlife, quality of life and Forest Row services. Concern also regarding flooding, health services, water and power shortages and increase in traffic

Option 14c

Section of Document:

Your View

Reason for comment:
Land could be allocated north of Framfield Road at Bird-in-Eye. It would be well related to the town centre, enabling access by foot and cycle and would not damage the landscape. The area to the east of the town would be the least damaging in landscape terms. The site is deliverable in terms of the criteria in PPS3.
Uckfield is the least constrained in landscape terms of the 3 principle settlements and is better served by public transport provision. The spatial objectives for Uckfield should include reference to the need for continued and improved housing delivery to provide for affordable housing opportunity and choice.

- [ ] chapter
- [ ] section
- [x] option

**Option 14a**

**Section of Document:**

**Your View**
- [ ] Agree
- [ ] No opinion
- [x] Disagree

**Reason for comment:**
The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern. The area is rich in ancient woodland, herb-rich grassland, ponds, streams and ancient common. The site is remote from existing sewage treatment facilities and the provision of sewage handling facilities may result in risk to health and odour escape.
Option 14b

Section of Document:

Your View ☑ Agree ☐ No opinion ☑ Disagree

Reason for comment:

The area is home to a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern. The area is rich in ancient woodlands, old herb-rich grassland, ponds, streams and ancient common. The area is effectively divided for pedestrian access to Uckfield by the nature of Snatts Road which is a narrow lane without benefit of pavement and cut between vertical banks at one end. The area is remote from the existing sewage treatment facilities and presents difficulties in providing a safe and odour-free sewage handling facility.

Option 14c

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

I am surprised that no plan is in place to improve road access to the North via this end of Uckfield to relieve some of the pressure on the Uckfield by-pass. I believe that there are insufficient means to cross the river Uck either on foot or by car and provision of dwellings in the area towards Framfield would add to the logic for providing additional river crossings.

Option 14g

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

Uckfield town centre has not been planned as a whole and presents a jumble of architectural styles which are not all pleasing to the eye. The land in the town centre has not been used to best advantage. In my view there is the scope to develope the town centre to provide significant increase in dwellings with the advantage of being located close to public transport facilities and without significant loss of public access areas.
Consultee ID: Mr Nash
Consultee ID: 103912
Part of document: □ document □ chapter □ section ✔ option
Question 14i
Section of Document:
Your View □ Agree □ No opinion ✔ Disagree
Reason for comment:
Having lived in Uckfield for the last 30 years, I am dissapointed at the lack of either medium term or long term planning for growth. The previous local hospital site was more accessible than the current site, the Train service no longer operates on Sundays, medical facilities have not expanded to meet the 100% increase in population, the only new road (Uckfield by-pass) is already over-loaded, only one secondary education facility exists leading to a concentration of traffic to and from the facility.

Consultee ID: Mr Williams
Consultee ID: 103948
Part of document: □ document □ chapter □ section ✔ option
Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View ✔ Agree □ No opinion □ Disagree
Reason for comment:
Development should be allowed in the high weald AONB to help meet the Council's strategic housing requirements.

Consultee ID: Mr Williams
Consultee ID: 103948
Part of document: □ document □ chapter □ section ✔ option
Option 5a
Section of Document:
Your View ✔ Agree □ No opinion □ Disagree
Reason for comment:

Consultee ID: Mr Williams
Consultee ID: 103948
Part of document: □ document □ chapter □ section ✔ option
Question 5c
Section of Document:
Your View □ Agree ✔ No opinion □ Disagree
Reason for comment:
The settlement boundary should be expanded at East Heathfield in line with option 12c (submitted proposal with map)
Consultee ID: Mr Williams 103948 Kember Loudon Williams

Option 6a

Reason for comment:
Agree with the proviso that growth including housing development should be included in and around settlements.

Option 9a

Reason for comment:

Option 9b

Reason for comment:

Option 9c

Reason for comment:
Consultee ID: 103948  
Kember Loudon Williams

Part of document:  option

Section of Document:

Reason for comment:
Support enhancing Heathfield's strategic role. There should be integrated, comprehensive planning facilities.

Consultee ID: 103948  
Kember Loudon Williams

Part of document:  option

Section of Document:

Reason for comment:

Consultee ID: 103948  
Kember Loudon Williams

Part of document:  option

Section of Document:

Reason for comment:
Consultee ID: Mr Williams, Kember Loudon Williams

Part of document: option 12d

Section of Document:

Your View: Disagree

Reason for comment: Your View
Option 25b

Section of Document:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
A consistent affordable housing threshold should be applied at no more than 30%. There is a risk that higher rates will cause land to be withheld from the market and the yield of homes will fall as a result.

Option 25c

Section of Document:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Option 25e

Section of Document:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
Option 28b

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Sport England strongly advocates the principle that developers should provide sport and recreational facilities or contributions in lieu of them to meet the demands that are generated by their developments. This is supported by guidance in PPG17. Sport England Developer Contributions 'Kitbag' provides advice and guidance on securing contributions for sport and recreation. It also includes the Sports facility Calculator which provides estimates of contributions for 3 types of built facility. Sport England welcomes the Open Space and Recreation Assessment work that the authority has carried out which can be used to develop Supplementary Planning Documents to secure contributions.

Option 28c

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Sport England supports this policy and is committed to the protection of existing sports facilities which should only be permitted to be lost if they are replaced. Sport England's policy set out in "Planning for Sport and Active Recreation - Objectives and Opportunities" states: PLANNING POLICY OBJECTIVE 2: To prevent the loss of facilities or access to natural resources which are important in terms of sports development. Should redevelopment be unavoidable, an equivalent (or better) replacement facility should be provided in a suitable location. This proposal is also consistent with the guidance in PPG17.

Part of document: ☑ option  
Section of Document: Option 18g  
Your View: ☑ Disagree  
Reason for comment:  
I have always been totally opposed to any major development in this area until such time as proper and very much needed infrastructure has been put in place. It has been said countless times by countless people over years, that this area is already on the verge of gridlock. Our road system is extremely bad, we have a very poor public transport system, which in the places it does operate is very expensive. Our doctors and dentists are over subscribed and undermanned, Our local hospital is being threatened with "Down Sizing" which is ridiculous under the circumstances. Most of our schools have to use "temporary classrooms" because they do not have enough classrooms to house the children they already have. The water and sewage services are also struggling to keep pace. The list could go on forever. For these reasons alone I would oppose such large development. Also to develop an area like ours in this manner would completely destroy the rural and much needed green belt between us and the coastal towns and larger inland towns, it would also wipe us out as a village with hamlets, we would become a suburb of Eastbourne.

Consultee ID: Miss Gould  
Part of document: ☑ option  
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty  
Your View: ☑ Agree  
Reason for comment:  
Yes, we do need more housing, we need affordable homes and more importantly, we need more social housing, we need affordable homes and more importantly, we need more social housing, such as council owned and rented. This area has a very low income per capita, with most people earning less than £20,000 per annum. Buying a home is out of the question, most new housing in this area has so far been taken up by in comers on higher incomes.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mr Flude Agent ID: 104152

Part of document: [ ] document [ ] chapter [ ] section [✓] option

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View [✓] Agree [ ] No opinion [ ] Disagree

Reason for comment:
Provided that such developments are small, in keeping with the area, and to assist local people. Large commercial developments should not be allowed.

Consultee ID: Mr Flude Agent ID: 104152

Part of document: [ ] document [ ] chapter [ ] section [✓] option

Option 2a

Section of Document:

Your View [ ] Agree [ ] No opinion [✓] Disagree

Reason for comment:
Obviously energy saving is to be recommended but more targets as to what 'must' be done are not helpful. Individual areas cannot necessarily be expected to generate the same savings as other areas. We do not want a proliferation of wind farms, that would destroy the unspoilt views, just to meet specific targets. In any case 10% is an idealistic value.

Consultee ID: Mr Flude Agent ID: 104152

Part of document: [ ] document [ ] chapter [ ] section [✓] option

Option 2b

Section of Document:

Your View [ ] Agree [ ] No opinion [✓] Disagree

Reason for comment:
For reasons given in my answer to Option 2a.

Consultee ID: Mr Flude Agent ID: 104152

Part of document: [ ] document [ ] chapter [ ] section [✓] option

Option 3a

Section of Document:

Your View [✓] Agree [ ] No opinion [ ] Disagree

Reason for comment:
A balance is always to be considered. Generally such land would and should be taken up, but in the case of specific areas not being so utilised it seems sensible to allow mixed or other uses.
Option 3b

Reason for comment:
Provided 'redevelopment' does not mean 'no further improvement or redevelopment to improve the business potential.'

Option 3c

Reason for comment:

Option 3d

Reason for comment:

Option 4a

Reason for comment:
Provided that the A27 (T) link is constructed to the Cophall Farm roundabout and the A27(T) is dualled and improved to provide good road access and communication.
Consultee ID: Mr Flude
Part of document: ☑ option
Section of Document:

**Section of Document:**

**Your View**  ☐ Agree  ☐ No opinion  ✓ Disagree

**Reason for comment:**
Option 8a

Reason for comment:
Provided that the A27(T) link is constructed to the Cophall roundabout and improvements by way of dualling are made to the A27(T) to ensure good road connections from the west to the A22.

Option 16a

Reason for comment:
Provided the A27(T) link is constructed to the Cophall Farm roundabout to provide good road access.

Option 16b

Reason for comment:
Has potential but beware of urban sprawl towards Hailsham. Would need the A27(T) link to be constructed to the Cophall Farm roundabout to provide good road access.
Consultee ID: 104152  
Mr Flude

Part of document:  
- Option 16c

Section of Document:

Your View:  
☑ Agree  
☐ No opinion  
☐ Disagree

Reason for comment:

Some redevelopment in Polegate could be beneficial.

Consultee ID: 104152  
Mr Flude

Part of document:  
- Option 16g

Section of Document:

Your View:  
☑ Agree  
☐ No opinion  
☐ Disagree

Reason for comment:

The green break between Polegate and Lower Willingdon should be maintained and designated a green open space in the Framework. No further road connections to the A2270 should be made as this road is already at capacity. If exits to the east have been ruled out as not possible then this area should not be considered for further development.
Question 16h

Section of Document:

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

In any new area for development especially to the west or northwest of Polegate consideration should be given to the provision of local shops, medical facilities, community centres and churches. The possibility of changes to the services provided by the Eastbourne District General Hospital should be taken into consideration when planning large numbers of new houses in the area. People do need good medical services especially in an emergency and at times of child birth.

Option 25b

Section of Document:

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Affordable housing is very important and should be provided otherwise many young buyers will stand no chance of getting into the housing market.

Option 25d

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ✔ Disagree

Reason for comment:

Option 25f

Section of Document:

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Consultee ID: Mr Flude
104152

Part of document: Option 25g

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:

I do not see why any reduction in stopping at other stations would affect this Option.

Consultee ID: Mr Flude
104152

Part of document: Option 26a

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:

Strongly disagree. The improvement to the A27(T) is urgent to improve communications and to improve safety especially if more development is to take place. With the new A27(T) link to Cophall roundabout in place then the new A22 might used to capacity to reduce traffic on the A2270. Eastbourne would then be better served both for residents and businesses. A well built new A27(T) road would not be a detriment to the environment. East Sussex suffers from poor road communications and the east-west link is particularly bad.

Consultee ID: Mr Flude
104152

Part of document: Option 27c

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:

I do not see why any reduction in stopping at other stations would affect this Option.

Consultee ID: Mr Flude
104152

Part of document: Option 27d

Section of Document:
Your View  Agree  No opinion  Disagree

Reason for comment:

Strongly disagree. The improvement to the A27(T) is urgent to improve communications and to improve safety especially if more development is to take place. With the new A27(T) link to Cophall roundabout in place then the new A22 might used to capacity to reduce traffic on the A2270. Eastbourne would then be better served both for residents and businesses. A well built new A27(T) road would not be a detriment to the environment. East Sussex suffers from poor road communications and the east-west link is particularly bad.
Consultee ID: Mr Flude

Part of document:  
- Option 28a

Section of Document:

Your View: Agree

Reason for comment:
Locally a start could be made with Hindsland between Polegate and Willingdon but I am sure than many other towns would also benefit from such a proposal.

Consultee ID: Mr Flude

Part of document:  
- Option 28b

Section of Document:

Your View: Agree

Reason for comment:
I do not see why developers should not contribute to such provision.

Consultee ID: Mr Flude

Part of document:  
- Question Twenty Nine

Section of Document: Housing Delivery

Your View: Agree

Reason for comment:
Strongly agree. Developers should build what they have applied and obtained permission for and this should be part of the Conditions of the Application determination. Planning permission should not be seen as a way of increasing the economic value of land for other financial advantages to benefit the developer.
Question Thirty
Section of Document: Infrastructure Requirements

Reason for comment:
This question might have been better if split up. 30a and 30b - the A27(T) and the link to Cophall roundabout is needed urgently especially if new development is to take place in the area. This would improve east-west communications and make for a safer road. It would improve communication to Eastbourne. Other engineering features need to be matched with the need as they arise. Water supply and waste treatment facilities will obviously be needed. Medical facilities and the services provided by the Eastbourne District General Hospital are also very important and will be required to cater for the new development.

Question 31a

Reason for comment:
Generally agree, but improvements to the A27(T) are needed to enhance east-west communications and a better route to connect with the A22 to Eastbourne.

Question 32a

Reason for comment:
But do not forget the need to improve the A27(T) as a good east-west communication is required.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 104211
Agent ID: Mr Kehoe
Tunbridge Wells Borough Council

Option 13a

Section of Document: Option 13a

Your View: Disagree

Reason for comment:

1. Tunbridge Wells Borough Council objected to the allocation of the northern part of this site for 70 dwellings when it was proposed to be included in the Wealden Local Plan Review: Revised Draft, November 2004. The grounds for objection were fourfold: a. Housing Land Supply: objection to the release of greenfield land; b. Impact on Tunbridge Wells Infrastructure: impact of development focussed on Tunbridge Wells but not clear that development contributions would be received by this Authority; c. Environmental Issues: Impact on setting of Royal Tunbridge Wells and SNCI; d. Traffic Impact: limited assessment of extent of highway impact. 2. The Council recognises that the policy framework surrounding housing supply has changed since 2004 and thus appreciates the rationale for Wealden’s consideration of the enlarged area in its Issues and Options Report. However, the Council’s concerns and previous grounds for objection, given above, remain largely unchanged in relation to the current proposal: Housing Land Supply 3. Given the location of the area away from the main urban centres in Wealden, it is questionable whether a housing development here would in fact meet the needs of Wealden’s residents, whether or not the numbers contribute to Wealden’s draft South East Plan requirements. In the context of housing land supply in Tunbridge Wells Borough, however, the allocation of this site would be premature. Given that development here would be an extension of Royal Tunbridge Wells, it is appropriate to consider how the proposal would be viewed were it located within Tunbridge Wells Borough. 4. In terms of housing targets, this Council currently expects to provide approximately 40% over its Structure Plan requirements for the period 2001-2011. The great majority of development continues to be on brownfield land, with 97% coming from this source in 2006/07. The potential for future development to be focussed on the Borough’s town centres, which will be explored by the Council’s programmed Area Action Plan, is very likely to drive the continuance of this trend. Thus, the Council would not wish a precedent to be set for the release of greenfield land in this part of the Borough. Moreover, in the “Rest of Wealden”, the part of Wealden District bordering Tunbridge Wells Borough, Wealden is also exceeding its draft South East Plan housing targets with brownfield windfall development (para. 4.53). 5. It is recognised that Wealden has a limited supply of brownfield land with which to demonstrate a five-year rolling supply of developable land for housing (in line with PPS3). However, the performance of small brownfield sites to date would indicate that Wealden District has a forceful case for seeking a substantial allowance for counting these towards future projections of housing delivery. This Council would wish to see this case made prior to considering the allocation of greenfield sites that could lead to greenfield release in Tunbridge Wells. Impact on Royal Tunbridge Wells Community Infrastructure 6. Residents of development in this area are very likely to use the services and facilities (including schools, health, recreation and employment) provided in Royal Tunbridge Wells town centre before using those in more distant centres in Wealden. Wealden District Council has not, however, demonstrated how the necessary infrastructure to support its proposal would be provided and neither is the proposal underpinned by the co-operative cross-boundary working required by the LDF process. For example, it is noted that the site originally chosen for a new school at Frant is now considered to be unsuitable. 7. Notwithstanding this objection, were a site to be allocated through the LDF process, or indeed proceed by way of a planning application, this Council would wish to engage in cross-boundary negotiations in an effort to mitigate the impact of the development upon the community infrastructure provided at Royal Tunbridge Wells. It would expect all benefits from S.106 Agreements and development contributions to accrue to Tunbridge Wells Borough. Environmental Issues 8. The Council’s concerns in relation to the SNCI that forms part of the site remain the same as in 2004. The SNCI should be surveyed to establish its present value prior to a site being allocated, in order that...
mitigation measures are a central consideration in any forthcoming development proposals. Traffic Impact 9. The Council is concerned that the local road network around Royal Tunbridge Wells is already severely congested at peak times and Wealden’s Report notes that a development of this scale may pose additional junction capacity issues. No allocation should be made before it could be demonstrated by comprehensive Transport Assessment and modelling that the traffic impacts of the development could be mitigated. It is noted that access to the site would be provided in Tunbridge Wells Borough. Kent County Council should therefore be consulted as Highway Authority. 10. In summary, the Council objects to the potential allocation through the LDF process on the following grounds: · Development in this location would not necessarily meet the housing needs of Wealden’s residents; · An allocation would be premature in the context of the housing land supply in Tunbridge Wells Borough, of which the development would effectively be a part; · A premature greenfield allocation could prejudice the preferred focus for the future development of Royal Tunbridge Wells to be on previously developed land; · A development of this scale is likely to place undue pressure on the community and transport infrastructure provided at Royal Tunbridge Wells. 11. Were this development to proceed by way of allocation or planning application, the Council would wish to see the following concerns addressed: · That mechanisms were in place to enable the impact of the development upon Tunbridge Wells infrastructure to be addressed; · That the value of the SNCI be fully established and harm to it be mitigated; · That the transport and traffic impacts of the development would not be to the detriment of transport system serving Royal Tunbridge Wells.

Consultee ID: Mrs Piper
Consultee ID: 104310
Part of document: ☑ option
Section of Document: Option 7d
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:
Usually the village shops and pub are the life of a village community. Once they're gone, the village dies apart from tourist trade. Littlelington is an example of this happening. Alfriston is now a major tourist attraction not a village anymore.

Reason for comment:

I feel Hailsham should fight to keep its cattle market as Hailsham is well known as a market town and I feel strongly that animals should not be transported long distances

Section of Document: Question 17d

Your View ✔ Agree □ No opinion □ Disagree

Reason for comment:
This is a good area for growth because it is in the Eastbourne / Polegate / Hailsham triangle; it has the benefit of the new Polegate bypass and the new road into Eastbourne, the road to nowhere as it was known.

Question 32b

Section of Document:

Reason for comment:
I feel the questionnaire is well thought out and looks at many aspects of planning for the future. If development takes place in Hailsham / Polegate and Willingdon, it is important that we have a Hospital that is big enough to cope with many more people. Also, water supply is going to be important. I feel strongly that the AONB should not be developed or else what is the point of giving it that designation. However, you will see I have said some villages in the High Weald AONB could possibly be considered because of the good rail links. Also Horam and Broad Oak and Cross in Hand are possibilities because of Merrydown - brownfield site and potential access from A265 but in general I would be against development in AONB. Thank you for giving people the opportunity to make their representations on the LDF. I feel it is well worth taking the time to complete the questionnaire. Infrastructure is vital to the whole of Wealden for the future.
Part of Document: Wealden's Landscape
Reason for comment:
Permitting residential re-use of redundant farm buildings Biodiversity - may require more detailed nature conservation survey.

Reason for comment:
A detailed landscape sensitivity and capacity assessment is required as an evidence base. Water Cycle - concerned that water supply needs can be met and impact of biodiversity. Concern regarding potential levels of development around Uckfield and Forest Row in relation to flooding.

Reason for comment:
Only for justified social/affordable housing needs associated with specific villages. Anything in excess of these needs should be of small scale and respect landscape character.

Reason for comment:
Higher target should be set. Requires improving energy efficiency for new homes.
Consider that it is preferable to keep the economy of the region in balance with the natural environment.

Mostly small businesses are supported by part time ancillary workers, which is generally insufficient income to support a mortgage.

Your View: Disagree

Reason for comment: 
Recommend 90% should be centred in and around existing towns with only 10% to rural villages for reasons of sustainability/infrastructure.

Consultee ID: Mr Compson  
104326 Nutley Conservation Group

Part of document: Option 6c  
Section of Document: 
Your View: Disagree

Reason for comment: 
No evidence to suggest that older household profile contributes to deterioration of village facilities, this does not take into account older non-car drivers. Nutley restaurants are an example of well used village facilities.

Option 7d

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Mr. Compson
Nutley Conservation Group

Question 7e

Reason for comment:
Should not assume that villages on ‘A’ roads have the potential for better transport links, services and facilities. In Nutley the ‘A’ road, which dissects the village prevents the safe access of services and facilities. Nutley has issues in terms of pavement width. There are 10 services in Nutley (not 15 as stated in the Core Strategy Background Paper Draft Settlement Strategy). Also there are issues in respect of facilities already identified. On the basis of the criteria suggested Nutley should be downgraded. Notwithstanding this the need to protect the immediate environment of the Ashdown Forest should prevail.

Part 5

Reason for comment:
Proposed methodology for identification of broad areas for development must include: Landscape character, Protection of wildlife and natural resources, Identified need for development in the specific area, Infrastructure and service provision.

Question Ten

Reason for comment:
Thresholds for villages are too large and should be scaled in relation to village size.
Mr Compson

Nutley Conservation Group

Option 18a

Reason for comment:
Development would urbanise the countryside gap between Lewes and Uckfield. The narrow lanes that run to the north of Isfield are unsuitable for traffic growth. The lane that runs to the north to the A272 should be designated a 'quiet lane'.

Option 19a

Reason for comment:
Limited capacity for infilling. Extending the development boundary would involve building on greenfield land, increase the risk of flooding and would be within 5km of the Ashdown Forest (SSSI, SPA and SAC). Mid Sussex plans to develop between 2500 and 4500 houses in East Grinstead would have a significant impact on Forest Row, the Ashdown Forest and Nutley.

Option 19b

Reason for comment:
Nutley should be identified for limited growth for reasons as follows: Nutley's location in relation to the AONB, Ashdown Forest (SSSI, SPA and SAC). The lack of peak time bus service, post office and the future of the pub is uncertain. The primary school is at capacity with limited scope for expansion.
Consultee ID: Mr Compson
104326 Nutley Conservation Group

Part of document: □ document □ chapter □ section ✓ option
Option 19c

Section of Document:

Your View □ Agree ✓ No opinion □ Disagree

Need to be considered in light of the cumulative effect of development on the Ashdown Forest and the need to keep traffic away from minor roads.

Consultee ID: Mr Compson
104326 Nutley Conservation Group

Part of document: □ document □ chapter □ section ✓ option
Option 19e

Section of Document:

Your View □ Agree ✓ No opinion □ Disagree

Reason for comment:
Need to be considered in light of the cumulative effect of development on the Ashdown Forest and the need to keep traffic away from minor roads.
Part of Document: Option 24a
Section of Document: Wealden’s Communities

Reason for comment:
Policies should be included that provide suitable private housing and social housing for the elderly. The council should adopt policies to restrict occupancy of new housing to people with local work or family connection. There is no reason for Nutley to be allocated a higher number of new houses than recommended by the Affordable Rural Housing Commision for the provision of affordable housing for local people. If this housing was a mix of private affordable (houses retained in perpetuity for local people) and social housing, then local people would be supportive. Extensions to newly built properties should be controlled by covenants and use of design to create difficulty to build extensions in. There is a need to provide homes for rangers and individuals employed by the Board of Conservators in the Ashdown Forest.

All these planned developments on the A22 must be carefully assessed

Consultee ID: Mr Compson
Nutley Conservation Group

Part of document: ☑ option

Section of Document: Infrastructure Requirements

Your View: ☑ Agree

Reason for comment:
That north-south through traffic should be discouraged on the A22
Mr Compson, Nutley Conservation Group, commented on Question 31b of the document.

**Reason for comment:**
the spatial vision should be "the protection and enhancement of the districts environment".

Mr Compson also commented on Question 32b of the document.

**Reason for comment:**
Development should be located in places that will minimise road traffic. Developer contributions to traffic management and traffic reduction should be incorporated into planning policy.

Mrs Buckeridge, with Consultee ID 104350, commented on Option 18a of the document.

**Reason for comment:**
Loss of local rural character Insufficent infrastructure Flood risk.
We agree that some development should be allowed to take place in the AONB to meet local housing need but this should be confined to infill sites. Provision should be made in the Core Strategy for Impact Assessments to be conducted for developments in relation to the Ashdown Forest as it is an SPA.

Generally agree but we are concerned that this could be too restrictive and stunt development. Flexibility is required necessitating site by site assessments.
Option 5a

Section of Document:

Reason for comment:

We prefer an up-rated 5a which should read: “Settlement boundaries should be maintained but should be expanded where needed subject to strict criteria to allow for only small scale development. This should be limited to the satisfaction of local community needs which include cohesion and sustainability”. Conservation Areas. In Maresfield we think the Conservation Area is too tightly drawn and should include the Houses on the green at Park Farm, Park Farm House, Park Farm Barn and Park Farm Oast. We would also want the proposed protected area on Park Farm to be included.

Option 6a

Section of Document:

Reason for comment:

Option 7a

Section of Document:

Reason for comment:

if these are based on facts and the ability of the existing infrastructure to cope with increased demands. Growth should be limited to the satisfaction of local community needs which include cohesion and sustainability.
Option 7b

Reason for comment:
this should be based on established need. There is no set limit in the case of Maresfield and several other villages; in all cases a limit should be identified.

Option 7c

Reason for comment:
but this should not be absolute policy (no blanket restrictions) but protection for these facilities.

Question 7e

Reason for comment:
WDC’s interpretation of its own criteria in relation to Nutley is incorrect and inaccurate and therefore Nutley should be defined as a village with limited growth potential. respondent has submitted a table containing factual information to update Matrix A of the Councils’ Settlement Strategy Background Paper.

Option 9c

Reason for comment:
Consultee ID: Mr Allen
104366 Maresfield Parish Council

Part of document: □ document □ chapter □ section ☑ option

Reason for comment:
This should be scaled down to 6+ dwellings for smaller villages, rising up to 10+ to 15+ dwellings for larger villages.

Consultee ID: Mr Allen
104366 Maresfield Parish Council

Part of document: □ document □ chapter □ section ☑ option

Option 14a

Section of Document: Site Allocation Thresholds

Your View ☑ No opinion

Reason for comment:
the development here would lead to a coalescence closing the Uckfield / Maresfield Gap

Consultee ID: Mr Allen
104366 Maresfield Parish Council

Part of document: □ document □ chapter □ section ☑ option

Option 14b

Section of Document: Site Allocation Thresholds

Your View ☑ No opinion

Reason for comment:
This would inevitably lead to increased traffic onto the A22 and increase through traffic using Maresfield village as a rat run which would be totally unacceptable to Maresfield.

Consultee ID: Mr Allen
104366 Maresfield Parish Council

Part of document: □ document □ chapter □ section ☑ option

Option 14h

Section of Document: Site Allocation Thresholds

Your View ☑ No opinion

Reason for comment:
this is not a suitable site for housing. It is too near the flood plain and cannot cope with the run-off from any new development

Reason for comment:
Question 31a
Reason for comment:
Concentrating on getting a dual carriageway for the A27 is more important than building houses.

Question 31b
Reason for comment:
Concentrating on getting a dual carriageway for the A27 is more important than building houses.

Question 32a
Reason for comment:
Hindsland playing fields, situated between Polegate and Willington, have been left to decay to the point in which they have become fallow. Ownership is unclear, but these fields must be restored.

Question Ten
Section of Document: Site Allocation Thresholds
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:
There appears to be a conflict in 11b with protection of recreational facilities, as in Q28c. Restriction of Park & AONB - housing in C'bro restricted ro infill & conversion or redevelopment of existing properties. If provision of housing for an increasingly ageing population is the be achieved, some means must be found to restrict the conversion of the limited stock of bungalows into houses. Also, since the town is a very desirable dormitory of T Wells, most housing is in the 4/5 bedroom range, exacerbating the demand for land and increasing the number of vehicles already choking the town. Housing for pensioners needs to be smaller than the average & sited close to the town centre to allow for shopping etc on foot. The suggestion that one of the areas of C'bro suitable for expansion is that south east of tge town (11d) - makes alot of sense and would bring alot of trade to J Brook which could rival that of the High Street. The current definition of brown field sites includes gardens and alot of the current domestic building in C'bro has been in fill on such sites. Continued approvals for such development will lead to loss of trees - a feature of C'bro and open space, which are the 'lungs' of any town. Since C'bro is really a dormitory of T Wells, residents are mainly affluent and want a variety of choice when shopping. Hence, they will necessarily travel to T Wells and Blue Water, possibly Tonbridge. The High Street is dying a slow death. Pedestrianisation of high street will not attract more shoppers or traders. Only result will be HGVs using Church Rd or Hill Lane for access to the High Street and the industrial estates of Jarvis Brook. Chuch Rd along Chapel Green is already a nightmare for drivers due to aprked cars and this will be exacerbated if commercial traffic increases. Church Rd is very narrow, would necessitate the negotiation of four mini roundabouts.

Question 20d

Section of Document:

Your View ☐ Agree ☑ No opinion ☐ Disagree
Reason for comment:
Rotherfield development must pose access problems. The village centre is always choked by parked vehicles - increases in population would exacerbate problems with traffic flows.

#### Option 5a

**Section of Document:**  

**Your View**  
- [x] Agree  
- [ ] No opinion  
- [ ] Disagree

**Reason for comment:**  
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland. Settlement boundaries should be drawn to ensure that some villages not necessarily identified for growth in the settlement strategy, can nonetheless expand to help achieve viability of services and communities.
Reason for comment:
Prospective Planning on behalf of Mr and Mrs R Haselwimmer. More flexibility in settlement boundary delineation is considered appropriate, particularly round the larger towns to enable incremental growth of settlements to take place within a planned framework.

Reason for comment:
Prospective Planning on behalf of Mr M Reiser. More flexibility in settlement boundary delineation is required.

Reason for comment:
Prospective Planning on behalf of Mr J Gadsby-Houlton. More flexibility in settlement boundary delineation is required.

Reason for comment:
Prospective Planning on behalf of Mr M Reiser. The criteria should allow for some infilling particularly in close proximity to existing settlements.
Option 5b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Prospective Planning on behalf of Mr J Gadsby-Houlton. The criteria should allow for some infilling particularly in close proximity to existing settlements.

Option 5b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland. The proximity of sites to existing settlements should be a major criteria in allowing small scale development.

Option 5b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Prospective Planning on behalf of Mrs R Stuart. The criteria should allow for some infilling and have regard for the proximity to existing development.
Prospective Planning on behalf of Mr and Mrs R Haselwimmer. The development boundary for Uckfield should be extended to include land to the north of Eastbourne Road at Cysleys Farm to form a strategic housing allocation. This would help to achieve option 14d. The site is outside any designated countryside area of special landscape value, is adjacent to a site with planning permission for housing (currently under construction) and the current settlement boundary for the town.

Prospective Planning on behalf of Mr M Reiser. Settlement boundaries could be redrawn to allow some small scale expansion of the larger settlements, particularly Uckfield. Land to the west of Buckswood Grange, Rocks Road, could be included.

Prospective Planning on behalf of Mr J Gadsby-Houlton. Settlement boundaries could be redrawn to allow some small scale peripheral expansion of towns, this could include land fronting Snatts Road, Uckfield.
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland. The settlement boundary of Halland should be redrawn to include land to the south of the A22 and west of the B2192. The land is in non agricultural use and is very well contained within defensible boundaries. The allocation of this site would represent a logical rounding off with regard to development in this area of the village.

Prospective Planning on behalf of Mr and Mrs R Haselwimmer. This option would meet the regional plan requirements. It could make it clear that the majority of the allocations will be in or adjacent to towns outside the High Weald AONB or the South Downs AONB/Proposed National Park.

Prospective Planning on behalf of Mr M Reiser.

Prospective Planning on behalf of Mr J Gadsby-Houlton.

Part of document: ☑ option
Option 7a

Section of Document:

Your View: ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland.
Option 7b

Reason for comment:
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland. It is more appropriate to classify villages by reference to their potential and the ability of any new growth to help sustain existing services or provide new ones. Therefore, villages such as Halland could be made more sustainable with the introduction of additional village services.

Option 9a

Reason for comment:
Prospective Planning on behalf of Mr and Mrs R Haselwimmer. Uckfield is less constrained than other towns referred to in this question and is not surrounded by areas of high landscape importance.

Option 9a

Reason for comment:
Prospective Planning on behalf of Mr M Reiser. Uckfield is less constrained than Crowborough or Heathfield.

**Option 14a**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
Prospective Planning on behalf of Mr J Gadsby-Houlton. This area of Uckfield is suitable for further development as it could be planned to have little impact on the surrounding landscape.
Prospective Planning on behalf of Mr and Mrs R Haselwimmer. This option is fully supported particularly on land to the north of Eastbourne Road. The site at Cysleys Farm could accommodate housing and/or commercial development and provide a site for additional public facilities as identified by the District Council. This area within the overall option 14d area of search, would be particularly suited to new development due to its lack of landscape impact, being outside a flood risk area, its sustainable location in relation to Uckfield Town Centre and other facilities and good access to the strategic road network. The land is in a single ownership and could be developed early in the plan period.

Prospective Planning on behalf of Mrs R Stuart. This area of Uckfield is suitable for substantial growth in the future as it does not impinge upon any landscape area of special distinction, it is outside recognised flood plains and is a sustainable location in relation to the centre of Uckfield. It has good road links via the former A22 to the Uckfield Bypass (A22) and the strategic road network. It is located on inter town bus routes and is within walking distance of Uckfield station.

Prospective Planning on behalf of Mr M Reiser. Small areas of development could be serviced off Rocks Road without affecting its character, the landscape generally particularly Lake Wood or creating significant traffic generation on Rocks Road/Church Road.
Question 14i

Reason for comment:
Prospective Planning on behalf of Mr J Gadsby-Houlton. Small areas of development in the option 14a could be serviced off Snatts Road without affecting its character or creating significant traffic generation.

Question 14j

Reason for comment:
Prospective Planning on behalf of Mr and Mrs R Haselwimmer.

Question 14j

Reason for comment:
Prospective Planning on behalf of Mr M Reiser.

Question 14j

Reason for comment:
Prospective Planning on behalf of Mr J Gadsby-Houlton.
Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland. Under impacts and issues and landscape and biodiversity it is made clear that the surrounding open fields are not outstanding, particularly to the south of the village. This is an important factor in supporting this option for an expanded Halland village. Such a development as suggested could bring significant benefits to Halland. Improved services and infrastructure could be enabled by implementing this option. The development would reduce the need to develop on sites in more sensitive landscape locations in an existing village with good links to larger settlements and the strategic road network.

Prospective Planning on behalf of Mr and Mrs R Haselwimmer. This should be considered within the overall framework of this option but specific requirements would be dependent on site characteristics.

Prospective Planning on behalf of owners land rear of Ivy Cottages, Halland.

Reason for comment: Prospective Planning on behalf of Mr J Gadsby-Houlton.

Consultee ID: Mrs Jones  
104411  
Part of document: Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment: This council supports affordable housing for local people around settlements in the AONB.
Option 2b

Reason for comment:
Support a higher target of 20% as this is obtainable especially with the use of bio fuels and the use of local power generation plants for bio mass fuels.

Option 3a

Reason for comment:
Land allocated for employment purposes should remain for that purpose, as once it is lost, it is lost forever. Mixed use of housing and business causes serious problems for residents. We would encourage clean industries to re-deploy from London.

Option 3b

Reason for comment:
This statement is extremely negative and we would like to see business land be made available to cater for all size businesses, as we need to provide for employment opportunities for the whole area of Wealden.

Option 5a

Section of Document:

Reason for comment:
This Council supports option 5A for local people around the villages in order to retain the vitality and viability of local communities.

Question 4e

Reason for comment:
This council would like WDC to consider the land to the East of Sovereign Harbour towards Pevensey Bay as an alternative area for development as it is close to the main centre of Eastbourne. We would also like WDC to consider development around Ninfield and Hooe as it is close to Battle Station, the Conquest Hospital and employment areas at Hastings.

Option 5b

Reason for comment:
Support option 5B around the villages with strict criteria, as laid down in the Wealden Local Plan 1998.

**Question 12g**

**Section of Document:**

**Your View**
- [ ] Agree
- [x] No opinion
- [ ] Disagree

**Reason for comment:**
This Council only supports any future housing development in Heathfield that would address local housing needs.
Concerns over developing on a flood plain, and the lack of infrastructure, so only supports future housing development in Uckfield that would address local housing needs. Needs improvement in youth services across District.

Reason for comment:
Do not support growth in areas north of Upper Horsebridge, as it infringes on the strategic gap between Hailsham and Hellingly. It is also on a flood plain.

Reason for comment:
Do not support growth options in the area south of Amberstone/Battle Road, as they are close to SSSI and on the edge of Pevensey Levels and extremely close to the floodplain.

Reason for comment:
Lack of infrastructure in Hailsham.

Reason for comment:
Large expansion west of Berwick station coupled with expansion west of Polegate. Promote a duall carriage way for the A27 from Polegate to Lewes, plus a new sewage works to service new houses. New primary school at Berwick should be included, plus a medical centre and A27 upgrade could improve job opportunities. Upgrade to Berwick station with connecting bus services.

104411 Hailsham Town Council

Question Twenty Nine

Section of Document: Housing Delivery

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment: Subject to the planning gain being made in the area which the development is made.

Consultee ID: Mrs Jones  
104411 Hailsham Town Council

Question Thirty

Section of Document: Infrastructure Requirements

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment: It is vitally important to obtain the dualling of the A27 and the Folkington Link in order to attract new businesses to the area to meet the requirements of the increase in population and to improve water and sewerage infrastructure. We need to link this area into the national road network.

Consultee ID: Mrs Jones  
104411 Hailsham Town Council

Question 31b

Section of Document:

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment: It is vitally important to maintain the existing characteristics of our villages and towns. We also need to preserve the environment and local landscape features whenever possible and we need to try and encourage as much housing as possible for local people in rural areas.
Consultee ID: Mrs Jones
104411 Hailsham Town Council

Part of document: ☑ option
Section of Document: Question 32b

Reason for comment:
This Council is of the opinion that money generated from 106 agreements should stay in the area or locality in which it was generated for the improvement of local infrastructure.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Part of document: ☑ option
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
The AONBs need to be secured against becoming suburban dormitory areas where the landscapes will suffer if any building outside the existing settlement areas is permitted. It is important also that the setting of the AONBs is properly respected, as building right up to any boundary will also ruin the AONB. The view from the AONBs should not be of either housing or industrial estates, complete with pollution and noise. Following any development there would be pleas for "improved" roads, and other infrastructure "improvements" further suburbanising the area. No.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Part of document: ☑ option
Section of Document: Option 3c

Reason for comment:
However we may not agree on the definition of suitable.
Option 2a

Reason for comment:
See comments for 2B

Option 2b

Reason for comment:
As the question says, if this is viable. The location of new properties also has a significant effect on energy use, for if all members of a household have to use cars for commuting to work, shopping, schools, recreational activities, etc, then the total energy use will be much higher than the savings on fuel in a well insulated house. New developments need to be in areas where needs can be met locally.

Option 3a

Reason for comment:
We already have too much long distance commuting; local employment is needed, not more houses for people to travel from.
Option 3b

Section of Document:

Your View: Agree

Reason for comment:
Whilst it appears logical, the effect may be to bring in yet more people. Unemployment, and poor quality employment, for people who live here now is the bigger problem.

Option 3d

Section of Document:

Your View: Disagree

Reason for comment:
Whilst it appears logical, the effect may be to bring in yet more people. Unemployment, and poor quality employment, for people who live here now is the bigger problem.

Option 4a

Section of Document:

Your View: Disagree

Reason for comment:
This site is a green field site west of the A22, overlooked by the South Downs. We do not wish to see the urban sprawl of Polegate spreading westwards along the foot of the Downs. This is not a suitable site for any development. It will encourage more traffic onto the A27, but we should be trying to reduce that traffic.

- [ ] Disagree

**Reason for comment:**

Since the building of the new roundabout this area is becoming an untidy sprawl of poor quality development on what was previously green fields, do we have to make it even worse. Also, this proposal again implies an unwelcome extension of development west of the A22. Could development be kept East of the A22?

**Reason for comment:**
Consultee ID: Mr Hurwood  
104430 Alfriston and District Amenity Society  
Option 5a

Reason for comment:
We agree that boundaries should be maintained, but cannot agree with the criteria of expanding to meet necessary growth. A blanket agreement that ignores the environment around the settlement cannot be supported. The boundaries were drawn carefully and should not be lightly discarded.

Consultee ID: Mr Hurwood  
104430 Alfriston and District Amenity Society  
Option 5b

Reason for comment:
As with 5a it is difficult to agree to a blanket agreement for expansion without regard to the specific issues that may apply in each case.

Consultee ID: Mr Hurwood  
104430 Alfriston and District Amenity Society  
Question 5c

Reason for comment:
It is probable that there are locations where changes could be made, by agreement with all interested parties, and ensuring that the landscape and environment are not being sacrificed only for economic reasons (The economic picture will always change with time, but once developed the land remains developed).

**Reason for comment:**

The non-urban percentage ought to be concentrated on the larger villages with reasonable facilities. Clear gaps between settlements should be preserved. However we have sympathy with the situation set out in 4.36 regarding development of villages close to towns.

We are worried about trying to force settlements into categories and strategies, as there will never be a typical example of any type. Individual characteristics, individual environmental impacts, individual effects on the infrastructure should all be taken into account before planning expansion in a particular settlement, however much it appears to fit a particular strategy.

Hailsham needs to have money spent on it to improve conditions for those there now. Planned growth, with new industrial sites too, could improve the environment and fabric of the town.

Whist there is scope for some further development we do not wish to see Polegate expanding West of the A22 or along the A27. Expansion here will only make the A27 situation worse, and it will further impact on the South Downs National Park, the view from the Downs should not be of an ever expanding Polegate or of a new enhanced A27 along the foot of the Downs.
Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Part of document: ☑ option
Option 8c

Section of Document:

Reason for comment:
This would be the worst possible option, with Polegate expanding, pressure on the A27 and the South Downs, an urban sprawl all along the A22, and Hailsham declining further as it becomes a poor suburb of Eastbourne.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Part of document: ☑ option
Option 8d

Section of Document:

Reason for comment:
As bad as 8c, it would do nothing to improve Hailsham or Polegate, but has the potential for despoiling a large tract of unspoilt land which here in the crowded South East we ought to be trying our hardest to preserve.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Part of document: ☑ option
Option 16a

Section of Document:

Your View □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
Highly visible from the National Park, the open land/valley forms an important part of the setting for the Downs, and for Polegate itself. Do not destroy this attractive component of the local countryside. The development would be totally divorced from Polegate, it would be car based, would not enhance Polegate but would be an Eastbourne suburb.
Option 16b

Reason for comment:
Similar reasons to disagree with development here as there is for 16a. Again it is totally divorced from Polegate, would be a car based (environmentally unfriendly) development, would not help the regeneration or improvement of Polegate, and it too would detract from the setting of the National Park. We should treat both of these areas (16a & 16b) with respect, not treat them as building sites.

Option 16c

Reason for comment:
It would be a totally car centred development separated from Polegate by the new bypass, and would open the way for sprawl to spread on up to Hailsham.

Option 16d

Reason for comment:

Option 16e

Reason for comment:
Option 16f

Section of Document:

Reason for comment:
But, a significant part of this land should be set aside for recreation, sports fields, and open space to preserve the gap, as seen from the main road, between Polegate and Willingdon. A road link to the new A22 would be a better way of helping development of this "infill" site.

Option 16g

Section of Document:

Reason for comment:

Question 16i

Reason for comment:
But we are unsure about the bus corridor, why not increase the frequency of the trains, and we note the comment that Polegate is “at a rail junction” and would point out that it isn’t, it used to be. Also at the station it is worth noting that despite local opposition permission was recently given for a mediocre development on land which should be part of the station car park, and does nothing to improve the environment of the station.
Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Option 18h

Reason for comment:

The setting of the South Downs National Park is no place to build a new settlement. We strongly oppose this proposition as totally out of character with the location. It would be a step towards an urban corridor (sprawl) from Polegate to Lewes. Also, it would not be feasible without major upgrades to the existing A27, and any improvements to the A27 would mean an increase in traffic through Alfriston from the coast, as those in the ever-expanding town of Seaford seek a quick route away from the coast.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Option 18i

Reason for comment:

This proposal for a new town or village has to be opposed. The site would be in full view from the ridge of the South Downs National Park (as the reservoir is now) and would greatly detract from the rural setting of the South Downs. We should be trying to maintain a corridor of mixed open landscape between Polegate and Lewes to maintain the open setting of the South Downs. Having an urban sprawl all along their feet could ruin the Downs; as an example look at the present view from the Downs of Eastbourne, Willingdon and Polegate, we do not wish this to continue along the present open area. Any large settlement here would “need” road improvements to meet the traffic increases (sustainable development?), and any improvements to the A27 would generate extra traffic through Alfriston as Seaford’s citizens and businesses seek fast routes away from the coast. Traffic generated by the large new development will also wish to travel to Seaford, increasing the traffic through Alfriston & Litlington far beyond the capacity of these narrow lanes.

Consultee ID: Mr Hurwood
104430 Alfriston and District Amenity Society

Option 18j

Reason for comment:

This proposal for a new town or village has to be opposed. The site would be in full view from the ridge of the South Downs National Park (as the reservoir is now) and would greatly detract from the rural setting of the South Downs. We should be trying to maintain a corridor of mixed open landscape between Polegate and Lewes to maintain the open setting of the South Downs. Having an urban sprawl all along their feet could ruin the Downs; as an example look at the present view from the Downs of Eastbourne, Willingdon and Polegate, we do not wish this to continue along the present open area. Your View  ☑ Agree  
Reason for comment:  

Berwick station should be upgraded, including its parking facilities, and it could have more trains stopping there. A multi-storey car park at Polegate could prevent the congestion in the streets around that station.

If the A27 were to be made into a dual carriageway along the foot of the Downs it would encourage more traffic, more commuters, more housing, in an area where the new National Park needs all the tranquility it can get. It would also generate extra unwelcome traffic through Alfriston, destroying the village, as Seaford traffic seeks the fastest routes out of the coastal area.

Reason for comment: Disagree with policies that restrict the change of land from commercial to residential use.

Consultee ID: Ms Dashwood-Hall
104457

Part of document: Question 7e

Section of Document:

Reason for comment: Anomalies on classification between larger and smaller local service centres.

Consultee ID: Ms Dashwood-Hall
104457

Part of document: Options for the Sussex Coast Policy Area

Section of Document:

Reason for comment: Infrastructure concerns already causing concern and further development will only exacerbate the problem.

Consultee ID: Ms Dashwood-Hall
104457

Part of document: Option 8d

Section of Document:

Reason for comment: Strongly agree, but not necessarily in Low Weald.
Consultee ID: Ms Dashwood-Hall Agent ID: 104457

Part of document: ☒ section

Section of Document: Options for the Rest of Wealden

Reason for comment:
Supports policy of more even distribution across district. 9C is best option.

Consultee ID: Ms Dashwood-Hall Agent ID: 104457

Part of document: ☒ option

Section of Document: Site Allocation Thresholds

Reason for comment:

Consultee ID: Ms Dashwood-Hall Agent ID: 104457

Part of document: ☒ option

Section of Document: Towns - Potential Priorities and Options

Reason for comment:
Supports housing development in Crowborough, Heathfield, Stone Cross and Polegate Willingdon-location should be determined by the views of and wishes of Heathfield residents. Supports development on edge of Tunbridge Wells. Supports development in Uckfield so long as flood sites are not used and new builds will not increase risk of flooding elsewhere. Concerns over infrastructure. Hailsham should be allowed to develop on its own and not as part of wider Eastbourne. Concerns over healthcare, schooling, leisure and traffic/transport.

Consultee ID: Ms Dashwood-Hall Agent ID: 104457

Part of document: ☒ option

Section of Document: Option 15a

Reason for comment:
Opposed to development of North West Hailsham- poor road system, no railway links, could exacerbate flooding and damage wildlife if important green gap is developed on.

Question One

Section of Document:  Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  
- Agree  
- No opinion  
- Disagree

Reason for comment:
Mainly to meet the needs of affordable housing in low numbers on exception sites first using brownfield sites. The AONB must be protected especially in conservation villages. Once lost will never be regained.

Consultee ID: Mr Chalke
Agent ID: 104476

Part of document:  
- document  
- chapter  
- section  
- option
Option 3d

Section of Document:

Your View  
- Agree  
- No opinion  
- Disagree

Reason for comment:
The infrastructure of the villages may not be able to support new housing and new business. Housing is the more important requirement

Consultee ID: Mr Chalke
Agent ID: 104476

Part of document:  
- document  
- chapter  
- section  
- option
Option 2a

Section of Document:

Your View  
- Agree  
- No opinion  
- Disagree

Reason for comment:
This should be achieved by the design of the new developments as new technology evolves, not necessarily wind farms etc in an AONB
Option 2b

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
If it can be achieved by design, keeping in mind the sensitivity of the AONB and without devastating the Asdown Forest.

Option 3a

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
If it is a genuine case of the site not being able to attract new employment and not because of inflated rent etc.

Option 3b

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Option 3c

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
It may not apply to all villages that new business development be created. All existing unused sites should be used first.

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option

Section of Document: Site Allocation Thresholds

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Not all villages will be able to handle groups of 15+ dwellings, perhaps smaller numbers in villages such as Hartfield.

Consultee ID: Mr Chalke  
Agent ID: 104476

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option

Section of Document: Site Allocation Thresholds

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Hartfield has limited growth potential and certainly single location of 20 dwellings would not be appropriate. Sites would have to be in smaller numbers for affordable housing. Two sites have been identified, The Old Coal Yard and The old Crown Farm. A site for the Surgery has also been identified at Old Crown Farm,

Consultee ID: Mr Chalke  
Agent ID: 104476

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option

Section of Document: Site Allocation Thresholds

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Any development around the village must be carefully considered. It is a conservation village in an AONB on the edge of Ashdown Forest. Once a village looses its character and community spirit these can not be regained.

**Reason for comment:**
Question 32a

Reason for comment:

It is important to provide affordable housing for families, single persons and elderly but not at the cost of losing the character, personality, community spirit and visual aspect of the village. A well-balanced growth will ensure sustainability.

Option 28b

Reason for comment:

Need for developer contributions for the infrastructure of all community facilities.

Option 28c

Reason for comment:

Leisure includes more than just sport and recreational facilities—i.e. cultural performance arts.
Consultee ID: Ms Freeman
104477 The Theatres Trust

Section of Document:

Question 32b

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Should include community and cultural facilities to reflect your Community Strategy.

Consultee ID: Mr Thompson
104478 Federation of Sussex Amenity Societies

Section of Document:

Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
We agree that some development should be allowed to meet local housing need but this should be confined to infill sites.

Consultee ID: Mr Thompson
104478 Federation of Sussex Amenity Societies

Section of Document:

Option 2b

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
We agree with option 2b that the aim should be to meet 20% of the energy requirements of new development from renewable energy sources.

Consultee ID: Mr Thompson
104478 Federation of Sussex Amenity Societies

Section of Document:

Option 3d

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
We agree generally that new housing development should be balanced with an appropriate level of new business development.
Consultee ID: Mr Thompson
104478 Federation of Sussex Amenity Societies

Part of document: ☑ option
Option 5a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
we consider they should be extended subject to a strict criteria and that priority should be given to development on infill/brownfield sites.

**Option 27e**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
There is a need for comprehensive traffic impact assessment related to new developments on the trunk road system throughout Wealden and the wider region. There is widespread concern about the adequacy of the present infrastructure and the impact of new developments. Much greater emphasis should be given to improving the environment of villages and smaller settlements currently subject to high levels of through traffic. There needs to be a coherent policy for reducing the speed and volume of traffic in these areas, and this should be a condition of all new developments.

Question 31a

Reason for comment:

I think it is very important to have affordable housing in villages, but the character of the village must be taken into account (no riffraff).

Question 32a

Question 32b

Reason for comment:

I think it is very important to have affordable housing in villages, but the character of the village must be taken into account (no riffraff).
Question One

Development should be concentrated in areas which are NOT in the AONB.

Reason for comment:
It is unrealistic to impose new short life unproven technology on housing which is a long term issue.

**Reason for comment:**

Your View  
Hailsham is large enough and sufficiently well serviced to have good potential for development.

**Reason for comment:**

Agree  
No opinion  
Disagree

**Reason for comment:**

Your View  
A new settlement would require a complete new infrastructure whereas development on the edge of an existing town such as Hailsham merely requires enlargement and improvement of existing facilities.

104480 102470 J J Hatfield & Co Ltd

Part of document:  
Option 15d

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

Would support this if the Southern relief road were to be constructed.
### Option 15d

**Consultee ID:** Mr Hatfield  
**Agent ID:** J J Hatfield & Co Ltd  
**Part of document:**  
- [ ] document  
- [ ] chapter  
- [ ] section  
- [x] option  
**Section of Document:**  
**Reason for comment:** Close to SSSI and flood risk.

### Option 15e

**Consultee ID:** Mr Hatfield  
**Agent ID:** J J Hatfield & Co Ltd  
**Part of document:**  
- [ ] document  
- [ ] chapter  
- [ ] section  
- [x] option  
**Section of Document:**  
**Reason for comment:** These sites are considered by Wealden District Council to have a low landscape value. There are minimal bio diversity issues. There is no flood risk. Oaklands Farm and The Brickfield are previously developed land. There is ready access to the town centre and the proposals include road improvements such as upgrading the South Road/Ersham Road roundabout and the possible southern link road which would be on this land.

Part of document:  
Option 25b

Section of Document:  
Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:  
The quality and character of this area requires generally lower densities. The Council must take care to consider the economic sustainability of any development.
There is potential for modest growth around all villages.

Whilst there is scope for areas of high density, the traditional densities in Wealden District are low and we should take care not to create slums for the future.

Whilst there is scope for areas of high density, the traditional densities in Wealden District are low and we should take care not to create slums for the future.

Not to the exclusion of stops at other stations.
The route of the existing A27 is shared with a railway line. Dualling the road would not have an adverse impact on its environment but would improve communications immeasurably between Lewes and the rest of East Sussex.

**Question 32a**

**Reason for comment:**

Agree with minor exceptions.

### Section of Document:

**Part of document:**
- [ ] document
- [ ] chapter
- [ ] section
- [x] option

**Option 2a**

**Reason for comment:**

Option 2a is preferred. A higher target of 20% could make some sites unviable and potentially impact upon the deliverability of housing sites within the district. The 10% figure stated in the South East Plan should be adopted by the district council in order to provide a consistent approach in national, regional and local guidance.

**Option 9a**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
It is considered that given infrastructure funding problems, Uckfield still remains the principal location for development in the Rest of Wealden. An increased level of housing allocation in the urban area of Uckfield would facilitate the funding necessary to implement the highways work needed for the town centre. This would be achieved by way of increasing the number of sites that could contribute towards these improvements and deliver the infrastructure required for existing problems and accommodate future growth. Furthermore paragraph 5.29 of the Issues and Options Paper considers that the existing Community College is now too large for its premises and recommendation is that the 6th Form separate from the main site. It is understood that in order to achieve this, significant development of up to 1,000 dwellings is required in the Uckfield area to provide extra students needed to make this split viable. It is therefore considered that by concentrating growth in the Uckfield area, this could be achieved.
Section of Document: Site Allocation Thresholds

Reason for comment:
It is considered that there should not be a site allocation threshold for edge of town or edge of village sites. A policy like this makes for a rigid framework and may prevent the best use and/or impact upon delivery of a suitable site that would go someway to meeting the housing requirement and/or ensuring the viability and growth towns and villages in Wealden. We therefore disagree with the principle of a suggested allocation threshold and that each site should be taken into consideration and determined on its own merits.

Option 14d

Reason for comment:
Agree with the broad location of 14d albeit that this should also include the site north of Eastbourne road (currently Policy UC2 in Non-statutory Local Plan 2005). This will ensure that the already allocated site can be included within any potential future search for suitable housing locations. It may be necessary for the Council to (re)allocate the site for the period up to 2026 as the outcome of the forthcoming Judicial Review may prevent the site coming forward under the current Non-Statutory Plan 2005 allocation. Agree with the spatial objectives of the town centre insofar that the necessary and suitable mechanisms are in place to allow for the objectives to be completed/obtained.
### Question 18k

**Reason for comment:**
Without very extensive new funding, there is not the infrastructure capacity to accommodate a new settlement. It would be an option that would be inconsistent with the approach that has supported relatively small incremental growth at established towns and villages to secure a broad mix of new housing, jobs and other facilities. It is important to maintain the growth of the existing towns and villages by locating new development in these locations rather than by meeting the housing requirement with a new settlement.

---

### Option 24a

**Reason for comment:**
It is considered that the Options 24a to 24c are inadequate in providing a suitable density range for new housing developments and advice should be taken from PPS3 (paragraph 46 and 47) regarding how LPA’s go about setting housing density policies. PPS 3 advises that a national indicative minimum of 30dph is sought, but that LPA’s may wish to set a range of densities across the plan area rather than one broad density range. It is considered that in more sustainable locations, and in more urban areas, higher densities should be achieved.

---

### Option 24b

**Reason for comment:**
It is considered that the Options 24a to 24c are inadequate in providing a suitable density range for new housing developments and advice should be taken from PPS3 (paragraph 46 and 47) regarding how LPA’s go about setting housing density policies. PPS 3 advises that a national indicative minimum of 30dph is sought, but that LPA’s may wish to set a range of densities across the plan area rather than one broad density range. It is considered that in more sustainable locations, and in more urban areas, higher densities should be achieved.

Part of document: ☑ option
Option 25a

Section of Document:

Your View ☑ Agree ☐ No opinion ☑ Disagree

Reason for comment:
The density range should be set based on a credible, robust and up to date Housing Market Needs Assessment. Paragraph 6.17 of the Issues Options report identifies that the housing needs survey of 2005 recommended 40% affordable provision across the District. However, the South East Plan recommends only 40% in the South Coast Policy Area. Further to this, the draft Strategic Market Housing Assessment recommends varying levels of affordable housing including only 30% in the South Coast Policy Area. It is clear that there is conflicting advice/evidence on the levels of affordable housing provision across the District and it is important the WDC give greater clarity on it's strategy for affordable housing provision in its Preferred Options Report.

**Reason for comment:**
Option 8b

Reason for comment:
This option is the most sustainable option for growth, with the least environmental impact.

Option 8c

Reason for comment:
New development along the Polegate/Hailsham axis would significantly erode the separate identity of the two settlements and result in development that is neither related to either settlement, i.e., almost a 'no-mans land'.

Option 8d

Reason for comment:
The suggestion of a new settlement (Option 8b) would do least to engender the sustainable (regeneration) of the existing settlements within the sub-region.
Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
A policy like this makes for a rigid framework and may prevent the best use and/or impact upon the deliverability of a suitable site that would go someway to meeting the housing requirement and/or ensuring the viability and growth of towns and villages in Wealden.

Option 16d

Reason for comment:
The areas of land identified in options 16d and 16e are significantly less constrained in landscape, transport and flood risk terms than each of the other potential options within/adjoining Polegate and Willingdon.
### Question 18k

- **Consultee ID:** 104487
- **The Barton Willmore Planning Partnership Eastern**
- **Part of document:**
  - ☑️ option
- **Section of Document:**
- **Your View**
  - ☑️ Disagree
- **Reason for comment:**
Reason for comment:
Disagree with all the options - they are too simplistic and are at odds with the policy requirements of PPS3: Housing (November 2006). PPS3 (para 46) indicates that LPA’s should develop housing policies across a range of important considerations, and avoid just one broad density figure for the whole district (para 47). It is therefore suggested that Wealden District Council develop a range of different density ranges, based upon the raft of different criteria set out in para 46 of PPS3, for a range of different (site/settlement specific) considerations. This would ensure that the most efficient use of land is achieved and that at more suitable sites, higher densities should be accepted.

Reason for comment:
Housing mix should provide for a variety of dwelling type and be based upon the specific market needs of an area, i.e. not solely flats and small dwellings.

Reason for comment:
The provision of affordable housing should be based upon an up to date housing needs survey.
Option 25c

Section of Document:

Your View

☐ Agree  □ No opinion  ☑ Disagree

Reason for comment:

It is not a viable option to seek a 'one for one' mix of affordable/open market housing on any site, least of small rural settlements.

Option 25g

Section of Document:

Your View

☐ Agree  □ No opinion  ☑ Disagree

Reason for comment:

Ancillary dwellings (for businesses) should not be considered appropriate. PPS7 already provides for such measures related to the rural countryside.

Option 25d

Section of Document:

Your View

☐ Agree  □ No opinion  ☑ Disagree

Reason for comment:

Rural areas, as with urban areas, require a mix of housing type and tenure, ie not just solely affordable housing.

Part of document: option
Option 25f

Section of Document:

Your View  Disagree

Reason for comment:
Ancillary dwellings (for elderly/disabled) should be considered on their respective merits, with strict restrictions upon occupancy

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: chapter
Part 1

Section of Document: Context

Your View  Agree

Reason for comment:
However, the County Council considers there is still a tendency in the document to see the provision of new housing as a necessary duty imposed from above rather than as a natural element of planning for future sustainable communities. The identification of 'place-shaping' as the central role of a Core Strategy is strongly supported and Wealden is to be commended for avoiding an Issues and Options stage which is an abstract pursuit of general principles unrelated to the particular circumstances of an area.
Option 3d

Section of Document:

Reason for comment:
Representation on behalf of the County Council as Highway Authority The inclusion of Option 3d is supported in that it provides scope for the creation of sustainable communities where there is a reduced need to travel. It will be important to ensure that employment land allocations are well located in relation to existing and future communities as this can facilitate the provision of appropriate transport infrastructure linkages and help to reduce out commuting by car. On account of the servicing needs of employment land, good access to the Primary Route network should also be at the forefront of any development strategy.

Option 3d

Section of Document:

Reason for comment:
Strongly support across Wealden District, although in the south Wealden area it may be necessary to provide a relatively faster rate of growth in employment than housing to meet South East Plan objectives for improving the economy of the Sussex Coast sub-region.
Reason for comment:
But the County Council considers the approach focuses exclusively on employment land when a strategic approach to the economy is required as part of the Core Strategy, an approach which gives priority in the Sussex Coast policy area of Wealden to measures to stimulate and grow the economy. Employment land provision will be an essential part of such a strategy but only as part of a wider policy approach within the Core Strategy. In respect of the potential locations for employment use identified in Question 4, until work is completed on employment land forecasts and an economic strategy, including priority for employment provision, and until the implications of work on Eastbourne's employment land provision are fully integrated into the process, it is not possible to be certain how many of these sites may be required for employment provision. No scale of employment land requirement is given. There is evident conflict with potential housing use on all these sites as all these broad locations are indicated later in the Issues and Options document (under Polegate) as potential locations for housing development. Policy for the Sussex Coast sub-region gives priority on new land to employment provision. Therefore, the sites with the greatest accessibility to strategic transport routes, including frontage positions, and with the possibility of long term rail access, should be the most favoured for employment use.

Reason for comment:
However, it raises the question of who decides there is no realistic prospect of land being developed for employment and under what circumstances - employment land is in competition with housing use on many sites and it is all too easy to find reasons for introducing housing use. What would be the consequences of such a policy approach for employment land supply? To compensate, should all housing development include an element of employment provision?

Section of Document:
Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
However, whilst this policy is appropriate for the majority of Wealden District, there will be a need to provide for potential larger scale enterprises in the south Wealden area if the South East Plan objective of regeneration and economic improvement for the Sussex Coast sub-region is to be achieved.

Consultee ID: Arr-Jones
Agent ID:
104491 East Sussex County Council

Part of document: □ document □ chapter □ section ☑ option
Option 4a

Section of Document:
Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. These options are supported in principle in that they offer potential for the criteria highlighted in my comments on Question 3 to be fulfilled. Having regard to the identified travel to work patterns within the District and the obstacles to development viability, it would be essential to ensure that the options are supported by appropriate levels of residential development to facilitate the provision of transport infrastructure. This would be predominantly focused on linkages into Eastbourne, Polegate and Hailsham with a heavy emphasis on a prospective Quality Bus Corridor. Options 4a, 4b and 4d would also pose specific challenges in overcoming the severance effect of adjacent roads.
Option 4a

Section of Document:

Reason for comment:
The County Council supports the consideration of this area for employment development because of its strategic accessibility, potential for links to the railway, including the exploration of the concept of a Parkway station, and the difficulty of effectively linking a residential area here with the rest of Polegate.

Part 4

Section of Document: Wealden’s Settlement Pattern

Reason for comment:
The County Council considers the current list does not exhaust the range of possible strategies that need to be considered in progressing towards a preferred strategy. These are strategies based just on choices of where best to distribute housing development. Strategies also need to be developed and assessed against other objectives, e.g. what strategy would deliver the most robust economic performance, or reduce out-commuting and hence improve sustainability? Rather than rely just on the physical assessment of individual sites the Issues and Options stage needs to lead to the development of spatial strategies that can deliver key objectives such as a stronger economy. The County Council would also want Wealden District Council to develop strategies which can deliver, and take advantage of, key items of infrastructure (some identified in the regional implementation plan). Concentrated development may be better able to deliver infrastructure where significant levels of investment are required.

Option 5b

Section of Document:

Reason for comment:
The County Council supports appropriate development outside existing village boundaries as over the longer term this could provide a solution where the reprovision of village schools is compromised due to lack of suitable alternative sites.
Consultee ID: Arr-Jones  East Sussex County Council
104491

Part of document:  option

Section of Document:

Your View  Agree  No opinion  Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. In the absence of an overarching development strategy for the District, it is difficult to comment on the appropriateness of the various urban/rural proportions. It would be essential however, to ensure that the weighting of any rural focus is sufficient to deliver necessary enhancements to public transport services. Many such services are County Council supported and, in the face of increasing budgetary pressures, their future is not assured. New development can bring about a rise in patronage but, more crucially, it would be important to realise substantive contributions at the outset to ‘pump prime’ the operation of the services and safeguard their future until such time that revenue from patronage can cover operational costs. Funding of this nature is essential to achieving appropriate levels of accessibility in more remote areas and mitigating the impact of new development on lower category roads.

Consultee ID: Arr-Jones  East Sussex County Council
104491

104491 East Sussex County Council

Part of document: ☑ option

Question 7e

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

Representation made on behalf of the County Council as Highway Authority. The emphasis placed on accessibility in defining and gauging growth potential is welcomed, but the terms of reference place an undue weight on journey times to local service centres by car. This, coupled with the absence of any criteria relating to walking/cycling, is at odds with the need to achieve sustainable communities that reduce the need to travel and are not reliant on car use. Furthermore, the weight afforded to the presence of a weekday peak hour (defined as 07:00 – 09:00) bus service takes no account of frequency, route or the return journey (many bus services are based around school hours, meaning that whilst they would operate in the AM peak they may not in the PM peak). Clarification on the rationale for journey distance thresholds of 2.5km or 5km to towns and rail stations would also have been helpful in understanding how the categories were derived.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: ☑ option

Option 8a

Section of Document:

Your View ☑ Disagree ☐ No opinion ☐ Agree

Reason for comment:

No opinion Representation on behalf of the County Council as Highway Authority. The argument presented in favour of a Hailsham focus in paragraph 4.42 is flawed in referring to less congestion on the A22 than the A27. It is inappropriate for a County Primary Route and a Trunk Road to be compared in this way as they perform entirely different functions on the network. The phrasing also suggests that development at Hailsham could use up available road capacity, which conflicts with an overriding need to ensure that transport infrastructure is delivered to minimise additional traffic.
Option 9a

Section of Document:

Reason for comment:

Representation on behalf of the County Council as Highway Authority Paragraph 4.46 refers to the solution to traffic congestion in Uckfield as 'currently blocking all significant development'. This phraseology is inappropriate in that the District Council have either approved or resolved to approve each of their allocated residential sites in the non-statutory Local Plan and have refused other major residential development proposals for numerous reasons not associated with congestion in the town centre. The paragraph also highlights how the cost and ability to solve the problem would count against this option, which would not be the case if a critical mass of development could be achieved that would facilitate delivery. In this respect the option proposing an Uckfield focus is supported. The accessibility and infrastructure limitations of Crowborough and Heathfield, together with a reduced ability to resolve Uckfield town centre, count against the development distribution proposed by the other options.

Part 5

Section of Document: Wealden's Places

Reason for comment:

The County Council considers identifying a long-list of broad locations for development is commendable at Issues and Options stage but raises issues of the resources available to infrastructure stakeholders to provide an assessment of all the potential options to help Wealden refine the list to a narrower range of options. The assessment tables associated with each set of broad locations include preliminary infrastructure assessments which have been informed by discussions between County Council and Wealden officers. The County Council does not have the resources to, for example, carryout a transport assessment on each of the broad locations identified and there is, at present, no county wide network model which could be used for such an assessment. A process will need to be agreed between County and Wealden to provide a sufficiently robust and consistent transport assessment to enable options to be narrowed down. Although the more significant tranches of potential development considered in the Issues and Options paper will bring with them, in any case, the requirement for new school places at extended or new schools, the County Council's Childrens Services Department hopes that revised information on school rolls and local school capacities will be available in time to inform the narrowing down of options, particularly where the growth potential of villages is concerned. However, capacity surveys are being updated as part of a 3 year rolling programme and it is necessary to balance the interests of several districts who are seeking this information for IDF work to similar timetables.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: □ document  ☒ chapter  □ section  □ option
Part 5

Section of Document: Wealden’s Places

Your View  ☒ Agree  □ No opinion  □ Disagree

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. There is an inconsistency in how the growth options are described as broad areas of search but are then presented with detailed comments on transport issues, including prospective access arrangements and the scope of off-site improvements. These details have not been exclusively based on recent site specific assessments by the County Council.

104491 East Sussex County Council

Part of document: □ document  □ chapter  □ section  ☒ option
Question Ten

Section of Document: Site Allocation Thresholds

Your View  □ Agree  □ No opinion  ☒ Disagree

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. Although the point is acknowledged in paragraph 5.9, this approach would need to account for cumulative impacts and the potential need for area-wide Transport Assessments and Travel Plans to inform the Core Strategy and/or Site Allocations Development Plan Document. For each of the towns within the Districts, it is unclear how (or whether) the spatial objectives have been informed by the Local Transport Plan and accompanying Local Area Transport Strategies. These documents should underpin the aspirations for each town through enabling new development to be matched against emerging transport priorities.
Question 12h

Section of Document:

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. However, the inclusion of a spatial objective to create a central bus service hub would appear difficult to deliver in view of the limitations on development scale within the options. There are also issues concerning where a central bus station could be located and how this sits alongside the Local Area Transport Strategy, which does not include an intention to create a bus station and instead places a firm emphasis on upgrading passenger waiting facilities and providing bus service connections to the rail network. The objective to extend the Cuckoo Trail is consistent with the Local Area Transport Strategy.

Option 11d

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ✔ Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. Although termed as a ‘broad area of search’ Option 11d is attributed with an identification of a type of access arrangement in the form of a roundabout. This is premature in that it has not been based on an assessment of traffic generation and appears inconsistent with the more general comments made in relation to access for other options. There is also a reference to capacity issues on Walshes Road, which are not representative of current conditions on the road. Options 11a, 11b and 11c offer better potential in how they are well placed in relation to the town centre and bus services to Tunbridge Wells. Option 11d, where more substantive development potential is identified, may not be sufficient to sustain the costs associated with resolving the inadequacies of the surrounding highway network and providing appropriate accessibility to local facilities.
Question 11f

Section of Document:

Reason for comment:
Representations made on behalf of the County Council as Highway Authority. The need for employment sites to have good access to the A26 is supported. The spatial objective to improve the gateway at Jarvis Brook is supportable in terms of improving the prominence and accessibility of the rail station. The limitations of the surrounding highway network, including the restrictive rail bridge, would need to influence the scale and nature of any accompanying new development.

Question 12g

Section of Document:

Reason for comment:
No opinion. Representation made on behalf of the County Council as Highway Authority. Although those options closer to the town centre provide most scope to reduce the need to travel, they all are affected by the paucity of travel choices to key shopping and employment centres and the rail network. The development scale associated with each of the options provides limited scope for these accessibility deficiencies to be overcome.

Option 13a

Section of Document:

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. The consideration of this option is supported, since it provides scope for a high proportion of associated travel demand to be met within Tunbridge Wells Borough.
Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. The inclusion of option 14d does not account for its sustainable travel disadvantages.

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. To reflect the Highway Authority’s stance on the Downlands Farm planning application, option 14a should make it clear that this is dependent on an access via the Black Down roundabout. If taken forward with a new access onto the A22, this option would be likely to attract a highway objection. The practicalities of restricting access from Snatts Road and Chruch Street are also questionable, given the sizable housing areas that these roads are already serving.

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. Option 14c describes Framfield Road as a ‘country lane’, a statement that is at odds with its function as the B2102. The relative merits of the option do not account for its remoteness from the Primary Route network and the consequent traffic impact this would have on the town centre. Furthermore, there is uncertainty concerning the deliverability of the pedestrian/cycle link to the town centre, which could serve to undermine its sustainability credentials.
Option 14f

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. This option could not be supported in the event of it prejudicing the reinstatement of the Uckfield – Lewes rail line.

Option 14h

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. This option could not be supported in the event of it prejudicing the reinstatement of the Uckfield – Lewes rail line.

Question 14j

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. The spatial objectives of improving accessibility and reducing traffic congestion/dominance in the town centre are supported, but need to be underpinned by an emphasis on facilitating sustainable travel patterns. Neither the delivery of the rail link nor the town centre traffic management scheme should be seen as delivering options for growth in isolation and it is important that walking, cycling and bus use are viewed as a key part of the solution. This is also critical in the context of capacity concerns on the A22, which cannot be overcome through road widening due to the need to prevent substantive traffic increases through the Ashdown Forest. Having said that, it is essential that those options carried forward, either individually or collectively, provide scope to deliver improvements to the town centre so as to enable additional traffic to be accommodated on this part of the network.
Option 15a

Section of Document:

Your View  Yes Agree  No No opinion Disagree

Reason for comment:

Agree nor disagree Representation made on behalf of the County Council as Highway Authority. Options 15a should draw attention to the need to support, sustain or enhance bus linkages to the town centre/rail network/Eastbourne, which may have come forward through the implementation of the non-statutory Local Plan land allocations.

Option 15b

Section of Document:

Your View  Yes Agree  No No opinion Disagree

Reason for comment:

Agree nor disagree Representation made on behalf of the County Council as Highway Authority. Option 15b should draw attention to the need to support, sustain or enhance bus linkages to the town centre/rail network/Eastbourne, which may have come forward through the implementation of the non-statutory Local Plan land allocations.

Option 15c

Section of Document:

Your View  No Agree  No No opinion Yes Disagree

Reason for comment:

Agree nor disagree Representation made on behalf of the County Council as Highway Authority. This option suggests that a development in excess of 1000 or more dwellings could be accessed via the town centre road network, which is starkly at odds with the spatial objective of reducing congestion in this area.
Option 15d

Section of Document:

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. Options 15d and 15e introduce the concept of a southern Hailsham relief road. This implies a road with a wider strategic or traffic distribution function but the road would appear to merely achieve access to the individual development sites from the A22. The rationale for such a road would need to be clarified. It is unclear how such a road could be linked to a northern A271 relief road unless options 15b and 15c could be designed to facilitate this.

Option 15e

Section of Document:

Your View: Agree

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. Options 15d and 15e introduce the concept of a southern Hailsham relief road. This implies a road with a wider strategic or traffic distribution function but the road would appear to merely achieve access to the individual development sites from the A22. The rationale for such a road would need to be clarified. It is unclear how such a road could be linked to a northern A271 relief road unless options 15b and 15c could be designed to facilitate this.

Question 15g

Your View: Agree

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The recognition of the need for major infrastructure delivery to facilitate suitable access to the A22 Primary Route is supported. It is critical to ensure that those options carried forward, either individually or collectively, provide scope for this to be achieved. The phrasing of options 15b and 15c imply that the necessity for a northern relief road is dependent on whether option 15a is pursued but it should be borne in mind that they would be likely to bring about the need for such an improvement in their own right. None of the options acknowledge impact on the A27 Trunk Road and the potential need for improvements. Furthermore, they have also not been presented in the context of a Quality Bus Corridor to Polegate and Eastbourne which would be crucial to achieving sustainable development.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: option

Question 15g

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The Boship roundabout capacity issue identified against option 15a is equally applicable to any of the options for the town and those in Polegate.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: option

Question 15h

Section of Document:

Your View ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. There is a potential tension between the spatial objectives in that enhancements to the approaches to the town could undermine the efforts to reduce congestion in the town centre. There is also an absence of sustainable travel patterns at the heart of the over-arching strategy for the town, aside from the inclusion of an aspiration for a central bus station.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: option

Option 16a

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. This option would relate well to the Quality Bus Corridor and could potentially be accessed without the need for a new A22 junction and provide scope to facilitate A27 improvements. Effective measures to overcome severance issues would be critical.
Representation made on behalf of the County Council as Highway Authority. This option would relate well to the Quality Bus Corridor and could potentially be accessed without the need for a new A22 junction and provide scope to facilitate A27 improvements. Effective measures to overcome severance issues would be critical.

Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The acceptability of option 16f is dependent on the delivery of the Folkington Link to release capacity on the A2270.
Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The options need to acknowledge the importance of downgrading the A2270 in conjunction with the Folkington Link. This is critical to achieving good connections to Eastbourne and enabling the road to function effectively as a local distributor of traffic. The Folkington Link should not be considered or presented in isolation without an appreciation of the necessary complementary measures.

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The spatial objectives acknowledge the need for co-ordination with Eastbourne but not Hailsham in the context of facilitating the delivery of major transport infrastructure. There is also an erroneous reference to the A23, which should be the A22. The reference to the QBC to Eastbourne is supported.

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. The level of development proposed by 17c would be insufficient to facilitate the re-opening of the Friday Street rail station.
Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: [ ] document [ ] chapter [ ] section [ ] option

Question 18k

Section of Document:

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
Agree nor disagree Representation made on behalf of the County Council as Highway Authority. All of the new settlement options would have limited scope to function as self contained communities, leading to a dependence on out-commuting to surrounding settlements. This is incompatible with reducing the need to travel and provides limited scope for sustainable travel patterns.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: [ ] document [ ] chapter [ ] section [ ] option

Question 18k

Section of Document:

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
The new settlement options involve quite considerable amounts of development in new locations, which have not been assessed for their impact on County Council infrastructure. There could be significant implications for the County Council's Transport and Childrens Services functions, as well as other County Council services, from these proposals.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Part of document: [ ] document [ ] chapter [ ] section [ ] option

Question 19f

Section of Document:

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. Most of the locations for village growth raise issues in terms of the viability of achieving improvements to accessibility by public transport and how this could serve to mitigate traffic impact on rural roads. Those that lie on key public transport corridors or which are afforded convenient linkages to larger settlements are likely to be more capable of accommodating limited sustainable growth.
No opinion Representation made on behalf of the County Council as Highway Authority. Most of the locations for village growth raise issues in terms of the viability of achieving improvements to accessibility by public transport and how this could serve to mitigate traffic impact on rural roads. Those that lie on key public transport corridors or which are afforded convenient linkages to larger settlements are likely to be more capable of accommodating limited sustainable growth.
Question 22e

Section of Document:

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. Most of the locations for village growth raise issues in terms of the viability of achieving improvements to accessibility by public transport and how this could serve to mitigate traffic impact on rural roads. Those that lie on key public transport corridors or which are afforded convenient linkages to larger settlements are likely to be more capable of accommodating limited sustainable growth.

Option 25b

Section of Document:

Reason for comment:
Affordable housing should meet South East Plan criteria.

Question 23f

Section of Document:

Reason for comment:
No opinion Representation made on behalf of the County Council as Highway Authority. Most of the locations for village growth raise issues in terms of the viability of achieving improvements to accessibility by public transport and how this could serve to mitigate traffic impact on rural roads. Those that lie on key public transport corridors or which are afforded convenient linkages to larger settlements are likely to be more capable of accommodating limited sustainable growth.
Reason for comment:
The County Council considers the Core Strategy should say something more about waste and waste minimisation in relation to development proposals (even though the County Council's Minerals and Waste Development Framework will set overall policy).

Reason for comment:
The County Council is pleased to see that Wealden is addressing Gypsy and Traveller sites even whilst work is continuing on the Partial Review of the South East Plan to determine the number and distribution of gypsy and traveller pitches by district. The County Council is engaged in joint work with districts and boroughs with all authorities as equal partners. The authorities are advising the South East England Regional Assembly (SEERA) on the number of permanent pitches needed and their distribution to districts. Ultimately these will come back through the Regional Spatial Strategy process with numerical targets for each local planning authority. The Core Strategy will need to include the criteria for G&T site provision within the District.
Part 6
Section of Document: Wealden’s Communities

Your View: Agree
Reason for comment:
The County Council strongly supports locating development so as to improve the viability of bus services, particularly where subsidy-free commercial services are available - these are likely to be much more sustainable into the future.
Consultee ID: Arr-Jones
104491 East Sussex County Council

Option 27a

Section of Document:

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. Option 27a is inappropriate in placing the emphasis on bus service viability, which is often dependent on the vagaries of the commercial market. New development can play an important role in safeguarding the future of vulnerable services but this should not in isolation dictate the location of future new development. It should instead be focused on those locations that are most sustainable, with an emphasis on ensuring that developers facilitate the provision of appropriate bus services through contributions and infrastructure. The option also refers to services to and between towns, which omits town services that are likely to be crucial to the accessibility of key settlement extensions.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Option 27b

Section of Document:

Reason for comment:
The County Council is actively engaged in overseeing work to establish what is needed to return rail services to Uckfield - Lewes and would support the return of the link to Tunbridge Wells. However, the amount of development needed to assist in funding a re-opening is not known at this stage and need not be confined to development along the railway route.

Consultee ID: Arr-Jones
104491 East Sussex County Council

Option 27b

Section of Document:

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. The sentiment of Option 27b is supported in that it recognises the role that new development could play in facilitating the reinstatement of the rail line. The reference to the service again relates to the commercial priorities of a train operator and the terms of reference for the option would be better focused on how the accessibility merits of new development along the route of the rail line would be enhanced by the funding of measures to assist its reinstatement (in itself subject to a commercial decision by the rail industry).
The County Council supports the concept of a Parkway station at Polegate, although recognising that much work is required to establish the feasibility of this concept.

Agree nor disagree Representation made on behalf of the County Council as Highway Authority. Option 27c relates to a commercial decision by the rail industry but could be explored in the context of major growth at Hailsham/Polegate. In parallel with option 27e, it would also be important to understand the feasibility of such a facility from an operational perspective by assessing the implication that it could have on existing commercial services.

No opinion Representation made on behalf of the County Council as Highway Authority. No objective relating to accessibility and encouraging sustainable travel has been included. This is important in supporting the vision for growth and reduced congestion.
Consultee ID: Arr-Jones  
104491 East Sussex County Council

Part of document: □ document □ chapter □ section ☑ option
Option 27d

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
The County Council considers the A27 will need to be improved because of the importance of achieving economic regeneration for the Sussex Coast and the potential significance of transport infrastructure to that regeneration.

Consultee ID: Arr-Jones  
104491 East Sussex County Council

Part of document: □ document □ chapter □ section ☑ option
Option 27f

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
Representation made on behalf of the County Council as Highway Authority. Option 27f is inappropriate in seeking to match parking provision with demand. A restrained approach should be taken that encourages greater use of walking, cycling and public transport whilst recognising car ownership. This is consistent with the County Council’s adopted parking standards which advocate parking provision based on the levels of accessibility afforded to a specific location. These maximum standards account for the varying levels of car ownership that can typically be expected at different types of household.

Consultee ID: Arr-Jones  
104491 East Sussex County Council

Part of document: □ document □ chapter □ section ☑ option
Option 27f

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:
The County Council would urge Wealden District Council to adopt the County Council's parking standards, which take into account not only house size and type, but also accessibility.
Consultee ID: Arr-Jones  East Sussex County Council

Part of document: ☑ chapter  □ section  □ option

Section of Document: Making it Happen - Implementation

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
Discussions have already been held between County and Wealden officers to establish County Council infrastructure requirements and the County Council looks forward to continuing to work with Wealden to use infrastructure information to help inform choices.

Consultee ID: Arr-Jones  East Sussex County Council

Part of document: □ document  □ chapter  □ section  ☑ option

Section of Document: Infrastructure Requirements

Your View  ☑ Agree  □ No opinion  □ Disagree

Reason for comment:
The County Council supports proposals for improving the A27 west of Polegate and A27/A22 junction as both give greater potential for the relocation of County Hall.

Consultee ID: Arr-Jones  East Sussex County Council

Part of document: □ document  □ chapter  □ section  ☑ option

Section of Document: Infrastructure Requirements

Your View  □ Agree  □ No opinion  ☑ Disagree

Reason for comment:
Wealden is to be commended for starting an Implementation Plan / infrastructure schedule at Issues and Options stage. As far as the County Council is concerned, however, infrastructure requirements are an inescapable consequence of the spatial options selected. The choice of options should include the infrastructure consequences as part of a more integrated selection process linked to development strategies - not in isolation.

Question 32a

Reason for comment:

Question 32b

Reason for comment:
Consultee ID: Mrs Harcourt-Smith  
104494

Part of document: ☑ option
Question 32b

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
See the Wealden Adopted Local Plan of 1998, paragraph 16, 17 and Para 16.9 (1). This plan is clear that there should not be development West of Polegate. Quote from Chapter 16 para 9: The objectives of the Plan with regard to Polegate ... can therefore be defined as follows: 1) to protect the attractive landscape setting of the settlements Quote from Chapter 17, paragraph 17 Development Boundary .. the porximity of the South Downs, designated as an AONB constrains further development boundaries for Polegate ... therefore seek to restrict the physical expansion of these communities to preserve their attractive countryside setting. The above guidelines are still valid and still apply to the whole area west of the A22 north of A27.

Consultee ID: Ms Dixon-Nuttall  
104496

Part of document: ☑ option
Question 11f

Section of Document:

Your View ☐ Agree ☑ No opinion ☐ Disagree

Reason for comment:
Not enough infrastructure for possible 2,310 dwellings.

Consultee ID: Ms Thomas  
104508
Ashdown Forest Riding Association

Part of document: ☑ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☐ Agree ☑ No opinion ☐ Disagree

Reason for comment:
Any development in AONB should respect the rural nature of the countryside, the rural economy and the lifestyles of the people who choose to there.
Consultee ID: Ms Thomas  
104508 Ashdown Forest Riding Association  
Agent ID: 

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Option 6a  

Section of Document: 

Your View  
☑ Agree  ☐ No opinion  ☐ Disagree  

Reason for comment: 
This would help to reduce traffic on rural roads. 

Consultee ID: Ms Thomas  
104508 Ashdown Forest Riding Association  
Agent ID: 

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Question 19f  

Section of Document: 

Your View  
☐ Agree  ☑ No opinion  ☐ Disagree  

Reason for comment: 
We would be concerned about an increase in the volume of traffic on roads over Ashdown Forest. Support conservation of Ashdown Forest Important habitat for wildlife. Development on the Ashdown Forest should be restrained. Developers should contribute to improving routes through the Ashdown Forest. 

Consultee ID: Ms Thomas  
104508 Ashdown Forest Riding Association

Part of document:  
☐ document  ☐ chapter  ☑ section  ☐ option  
Section of Document: Transportation Needs  

Your View  
☐ Agree  ☑ No opinion  ☐ Disagree  

Reason for comment: 
We have identified 4 places in which pegasus road crossings could be installed as a part of the necessary infrastructure to support growth in traffic volumes resulting for new development in Wealden.
Consultee ID: Ms Thomas
104508
Ashdown Forest Riding Association

Part of document: □ document □ chapter □ section ✓ option
Option 28b

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Want to work with WDC, ESCC and other local councils to ensure Rest of Wealden improvements are included in the LDF and LDD.

Consultee ID: Mr Higgins
104509

Part of document: □ document ✓ chapter □ section □ option
Section of Document: Location Plan

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:
I don't disagree with the correct developments where needs are established and there is a viable and sustainable transport policy. This is not in place, especially in Hailsham where the nearest commutable rail links are Uckfield, Polegate and Lewes (Berwick is limited with limited parking), added to that the fact that most southern towns are 'dormitory' towns where a sizable amount of people commute to Brighton and London. This makes the development of residential dwellings, very difficult so that the already creaking minor roads and trunk roads don't break under the weight. Also buffer zones, with villages like Hellingly and Pevensey already suffering the threat of being swallowed up into the much larger neighbouring centres of Hailsham and Eastbourne respectively. This would be a betrayal of the character and natural landscape to do this, just because it is an easy option. Finally, if development is to be done, it should be along the mainline railways and roads, i.e. the A22/A27/A21 or along the mainlines from Polegate to Lewes or Uckfield to Crowborough.

Consultee ID: Mr Higgins
104509

Part of document: □ document □ chapter □ section ✓ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
AONB in the 50’s maybe, but many are now just forcing us to over develop the areas that we use everyday (split in two by dual carriageways and railways). Ensure that buffer zones between towns and villages are maintained rather than tenuous AONB statuses. Let the national park decide the boundaries.
Option 3d

Section of Document:

Reason for comment:
Essential, I would place a higher need on business than housing at the present time.

Option 2a

Section of Document:

Reason for comment:

Option 2b

Section of Document:

Reason for comment:

Option 3a

Section of Document:

Reason for comment:
NO, this area needs all the employment it can get. What is the point of building more houses if there is no more employment. Utter futility!!!!!
Consultee ID: Mr Higgins  
Consultee ID: 104509

Part of document:  
- Option 3b

Section of Document:

Your View:  
- Agree
- Disagree

Reason for comment:

Any employment, preferably not warehousing or logistics as these have a low proportion of employment to space.

- Agree
- Disagree

Reason for comment:

Good transport links

Consultee ID: Mr Higgins  
Consultee ID: 104509

Part of document:  
- Option 4b

Section of Document:

Your View:  
- Agree
- Disagree

Reason for comment:

Good transport links
Mr Higgins

Option 4c
Reason for comment:
Transport links are good

Mr Higgins

Option 4d
Reason for comment:
Sites with direct access onto the A22 are preferable, and the land to the west of Hailsham is a good example of this.

Mr Higgins

Question 4e
Reason for comment:
I think it is vital that areas such as Arlington stadium and land around Berwick station to Lewes or back towards Polegate are looked at as they have potential for larger scale growth than bitty developments of 20 houses here and a few businesses there. We will have to sacrifice some of the country to this cause, but transport infrastructure and sustainability of this is vital to invest in.
Reason for comment:
Agree, separate settlements around sustainable transport is the way forward. If this means losing a few hectares of farm land then I think this is a better price to pay than grinding the urban areas to a standstill or ruining the unique character of many smaller villages. Also ensure that they are not built on buffer zones between larger urban centres and smaller villages (e.g. Hellingly and Hailsham).

Reason for comment:
If separate, and not just an expansion of the current boundaries.

Reason for comment:
I think that certain villages and smaller areas have better sustainable transport than many of the already over-populated urban areas. This must be done carefully though, perhaps whole new developments around the transport, and not within village boundaries, i.e. between Lewes and Berwick, or Uckfield and Crowborough.
Option 7a

Better to outline a standard approach.

Option 7b

Option 7c

Option 7d

Excellent transport compared to many other areas, flooding would need to be addressed

---

Part of document: Option 9c

Section of Document:

Reason for comment:
Could be spaced out, and utilise more space than is available elsewhere without over developing the coastal regions, already creaking.

---

Part of document: Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
This is a meaningless figure when developments in areas around Hellingly, Hailsham, Pevensey, Polegate etc are in the 100’s. 15 would be a god-send

---

Part of document: Option 11a

Section of Document:

Reason for comment:
Option 11b

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree
Reason for comment:

The strategic gap must be protected, Hellingly is already getting 400+ dwellings at the hospital, and another 500+ is just too much for this area. The transport is currently at breaking point, the Sewerage works are not capable of supporting this as outlined in a number of documents in applications for planning permission in this area. It is not the right thing for Hellingly to become a suburb of Hailsham, as with many other surrounding villages. There is also the potential for impact on the Pevensey Marshes (800 mtrs away) and the wildlife habitat. It has no rail links within anything other than a car journey with no prospect of significant local employment. It is also not within easy walking distance of Hailsham town centre, causing even greater load on the existing transport infrastructure and town centre car parking (as most people would use their cars).
Consultee ID: Mr Higgins  
104509

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Option 15c

Section of Document:

Reason for comment:
Further development within easy walking distance of Hailsham town centre would seem more desirable than developments in the more outlying fringes as it could potentially have a lesser impact on the volume of traffic in the town centre and the already over stretched car parks.

Consultee ID: Mr Higgins  
104509

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Question 15h

Section of Document:

Reason for comment:
There is already considerable further development approved for Hailsham. We really need to see what effect the currently planned growth has on the infrastructure and services before approving any further large scale development in and around Hailsham. The town centre is already choked with traffic and parking in the town is difficult, bordering on impossible, much of the time. Large new developments would result in the need for considerable additional town centre parking, as well as additional health care facilities and schools. It is not sufficient to incorporate a new surgery into development proposals unless we can be sure that we will be able to attract dentists and GPs to the area to work. In view of the limited employment opportunities in Hailsham, the majority of incoming residents would presumably work outside the area, resulting in increased pressure on the wider road network as they made their daily journeys to and from neighbouring towns. Without a rail link Hailsham is surely nearing/in danger of exceeding its growth potential already.

**Consultee ID:** 104509  
**Mr Higgins**  

### Option 24b

#### Section of Document:

**Reason for comment:**

It does not seem realistic to plan to provide less than 2 parking spaces per unit (which seems to be what higher densities would require) - people will still own cars, so either the new developments will be choked up with parked cars on every available bit of space or people will choose not to move in to new homes because there is inadequate parking to meet their needs.

104509

Part of document: ☑ option
Option 28c

Section of Document:

Reason for comment:
Loss of existing facilities is unacceptable - more homes require more facilities, not less.
CORE STRATEGY ISSUES AND OPTIONS CONSULTATION

Thank you for your letter of 29th June 2007 enclosing the Issues and Options Consultation Paper. We are pleased to see the progress you have made with this. Whilst we cannot comment on the merits of particular proposals or options, we are very pleased with your initial approach, which seeks to identify alternative spatial outcomes and explain the implications arising from those outcomes. In particular, I was impressed with your approach at the Wealden LSP meeting on the 10th July and we like the way you are seeking to focus on place-shaping and set out how places might change over the plan period. You may wish to compare notes with colleagues in Brighton and Hove, who are re-casting their Core Strategy along similar lines. We understand that you are continuing to engage with the Highways Agency, Environment Agency and Natural England to help you avoid potential “showstoppers” at a later date and that the preferred options will be deliverable. Do please let us know should any issues arise that need our assistance.

We have spoken on a number of occasions about what a model core strategy might look like. We trust you have studied the Planning Inspectorate publication “Local Development Frameworks: Lessons Learnt Examining Development Plan Documents” June 2007. In addition, you may wish to consider the following pointers:

· Ensure that the document comprises a spatial vision, strategic objectives for the area, a spatial strategy, core policies and a monitoring and implementation framework with clear objectives for achieving delivery (PPS12, paragraph 2.9);
· Consider if it would be helpful to include a “pen picture” briefly covering social, economic and environmental context along with issues arising from other plans and strategies;
· Make sure strategic objectives relate to what the plan is meant to deliver, are SMART (specific, measurable, achievable, relevant and time-bound) and are, where possible, distinct from sustainability objectives;
· Provide a well articulated strategy saying what will be delivered, where, when, how and with whose help (together with planned contingencies) and ensure that separate topic strands are brought together at identified broad locations to facilitate place-shaping;
· Include a distribution to broad locations of housing (essential) employment and other key uses where change is envisaged together with a housing trajectory;
· Ensure core policies are limited to what are needed to deliver the strategy, are SMART and are distinct from generic DC policies;
· Avoid any repetition of national policy but demonstrate (we suggest through application of appropriate sustainability objectives in the sustainability assessment and report) that the plan is consistent with national policy;
· When conducting sustainability appraisal, consider addressing “showstopper” issues first (for example harm to Natura 2000 sites) before getting into the finer grain of assessment;
· To make sustainability appraisal more manageable, consider mapping sustainability objectives to the hierarchy of alternatives in figure 27 of guidance (for examples some objectives may be more pertinent to how a chosen area should be developed rather than to choice between areas).

There is one critical issue relating to soundness test vi that we will expect the Wealden Core Strategy to address, please. Mid Sussex District Council is preparing an Area Action Plan Development Plan Document (AAP DPD) for East Grinstead in conformity with saved policies from the West Sussex County Structure Plan. Once submitted, that DPD will be examined for soundness. A critical issue will be the proposed route of the relief road needed to support the development of 2,500 dwellings at East Grinstead. We cannot comment on the merits of the chosen route or any other alternatives that have been considered by Mid Sussex District Council until the Inspector has examined the plan and issued his binding report. However, if the Inspector’s binding report were to find that the most suitable route for the relief road is one that crosses the boundary into Wealden and East Sussex, the Wealden Core Strategy will need to make express provision for that leg of the road and explain how the Council would provide the necessary support through its (and its partners’) powers to deliver it. In preparation for the preferred options stage of your Core Strategy, we would urge you to discuss the issue with Mid
Sussex and test alternative options for linking the relief road to the A22 from where it is expected to cross the county and district boundary. We would hope that Mid Sussex would have their Inspector’s report before you submit your Core Strategy so that you can fully align it with the East Grinstead AAP. I have copied in Judith Hewitt to make her aware of what we are saying and would be happy to meet you and Judith together to explore these issues. I hope you find our comments helpful. Do feel free to get back to me if you have any other queries or need further guidance. Yours sincerely David Paine, BSc, DipTP, DMS, MRTPI, MCMI Senior Planning Officer

Mr Moon
The Parish Council of Hellingly

Option 18e

Agree
Disagree

Whilst we all accept that appropriate housing is required, the locations must be in the right place where they can receive local support and do not ignore the vital "quality of life" of those who would be drastically affected. In this context Bird-in-Eye hill is the wrong place. Letter dated 14th Ma, 2007 has been included as part of this representation.

Miss Baitup

Part 5

Agree
No opinion
Disagree

every effort should be made to build on brownfield sites; also I understand that in Britain to-day, some 700,000 homes stand empty. Meanwhile, acres of urban industrial sites lie idle. Could not these be developed, cutting down on car journeys and using schools, shops and sewers more efficiently, instead of despoiling our beautiful countryside.
Part of document: Option 19e

Section of Document: Agent ID:

Your View: Disagree

Reason for comment: Hartfield parish council should be redesignated as 'village with growth potential' with a plan submitted showing growth potential. Hartfield requires new integrated facilities with health centre, car parking, village hall, mixed housing with other supporting community facilities including youth club facilities and public toilets. It is considered that the most effective results will be achieved from holistic positive planning.

Consultee ID: 104530

Part of document: Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Disagree

Reason for comment: only limited development for local and affordable housing

Consultee ID: 104530

Part of document: Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Disagree

Reason for comment: Whilst I disagree with large scale development in AONBs, I think there is a case for limited development in appropriate locations for small scale development to meet local need and affordable needs. Such sites should be allocated whenever possible.

The most effective way of ensuring that sites come forward and the housing built is to ensure that the land is available and that the required infrastructure is also available.
Consultee ID: Mr Oldham
104530

Part of document: document

Section of Document:
Your View Agree No opinion Disagree

Reason for comment:
I feel strongly that new housing in the villages should normally be in the form of terraced housing and flats and essentially for local need and the various forms of affordable housing. Our villages are already dormitory in nature mainly larger private housing with little or no employment opportunities. General purpose new larger homes can only add to this problem, creating an even more unsustainable situation than already exists. In villages, attention should be given to declining employment opportunities and services, to encouraging new and ensuring new housing is of an appropriate scale and type to help local needs.
Option 5a

Section of Document:

Reason for comment:

Consultee ID: Mrs Flittner

Part of document: Option 5a

Consultee ID: Mrs Flittner

Part of document: Option 21a

Section of Document:

Reason for comment:

Consultee ID: Mr Pickup

Part of document: Option 3b

Section of Document:

Reason for comment:

Option 3b 1. While a policy is required to allocate new employment land within appropriate locations to meet identified future needs, the core strategy should also be clear about the Council’s policy intentions towards retaining existing employment land and buildings (i.e. land and buildings that fall within Use Class B1, B2 and B8 of the Use Classes Order 1987). 2. Such a policy needs to be couched so as to provide a flexible approach having regard to different planning considerations that may apply to individual sites or redevelopment proposals. For example, in such cases as existing purpose built industrial estates and business parks, it would be appropriate to strongly resist any proposal that would reduce the employment potential of such areas. In other cases however, for example where business premises comprises a non-conforming use within a residential area, or where former factories and business premises have become redundant and disused (for example at the former Merrydown Cider factory in Horam), a more flexible policy is needed to establish appropriate and sustainable forms of development that could give rise to other environmental improvements and/or wider community benefits. In such cases, a policy needs to be sufficiently flexible to permit change of use/redevelopment to other uses or to provide mixed housing/employment use on suitable larger sites. Clearly, where such sites are of a suitable size to accommodate both housing and employment uses within the appropriate locations (and having regard to local employment needs and demand for business accommodation) this would be a highly sustainable form of development notwithstanding the potential loss of some of the employment land and/or buildings as part of the redevelopment scheme.
Option 4b 1. This option is worthy of detailed consideration as part of a large mixed development perhaps in the form of a new Polegate Neighbourhood or even a small ‘eco-settlement’. Employment opportunities exist at Cophall Farm at present both in the form of the motorist service area uses and in the form of business use of former agricultural buildings. This could be expanded with additional employment uses to form a new neighbourhood centre to serve a small housing settlement while still providing for motorists using the A22/A27 corridor and tourist/visitors in the area generally. 2. This part of the core strategy document needs therefore, to be crossed referenced with the part of the document that considers the general potential for new settlements or concentrated growth (i.e. paragraphs 5.38 – 5.45).
Option 6d 1. A flexible option should be considered that provides for the growth/expansion of those settlements best suited or equipped (in terms of service provision etc.) to accommodate additional growth. This could be based upon establishing a hierarchy of settlements in relation to their size, accessibility (in all forms), function, services community facilities etc. Thus, rather than establishing a set percentage split between urban and rural settlements, opportunities for growth and development should be the subject of a more objective assessment also having regard to potential landscape impact, impact upon biodiversity etc. This should be linked with the Council’s approach put forward in paragraphs 4.25 – 4.37.

Option 7a 1. Please see response to Option 6d. Option 7a is supported in principle.

Option 7d 1. Any such policy needs to be capable of flexible interpretation to provide for situations where it can be demonstrated that there is no remaining commercial demand or viability for a facility. It would be more appropriate to find a suitable alternative use rather than the former village facility remaining vacant and representing a wasted land resource.

### Option 8a

**Part of document:** [ ] document  [ ] chapter  [ ] section  [✓] option

**Section of Document:** Option 8a

**Your View**  [✓] Agree  [ ] No opinion  [ ] Disagree

**Reason for comment:**

Option 8a 1. The full potential of accommodating additional development at Hellingly Hospital should be investigated further in light of the existing development that is taking place. Further housing development of an appropriate form and scale, may provide the catalyst for securing supporting facilities that will reduce the need to travel. Alternatively proposals such as a 'continuing care village' might be considered along the lines of that which has taken place to the north of Ditchling Common in Lewes District.

### Option 8d

**Part of document:** [ ] document  [ ] chapter  [ ] section  [✓] option

**Section of Document:** Option 8d

**Your View**  [✓] Agree  [ ] No opinion  [ ] Disagree

**Reason for comment:**

Option 8d 1. The draft document identifies the potential for the establishment of an 'eco-town' which is worthy of more detailed consideration. The use of greenfield land to accommodate future housing and employment needs is inevitable and therefore, serious consideration should be given to the planning merits of locating a potential new 'eco-settlement' to the west and north west of Cophall Farm, Polegate given its excellent accessibility and the strategic importance of the location. It should therefore crossed reference with paragraphs 5.38 – 5.45 of the document.
Question Ten 1. The development plan system has worked well in identifying and allocating sites for development to meet future employment and housing needs. While it is agreed that a threshold needs to be introduced, 30+ residential use on the edge of towns and 15+ residential use on the edge of villages is too high a threshold. In the past, development plans have been capable of identifying all potential housing sites for 5 dwellings and above. 2. A criteria based policy will however still be required for sites lower than this threshold or for future unidentified sites that may come forward. 3. There are no reasonable grounds for claiming that the examination into site allocations would become bogged down through the consideration of small omission sites (paragraph 5.10) as all such potential sites should be considered as part of the LDF process. The first examination in public in to the housing land allocations document is clearly an appropriate time to consider all such potential sites.

Option 11e 1. It is not clear whether this option includes the existing housing land allocated at Alderbrook, Crowborough as part of the Non-Statutory Local Plan (policy CR4). Paragraph 5.15 indicates that where such allocated sites in the Non-Statutory Local Plan are not the subject of extant planning permissions (as in the case of land at Alderbrook) that "it will be necessary to reassess these areas as part of the Local Development Framework process to see if they still deliverable etc and that they meet new regulatory requirements on strategic environmental assessment". 2. If Option 11e seeks in part to retain the existing allocation at Alderbrook the subject to policy CR4 in the Non-Statutory Local Plan, then this is strongly supported. Indeed, the District Council must have considered the land suitable for housing development given that the land is allocated in the Non-Statutory Local Plan. 3. If however, Option 11e seeks to develop 120 – 170 dwellings on land that includes the adjoining recreation ground to the east, then there is a strong objection to this proposal. The recreation ground provides an important local recreation and open space facility for existing residents and the existing standard of provision could be improved through financial contributions arising from the development of the allocated land the subject of policy CR4. There is no obvious site to relocate this important facility.
Option 12c

1. It is acknowledged that while Heathfield comprises an important local service centre for the surrounding rural area, its location within the High Weald AONB limits the potential for the outward expansion of the settlement. 2. Given the good level of services and community facilities available, the limited extension of the town should be carefully considered in order that a contribution can be made to meeting housing demands generally within district, and also in helping to provide a reasonable range of choice of location for those wishing to occupy new dwellings. 3. Land in the vicinity of Option 12c is therefore, worthy of further consideration as small scale housing development here can be achieve without leading to coalescence of development or unacceptable outward expansion into the rural surroundings. There is also good road access at this location, which is within a relatively short distance of the central part of Heathfield to the west. There is also scope in this location for housing development to be contained by existing field boundary tree screening so as to minimise visual impact.

Option 15a

1. While the area around Hellingly village would be inappropriate for further development due to potential flood risk, inadequate road access, and visual impact upon the rural setting of its historic core, there is potential to intensify development at the former Hellingly Hospital site which is the subject of a current residential conversion scheme. A more concentrated development at this location could provide the opportunity for securing associated community facilities that would help reduce the need to travel. Alternatively, self-contained proposals, such as a ‘continuing care village’, for the elderly could be considered at this location (see also the response to Option 8a and 18g).
Option 16b 1. The land to the west and north west of the Cophall Farm service area has many attributes that make it worthy of detailed consideration and assessment to help meet future development needs within the southern part of the district. As shown on the attached OS Map extract the Baker-Beall family at Cophall Farm own some 58 hectares of land which includes the land occupied by the existing service area facilities. 2. It is inevitable that greenfield land will need to be released in this part of the district in order to meet future housing and employment need during the period covered by the Core Strategy. While there are other options for considering disbursed growth, there are advantages in seeking concentrated growth at a single, suitable location such as Cophall Farm, so as to create a catalyst for supporting facilities. 3. Physically, the land is well contained by its topography and boundary tree screening. Significant development could take place here without having an unacceptable visual impact on longer distance views around the site. 4. There is already good road access to the strategic highway network and focusing development at this location could also provide the catalyst for the constructing Folkington Link along its existing protected alignment. 5. Although the area is physically separate from both Polegate and Hailsham, the existing service area could be expanded to form a new neighbourhood centre to serve mixed development on the adjoining to the west and north west. There is existing employment created by the service area facilities as well as employment generated by the reuse of existing farm buildings at Cophall Farm. This could be expanded to generate additional employment facilities at this location as well as other community facilities. 6. Existing bus service routes could be modified to serve development at this location so as to provide public transport connections with Hailsham, Polegate and (Polegate Railway Station). The Cuckoo Trail is within close proximity and other cycle and foot path links could be extended to serve the site. 7. There are no over-riding physical or practical reasons why this location could not accommodate a small, relatively self-contained ‘eco-settlement’ where all the development that takes place is carefully conceived and designed so as to minimise the impact upon the environment through ‘green’ building, drainage and other techniques. A development of sufficient size could also contain its own primary school facility and sewage treatment disposal facilities. 8. These representations should also be read in conjunction with the response to Option 4b, 8d and 16b.
Option 18h

Reason for comment:
Option 18h 1. See Representations in Response to Options 4b, 8d and 16b in response to the potential for establishing a new ‘eco-settlement’ at Cophall Farm

Option 22b

Reason for comment:
Option 22b 1. Following pre-application consultations with the District Council and also Horam Parish Council over the past 18 months, the Local Planning Authority should beware of the development potential of reusing the former Merrydown Cider factory site in Horam which represents one of the few significant ‘brownfield’ opportunities within Wealden District for accommodating new development. The site has been disused for quite sometime and the vacant buildings are having a blighting effect on this part of the settlement. 2. The land is shortly to be the subject of a full planning application for redevelopment following a two day exhibition of the draft proposals towards the end of 2006. 3. The land has potential to accommodate a mixed development comprising up to 900 sqm of B1 business floor space and between 80 – 90 dwellings. 4. Clearly, the emerging Core Strategy document would provide an opportunity for formally recognising this important and significant redevelopment proposal.
Option 24a

Reason for comment:
Options 24a – 24d. Any density policy should reflect national advice contained in PPS3 (Housing). The policy should require a minimum density of 30 dwellings per hectare but also recognise that there may be opportunities for higher densities in appropriate locations particularly around accessible public transport nodes or within the central parts of settlements. The policy should also recognise that with regard to the reuse of ‘brownfield’ land, there maybe physically constraints that limit the potential to achieve the normal minimum density requirement. In such cases, the policy should provide for these proposals to be considered on their individual planning merits but with the broad aim of making more efficient and effective use of existing developed land even if at less than 30 dwellings per hectare.

Option 25a

Reason for comment:
Option 25a. The District Council needs to undertake a detailed assessment of the mix of recent housing built within the District to establish whether the provision of smaller dwellings should remain a priority. National Planning Policy advice contained within PPS3 (Housing) seeks to promote balanced and mixed communities which in addition to meeting smaller household requirements also needs to provide for new family accommodation (for example 4 and 5 bedroom dwellings).
Option 25b 1. Within the towns identified, there is no justification for reducing the threshold below 15 dwellings for providing affordable housing, as advocated in national planning policy advice contained in PPS3 (Housing). The requirement for 40% is also too great as this may prevent redevelopment sites coming forward within these sustainable locations. The policy should also reflect the increased costs of redevelopment brownfield sites as compared to developing greenfield sites. In Hastings Borough for example, there is a reduced requirement (25%) for affordable housing schemes on brownfield sites compared to 30% on greenfield sites. Wealden District Council should consider introducing a similar policy.

Option 25c 1. It is assumed that this option relates to established and identifiable settlements and other than the 5 main Wealden towns, as opposed to rural areas outside established settlements. Assuming this to be case, a ‘on-to-one’ provision of affordable housing with open market units is wholly unreasonable and is bound to result in having a negative impact on the supply of housing coming forward within such settlements affected. This would have a serious impact upon over-riding aims of seeking to make fully efficient and effective use of previously developed land within suitable settlements. There is no sound planning reason why suitable settlements such as large villages and smaller villages providing a local service function, should not be treated in the same way as the 5 main towns having regard to the thresholds for providing affordable housing in redevelopment schemes. 2. A policy should also be introduced that enables developers to make a financial contribution towards affordable housing provision where it cannot reasonably be provided on the application site (this is particularly relevant to small apartment schemes). Such funding could then be used to provide services and ‘kick start’ sites specifically allocated for affordable housing such as in the Non-Statutory Local Plan.
Option 25d 1. Outside established development boundaries, it is agreed that affordable housing would be appropriate as an exception to countryside restraint policies, when a local need can be clearly identified.

Option 30b 1 Please see response to options 4b, 8d, 16b and 18h.
Row 19a of table 10 states that Forest Row has the strategic potential to deliver between 200 and 340 dwellings and that potential locations lie to the north and west of the village. Ashurst Wood, within Mid Sussex is located approximately 1½ miles north of Forest Row. The area between Ashurst Wood and Forest Row is not located within a designated Strategic or Local Gap. However, the relatively short distance between the two settlements is an area which is considered to be particularly vulnerable to development pressure and Mid Sussex District Council would have concerns about significant development proposals within the AONB north of Forest Row as this could have a harmful effect on the character of the rural area and the setting of the villages. As stated above, a route for the East Grinstead Relief Road that by-passed Forest Row to the west was considered at the Issues and Options stage of the East Grinstead Area Action Plan but was ruled out as a preferred option due to the particular environmental constraints and designations. I would expect that many of these designations and environmental features would also constrain the development potential to the west of Forest Row for the level of housing suggested in your Issues and Options document. Throughout the consideration of the East Grinstead Area Action Plan both Wealden District Council and East Sussex County Council have been concerned that options for the East Grinstead strategic development and the associated transport package would result in a detrimental impact on Forest Row. In response to different scenarios being tested through a transport model East Sussex County Council have stated that they would only accept relief road proposals which increased traffic through Forest Row by less than 5%. East Sussex County Council consider that it would be difficult to mitigate against any significant increases in what is often a very congested part of the highway network. Given their current position with regard to increased flows through the village I would be interested to understand how the County Council, as highway authority, would propose to manage and mitigate against the additional car movements arising from up to 340 dwellings north or west of Forest Row. I hope that these comments are helpful. If you have any queries regarding the above please do not hesitate to contact me.
Paragraph 6.41, relating to the A22, is inaccurate as it indicates that Mid Sussex District Council is no longer pursuing a relief road for East Grinstead as part of an Area Action Plan for strategic development. It therefore, does not reflect the current position, or the policies and intentions of neighbouring authorities (Mid Sussex District Council and West Sussex County Council) and strategic documents including the West Sussex Structure Plan, the East Grinstead Area Action Plan Pre Submission document and the Regional Spatial Strategy. The West Sussex Structure Plan allocates strategic development to the west / south west of East Grinstead. The Structure Plan allocation is contingent upon the provision of a comprehensive package of transport improvements which will include improvements to the existing road network (as stated in your paragraph 129) and the provision of a relief road. Therefore, the Structure Plan clearly establishes the principle of a large-scale development with an associated transport package including a relief road. Mid Sussex District Council has been working with neighbouring authorities and other agencies to deliver the allocation through an Area Action Plan. Mid Sussex District Council published the Pre-Submission Area Action Plan in May 2006. This document included a number of options for the development and the alignment of an A264 – A22 relief road. At the 'Issues and Options' stage, a relief road route was considered which ‘by passed’ Forest Row and joined the A22 south of the village. This was not included as a preferred option due to the considerable environmental and delivery constraints, partly resulting from the trustee status of East Sussex County Council in managing Ashdown Forest. As you may be aware, following consideration of the representations submitted at the Pre Submissions stage, members at Mid Sussex Full Council on 25th July 2007 considered a report which sought agreement on the contents of the submission document that is expected to be submitted to the Secretary of State later this year. This document will include a single route for the relief road that will be funded by the consortium of developers building the strategic development. The preferred route links into the A22 at the Brambletye Bends north of Forest Row. The primary purpose of the relief road is to relieve traffic congestion in East Grinstead and, in approving the overall package of measures to be included in a Submission Draft Area Action Plan, members had to balance the benefits and disbenefits in and around the town and the surrounding area. Whilst many of the surrounding villages and rural areas would benefit from a relief road, it is acknowledged that there would be increased flows along the A22 to the north and south of East Grinstead and mitigation measures would need to be put in place. Therefore, a connection into the A22 at the Brambletye Bends would result in increased traffic flows through Forest Row. However, as a primary route, designated by East Sussex County Council as a lorry route, it is an appropriate route for longer distance traffic to take. Officers of East Sussex County Council have expressed the view that transport improvements in Forest Row have maximised the capacity of the village. However, officers of West Sussex County Council do not consider that evidence has been provided that demonstrates that all mitigation measures have been explored. Therefore, it will be necessary that further consideration be given to transport measures to cope with any increased traffic. It should be noted that, as in East Grinstead, traffic levels would in any case continue to rise significantly on this stretch of road through Forest Row without the strategic development at East Grinstead. Whilst the Area Action Plan will form part of the Local Development Framework for Mid Sussex it will not do so for neighbouring authorities. Therefore, it is important that these authorities take account of the implications of the East Grinstead Area Action Plan within their Local Development Frameworks. At its western end the single preferred option for the relief road also crosses the West Sussex county boundary and enters Surrey and Tandridge administrative areas. In May 2006 Tandridge District Council published, for consultation, their Core Strategy Preferred Options Report. This document stated that Tandridge District Council would oppose any East Grinstead bypass within the Tandridge Green Belt. In response to this statement both SEERA and GOSE made
comment within the context of soundness test 6 of PPS12 which states: “The strategies/policies/allocations in the plan area are coherent and consistent within and between development plan documents prepared by….neighbouring authorities, where cross boundary issues are relevant.” GOSE, in particular, picked up on the statement made within the Tandridge document and stated that they would be looking for evidence under soundness test 6 that Tandridge District Council had liaised with Mid Sussex District Council and that there was a coherent and consistent strategy with the Tandridge Core Strategy and the East Grinstead Area Action Plan. In response to these concerns, officers from Tandridge District Council have been working with colleagues from Mid Sussex District Council to formulate suitable wording for inclusion within the Tandridge District Council Core Strategy Submission document (expected December 2007). To avoid similar ‘soundness’ concerns from being raised I would suggest that Wealden District Council take a similar approach. I endorse the suggested wording submitted to you by officers at West Sussex County Council. Incorporation of the text below would help to reflect the current and likely future position and would help to demonstrate that the Wealden Core Strategy is coherent and consistent with neighbouring authorities development plans: “The West Sussex Structure Plan establishes the principle of a large scale mixed use development of 2,500 homes west and south-west of East Grinstead, complete with transport package including a relief road. In preparing an Area Action Plan for East Grinstead, Mid Sussex District Council has considered options for the development and the route of the relief road, choosing a route which enters Wealden District.” Mid Sussex District Council officers and members will continue to work with colleagues from neighbouring authorities in an effort to address concerns and ensure that the best possible development and transport solution is delivered for East Grinstead and the surrounding area.

**Section of Document:** Question 7e

**Your View:** ❌ Agree  ❌ No opinion  ✅ Disagree

**Reason for comment:**

Classifying the existing and future role of the towns and their town centres should inform the strategy and settlement structure and therefore potentially settlement boundaries.
We support the Town Centre Opportunity Area concept for Crowborough and this should be informed by the development of town centre strategies to further identify the town’s shopping and other town centre uses as well as residential and site development opportunities.

We support the Town Centre Opportunity Area concept for Heathfield and this should be informed by the development of town centre strategies to further identify the town’s shopping and other town centre uses as well as residential and site development opportunities.

We support the Town Centre Opportunity Area concept for Uckfield and this should be informed by the development of town centre strategies to further identify the town’s shopping and other town centre uses as well as residential and site development opportunities.

```
We support the Town Centre Opportunity Area concept for Hailsham and this should be informed by the development of town centre strategies to further identify the town’s shopping and other town centre uses as well as residential and site development opportunities. However, the statement requesting the need to find land for school displaced by Tesco development and land for other community civic purposes is incorrect. A new school is being built on land off Marshfoot Lane to replace the Whitehouse School which is being displaced by the Tesco development within the town centre.

Reason for comment:

It is stated that a Core Strategy must: · link and be complementary to the spatial strategies of stakeholders, in particular infrastructure providers; · provide a framework for making infrastructure decisions and investments; and, · have a focus on delivery of the development that is needed. It is South East Water’s view that the Core Strategy, based on the Issues and Options Report will not meet these objectives. South East Water refers the District Council to its pre-consultation letter dated 4 June 2007, which explains in some detail the water resource planning process. There is no acknowledgement of this process and no proposed means within the Core Strategy to link into the Water Resource Management Plan. Furthermore there is no framework for making decisions on water infrastructure schemes, not all of which are of regional significance and within the remit of the South East Plan. Section 1.15 South East Water agrees with the statement that adequate infrastructure should be in place for new housing. In addition to this, the Core Strategy should also ensure, regardless of growth, that there is sufficient infrastructure in place to serve the needs of the existing population. It is part of South East Water’s remit to address this through their Water Resource Management Plan and the company are committed to working with Wealden District Council to ensure that the need for water is met within the District.
Section 2.16 – 2.18 The report states that given the importance of the District for nature conservation interests it is not a good choice for locating strategic (sub-regional) development. Conversely, the plan should recognise that inevitably some development may be necessary within these areas where there is an overriding need and there are limited opportunities outside of these areas. We refer to water infrastructure schemes, in particular groundwater and reservoir schemes, the location of which are dictated by, amongst other matters, the availability of water and geology. Section 2.19-2.36 South East Water welcomes the addition of a section on Wealden’s Water Cycle and the holistic approach being adopted by the District Council. The company does however believe that in developing the Core Strategy, the need for water resource infrastructure should be given greater prominence and discussed within the section on infrastructure (part 7). It is implied within Section 2.34 that Wealden District Council sees no role for itself in the provision and delivery of water demand measures and new resources, deferring to the Government’s Code for Sustainable Homes and the South East Plan. This is contrary to policies NRM1 and NRM2 of the draft South East Plan that sets out a range of responsibilities for local authorities in the development and delivery of sustainable water resources and strategic water resources. South East Water agrees that future water demand will be met through a combination of demand management and new resources, the details of which will be confirmed by the water resource management planning process. The draft South East Plan currently names Clay Hill in a list of reservoirs that may be developed within the Plan period. South East Water has been granted funding by Ofwat to investigate the feasibility of the Clay Hill scheme. This is being undertaken in the context of a wider appraisal of water resource options for the Water Resource Management Plan (a statutory process that will be subject to Strategic Environmental Assessment and stakeholder and public consultation). The draft plan is due to be published at the end of 2007, with consultation beginning in Spring 2008. The plan will confirm the water resource schemes needed to support both the existing population and deliver growth proposals. Depending on the schemes that emerge from the water planning process, Wealden District may have a significant role to play in delivering the required water resources. Not all water resource schemes will be of regional significance and subject to inclusion in the South East Plan, for example the development of new groundwater boreholes and augmentation of existing water supply infrastructure. The Core Strategy needs to make provision for such infrastructure as the need is identified and include policies that support and where necessary, allocate land for water resource development. South East Water will then be in a position to deliver the resources needed to support regional and district growth and sustainability objectives. As a new plan is prepared every 5 years, the Core Strategy must be flexible to reflect changing circumstances and new demands. The pre-consultation response from South East Water (dated 4 June 2007) provides further information about the water resource planning process. Section 2.39 In terms of generic policies, South East Water would wish to see the following: · the promotion of water efficiency measures within the key urban design principles – South East Water currently has limited powers to ensure that such measures are included within new developments; and, · a policy supporting and seeking to deliver water resource development identified through the Water Resource Management Plan.
South East Water welcomes the approach to infrastructure being adopted by the Council and the active role it is promoting in its delivery. As discussed above, South East Water would wish to see within this Core Strategy recognition of the water planning process and a linkage between the two plans. At the end of section 7.4, reference is made to sewerage facilities having not been the remit of plans at a local level in the past but these now being recognised as crucial to the delivery of growth. This is also the case for the development of new water resources. South East Water would welcome the introduction of any body, such as the Wealden Delivery Board, to deliver key infrastructure in a timely manner. On a cautionary note however, this should not be seen as a substitute to providing clear policy direction and support for infrastructure within the Core Strategy. Ultimately it is the water companies who are responsible for delivering water resources.

South East Water is not in a position to confirm what water resource infrastructure will be required within the District until it completes its Water Resource Management Plan. The limitations of the potential infrastructure requirements within Table 15 should therefore be recognised.

The inclusion of an objective to support and assist in the delivery of water demand measures and the development of new water resources, as identified in the Water Resource Management Plan, would be welcome.
As discussed, the inclusion of an objective to support and assist in the delivery of water demand measures and the development of new water resources, as identified in the Water Resource Management Plan, would be welcome.

Reason for comment:
Should be controlled but each case decided on its own merits

Reason for comment:
Keep the size of the existing towns and villages in proportion to each other but each town needs individual consideration

Reason for comment:
Agreed as long as it avoids town cramming

Question 11h

Section of Document:  

Your View  ☐ Agree  ☑️ No opinion  ☐ Disagree

Reason for comment:
Business land could be developed adjacent to the army camp on the A26. Development should relate to the existing road infrastructure. Land adjacent to the south east of the railway station should be excluded. Development at steel cross could compromise sports development proposals.

Question 31a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Agreed but: reopening of wealden line is crucial - discouraging through traffic on the A22 will adversely affect economic activity in Crowborough - trees and hedges should be planted with every development to maintain high weald local character

Consultee ID: Ms Grimes
104725 The British Wind Energy Assoc

Part of document: ☑ section
Section of Document: Wealden’s Renewable and Low Carbon Potential

Your View ☑ No opinion ☐ Disagree

Reason for comment:
emphasise importance of including a renewable energy policy in Core Strategy (which follows PPS22/Climate change annex to PPS1) BWEA believes that Core Strategy should briefly outline the different renewable energy technologies and equally encourage and promote all forms of renewable energy. Important that the LDF as a whole presents an objective and robust approach to renewable energy, rather than a restrictive policy in response to renewable energy objectors. The LDF must not demonstrate an assumption that renewable energy developments will have negative effects, nor should it fail to fully recognise the many local benefits that arise through renewable energy developments.
BWEA is disappointed with the Council's decision to restrict its renewable energy policy to micro-generation, with no acknowledgement given to the potential for medium sized and community led renewable energy developments. BWEA welcomes the inclusion of a micro-generation policy within the Core Strategy. Options 2a and 2b are too restrictive, choosing only to focus on a percentage target, when other issues including building age, size and use class are of equal significance. Such a policy should stipulate a requirement for onsite renewables to provide electricity for at least 10% of all new buildings' needs in addition to stringent energy efficiency/building performance requirements. Following wording is highlighted as an example: "All non-residential or mixed use developments (new build, conversion, or renovation) above a threshold of 1000m2 will be expected to provide at least 10% of their energy requirements from onsite renewable energy generation. All residential developments (new build, conversion, or renovation) of 10 or more units will be expected to provide at least 10% of their energy requirements from onsite renewable energy generation."

Although the Assembly has no substantive comments to make on this document, we would expect your submitted core strategy to reflect the spatially specific aspects of the draft South East Plan and to identify the broad locations and quantum of housing across the borough/district and the spatial focus in terms of future retail, employment, tourism, community or other infrastructure developments.

We would like to clarify that the Selmeston/Wilmington improvements are not included as a priority in the draft South East Plan as stated in Paragraph 6.39 of Transport Needs: this is in the implementation plan, and is prioritised in the Regional Funding Allocation.

Section of Document:  
Your View ☑ Agree ☐ No opinion ☐ Disagree  
Reason for comment:  
I would ask you to consider including a mention of the police in any reference to planning gain contributions within the LDF or indeed as a separate SPD.

Consultee ID: Mr Garrad  
104820 Community Safety Branch  
Sussex Police  
Part 7  
Section of Document: Making it Happen - Implementation  
Your View ☐ Agree ☑ No opinion ☐ Disagree  
Reason for comment:  
I would ask you to consider the importance of crime prevention based on the ten principles of "safer places" and perhaps ask applicants to show the measures they have taken to reduce opportunities for crime and the fear of crime. "Secured by design" and "Park Mark" should be the standard in all developments.

Ms Myers  
Frant Business Association  
Part of document: ☑ section  
Section of Document: Education Needs  
Your View: ☑ Disagree  
Reason for comment:  
The issue of the safe pedestrian access from the High Street has already been addressed with documented evidence. The vehicular access to the site is being investigated at present and an alternative entrance being sought. No reason can be seen why previous designated site in Church Lane should not be retained within the LDF for the development of a school.

agree with a lot of spatial vision but feel the a27 dualling has not been addressed sufficiently. Certainly a new town at Berwick could never happen without massive infrastructure work beyond Berwick and its environs.
Consultee ID: 105219  Mr Ann Danny Cottage

Part of document:  Option 32a

Reason for comment:
Your View  Agree  No opinion  Disagree

Consultee ID: 105789  Unknown Watsons

Part of document:  Option 12c

Reason for comment:
Your View  Agree  No opinion  Disagree

Agree with most but not Bewick new town which is contrary to everything in S01,3,6. of the spatial objectives. Berwick already has the designation of gateway to the cuckmere valley and thus eastern gateway to the national park. A new town is hardly the appropriate arrival point for tourists to start their tranquil country experience. Just remember tourism 3.29 in the paper tourism, hotels and catering are the main employment sectors in the district.

Heathfield market area. Interest shown in residential development/ light industrial/ office use. Late submission.
It is acknowledged that a number of Local Authorities are seeking a percentage of onsite renewable energy generation in new development and in principle our client supports this approach. However, we consider that any such policy should incorporate an element of flexibility to allow for circumstances where it will not be viable or suitable to incorporate renewable energy equipment to reduce CO2 emissions by a given percentage. Paragraph 8 of PPS22 states that local planning authorities may include policies in Local Development Documents that require a percentage of energy requirements to come from onsite renewable energy generation, however this guidance is subject to the caveat that such policies: 1. should ensure that a requirement to generate on-site renewable energy is only applied to developments where the installation of renewable energy generation equipment is viable given the type of development proposed, its location and design; 2. should not be framed in such a way as to place an undue burden on developers, for example, by specifying that all energy to be used in a development should come from on-site renewable generation. The absence of any such flexibility conflict with the intentions of Government Guidance within PPS22 and its companion guide. Accordingly, Wm. Morrison requests that any such policy on renewable energy includes text to confirm that the percentage requirement will be subject to tests of viability and suitability.

Comments similar to those within Option 2a

We also request that the Core Strategy recognises the important role that the retail sector has in Wealden's economy. Retail development not only provides employment for the local population, but also assists in the regeneration of the area and this should be reflected in the Core Strategy.
In terms of the options relating to land allocated for employment uses, our clients supports a flexible approach to the redevelopment of employment sites for alternative uses if it can be demonstrated that there is no demand for the site and that it is unviable to retain the site in employment use. We therefore consider that the best approach is a criteria based policy which outlines the circumstances where alternative uses may be considered as appropriate. By allowing a certain level of flexibility it will ensure that sites do not remain vacant and that land across the Borough is used efficiently.

We note that the council will shortly be undertaking a Retail Study to inform town centre development opportunities. This Study should contain a realistic assessment of need for retail development in Wealden, taking account of both quantitative and qualitative considerations. This approach is in accordance with guidance provided by PPS6. The Core Strategy should provide a positive strategic policy framework for retail uses and town centres, which fosters a competitive and innovative retail sector and enables people to have access to a diverse range of quality shopping provision. Paragraph 2.44 of PPS6 states that a sequential approach should be applied in selecting appropriate sites for retail uses. All options in the centre should be thoroughly assessed before less central sites are considered for development for main town centre uses. This approach, however, does not presume against edge edge of centre and out of centre retail development, providing that the sequential test has been met and that the vitality and viability of existing centre is not compromised.

Agree that Maresfield should be identified as a village with growth potential. Disagree with designation of Frant as a smaller village due to its proximity to Tunbridge Wells, therefore should be considered as the potential extension to Tunbridge Wells and not as an enlargement of Frant.

We re-confirm our view that the edge of Tunbridge Wells is a very sustainable location in principle for further development and accordingly support the proposal identified in Question 13. We also confirm our support for the SINC to be re-surveyed.

Reason for comment:

My Council would not wish existing (or currently identified) employment land to be used for housing as it is important to provide local employment opportunities. It is considered that access and other constraints should preclude additional housing in areas identified in options 12d and 12e. However, it is suggested that housing could be provided in that part of Heathfield Park which adjoins Tower Street.

Question Twenty Nine

Section of Document: Housing Delivery 

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree 

Reason for comment: 

Page 1089 of 6217
All future development must be dependent upon improved and appropriate infrastructure arrangements being in place before new dwellings are occupied. There needs to be a robust system in place to secure developers' contributions towards improvements carried out by others. In Heathfield and Waldron parish it should be noted that there is currently an urgent need for new burial land.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consuttee ID: Hirshman
105966
Chalvington with Ripe Parish Council

Part of document: □ document □ chapter □ section ✓ option
Question 32a

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Consuttee ID: Mrs Wales
105967
Danehill Parish Council

Part of document: □ document ✓ chapter □ section □ option
Part 2

Section of Document: Wealden’s Landscape

Your View □ Agree □ No opinion ✓ Disagree

Reason for comment:

Wealden District being significantly an A.O.N.B must, for the sake of the future welfare of those yet to be born, protect its rural image and encroachment into present designated Green Belt areas must be resisted or only used as the very last option. The spread of building extra homes within present villages and hamlets must be in sympathy with the existing numbers so that assimilating these does not stand out as a major impact on the present visual aspect. Sympathetic placement is an essential requirement. The recent trend of building on flood planes currently lends its self to question and the Parish is not apparently exposed to risk of widespread flooding due to its position. But the Parish Council suggests that further development without guaranteed flood defences being sited appropriately.
Option 19c

Section of Document:

Your View  ✓  Agree  ☐  No opinion  ☐  Disagree

Reason for comment:

It is noted that some 60 additional houses are scheduled in the next 20 years and the Parish Council do not object to this number being excessive as regards its impact on the visual aspect of the Parish provided that the style and location is sympathetic to the Parish. There are areas within or on the boundaries which will accommodate limited growth and there are some 'brown field sites' which in the past have been refused could now be made use of. However, the Parish Council is very mindful that the Parish has no medical facility within its boundaries, it has one small village store that cannot provide for all of the Parishioners needs, the public transport is minimal, the village school is currently at its maximum in terms of numbers and to accommodate additional pupils may give rise to a significant problem. The Parish Council fully recognises that there is insufficient starter homes or affordable housing available within the Parish and would welcome additional housing of that nature but it would be only suitable if placed within the easy reach of the local village centre of Danehill where some facilities including the school are available. Chelwood Gate and outlying areas of the Parish are not suitable in this respect. Encroachment into those areas which are regarded as forest would be strongly resisted by the Parishioners. Again the matter of the road network and the increase in the vehicular traffic generated not necessarily within the Parish but by increasing numbers of vehicles generally is of concern.

Transport Needs

Your View  ☐  Agree  ✓  No opinion  ☐  Disagree

Reason for comment:

Travel within the District is currently a problem and the use of cars as a means of countering poor public transport facilities is an increasing problem. The building of further homes on locations that require the use of a car to obtain mobility is only going to compound the problem. The present road structure and stock within the District is gradually eroding the poor quality that we have and the addition of further vehicles can only but accelerate the problem. Siting of additional housing must take into account the present travel services available.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: Mrs Wales
105967 Danehill Parish Council

Part of document: □ document □ chapter □ section □ option

Section of Document: Infrastructure and Phasing

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
It is noted that there is no firm proposal for improving the infrastructure to support the increase in house numbers and the attendant growth in population. The Parish Council take the view that the infrastructure to support should either be in place before the increase or to be developed simultaneously. Siting of the proposed new dwellings should be such as to take as much advantage of existing services as possible, in this context it would appear that areas for development should be located around or if possible within existing conurbations so that existing services are within easy reach of the new developments. To create significant dwellings in green space land without the full supporting services being within easy reach or effectively on the door step will create further problems associated with sufficiency of transport and accessibility. The Parish Council urges that the matter of infrastructure be raised to the highest level of questioning and resolution before final development proceeds. To state that suitable infrastructure will or may follow is not an option to be accepted.

Consultee ID: Mrs Newton
105977 Framfield Parish Council

Part of document: □ document □ chapter □ section □ option

Section of Document: Option 14c

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
The Parish Council strongly objects to any development on Bird in Eye Hill for the same reasons as previously documented. This is the worst site in the Uckfield area for development and is of course within Framfield parish.

Consultee ID: Mrs Newton
105977 Framfield Parish Council

Part of document: □ document □ chapter □ section □ option

Section of Document: Option 21d

Your View □ Agree □ No opinion □ Disagree

Reason for comment:
The Parish Council...accept that development along the lines detailed are inevitable over the next twenty years and would not object to the principle of the proposals. However, at all stages they would wish to be involved from the initial devolvement of the sites through to the setting of the 106s on any approved applications.
Option 21e

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

The Parish Council...accept that development along the lines detailed are inevitable over the next twenty years and would not object to the principle of the proposals. However, at all stages they would wish to be involved from the initial devolvement of the sites through to the setting of the 106s on any approved applications.

Part 2

Section of Document:  Wealden's Landscape

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:

Support proposals to 'enhance connectivity between existing habitats by appropriate landscape scale design and habitat creation and the protection and enhancement of wildlife corridors.' (Section 2.18) Brownfield sites as well as greenfield sites are often rich in biodiversity and harbour protected species.

Part 5

Section of Document:  Wealden's Places

Your View  ☐ Agree  ☑ No opinion  ☐ Disagree

Reason for comment:

Advise that the comments of the relevant AONB contracts are considered for each of the options within AONB boundary or may affect the landscape.
Essential that up to date baseline data is collected for areas for potential development. Current information not detailed enough. Biodiversity section does not provide enough information. Lack of acknowledgement of proximity of SSSI's to some options. SSSI's have not been clearly labelled on the maps. Suggest using the following baseline data for each suggested locations: 1) Location of statutorily protected sites 2) AONB boundary 3) Protected species survey 4) Ancient woodland/ other BIAP habitats 5) Location of local wildlife sites 6) Habitat networks 7) Full ecological survey of habitats and species. Additionally, site selection should include clear policy to conserve and enhance biodiversity as set out in relevant guidance. Propose including innovative ways to incorporate biodiversity. Landscape planting schemes should use native species. Natural England welcomes the opportunity to consult with WDC on the formation of other such policy regarding protected species and ecological surveys.

May adversely impact on ancient woodland. Natural England would advise that a target of Wealden's LDF is that there is no loss of ancient woodland.

May adversely impact on ancient woodland. Natural England would advise that a target of Wealden's LDF is that there is no loss of ancient woodland.

Reason for comment:

Consultee ID: Mr Goacher  
105985 Berwick Parish Council

Part of document:  
Question Ten

Section of Document: Site Allocation Thresholds

Your View: No opinion

Reason for comment:
Site allocation thresholds should be determined by negotiation with the village concerned. The total negotiated development can be achieved by more than one reasonably sized developments (10+ in and around the edge of Berwick) spread around the parish, other than one concentrated development which would overwhelm the existing village. Alongside such development it is very important to assess and implement infrastructure. Developments should be contained to the extent of what infrastructure requirements are needed in the Parish. The designation of villages with potential will therefore need to be carried out with a lot of Parish consultation.
Option 16a

Reason for comment:
Ideal for expansion of housing

Option 16b

Reason for comment:
Ideal for expansion of housing

Option 18j

Reason for comment:
Proposal goes against all previous policies and statements from WDC about the character and setting of Berwick station -Brewick sites have regeneration to become greenfield sites with wildlife, fauna and flora -the village is the gate way to the South Downs with people using train to gain access to the Cuckmere valley(proposed national park would seem inappropriate for a new settlement -current parking facilities and platform length are not adequate for local delivery station -a new settlement adjacent to the proposed National Park would spoil the area and degrade the whole valley and hills -development on the SSSI of Arlington Reservoir is inappropriate -poor road infrastructure of the A22/A27 and connecting roadways through Berwick station.Upgrading the A27 goes against the consent provided through the local option to upgrade the A27 envisaged during the consultations in 1991/1992 consultations -close to the flood risk area -sufficient employment could be provided for residents and therefore unless commercial activity is envisaged new occupants will be travelling elsewhere

Question 18k

Reason for comment:
the prospect of a new settlement within Wealden should not be ignored, which would reduce the requirement of additional housing within the villages.

Consultee ID: Mrs Rudin  
Agent ID: 105986  
Forest Row Parish Council

Part of document:  
- Document: ☐  
- Chapter: ☐  
- Section: ☐  
- Option: ☑

Option 19a

Reason for comment:
Limited growth (below the 200-340 proposed) in Forest Row could be considered provided the infrastructure is capable of absorbing such development. It cannot be stressed too greatly that Forest Row has huge local issues that should be taken in consideration. (details submitted in preamble which include: health, education, youth services, libraries, community centre and playgroup, transport, public transport, traffic, utilities, flooding and local considerations). The character of the village should be protected. The provision of local services and utilities should be considered. There is some doubt whether the existing services such as Health and Education could cope with a large scale development. The statutory utilities are also over-stretched and there may be an adverse impact of the AONB and the designated flood plain.

Part of document: option

Section of Document:

Your View ✓ Agree  □ No opinion  □ Disagree

Reason for comment:
Section of Document:  
Your View  ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:  
agree in principle but ownership level should be increased 2 per household in rural areas due to inadequate public transport.

Section of Document:  
Your View  ☑ Agree  ☐ No opinion  ☐ Disagree
Reason for comment:  
strongly agree
Concerns expressed over the capacity of current medical and educational facilities in the village if significant development occurs. Medical concerns include parking, waiting room space, consultation space, and possibility of reduction in quality of service. Educational concerns include the fact that it is not possible to predict pupil numbers more than 2 years ahead, and consideration would need to be given to the availability of school places.

broadly agree with the options as proposed especially with a view to preventing developers landbanking. Every effort should be made to deliver the housing once permission has been granted. A two year permission would be a viable option as it would make developers focus and reduce the spectre of the chaos hanging over local residents.

In as much as Forest Row has not been mentioned at all in Table 15, it would be difficult for us to comment on the specifics therein. In addition to concerns over the capacity of services to cope with large scale development we would argue that independent advisors, and not the providers of such services should carry out the assessment for the provision of essential services to large developments.
Mrs Rudin, Forest Row Parish Council

**Reason for comment:**

The themes are worthwhile and the aims laudable. Most of the vision is actually in place and it will be maintaining this that will prove to be the challenge.

Mrs Hewes, Frant Parish Council

**Reason for comment:**

Whilst residents at this location will consider themselves residing in Tunbridge Wells, they will be within the Parish of Frant and their children will be entitled to be educated at Frant School. The potential for additional numbers of children at the school must not be underestimated and provision for a new school must be included within the LDF. There is currently no capacity for taking any additional children at the school and Governors are already concerned about applications for school places arising from the redevelopment of the former Rawsons site in Bells Yew Green into 34 dwellings. It will be essential to address the issues of infrastructure before further development is permitted.

| Consultee ID: | Ms Arnott | Agent ID: | 105998 | The National Trust |
| Part of document: | ☐ document | ☐ chapter | ☐ section | ✔ option |
| Question One | |
| Section of Document: | Settlements in the High Weald Area of Outstanding Natural Beauty |
| Your View | ✔ Agree | ☐ No opinion | ☐ Disagree |
| Reason for comment: | National Trust's policy is to support the provision of limited amounts of housing to meet identified local needs, particularly for affordable housing in AONBs (and National Parks). We oppose the development of general market housing in nationally designated areas. |
Reason for comment:
The Trust fully supports the development of renewable energy and the setting of challenging targets for renewable energy production in new development. Support an emphasis on use of biomass. Environmental considerations- valued landscapes, biodiversity, historic environment and welfare of local communities. Opposed to large scale wind energy schemes, especially in nationally designated landscapes.

Reason for comment:
Concerns over the impact of development upon tourism in district and the potential economic damage.

Reason for comment:
Support retention of settlement boundaries. Preperation of the LDF provides the opportunity to amend boundaries to meet development needs. Permit 'rural exception sites' to meet essential local needs.
Emphasis on urban areas is most sustainable (coupled with appropriate levels of development in rural areas to meet identified local needs). Use of brownfield land should be the priority. Investment in infrastructure essential.

Development within and adjoining existing urban areas (as against a new settlement) is likely to be the most sustainable solution, not least because of the role this can play in resolving existing urban infrastructure problems.

Focus on development in Uckfield, as development in Crowborough and Heathfield is likely to result in housing within the High Weald AONB. In addition, the Uckfield led strategy could assist in the implementation of the proposed flood alleviation scheme in the town and fits well with the potential reinstatement of the Lewes/Uckfield/Tunbridge Wells railway line.
The National Trust would not support development option 16a - Area to the north-west of Polegate, as this area is highly visible from the South Downs and development would adversely affect the setting of the AONB/ proposed National Park.

Option 16b

Any development further to the north at 16b (Area to the northwest of the A22 Cophall roundabout) should be limited and appropriately screened to minimise visibility from the South Downs. This is particularly important in the light of the recently published Inspectors Report on the South Downs National Park recommending that the chalk downs are given National Park status.

Option 18i

National Trust holds serious concerns regarding potential new settlements at Wilmington Green, due to the adverse effects on the South Downs.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 105998
Ms Arnott
The National Trust

Part of document: Option 18j
Section of Document:

Your View
☑ Disagree

Reason for comment:
National Trust holds serious concerns regarding potential new settlements at Berwick Station, due to the adverse effects on the South Downs.

Consultee ID: 105998
Ms Arnott
The National Trust

Part of document: Option 24c
Section of Document:

Your View
☑ Agree

Reason for comment:
Support residential development at high densities (50dph and above) in urban areas, particularly in areas with good accessibility and transport. However, not appropriate in historical areas where high quality design should be implemented to maintain and enhance the character of the area.

Consultee ID: 105998
Ms Arnott
The National Trust

Part of document: Option 27b
Section of Document:

Your View
☑ Agree

Reason for comment:
National Trust would support the reinstatement/development of this link. Whilst small scale development in the vicinity of rural stations may be appropriate, a focus on Uckfield as a means of providing the majority of funding is preferred.
Option 27b

Reason for comment:
National Trust would support the reinstatement/development of this link. Whilst small scale development in the vicinity of rural stations may be appropriate, a focus on Uckfield as a means of providing the majority of funding is preferred.

Option 27d

Reason for comment:
High priority to improvement of public transportation. We do not support the dualling of the A27 to the west of Polegate due primarily to the impact on the South Downs. Only support major new road improvements or new road schemes when there is no viable alternative. In this context we do not support the construction of a realigned A27 to the north of the Arlington Reservoir. The development of such a route could only be undertaken in association with major new settlement development- an option which was presented in the document partly on account of the presence of the south coast rail line, and which we would resist.

Option 21b

Reason for comment:
Area of land to the west of Five Ash Down is put forward for development. Five Ash Down has good transport communications and close to Uckfield with its wide range of services. The area is adjacent to the village and is currently a sawmill and, as such, the area could be considered as brownfield land.
Consultee ID: Mr Stoggles  
Agent ID: Learning & Skills Council  
Part of document: ☑ chapter  
Section of Document: Wealden’s Working Patterns  
Reason for comment:  
LSC Sussex would particularly wish to be in detailed discussions with WDC in regard to the Hailsham Triangle and what effects an increase in employment and housing would have for post 16 learning and skills services. We would wish to support directly any programmes or projects leading to economic development of the district and in particular the triangle.

Consultee ID: Ms Macklen  
Agent ID: Buxted Parish Council  
Part of document: ☑ option  
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty  
Reason for comment:  
As long as it’s for smaller affordable homes for local people to rent or buy. There is a need for all communities to evolve and without the option to build in the AONB villages they will be artificially pickled in aspic and unable to evolve. In addition (see Q6) there is an issue that only 24 villages are considered in the Issues and Options document for development (of varying degrees) within the LDF – with relatively few taking the bulk. This is not equitable or sustainable. It would be better to plan development within the AONB rather than exclude it – then overall sustainability is considered with collective contributions to overall infrastructure in the participating villages. A few houses in each village are easier to absorb as a community and in terms of infrastructure and also in sustainable social cohesion than the mass developments proposed in a few villages.

Consultee ID: Ms Macklen  
Agent ID: Buxted Parish Council  
Part of document: ☑ option  
Section of Document: Option 2a  
Reason for comment:  
Your View
Option 2b

Reason for comment:
What options are being considered? What is the economic viability (in terms of what houses will cost and whether they will be affordable) of aiming for 20%? Yes work towards 20% over the long term if this seems feasible. Please note that in section 2.31 the issue of flood defences at Buxted Park is noted. Please be aware this is wholly inaccurate – you cannot earmark Buxted Park as potential flood storage – it is a grade 2 listed park and SSSI site. The proposal for flood water storage was above Buxted to protect Uckfield and also Buxted – which you may not be aware is also vulnerable to flooding! Please correct this anomaly. At times water cascading down surrounding hills leads to flash flooding. Further development or tarmacing around the Pound Green area will lead to considerably more run off onto adjacent properties on lower levels.

Option 3a

Reason for comment:
Note that Ashdown Business Park has been empty for 35 years and there is similar land on the Lower Dicker that would probably now be better earmarked for other use. This policy shouldn’t include agricultural buildings with permission for business use as they would inevitably be taken over by property developers. We have seen examples of this locally and the pressure for such conversions is rising.

Option 3b

Reason for comment:
In relation to evidence of market need it is also important that WDC become more savvy as to the marketing of units with business approval – particularly agricultural units with attractive vernacular or good locations: property developers are becoming cleverer at finding ways of not being able to let them –and instead then seek residential conversion.
Option 3c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

WDC need to be more savvy in granting permission for mixed use and require development of any business elements as part of any permission - not simply requiring the provision of services to allow units to ‘perhaps’ be built. The Grampian outline planning approval is a clear case in point.

Option 6c

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

Golden Cross/Lower Dicker area could be considered for re-generation given it is a generally run down area which could be rejuvenated by quality development that included housing. It has good road access and bus transport. Its location would allow easy access to Hailsham, Uckfield and Heathfield and larger towns beyond.
Consultee ID: Ms Macklen
106030 Buxted Parish Council

Part of document: Option 5a

Reason for comment:
Only where driven, agreed and justified by local need and demand – by the local community – not as part of higher level plans.

Consultee ID: Ms Macklen
106030 Buxted Parish Council

Part of document: Option 5b

Reason for comment:
Only where driven, agreed and justified by local need and demand – by the local community – not as part of higher level plans.

Consultee ID: Ms Macklen
106030 Buxted Parish Council

Part of document: Question 5c

Reason for comment:
A272/Lower Totease/Pound Green & Nursery areas of Buxted need a tightening of the Buxted boundary to avoid garden infill, backland and ribbon development.

Consultee ID: Ms Macklen
106030 Buxted Parish Council

Part of document: Option 6a

Reason for comment:
Option 6b

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

• We suggest 85% in and around the towns – but not encroaching on neighbouring villages - and 15% in the villages – because going from the figures (assuming higher allocation of 10,300 more houses in Wealden 2008-2026; 24 villages only are earmarked for development in the Issues and options paper – meaning an average 248 more houses per village = 60/40 (town/village). This is unacceptable. • Towns should and can take more houses as they have the infrastructure to cope and or it is better focussed within them; the villages don’t. It also depends whether the local community want it – shouldn’t be a blanket figure. • Furthermore, some villages have been ignored and aren’t even being considered in this paper for development, even though the villagers would very much like to see some development of homes for locals in their villages/hamlets – in our own (Buxted) Parish we feel High Hurstwood could benefit from small scale development of small homes – but there is no policy to allow this • There should be allocations to every village. In addition, this decision should be taken on a case by case basis, depending on the merits of the locations being considered for development with positive input from the Parish Councils, rather than have a blanket figure across the region. • The aim of any development must be to have a positive effect on the village rather than happen as a result of town development by accident. • Must avoid villages on the edges of towns being amalgamated with the towns (e.g. developments at Ringles Cross and Five Ash Down would lead to amalgamation to North Uckfield – which is wholly unacceptable and against much of the sentiment and strategy written in the Issues and Options document). The impact on these and other villages by town development must be avoided. Instead, focus should be on developments to the South of Uckfield given that they would not then absorb other villages into the town – whereas those in the North would absorb Five Ash Down and Maresfield into a sprawling Uckfield conurbation. • Suggesting that villages might benefit from facilities in towns (see comments re justifying development in Maresfield and Five Ash Down) shows an unfortunate non-understanding of why people choose to live in the villages rather than in the towns.

**Reason for comment:**
Part of document:  □ document  □ chapter  □ section  ✔ option

Section of Document:

Reason for comment:

Villages, shops and other services have to be sustainable. We re-emphasise the point made in 6d which argues for more natural evolution rather than enforced development. Whether to restrict change of use must be considered on a case-by-case basis. Shops etc do need support, but must be economically viable. Any village development must take the need for village services to remain economically viable into consideration.

Part of document:  □ document  □ chapter  □ section  ✔ option

Section of Document:

Reason for comment:

There is potential for some new settlement development to rejuvenate poor quality areas – eg around Lower Dicker and Golden Cross. Replacing the sites used for boot fairs (consider criminal element) and land advertised for business use for considerable periods – with quality redevelopment this area would be enhanced and local services given the opportunity to be more sustainable.

Part of document:  □ document  □ chapter  □ section  ✔ option

Section of Document:

Reason for comment:

- Must avoid the big impact town development will have on villages if the wrong planning decisions are taken. E.g. developing North Uckfield will push into Ringles Cross and amalgamate Five Ash Down and Maresfield into a sprawling Uckfield conurbation Any further development post 2026 would ensure this happens. • On the other hand, developing south of Uckfield towards the A26 would avoid this problem. Developing here would have no impact on villages. With any increased development in the villages, better infrastructure, although essential, is unlikely to happen. Therefore development in the villages is unpopular and it will be better to plan small allocations across all villages – reducing the allocation overall to 15% and focus the rest of the development on the towns with options for some new small settlements in areas where such rejuvenation would be good for the community and where landscape is not so sensitive.

WDC need to be more cognisant of the pressure to infill or expand out of development boundary. Allowing developments to be placed where developers feel they want to put them rather than as part of a strategic plan that has involved the community in the process (even given the comment in 5.10 re the process being “bogged down”) – is naïve and does not do the community good service. Allowing developers to dictate where they want to put houses is a nonsense. While WDC may feel 15 houses in a village does not warrant site allocations - this is not acceptable or sustainable.

Provided this is agreed by the local community.
Question 11h

Reason for comment:
Better primary and junior schools needed in Crowborough – 80+ children are out commuting from Crowborough to High Hurstwood for schooling! With developments in Buxted Parish including the Grampian development – HH school should first cater for local children living in the Parish.

Question 12h

Reason for comment:
Provided this is agreed by the local community

Option 14a

Reason for comment:
This would close the gap between outlying villages and Uckfield. This is unacceptable. There are also important and sacrosanct areas of ancient woodland – Views Wood plus –Buxted Park is a SSSI site. Building to the margins of such sensitive land is environmentally unsound. We would strongly question this location for a 6th Form college. The traffic and safety problems this would cause would be insurmountable.
Option 14c

Reason for comment:
This would cause road chaos into Uckfield and the rural lanes into Buxted and Framfield. There is an important, successful well-functioning farm along Framfield Road. WDC may not be aware that Bird-in-Eye meat is prized and marketed beyond East Sussex. Surely we need to support rather than demolish local farming and other businesses?

Option 14d

Reason for comment:
This is adjacent to land already allocated in the Wealden Non Statutory Plan

Option 14d

Reason for comment:
This is adjacent to land already allocated in the Wealden Non Statutory Plan

Option 14e

Reason for comment:
This would have far less impact (than proposed developments north of the town would have) on local villages.
Reason for comment:
This appears to be the site of the last profitable dairy farm in the area – to consider building over it is a nonsense. If WDC prize the rural heritage of the area as the introduction to this document purports what sense is there to develop over profitable farmland?

Reason for comment:
Should develop west of the A22 – new settlements and business (not just business – there isn’t necessarily the need for this) This would be a good place for a new settlement – it is naive of WDC to note is as being ‘not applicable’!

Reason for comment:
Provided Uckfield residents agree!
Possible new settlement area – e.g. west of the A22 – this isn’t good land so it would be a potential opportunity for development of houses with good access to the A26 although access to the A272 is also possible this is likely to be problematic given the dangers of the road.

We agree with the spatial plan if local communities within Hailsham agree with it.

We agree.

Reason for comment:
The communities themselves need to provide spatial objectives/aspirations for housing developments where they live.
Consultee ID: Ms Macklen  
106030  Buxted Parish Council

**Question 21g**

**Section of Document:**

**Reason for comment:**
• We oppose the north Uckfield expansion into Ringles Cross  
• High Hurstwood has been totally ignored. As per earlier comments it is inappropriate to pickle villages in aspic – to be sustainable living communities they need to evolve. The village needs more houses for people who would like to stay on. At the moment there are no spare houses. There is a local need for smaller homes to rent and buy.

Consultee ID: Ms Macklen  
106030  Buxted Parish Council

**Question 20d**

**Section of Document:**

**Reason for comment:**
The communities themselves need to provide spatial objectives/aspirations for housing developments where they live.

Consultee ID: Ms Macklen  
106030  Buxted Parish Council

**Question 21a**

**Section of Document:**

**Reason for comment:**
On the scale proposed this will take the village into part of a sprawling conurbation of Uckfield and this is unacceptable.

106030 Buxted Parish Council

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option
Option 21b

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Five Ash Down is already being seriously developed with approval of the Grampian site for 140 houses. Earmarking it for any more development at this time without seeing how the development at Grampian works is a nonsense. WDC would basically be destroying a village and making it part of a sprawling conurbation of Uckfield and this is wholly unacceptable.

106030 Buxted Parish Council

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option
Option 21c

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
- We might support development of up to 100 houses in Buxted but only if assigned in once place not spread out. Land has already been earmarked in the NSLP and not yet developed – this should remain the area for the focus of the LDF development
- We do NOT support expansion east and west of Buxted and wonder why WDC would even consider such.
- Any development in Buxted should be in once place otherwise there is even more ribbon development spread along the A272 which is already a very dangerous road. And ribbon development isn’t conducive to village togetherness and cohesiveness. Buxted already has a station car park and there are already plans to enlarge it within the NSLP. We don’t need more and to consider development of Buxted as any kind of ‘Park Way’ station is wholly inappropriate. It would encourage rat running on narrow lanes which is both dangerous and makes the amenity use by walkers, riders and cyclists impossible.

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option
Option 25a

Section of Document:

Your View  
☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
Has WDC not noted the issue in London where too many flats have been built and where there are now negative equity issues and no homes for people to move to with children – or quality properties for older people to downsize to within the villages where they have lived (most people who have had villages houses do not want to move to flats with no gardens) – this shift also free up larger family homes.
Option 25d

Reason for comment:

Only increase density if local character is respected. New developments need to consider and respect the local environment and have a sense of their place.

Option 24c

Reason for comment:

Your View
Consider the local environment and also whether the LDF is aimed at developing commuter centres or local sustainable communities with a sense of place within Wealden. To adopt a policy of cramming homes into small areas because there is a bus or train is naïve.

This a particularly good strategy for villages in the AONB.

A certain amount of growth may be needed to maintain or create a balanced population, also the elderly may want to downsize or move into extra care housing but not move away from a familiar locality. Development boundaries should be reviewed accordingly.

Danger of ghetto formation.

We are in favour of a higher percentage of growth in towns.

Option 6c

Section of Document:
Your View ☑ Disagree

Reason for comment:
In selected areas for older residents and people in extra care housing.
Option 24d

In selected areas for older residents and people in extra care housing.

Option 25a

There is a need for affordable housing for older people with diminishing means

Option 25b

Option 25c
In rural areas it will be difficult to find landowners willing to part with their land for affordable housing when the going rate for land on which affordable housing is to be built is well below market value. Some HOPE projects seem to have foundered for this reason.

The rural exceptions policy should be made more flexible than at present

Making it possible for the elderly to remain in their own homes or adjacent to their relatives makes complete social and economic sense and should be encouraged in every possible way.

Part of document: □ document □ chapter □ section □ option
Option 27b

Section of Document:

Your View □ Agree □ No opinion □ Disagree

Reason for comment:

Reinstatement of Uckfield / Lewes rail link is vital for this area where large population groupings do not have good acess to thier county town or the South coast. This objective should be a priority and be a pre-requisite to any large scale developments rather than a long term aim. Uckfield Line Parishes Comittee.(Representing all Town and Parish Councils from Oxted to Uckfield)
I argue that the Broadoak Envelope is out-of-date and already abused: 1) Throughout the last 40 years, there has been development to the North, down Street End Lane (formerly Scotsford Rd.): a. A small single-storey garage and workshop was demolished by Phillip French in the 1970s and replaced by a two-storey plumber's works (called Jubilee Works) which, even in construction, exceeded the specified height. This building was converted to domestic dwelling a few years ago. b. There have been at least two new houses built to the South of the above which exceeded the footprint of the cottages they replaced. From one of these, an electrician operates his business. c. To the immediate North of Jubilee Works, extensive outbuildings were built in the 1960s - these we took over in 1971. d. Further to the North, at the bottom of the hill, there is a very busy vehicle repair and maintenance garage that also runs a small fleet of minibuses. e. None of the above is in an "elevated and exposed position" as stated in the Council's 'Broad Oak Development Boundary' (Ch.19. Broad Oak - Wealden Local Plan - Dec.1998, p.187) in its maintaining that Broadoak lies within an Area of Outstanding Natural Beauty, but lies well out of sight, and already outside the Envelope. f. It is unlikely that many residents within the existing Envelope have any idea that they are within an AONB since, in the last main infill, far too many houses were greedily squeezed onto the N. facing hillside, obscuring views and, in the case of at least two roads, creating an imminent non-passable way with car parking overflow onto the verges and added mudbath attraction in the Winter. g. If the Envelope had been more reasonable, say at least to the garage in d. above - and there's still time! - there would have been reasonable space for development.

I would just like to say how user friendly and easy I thought this whole "on-line" document was to read, understand and fill in. It was simple to create a user log in and then work through the document adding my comments. Well done for making the whole event easy for the public to use.

Part of document: ☑ option
Question One
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:
I agree in principle but one would have to say that your statement “some development” leaves the door far too wide open. I would therefore say that I am happy to accept consideration on “brown field sites” but elsewhere, the settlements would have to be completely sympathetic to the surroundings.

Consultee ID: Mr Moss
106075

</table>

**Option 6a**

*Keep the majority of the development where the amenities are. This would also cut down the need for traveling distances to work.*

**Option 6b**

**Option 6c**

**Question 6d**

*The majority of development should be based on a demonstrated need for housing and the availability of amenities and infrastructure and therefore each decision would depend on the infrastructure, employment opportunities, and housing demand in the proposed locations.*
Growth can only come with a properly structured plan to develop and improve infrastructure & services.

Whilst Crowborough is not a village, the viewpoint given represents a good guide for focussing development in villages with the greatest capability for supporting growth is a reasonable strategy.

Disagree. If premises are not used then they should be considered for change of use because change of use in many of these cases is likely to be due to the business becoming uneconomic.
Option 9c

Section of Document:

Reason for comment:
I strongly agree that this is the best way forward as it would have less impact on the on AONB and the shared approach is best to ease the burden on an already over-stretched Wealden infrastructure. The only caveat is that there still has to be a demonstrated need for housing development as opposed to the build them anyway approach.

Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
The principle is sound as long as each development comes with an appropriately sized developer contribution tied up in a section 106 agreement to cover contributions for transport links, community amenities, education requirements and especially youth projects.

Question Ten

Section of Document: Site Allocation Thresholds

Reason for comment:
As long as it can be demonstrated that there is a housing need. Thirty dwellings (the threshold applicable to Crowborough) may be too low. Again, the size of the development must be proven and be in line with the local infrastructure and needs.
Consultee ID: Mr Moss

Option 11a

Section of Document:

Reason for comment:
I agree with this choice of site for affordable housing near town centre providing there are sensible densities.

Option 11b

Section of Document:

Reason for comment:
Crowborough Town Council has already identified this area for recreation. Any development to this area would likely involve the loss of further recreation land. PPG 17 is quite clear that Crowborough is woefully short of recreation land. This site would also have an impact on land designated as ANOB.

Option 11c

Section of Document:

Reason for comment:
Development of this area would open up the town boundaries along the A26 which would be good for access on to the main road infrastructure. The development could bring other benefits such as new facilities, infrastructure, localised shopping by the addition of a parade of shops and allotments etc, all built in to the cost of the development by implementation of a Section 106 agreement with the developer.
Consultee ID: Mr Moss
106075

Part of document: ☑ option
Option 11d

Section of Document:

Your View  ☑ Disagree

Reason for comment:
This site is totally unsuitable for large housing development as it is already poorly supported by local infrastructure and the roads network.

Consultee ID: Mr Moss
106075

Part of document: ☑ option
Option 11e

Section of Document:

Your View  ☑ Disagree

Reason for comment:
This site is totally unsuitable for large housing development as it is already poorly supported by local infrastructure and the roads network.

**Reason for comment:**
Suggest that Crowborough relocate the current industrial site from Jarvis Brook to the area in and around MOD camp site. This redevelopment would give Crowborough the opportunity to build a modern business park to tempt in new business with direct access on to the main roads, all of which would serve as an inducement to attract new business to the area. It would also allow the inner town areas currently set aside for commercial properties to be redeveloped into housing, close to rail links and the town.

</tbody>
</table>

**Reason for comment:**
This is the highest density that should be allowed to maintain the look & feel of Wealden's rural aspect and mix of development, amenities space and communities. The only possible exception could be that higher densities could be considered in some “inner town” locations by use of town houses & terraces (not blocks of flats!).

- [ ] Disagree

**Reason for comment:**

Would consider higher densities for terraced housing but would be very concerned over “blocks of flats” as these would change the character of Wealden. Any higher density development must maintain sufficient quality and special requirements within the dwellings.

**Option 25b**

**Section of Document:**

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**

I agree in 40% affordable housing for developments in Crowborough. Strong consideration should be given to reduce the threshold on the number of dwellings built in any given development that would then trigger affordable housing. I believe that this should be reduced to five dwellings. This would more likely get the developers to build developments with the affordable housing as part of the scheme.

Question 32b

Section of Document:

Your View: No opinion

Reason for comment:
We feel that a specific objective should be included relating to addressing the need for affordable housing in villages- SO5's desire to meet the minimum target for affordable housing is not enough. The objective should reflect a desire to ensure that our villages remain sustainable, with a balanced population, able to live and work locally, making appropriate provision for affordable housing both for families with children and those living alone.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Agree

Reason for comment:
But only a few houses in any one place. They must be built to match existing properties.

Consultee ID: Waters
106081

Part of document: option
Option 2a

Section of Document:

Your View: Disagree

Reason for comment:
The insistence that new development must generate 10% of its own consumption of energy and also for new technology and better insulation to make new housing "carbon neutral" seems to be extremely idealistic and surely would increase the cost of new housing making it less affordable for low income families. I realise that the plan covers a long period and it is possible that, when appropriate cheap technology has been developed, this may be achievable but, in the meantime, I suggest that required standards should be set to cover insulation, solar panels, double glazing etc (and to prohibit oil fired central heating?) .
Reason for comment:

RE: Land at Bird in Eye Farm, Uckfield. We have been asked to promote all of this site as being suitable for residential and ancillary uses for the future sustainable development of Uckfield and Wealden District during the current Local Development Framework (LDF) period. The site was historically proposed for housing development during the past Local Plan Review. The site’s location and suitability has not changed allowing publication of the previous consultative document which suggested allocation of this site. We therefore wish to submit the enclosed site for allocation during the forthcoming Core Strategy and Site Specific Allocation documents.

Reason for comment:

RE: Land at Park Farm, New Road, Hailsham. We have been instructed to promote part or all of this land as being suitable for residential/employment and ancillary uses for the future sustainable development of Hailsham and Wealden District during the current LDF period. With the granting of consent for housing at the former Hellingly Hospital and the approved new link road from New Road, this provides a marvellous opportunity for the area shown on Plan 2 to be redeveloped for further housing, doctors surgery, primary school and all land uses which would compliment and improve the accessibility and sustainability of the hospital site to Hailsham. If a greater strategic housing growth is required for Hailsham the rest of Park Farm could also be considered as part of a comprehensive approach to north Hailsham.

Reason for comment:

Typical densities for new development should accord with guidelines set out in PPS3. Prescriptive densities are inappropriate and limit the role of design and therefore "typical densities phasing should be removed."

106087

Agent ID: Mr Courtley
102476

Part of document: ☑ option

Section of Document:

Your View   ☑ Disagree

Reason for comment:
Any type, mix and tenure should be established by the Housing Need Survey and on evidence based policy approach. Regional spatial strategies should set out the regions approach to achieving a good mix of housing together with strategic Housing Market Assessment. Until the above work is carried out any prescriptive proportionment to settlement size is unfounded.
Option 25c

Reason for comment:
Any type, mix and tenure should be established by the Housing Need Survey and on evidence based policy approach. Regional spatial strategies should set out the regions approach to achieving a good mix of housing together with strategic Housing Market Assessment. Until the above work is carried out any prescriptive proportionment to settlement size is unfounded.

Option 25d

Reason for comment:
However we strongly support 25d "Sites solely for affordable housing should be allocated in rural areas where real need is identified". This is preferable to "exemption housing policies" as it enables a proper assessment of alternative sites and offers certainty on their delivery. This is supported by PPS3.

Option 3a

Reason for comment:
Just because land has been categorised at some point in the past doesn't mean it is relevant to today's needs - especially when other new sites are coming forward and transport links are being improved.
Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

They already have been in the local development plan and are just in a mess now. They need to be looked at again.

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

It really doesn't make sense to not allow a certain amount of necessary development where it is for the greater good - for example in the local development plan an agreement was reached for a series of roundabouts on the Lewes Road in Ridgewood with the objective of slowing down traffic. An additional spur from a roundabout to access a development would make sense instead of creating more roundabouts, traffic calming, more streetlights and longer routes into housing estates (more petrol and noise for local residents). Think of the shortest route even if it goes over a development boundary and minimise the impact through natural screening.
Uckfield has been built as a single road with its epicentre in a dip. This makes it unsuitable as it is prone to flooding. With traffic coming from all directions and passing through the dip which is the meeting point for roads and a railway it just wouldn't work.

This area has been discounted in the past due to existing infrastructure. Yet it is the obvious choice to turn Uckfield from a linear town.

WDC has already approved development in this area. Further development makes sense as the area is above the flood plain and is bordered by the bypass so gives easy access out.

Reason for comment:
Option 7a

Reason for comment:
Should be subjected to frequent review

Option 7b

Option 7c

Reason for comment:
This agreement of the principle must be related to the continuing development of all the collateral services which determine the success or otherwise of a community
Whilst the free market forces should underpin the quality of village life, the firm restrictive policy must be retained to reinforce the logic/rationale behind the creation of sustainable villages. It is a conundrum. On the one hand entrepreneurial enterprise is always welcomed in the villages and that person's capital is at stake. Whilst business fortunes may fluctuate with the changing fashions and customers' preferences/expectations, the never ending demand for rural residences in quality areas will never diminish. The temptation for an easy profit by change of use is very appealing. Indeed it may be seen as a deliberate route to quick/easy profits. Nevertheless, the up turns in economic cycles can re-invigorate village centre retail activity, for which the premises must, in broad measure, remain available.
Consultee ID: Mr Deller  Agent ID: 106099

Part of document:  ☑ option

Section of Document: Site Allocation Thresholds

Reason for comment:
On the edge of villages I believe that the base figure should be ten(10). A base figure of fifteen(15) can be disfiguring on some village communities as is obviously evident in other parts of the county and country.

Consultee ID: Mr Deller  Agent ID: 106099

Part of document:  ☑ option

Section of Document: Option 20c

Reason for comment:
This agreement is conditional on the finally agreed total extra housing being built at a sensible rate over a period of twenty(20) years in concord with all other aspects of a village growth concerning both the dwellings and population.

Consultee ID: Mr Deller  Agent ID: 106099

Agreement with your spatial objectives is the easy part of the exercise. Bit on a par with the traditional attributes associated with “motherhood” and “apple pie”. The real test is in applying those objectives with determination and positive action, qualities which have not always been readily apparent in some activities in the past. The problems faced by the Planning Department are not helped by the fact that it does seem to be always understaffed. I do not profess to have the answer to that employment problem, but until there are sufficient staff in situ, determination and positive action on the scale that is needed will not be achievable. That would be a pity because this current body of work is praiseworthy.
A District Council the size of Wealden has a very difficult and somewhat daunting task to meet the requirements of Central Government planning stategy whilst keeping all of its own constituents on side. The width and variety of critical counter opinion are shown elsewher in this comment section. Nobody in their right mind sets out wilfully and thoughtlessly to destroy their own habitat and/or to view their own requirements as distinctly separate from the bulk of that community. Therefore, it would be a good starting point if whomsoever does take action on this plan recognises that we all have Human Rights. Too often such claims are made most vociferously by those whose marginal positions in a modern society should first be self-reviewed to determine if their minority views should over-rule the views of the vast majority of other citizens who consider themselves to be Right-Minded ie nothing political, but having sound views and principles. Give and take in the creation of workable compromises will have to underpin the strategy together with the realisation that sharing the burden of extra dwellings, businesses, infrastructure creation and the like will involve some disproportionate allocations in pure numerical terms. Whatever the minutae of detailed argument will find and unravel in the process of lodging disagreements, the fact is that this document is literally a fair and open minded attempt to start the process of dealing with a major problem.

Willing vendors re. the 3.44 acre site at Cadence Punnetts Town. A generous mix of general demand and affordable houses would benefit the village, and as If successful we would contribute to much needed offsite village improvements. The site-lines and visibility splays far exceed the planning requirements. no drainage problems as with floodplanes. An additional alternative has been put forward on the 17/07/07 which includes a further of 1.06 acres. Full representation inserted as a hard copy.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
However, a specific classification should be given to these development areas, such as: - 90% of the land designated should be set aside and managed to enhance the local ecology - All developments should be design in-line with sustainable design guidelines for residential developments. - developments should designed to exceed Council's targets for renewable energy and sustainability to enable overall targets to be achieved. - the design of dwellings should focus on blending with and into the local landscape and environment.

Reason for comment:
Businesses should be located away from residential areas

Reason for comment:
New developments should be designed to maximise on-site renewable energy generation, whilst at the same time minimise energy consumption. Therefore a sweeping policy statement that all new buildings must generate at least 10% energy from renewable sources does not incentivise energy reduction; energy reduction should be a core strategy.
Energy generation from renewable sources should be maximised as far as practical whilst also minimising energy consumption. Those developments that adhere to such principles should be favoured over those that do not.

</tbody>
</table>
Option 5a

Reason for comment:
Developments outside should be considered with a view that they bring tangible benefits to the local community.

Option 5b

Reason for comment:
The criteria should be based on sustainable developments and only if new developments are sympathetic to the local environment and do not ruin the visual aesthetics of the area.

Question 5c

Reason for comment:
Submitted a proposal for the extension of the existing planning boundary at Wadhurst.

Question 5c

Reason for comment:
Submitted a proposal for the extension of the existing planning boundary at Wadhurst. Map submitted Supporting reasons: 1. Currently lying idle. 2. Close to existing boundary. 3. Access to local services. 4. Limited visual amenity impact.
Consideration should be given to encouraging those land owners whose parcels lie outside development boundaries to enhance the ecological value and hence amenity value. At present land owners who do not use their land will leave fields unmanaged and this is a waste of potential ecological resource.

Consideration should be given to encouraging those land owners whose parcels lie outside development boundaries to enhance the ecological value and hence amenity value. At present land owners who do not use their land will leave fields unmanaged and this is a waste of potential ecological resource.

if anything this should come even further. Large developments will attract developers who's prime aim is profit. The council should look to encourage individual builds since self build is not purely driven by profit. This could help with sustainability targets.

**Section of Document:**
Option 20b

**Reason for comment:**
Section 4.8 of the Draft Settlement Strategy ranked Wadhurst top for total service and facilities provision. Good access to train services is important and consideration should be given to developments closer to train station, with the intention of encouraging walking/cycling to the station instead of using the car. However, any developments must be sympathetic to and blend with the local environment, and also strict control on the density of developments. Any developments on green filed sites should be designed and built with sustainability in mind, for example in-line with the Code for Sustainable Homes (BREEAM).

Question 31a

Agree

Reason for comment:

Generally agree. However, there needs to be more focus on sustainable transport solutions, such as the opening of disused railways where practical.
Option 27e

Reason for comment:

```
Parks add significant benefits to the local community. At present there is no incentives given from the Council to allow land owners for areas to be set aside for as park land.
```

Option 28a

Reason for comment:

```
Parks add significant benefits to the local community. At present there is no incentives given from the Council to allow land owners for areas to be set aside for as park land.
```

Option 28b

Reason for comment:

```
Setting specific criteria on developers to meet local recreational facilities will enable targets to be met. Developers need to be pressured into ensuring real benefits are given back to community and not all for their own profit.
```

Option 28b

Reason for comment:

```
Setting specific criteria on developers to meet local recreational facilities will enable targets to be met. Developers need to be pressured into ensuring real benefits are given back to community and not all for their own profit.
```

Option 28b

Reason for comment:

```
Setting specific criteria on developers to meet local recreational facilities will enable targets to be met. Developers need to be pressured into ensuring real benefits are given back to community and not all for their own profit.
```
New developments must be sympathetic to the surrounding environment and should enhance the local ecology and/or environment. The visual instruction of developments need to be taken into consideration, such that developments blend with the surrounding environment and that outdoor spaces are designed to enhance the local ecology.

The AONB should not be 'nibbled' away at. Also North West Uckfield meets all the criteria of the High Weald AONB and should be reviewed and added to this boundary.
### Part of document: Option 2b

**Section of Document:**

- **Reason for comment:**
  It would be preferable to set a higher target if possible. 

- **Consultee ID:** 106111  
  Mrs Reed

### Part of document: Option 3a

**Section of Document:**

- **Reason for comment:**
  If these are brownfield sites then priority to rural/farm type employment before developing, if that is not an option then to encourage employment to help the rural areas and if there is no employment option to develop homes/mixed use. These must be brownfield sites and not using farmers green fields. It must always be preferable to develop brownfield over countryside.

- **Consultee ID:** 106111  
  Mrs Reed

### Part of document: Option 5a

**Section of Document:**

- **Reason for comment:**
  The settlement boundaries should be reviewed as part of this process and then fixed until 2026, this way everyone (Wealden, especially developers and the local population) know where they stand. It is a slippery slope to development otherwise.

- **Consultee ID:** 106111  
  Mrs Reed

---

Page 1275 of 6217
### Option 5b

**Reason for comment:**

Have to disagree to this as the 'criteria' has not been shown, may lead to a slippery developer led free for all.

### Option 6a

**Reason for comment:**

### Option 6b

**Reason for comment:**

### Option 6c

**Reason for comment:**
Question 6d

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The option to maintain the current split of 90% town and 10% rural needs to be offered for consultation. If there is a 20% split and Wealden have to develop 10000 dwellings that would mean the minimum developed in the villages would be 2000 dwellings.

Option 7a

Your View  ☐ Agree  ☐ No opinion  ✔ Disagree

Reason for comment:
Too rigid and then tries to fix a volume of housing which may be inappropriate

Option 7b

Your View  ☐ Agree  ☐ No opinion  ✔ Disagree

Reason for comment:
Maresfield, Five Ash Down and Buxted shown as Smaller Service Centre and yet have disproportionate larger growth options. These larger growth options would start to merge these 3 villages together and may even make these villages feel like suburbs of Uckfield and loose their separate identity. The surrounding areas to these 3 villages are all sensitive and you can imagine the same for all the villages shown for large growth. I recognise that development will need to occur but this is excessive. Therefore suggest that the rural ratio be disappated between the 70 or so Wealden villages and not just left to a few to take the burden.
Option 7d

Where possible and practical local services and facilities for the villages should be protected. However, if the services are not financially viable then how do Wealden propose to support this?

Reason for comment:

Option 9a

It would be unfair for the whole burden of development for this part of Wealden to fall on one town, it needs to be fairly divided between Crowborough, Uckfield and Heathfield taking into account which has infrastructure and capacity to support the growth. In addition, any development should not take place in the AONB, breach any significant landscape horizons so the development can be seen from far reaching views, should be in the least sensitive ecological area for that town, be away from any area at risk of flooding, not jeopardise any streams/ rivers and be sensitive to local residents. Also, brownfield sites are always preferable and town centre developments as long as green space / leisure activities are not jeopardised.

Reason for comment:

Option 9b

It would be unfair for the whole burden of development for this part of Wealden to fall on one town, it needs to be fairly divided between Crowborough, Uckfield and Heathfield taking into account which has infrastructure and capacity to support the growth. In addition, any development should not take place in the AONB, breach any significant landscape horizons so the development can be seen from far reaching views, should be in the least sensitive ecological area for that town, be away from any area at risk of flooding, not jeopardise any streams/ rivers and be sensitive to local residents. Also, brownfield sites are always preferable and town centre developments as long as green space / leisure activities are not jeopardised.
Option 9c

Section of Document:

Reason for comment:
It would be unfair for the whole burden of development for this part of Wealden to fall on one town, it needs to be fairly divided between Crowborough, Uckfield and Heathfield taking into account which has infrastructure and capacity to support the growth. In addition, any development should not take place in the AONB, breach any significant landscape horizons so the development can be seen from far reaching views, should be in the least sensitive ecological area for that town, be away from any area at risk of flooding, not jeopardise any streams/ rivers and be sensitive to local residents. Also, brownfield sites are always preferable and town centre developments as long as green space / leisure activities are not jeopardised.

Option 12e

Section of Document:

Reason for comment:
Not precise, should be minimum with a maximum rather than an ambiguous +, or a percentage.
Option 14d

Reason for comment:
Need to ensure no significant landscape horizons breached which means it can be seen from afar, that any ecologically sensitive areas are protected, away from any risk of flooding, that local conservation bodies are listened to, that Millenium Green has an additional buffer zone and that any development is sensitive to local residents.

Option 14h

Reason for comment:
Breaches bypass. Rural areas surrounding Uckfield need to be protected and that does not mean building up to the bypass. It is important to maintain the countryside gap between Uckfield and the bypass which gives Uckfield its unique countryside setting.
The site NW of Uckfield (known as Downlands Farm and Budletts Common) put in a planning application in November 2006 for 750 homes at Downlands and industrial site at Budletts Common. This was reviewed and subsequently REFUSED in February 2007. It was an extensive application and a far-reaching review occurred and the application subsequently refused. It is important to note the number of objections (provided in a short period of time just before Christmas) as these reasons still stand as to why this site should be excluded from the LDF going forward. A summary of objections are below to help other readers of the LDF, who may not be aware of this planning review, gain an understanding into why this site should be protected long term due to its landscape and ecology, for future generations to enjoy and for the overall good of the area and Wealden. On the basis of the points below I ask you to ‘disagree’ with the Uckfield NW option (Question 14a) and the Uckfield Ringles Cross Option (Question 14b) “LANDSCAPE IMPACT: NW Uckfield landscape shares many of the characteristics of the High Weald including large tracts of woodland, ancient woodland, wooded ghylls and associated streams, sandstone outcrops and expanses of birch, gorse and bracken. Much of the woodland is ancient in origin and therefore of considerable ecological value. Uckfield Town is almost completely concealed by the NW ridgeline of trees along Snatts Road. The proposed site is clearly visible from 2 AONBS (South Downs and Ashdown Forest) Long views stretch away northwards to the heathland ridges of the Ashdown Forest. Officers (for Development Control North Sub-Committee) consider that the visually exposed and rural qualities of the open slopes (below Snatts Road) make the application site sensitive to development. Any outward expansion would be highly intrusive in the landscape, breaching a significant visual horizon and exposing the urban area of Uckfield to a wide tract of previously unaffected countryside. In landscape terms, it is considered the development would cause unacceptable harm to the rural setting of Uckfield and Maresfield and the visual quality, continuity and rural character of the surrounding countryside. ECOLOGICAL IMPACT: The site includes a number of habitats of nature conservation importance, including an ancient woodland complex, ghyll woodland, old herb-rich grassland, ponds and streams. The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern. Direct adverse impacts would be the loss of ancient woodland and the loss of acid grassland at Budletts Common. However, there is also potential for indirect adverse impacts through fragmentation of woodland by the construction of the road network, changes to the local hydrology in the ghylls and through exposure of sensitive habitats to urban activities such as informal recreation, predation by domestic pets and rubbish dumping. The Environmental Agency, the Sussex Wildlife Trust and the Woodland Trust have all raised significant concerns over the ecological impact of development and objected to the application. Ancient Woodland is the closest approximation to natural broad-leave forest to be found in England and is therefore the most ecologically valuable. It is an irreplaceable resource both for its diversity of species and for its longevity as woodland. The Government recognizes that ancient woodland is declining and becoming fragmented and should be protected for its value as a biodiversity resource. PPS9 Biological and Geological Conservation states that Local Planning authorities should not grant planning permission for any development that would result in its loss or deterioration unless the need for, and benefits of, the development in that location outweigh the loss of the woodland habitat. The site includes wet woodland and ghyll woodland. Ghyll woodland is a nationally rare habitat and virtually unique to South East England. Wet woodland is a UK Biodiversity Action Plan priority habitat. At Downlands farm rare lichen and mosses have been recorded on the sandstone rock exposures. Ghylls are too steep-sided to have ever been cultivated and have often had continuous tree cover.
maintaining a damp, shady microclimate for hundreds or thousands of years. Both ghyll and wet woodland habitats are known for their fragility and sensitivity to human disturbance and water pollution. The EA also consider the size and connectivity of the site of natural habitats is also significant in terms of the range and numbers of species it supports. Government PPS9 states that ‘local authorities should aim to maintain networks by avoiding or repairing fragmentation and isolation of natural habitats…. Such developments should be protected from development and, where possible, strengthened by or integrated within’ The EA also consider that the potential ecological impacts on the adjacent Lake Wood SNCI and on high quality watercourses downstream and outside the application site have not been adequately addressed. Overall, it is considered that the adverse ecological impacts of development cannot be sufficiently mitigated, particularly the loss of irreplaceable natural habitats such as ancient woodland, fragmentation and isolation of the remaining habitats arising from increased human activity." There is much more which can be found on the WDC site. WDC Refusal was based on the following:- • The proposed development represents an unjustified and unacceptable form of development of a site that lies in open countryside outside the defined development boundary for Uckfield • The proposed development would result in the unacceptable loss of ancient woodland and wetland habitats and lead to the unacceptable fragmentation, isolation and disturbance of natural habits that support protected wildlife species and other flora and fauna of acknowledged nature conservation importance • Insufficient information submitted to enable a proper assessment of the archaeological implications of the proposed development • The proposal does not satisfactorily demonstrate that adequate provision will be made to facilitate walking and cycling and reduce dependence on the private car • The proposal does not satisfactorily demonstrate that there would be an acceptable impact on the surrounding highway network, particularly in Uckfield Town Centre which is already heavily congested at peak times • The applicant has failed to demonstrate to the satisfaction of the District Planning Authority that the proper provision and delivery of the necessary infrastructure improvements can be secured to meet the additional needs OBJECTS – ENVIRONMENT AGENCY Proposed main access via Blackdown roundabout unacceptable ecological impact (includes Budletts Common). Proposed ponds adjacent to Blackdown roundabout will result in unacceptable loss of habitat. Roads will prevent movement of Great Crested Newts. Residential layout will result in loss of wet grassland and ancient wet woodland. The effects of increased human and pet access to the Longwood ghyll and Shermanreed Wood ghylls have not been addressed and are likely to be highly detrimental. The ecological impacts on adjacent Sites of Nature Conservation Importance (SNCI) have not been addressed OBJECTS - WOODLAND TRUST Downlands Farm contains areas of ancient woodland, including wet woodland and ghyll woodland, forming a rare mosaic of ecologically rich and sensitive habitats. The development proposals would result in unnecessary damage and loss to ancient woodland in conflict with Government guidance and development plan policies OBJECTS – FORESTRY COMMISSION The proposed development will have a significant impact on Ancient Woodland within the site. The Governments forestry policies highlight the importance of Ancient Woodland and strongly discourage development that results in its loss…. These woodlands are of significant ecological interest and are sensitive to changes around and within them OBJECTS – Highways Authority Proposal would lead to an unacceptable increase in existing safety hazards and unacceptable traffic conditions in Uckfield Town Centre. The proposal does not demonstrate that there would be an acceptable impact on the surrounding highway network COUNTY ARCHAEOLOGIST In light of potential archaeological significance need an archaeological assessment to be undertaken OBJECTS - FOOTPATHS OFFICER OBJECTS – Head of Policy and Environment OBJECTS – Arboriculture and Landscape Section Falls within an area of countryside dominated by wide tracts of ancient woodland, including SNCI Woodland Trust Lake Wood wildlife reserve and the development would have a grave impact on wildlife, including the habitat of European protected species. The landscape is a fine example of the High Weald/Low Weald interface and the development would have a significant negative impact upon its character quality. There would be an unsustainable relationship between existing and proposed new trees and the new development OBJECTS – Sussex Wildlife Trust Environmental impact fails to correctly value the ecological assets of the site and underestimates the resulting impacts. The site is of historic and ecological importance because it has remained largely undeveloped and is a good example of the Weald landscape being a mosaic of habitats of ancient woodland and unimproved grassland. The site is an important link within the larger ecological network of the area OBJECTS - CPRE SUSSEX Site represents a new community isolated from Uckfield.
Development would reduce the countryside gap which separates Uckfield from Maresfield and Five Ash Down. The inhabitants would tend to rely on car transport contrary to Government policy.

OBJECTS – Uckfield Town Council
The scale and size of the development. Lack of infrastructure to support the development. Congestion at the access site. Potential Ecological conflicts. Onsite water treatment unacceptable

OBJECTS – Maresfield Parish Council
Reduce the important countryside gap between Uckfield and Maresfield. Ecological/biodiversity. Insufficient infrastructure. Development opposed to the principles and policies of the non-statutory plan relating to the protection of the setting and individual identities of settlements and preventing their coalescence. The proposed development would generate an unacceptable level of additional traffic exacerbating current traffic problems in Maresfield and Nutley

OBJECTS – 215 letters and a petition
469 signatures (December 2006)

LOCAL PLAN REVIEW
5th December 2000
Wealden Local Plan Review concluded that any outward expansion of development on the north western edge of the town, largely comprising land at Downlands Farm and Budletts Common would cause unacceptable damage to the visual quality, continuity and rural character of the surrounding countryside. Further consideration was given by the council in 2002 a detailed reappraisal of the land on the north-western edge of the town was carried out in order to assess its potential to accommodate major housing growth, but this reappraisal confirmed the councils earlier findings in terms of landscape impact, as well as identifying significant concerns in education and transport issues. 15th December 2003 a further planning review and 91 objections were received* Please help protect and conserve this ecologically rich area and ‘disagree’ with development of NW of Uckfield. This specifically includes Downlands Farm and Budletts Common and extends to either side of the A22 NW of Uckfield. Disagree to Question 14a and 14b.

Part of document: ☐ document ☑ chapter ☐ section ☐ option
Option 14a
Section of Document:
Your View ☐ Agree ☐ No opinion ☑ Disagree
Reason for comment:
Option 14b

Reason for comment:
Too close to SSSI Buxted Park and other Sites of Nature Conservation importance. Will close strategic countryside gap for Buxted and Five Ash Down. Many points similar referred to in response to question 14a. Will increase traffic using Snatts Road which is a small country lane and already dangerous at exit/entry and generally not suitable for increased traffic. Will negatively increase traffic on old London Road and potential for more accidents either at Budletts Common and A272 junction.

Option 14c

Reason for comment:
Large scale development trying to use Framfield Road as access is unsuitable as it is already congested and it will be harmful to residents of Framfield Road. More suitable access should be sought before site contemplated.
Option 14g

Reason for comment:
Need to ensure no significant landscape horizons breached, that any ecologically sensitive areas are protected, that local conservation bodies are listened to, any development is sensitive to local residents, to help fund re-instating train link. Main concern is risk of flooding and that flood prevention is key and environment agency consent to development is confirmed. Flood defenses for Uckfield must be in place prior to this development.

106111

Part of document: Option 21b

Section of Document:

Your View: Disagree

Reason for comment:

Five Ash Down has approx 100 dwellings currently with another 140 planned at the old Grampian site, this is enough for one small village. This new number is completely disproportionate and would start to merge the village with Uckfield / Maresfield and Buxted. If there is a need after the 140 it should be a few, not many as proposed. Rural allocations should be dispersed through the community with each and every village taking a share not just selecting a few villages. A developer may well want larger locations to make more money, however, Wealden should be encouraging smaller developments to protect our precious landscape and countryside.
Consultee ID: Mrs Reed
106111

Part of document: □ document  □ chapter  □ section  ✔ option
Option 21c

Section of Document:

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
Buxted has already taken a number of developments, 120 is too many and should be reduced. Also, no development near Buxted Park which is a Grade II listed SSSI. The station car parking needs to be improved to stop parking outside residential properties all around the village.

Consultee ID: Mrs Reed

Question 21g

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
Do not concentrate large development on a few villages within Wealden. The rural villages/community needs to take their fair share of development and disperse building through Wealden. Smaller is better rather than overloading a few with out of propotion developments. Developers may well like big sites, this is out of keeping with Wealden. villages should not be expanded above 10-20% otherwise they will loose their indiviudal identity and if it is too large become mini towns and ruin what is good about Wealden.

Consultee ID: Mrs Reed

Reason for comment:
Question One

Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
What does "some" development mean? Once you allow "some" development surely you set the precedent for more and then you no longer have an area of outstanding beauty!

Option 2a

Reason for comment:
It should at least meet the target which seems low.

Option 3a

Reason for comment:
Local jobs are important, once you change the use you lose the employment opportunities.

Option 3b

Reason for comment:
Of course!
Consultee ID: Mrs Head 106113

Part of document: Option 3c

Section of Document:

Your View  Agree  No opinion  Disagree

Reason for comment:

Absolutely otherwise you cause more congestion and traffic problems with everyone having to commute for work.

Consultee ID: Mrs Head 106113

Part of document: Option 3d

Section of Document:

Your View  Agree  No opinion  Disagree

Reason for comment:

Yes we need more local jobs and less commuting or better transport links. Travelling into Eastbourne by public transport for work is a nightmare and takes around 45 - 60 mins each way.

Consultee ID: Mrs Head 106113

Part of document: Option 4b

Section of Document:

Your View  Agree  No opinion  Disagree

Reason for comment:
Reason for comment:
How would you travel there?

Reason for comment:
Please don't keep adding housing to the edges of Hailsham - we moved here from Eastbourne because of the peace and the surrounding countryside and for a better quality of life. Transport, schooling and doctors all need to be included in expansion and there are already too many houses about to be built despite our objections.

Reason for comment:
Too many houses, causing too much traffic, shortage of school places, shortage of doctors, shops, work etc. Losing countryside. No thanks.
Consultee ID: Mrs Head 106113  
Part of document: ☑ option  
Option 15b  
Section of Document: 
Your View ☑ Disagree  
Reason for comment: 
No more housing onto the edges of Hailsham or else it will end up like Eastbourne and Stone Cross with no "gap" between Hailsham and Polegate or Horsebridge. What about a rail link at the southern end of Hailsham and Polegate? Hailsham should retain its character as a market town.

Reason for comment:
Your View □ Agree □ No opinion □ Disagree

Reason for comment:
I, Ann Haig McVitty, evidently have the reputation of "being the member of the public in the whole of Wealden, who has followed Planning Policies and development control matters, and attended more planning meetings over the past 30 years, than any other person" and therefore, it must be assumed that I do understand the issues and the reasoning behind most of the questions contained in this massive document, and just how important it is that everyone of us, from whatever our own particular stand-point or interest may be, to make, whatever our comment may be NOW before 14th August; as on what is recorded in this CORE STRATEGIC CONSULTATION DOCUMENT now is likely to affect the Planning Policies and Programmes that will affect all our lives over the next 20 years! However, even I, (who am very far from being alone in this) do find that the whole way these Documents, Instructions and S ummaries have been put together, and presented to the public, extremely confusing. ( Even the numbering of the Parts/Chapters and the 32 odd questions, is not consistent from document to document!.) Basically, the whole approach is not at all user friendly and to the majority of the ordinary members of the public - particularly those who do not use computers - who are the very people who will be affected by what is eventually contained in this document, it must be very "putting off"? I would never have thought that it would take me, 5 hours, followed by a 7 hour session yesterday going over the answers to questions affecting a local organisation on which I am a committee member, and a further couple of hours this evening, to work out just How and Where I should make the "individual personal comments " I need to make on various issues of concern to me. If this happens to someone like myself - then I am not at all surprised that the reaction I have had to asking probably 20 individual people whether they were aware of this Consultation, and whether they had or were going to contribute? I have been met with blank stares, or remarks like, "oh! I think we got something about this through the post, but it looked very complicacated", and "what is the point as "they" will do what they want anyway". The Danger must be, that the responses you may get, could be largely from Agents, and Developers, and Government Departments, who will naturally have a very different view on what should happen where, over the next 20 years, than the local people of all ages, whose housing needs for themselves and their families, now and in the future, are in my view ,what should be directing the policies that will eventually come out of this Consultation? Thus the unique character of Wealden, the conservation of the environment, and the best use of the resources we have, could end up by being compromised for ever, with the whole of the South East being covered with "the wrong sort of houses" ( i.e. the ones that are most profitable for developers to build - so that communities are left without the necessary community facilities to support both "the sense of living in a community" and the infrastructur necessary BEFORE ANY NEW HOUSES AT ALL CAN BE BUILT! 3-8-07
1. THE GOVERNMENT REQUIREMENT FOR HUGE NUMBERS OF NEW HOUSING IN THE SOUTH EAST OVER THE NEXT 20 YEARS APPEARS TO BE DESIGNED FOR THE BENEFIT OF DEVELOPERS RATHER THAN FOR THE NEEDS OF THE LOCAL INHABITANTS OF THE TOWNS AND VILLAGES, BE THEY OLD, YOUNG, KEY WORKERS, FAMILIES THAT DO NOT WANT TO SPLIT UP ETC. ETC. THIS RESULT IS THAT THE SOUTH EAST NOT GETTING THE LOW-COST/AFFORDABLE/SOCIAL HOUSING NEEDED FOR THE SUCCESSFUL ECONOMIC DEVELOPMENT AND SOCIAL REQUIREMENTS OF THE AREA. WHATEVER HOUSING IS BUILT, IT MUST BE BUILT WITH A VIEW NOT ONLY TO PROVIDE HOUSING FOR DIFFERENT SECTIONS OF THE COMMUNITY, BUT KEEPING IN MIND HOW BEST TO CREATE NEW JOBS AND PROVIDE EMPLOYMENT IN THAT AREA: SO THAT OVER THE NEXT 20 YEARS WE DO NOT GET GETTOS OF HOUSING WITHOUT ANYTHING BEING DONE TO ENSURE THAT THE OCCUPANTS FORM PART OF A SUSTAINABLE COMMUNITY. 2. IT IS QUITE USELESS TO PLAN FOR NEW HOUSING IN AREAS WHERE THERE IS ALREADY A STRAIN ON THE INFRASTRUCTURE, E.G. WATER SUPPLIES, DRAINAGE, ACCESS TO COMMUNITY FACILITIES, DOCTORS, SCHOOLS ETC. EQUALLY, TO BUILD ON FLOOD PLAINS OR CRAM IN MORE HOUSES WHERE FLOODING HAS ALREADY BEEN EXPERIENCED WITHOUT FIRST TAKING FLOOD PROTECTION MEASURES IS both Irresponsible, and asking for trouble that goes far beyond flooding, ie. insurance claims and rising premiums that only go to Increase the price of houses that is the root of all the trouble over shortage of “affordable housing”.

Then there is the whole question of allowing building "in the Countryside" where there is a case for rethinking the whole "exceptions policy". Just as Social Housing is now allowed in certain circumstances as an exception - Over the next 20 years with the farming industry declining and "those who live and work in the countryside" not only have to "diversify to survive", but there is going to be an increased need to consider "who is going to "conserve and look after the countryside"? - indeed our heritage"? That can only happen, if those who are willing and interested in such things as cutting the hedges, clearing the ditches, replanting the trees keeping the fences in repair and encouraging wildlife habitats etc. have the incentive to do so and the financial means of so doing. I therefore believe, there is, and certainly will in some instances, a case for allowing the building of an occasional, substantial new dwelling in the countryside, on land that is not being used for traditional farming, or is on too small an acreage to be financially viable from traditional agricultural use etc. This should only be allowed, where the owners of the house are carrying out, or setting up such activities that will in themselves creates employment so that the existence of a large property in that area becomes in itself the creator of employment, and becomes the centre for maintaining and enhancing the environment around it, including the maintenance and husbandry of the land. This should be for the benefit of everyone in the area. What I am suggesting could in a sense be described as a return to something like "The Victorian Era" where the occupants of "the big house", and the land around it, supported the cottagers around, by giving them employment to maintain whatever enterprises stemmed from "the big house". I see this sort of development as the only way the scaling down of traditional farming (when the farmland/countryside was well maintained, and as a side line benefit, non profitable jobs such as cutting the hedges etc. happened, when the main profits from the use of the land, were coming from farming as it used to be. etc.). At the present time, exceptions policies are far too narrow to be able to encompass "development for the future" and it can only happen where the "design of the house is unusual and of exceptional quality. (This has happened with the building of The Castle in the middle of a lake by a Tunbridge Wells Dentist in the late 80's when I was present when permission for this was given by 1 vote! "I do not see why we should not allow this man to realise his dream of a lifetime, when the risk is all his, and what he is doing is utilising and enhancing the amenities of the area" I therefore find it surprising that when quite recently, Wealden had an application for an unusually designed half burried, echo-friendly house, designed to be the hub in the centre of a landscape that needed maintenance and enhancement which would be provided from the house and its owners, (with, as I understand it "the property being written in trust, so that the benefits it was designed to bring to the area, would continue in perpetuity) that this application was refused by Wealden. I hope over the next twenty years, those in charge will not be so bound by traditional planning "boundaries as we have come to see them, that they will be unable to adapt to inivative development, of what may at first sight be a completely new way of looking after our heritage, without which the landscape as we know it will simply die away.

  Am concerned that using wood chippings etc. for energy and placing new housing near the sourse, would further erode the tree cover and character of the area, which is already being seriously eroded by inappropriate development. Have to remember that felled trees reduce the take up of water, which leads to flooding - so going for too much "renewable energy in principle alone, could be a short sighted policy long term.

Reason for comment:
Option 3c

Reason for comment:
The point is that each site has to be considered on its merit - small, medium sized business space probably preferable but "suitable locations " is subjective and can only be judged together with the employment and housing needs in the area.

Option 3d

Reason for comment:

Your View

Option 6a

Reason for comment:
Because too much new development on the outside edges of towns is in danger of isolating residents from shops, doctors, community services in the centre of the towns, and this is particularly applicable if one has put sheltered/low-cost housing for the elderly, who may not have cars, right at the edge of the towns.

Section of Document:

Your View  ☑ No opinion  ☐ Agree  ☐ Disagree

Reason for comment:

There will be circumstances where a village needs to expand, particularly if any new development on the edge of towns locates the type of housing Wealden Senior Citizens Panel is interested in too far away from the centre of the town. It would not be desirable to rule out development over the next twenty years in villages which have now lost their village shop, post office, schools etc as that could be condemning these villages forever as dormitory areas with no incentive for the young to stay in their own community, find work and help to regenerate the area.

Question 4e

Section of Document:

Your View  ☑ No opinion  ☐ Agree  ☐ Disagree

Reason for comment:

It would be presumptuous of me to comment on new employment sites in this area, as I do not live there, and therefore comment would smack of "nimbyism".
THERE IS SOMETHING INHERENTLY WRONG IN POLICIES THAT AUTOMATICALLY INCLUDE GARDENS AS "BROWNFIELD" AND THEREFORE DEVELOPMENT SITES! IT HAS LED TO THE OPPORTUNIST PRACTICE, OF SITES BEING CLEAR FELLED, REDUCED TO WHAT RESEMBLES A "SCORCHED EARTH" LANDSCAPE BEFORE ANY PLANNING APPLICATION IS SUBMITTED - THUS "REMOVING" THE GROUNDS ON WHICH A PLANNING APPLICATION MIGHT HAVE BEEN REFUSED. - EG. " Loss of Tree Cover, Wildlife habitat, (including protected species) Change of Character to the amenities of the area, and to neighbouring properties, - increased traffic considerations, etc. etc." We are told that under the present directives Anyone has a perfect right to fell trees in their gardens "UNLESS THEY ARE COVERED BY TPO'S" BUT the trouble is that the sound of chain saws almost invariably happens at weekends, when the officers of the local authority are not available to intervene, and most of us are not aware of a tree or a group of trees that forinstance "contribute to the street scene" until the saws are out. FURTHERMORE, THERE HAS BEEN A RECENT GLARING EXAMPLE OF AN ENTIRE WOODLAND THAT WAS COVERED BY A WOODLAND TPO, BEING FELLED, WITHOUT AN EXAMPLE BEING MADE OF THE CULPRIT, SO AS TO WARN POTENTIAL DEVELOPERS THAT SUCH BLATENT ABUSE OF STEPS TAKEN TO PROTECT THE ENVIRONMENT WOULD NEVER BE TOLLERATED. WHAT SORT OF MESSAGE HAS THAT SENT OUT TO DEVELOPERS - ONLY THE ONE THAT "THEY CAN GET AWAY WITH ANYTHING"? (In any case I do not think enough attention is being paid to what the loss of tree cover is doing to the environment, quite apart from the change of character to an area where its tree covered nature is part of the special amenities and unique character of the area - The more an area is built over, and "concreted over" the less the trees are able to soak up the moisture, and surface water drainage problems are created). This whole "gardens being designated "brown field sites" has led to the wrong sort of development taking place, where it never should have been allowed in the first place - and the whole character of an area being altered to the detriment of the amenities of the neighbours. It has opened up a "field day" opportunity for developers, only interested in obtaining huge profits by demolishing a perfectly good house, and replacing it with housing that is either unsuitable for the area, or of a cramped style out of character with the character of the area and detrimental to the amenities of adjoining residents, who have to live with it, when the original owner of the vacated/demolished house, moves elsewhere! (Over the past 3O years of studying development trends in the Warren/St.Johns area of Crowborough I can think of very few instances where the land round a large house has been sold for development, that the original owner has remained living in the original house. ie. development has been encouraged, which the original owner of the site, would have normally objected to.!) The situation is even worse now, when the trend is for developers to try to buy up perfectly good houses, with the intention of demolishing them, and applying for planning permission for development of a much greater density and of a different character. Building on unsuitable sites of this type, of course creates a precent so that adjoining neighbours tend to be tempted to "jump on the band waggon". What is happening now that "gardens" which used to be protected from "backland development" and by a policy of development in the Warren Area of Crowborough being restricted to plots having to be at least a quarter of an acre in size, having been "torn up" and the criteria of "greed" taking over, which would be all right in certain circumstances IF WE WERE GETTING THE TYPE OF HOUSING the Governement is demanding we build, but we are NOT! This appalling policy is resulting in demolition of perfectly good houses, rather than their adaptation/refurbishment, so that we are getting the type of development that is going to make the biggest profit for the owners of the land/ and the developers behind them, irrespective of the type of housing that is actually required in the area. OVER THE NEXT 20 YEARS
ONE WOULD HOPE TO SEE THE WHOLE POLICY AND CRITERIA OF WHERE AND WHAT TYPE OF HOUSES ARE BUILT, ADJUSTED SO THAT THE "UNREASONABLE PROFIT" ELEMENT, IS REPLACED BY ONE OF WHAT IS ACTUALLY SUITABLE AND IN CHARACTER WITH THE AREA, AND MEETS THE HOUSING REQUIREMENTS OF THE PARTICULAR TOWN OR VILLAGE. It does not mean that building in overlarge gardens should never be allowed, but it should not be to the detriment of setting of the original house, or future residents of that property - and before a permission is given for a property to be demolished, I think alternative uses/adaptations of it should be considered. But ABOVE ALL STEPS MUST BE TAKEN, TO PREVENT THE FELLING OF TREES AND THE CLEARANCE OF SITES BEFORE A PLANNING APPLICATION IS SUBMITTED - BY REQUIRING ANYONE CONTEMPLATING SUCH AN ACTION, TO GIVE NOTICE TO THE LOCAL AUTHORITY IN THE FIRST PLACE, SO THAT THE SITE CAN BE CHECKED, FOR THE AFFECT SUCH AN ACTION MIGHT HAVE ON THE WILDLIFE HABITAT ETC. BEFORE THE EVENT, NOT AFTER AND TO SEE IF ANY TPO'S WERE APPROPRIATE.

Part of document: ☑ option
Option 5a

Section of Document:

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
A certain amount of ‘organic’ growth is needed to cater for the needs of the existing local residents particularly the elderly, who may want to downsize but not move away from a familiar locality, and the young who may want to stay in the locality near their parents, and to be near their work. Therefore in order to maintain a balanced population in even the smallest communities, development boundaries should be reviewed when necessary and not set in stone, and villages which have "lost" their school, shop, post office etc now may well turn out to be the more suitable sites for new development in order to "generate new employment opportunities, keep the schools open, so they are not closed for "lack of pupils etc. The whole process of development is something of a "chicken and egg concept".
Option 5b

Section of Document:

Your View  □ Agree  □ No opinion  □ Disagree

Reason for comment:

If this option is chosen, the location, style and type of housing should be carefully monitored, and development should only be allowed where there is a real proved local need: e.g.: Consideration should be given to “sheltered housing” and “sheltered housing plus” as at present under consideration by the County Council. The options before us talk a great deal about low cost/affordable housing, and not enough about either "sheltered housing" or the possibility of going back to allowing Local Authorities to build even a limited number of houses for rent again, for which in certain circumstances, there could be some justification. (Because of the frustration Local Authorities must feel, over the outside restrictions and regulations that must affect their ability to manage the "housing lists" so that local residents feel that what is happening is "fair". I can see the problem of people being unable to get onto, let alone off, the housing list in the future, increasing rather than decreasing, unless the local authorities are allowed much more discretion to manage their own affairs. The housing corporations who provide much of this sort of housing with the local authorities at the moment, seem to me to be expanding their own agendas in this field, so that the trend is likely to be "away from Local Authorities altogether" rather than "closer". This is a political matter, and perhaps not for this Consultation, but rightly or wrongly, I feel instinctively, that the trend may not be moving in the right direction as things are, and that our electorate might well prefer to know that it was their "Local Authority" to whom they pay Council Tax that they need to go to on housing matters - even if it is only to seek help in "changing a light bulb". Ever since the Sale of Council Houses was permitted, the social "gains" that concept made, did end up by creating "losses" such as unacceptable waiting lists for those "on the housing list" simply because there was no accommodation available - and priority at the top of the list often going to newcomers from outside the area (e.g. immigrants) at the expense of local families who had been waiting for many years. Therefore, I would like to see if not a return to Local Authorities being landlords and building Council Houses, that at least they be allowed to retain more money from "business rates" to enable them to pay more attention to repairs, and improving the quality of accommodation for many of their most vulnerable residents, instead of sometimes giving the impression "that they do not care!"
As people get older they need basic services such as doctors' surgeries and transport links to hospitals, shops etc and therefore should probably be discouraged from moving to new developments in isolated communities where such services may not exist, but as well as such practical matters; the fact of retaining contact with family and friends and interests is even more important. On Changes to the Boundaries: There are certain illogical here in Crowborough, which I believe need to be tidied up. It is illogical that the top end of Goldsmiths Avenue, Beacon Road West, Warren Road etc. should be in Crowborough West, rather than the Boundary being along Beacon Road itself. Equally, the boundary between Withyham and St. Johns, as you go down St. Johns Road, should include "Murray Cottage" within St. Johns where it always used to be, and there seems to be a certain illogicality over the boundary on the N side of St. Johns Road, whereby One side of Old Lane is on Crowborough St. Johns, and the other in Witham (with very different Council Tax levels) But IF THIS WERE TO BE CHANGED, AND MORE HOUSES INCLUDED IN CROWBOROUGH, THEN WHEN IT COMES TO SETTING COUNCIL TAX LEVELS, CROWBOROUGH TOWN COUNCIL, SHOULD TAKE NOTE THAT, THE MORE HOUSEHOLDS THERE ARE IN THEIR DOMAIN, THE LESS SHOULD BE THE LEVEL OF THEIR OVER HIGH COUNCIL TAX LEVY. (This did not happen when the whole of St. Johns, (Withyham) was subsumed into (Crowborough) St. Johns in the early 1980, as was assumed would happen, and this caused a lot of understandable resentment among the residents of St. Johns, bearing in mind the very considerable difference in levels of Council Tax ) THIS RAISES THE WHOLE SUBJECT OF COUNCIL TAX, AND THE EFFECT THAT HAS ON THE HOUSING MARKET, AND THE WELFARE OF MANY OF THE INHABITENTS, but this is probably not the place to go into that, so I raise it only as a marker, as it affects the whole of the housing market, and houses, of what type and where they are built, etc. The introduction of the HIPS scheme which is likely to end up by affecting the sale of all houses except the smallest, is likely to affect the whole of the housing market, Over the next 20 years, the boundary that goes through the middle of Groombridge is also illigical, and must cause considerable anomolies to that community, when half the village is not even in Wealden. I would expect the people who live in that area to express views on this. If the question relates to settlement boundaries, in the context of where development can and cannot take place at the moment, then I think that villages like Blackham, which in my life time, had a school, a village shop, a garage, and a post office (all of which have gone) and it is therefore it is designated as "not within a development area" then I think this is an area, which could well benefit from more developent - low cost/ affordable housing schemes, etc. which in turn could create the need for the return of Post Office, Shop etc. etc. As I lived in the are for 15 years and know it well, I am aware of potential development sites there which will never come forward, as long as it is uneconomic for the landowners to release the land, or where any proposals are automatically turned down. Where a landowner has land in an area at present not designated for additional housing, the opportunity should be taken to re-consider that designation, if appropriate - taking into consideration that the whole village could benefit, as housing > people = more children = keeping the school open; the more people, the more demand for facilities such as shops, medical facilities halls etc. all of which generate employment which will keep the younger generation as part of their own local communities etc. etc. I do not like to witness the total "gentrification" of a village, to the exclusion of the local inhabitants, which tends to happen if housing in a village is only affordable to people from outside the village etc. The same sort of comments could apply to the village of Withyham, which includes Balls Green and has a school, a pub, and a church, but has lost its Church, I would think that there could be scope for revising the development boundaries there, for the benefit of the village as a whole - but doubtless the Parish Council will comment on that.

Option 6b

Section of Document:

Your View  ✔ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:

Housing development suitable for older people would be more appropriate in urban locations, where it is more likely that there will already be the services and support personnel particularly needed by the elderly. However, it should not be assumed that this is automatically the case and planning for new development should be carried out with reference to comments at 6a. And villages where the elderly already live should be considered, so that large houses can be vacated and the elderly do not have to lose contact with their own community.

Consultee ID: Mrs. Haig McVitty
Agent ID: 106117 Private Individual

Option 6c

Section of Document:

Your View  ☐ Agree  ✔ No opinion  ☐ Disagree

Reason for comment:

It would be wrong to disagree categorically with this percentage. Some villages need more new development than others in order to sustain community services such as schools, churches, shops etc which they might be in danger of losing if younger families are not enabled to find affordable housing in their locality.

Consultee ID: Mrs. Haig McVitty
Agent ID: 106117 Private Individual

Option 7a

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ✔ Disagree

Reason for comment:

There could be a case for development in villages which have already lost their facilities (see 6d above) (e.g. Withyham, Blackham) as well as in the case of smaller villages, where for example there might be only one shop and a school where numbers are dropping, there is a greater need to build up the community by providing housing for young families, to ensure that the community remains viable having an age group mix of inhabitants. Slightly larger villages on the other hand might have reached the capacity of their services and could only cope with a small number of additional houses. It is more complicated than this “sliding scale” approach would indicate.

Part of document: option

Section of Document: Option 7b

Reason for comment:
The choice of Rotherfield as a village earmarked with potentially large growth seems to be perverse, when there is often almost total "traffic grid-lock" trying to negotiate one’s way through the village by the Church, round the corner by the shop, turning to the right where there is the added traffic hazzard of cars etc. coming into Rotherfield from Mark Cross. The Chart for Growth potential is far too rigid and may well have to be changed as time goes on as farm diversification schemes etc provide more local employment and there is the need for local housing schemes where there is no obvious need now. Growth potential would need to be constantly reviewed as circumstances change. This need for flexibility will be linked with policies for the conversion of farm buildings, which I would rather see converted to small scale industrial units, rather than additional dwelling houses, but this will depend on the individual circumstances and location of the building. The key word here, is FLEXIBILITY.

Part of document: □ document □ chapter □ section □ option

Option 7d

Section of Document:

Your View ☑ Agree  □ No opinion  □ Disagree

Reason for comment:

To do this the entire planning system would need to be changed so that the presumption is automatically in favour of an preserving existing necessary village service, instead of what happens at the moment, objectors are told that the local authority “can only consider the planning application before them” and are unable to refuse an application, because the local people “would rather have a “butcher’s shop” than another estate agent.” Etc. [THIS OF COURSE RAISES THE WHOLE QUESTION OF WHO MAKES THE PLANNING DECISIONS AND WHETHER THE POLICY OF AUTOMATICALLY DEVOLVING THIS TO FORINSTANCE TOWN COUNCILS/PARISH COUNCILS WOULD GIVE THE PUBLIC BETTER CONTROL OVER “WHAT HAPPENS LOCALLY”. I have views on that well meaning concept, which there is not time to set out here, but in general the important thing is that :- LOCAL MEMBERS OF THE PUBLIC MUST NOT BE DEPRIVED OF THEIR ABILITY TO EXPRESS THEIR VIEWS ON DEVELOPMENT PROPOSED IN THEIR LOCALITY THAT IS LIKELY TO AFFECT THEIR LIVES. (I am alarmed to read that the Government proposes to stop the public challenging major development projects, which is taking away their right to protest, and is a retrograde step when it comes to individual freedoms!] Returning to the Q.7d. It is vital that no more village shops are allowed to be closed by owners who perhaps merely wish to capitalise on their properties by selling them for housing. It is much harder to re-open a shop than it is to close one. We want to promote a planning system that encourages the viability of local shops and post offices so that they do not have to close. Village plans should include consideration of the steps necessary to keep village shops/post offices viable. Otherwise, there is a danger of turning a settlement into a “dormitory” village or hamlet, which in turn may lead to increased crime levels and older people in particular, left in isolation with no village centre where they can meet, and nowhere to “cash their pensions” obtain money, or even shop for essentials. The elderly in particular, suffer when Village Shops/ Post Offices close, and there is no alternative source of these basic essentials to living available to them. The same problems arise when Doctors Surgeries are removed from villages, and the elderly are instructed to visit surgeries in surrounding villages, when there is no reliable, sufficiently frequent bus service available.....

Part of document: □ document □ chapter □ section □ option

Question 7e

Section of Document:

Your View  □ Agree  ☑ No opinion  □ Disagree

Reason for comment:

See comments made elsewhere re including some villages which are not at the moment scheduled for development at all, as their needs may well change over the next 20 years
Adequate infrastructure and services should be in place before development is even considered. It should then be up to the local parish and town councils to design and evolve their own plans, in consultation with the public, for what is suitable or desirable in the area they cover. The size threshold depends on the site available and the type and design of buildings appropriate to that site.
Before any development in Crowborough takes place it is vital that a proper community centre is provided as this not only serves the residents of Crowborough but people from the surrounding villages. WITH THE ANNOUNCEMENT IN THE LOCAL PRESS THIS WEEK THAT THE DISTRICT COUNCIL IS NOW PLANNING TO SELL OFF THEIR OFFICES AT PINE GROVE TO DEVELOPERS I have to point out that the people in Crowborough are again in danger of being “short-changed” over THE PROVISION OF THE SUITABLY SIZED COMMUNITY CENTRE - WHICH WAS AGREED IN 2004/5 AFTER EXPENSIVE CONSULTATION, TO BE A BUILDING THAT COULD ON OCCASIONS HOLD AT LEAST 500 SEATS, AND IS THE FACILITY THAT CROWBOROUGH NEEDS AND DESERVES AND HAS BEEN PROMISED FOR OVER 25 YEARS, BUT FOR A NUMBER OF REASONS (Different bodies and individuals with different aims, ideas, and objectives) HAS NEVER BEEN ACHIEVED. Because of this latest announcement, THIS NOW LOOKS EVEN MORE LIKELY NEVER TO HAPPEN! It is my opinion that over the years Wealden District Council and to an Extent the County Council have failed in what I see as one of their main responsibilities towards the electorate - “to provide the largest of the Wealden inland Towns with the Community Facilities required to "put it on the map” and serve the interests of the whole community of which Crowborough should be the hub. This “failure” has resulted in what I call “Crowborough having dropped off the map” in that outside organisations, conferences, seminars, entertainments, etc. simply do not even consider coming to Crowborough, with all the benefits that might bring to the town, for the simple reason that Crowborough does not have the facilities required to cater for their needs. These sort of gatherings and activities who are instead going to Uckfield, Hailsham, Heathfield, and even Lewes and Brighton, so it is small wonder that Crowborough to the outside world has the reputation of being a “no-go” area. All this has come about because, apart from "vested interests" from different local organisations and people which has clearly split the objectives on the “divide and rule” principle, Wealden District Council has failed to cash in on "planning gain" that could have been achieved in for the benefit of the whole community, when land they owned was sold to Safeways/Morrisons and then through Section 106 agreements etc. ensured that at part and parcel of the deal the developers provided the Community Centre/facilities that Crowborough so seriously lacks. One has to compare Crowborough’s situation with that of Uckfield who got its Community Centre AT NO OBVIOUS COST TO THE RESIDENTS OF UCKFIELD, as part of the Tesco development in Uckfield SIMPLY BECAUSE THE TOWN COUNCIL OWNED THE LAND ON WHICH TESCO WANTED TO BUILD. Here we have been fobbed off with promises that Wealden would provide the land, for a facility which does not meet the objectives listed above, and that the Town Council and the people of Crowborough would have to pay for the greater part of any structure that might eventually go on “this land”. Without going into everything that has happened or not happened over consultations, schemes and counter schemes, to provide this essential facility for Crowborough that have gone on within the Town Council, and the Steering Group for Community Facilities at Wealden, etc. over the past 3 years, I find it deeply disturbing to recognise the possibility that Wealden District Council having “let down” the people of Crowborough when Morrison’s was built, look to be all set to do the same thing again - severe critics might say “line their own pockets” at our expense, yet again?

Section of Document: Agent ID: Agree No opinion Disagree

Reason for comment:
It is impossible to have cut-and–dried opinions about this, when viability for the developers should not be the main criteria to be considered in building dwellings to fill the enormous gap in the market. Instead we should be catering for the needs of the population. i.e. the old, the young and the working, in preference to type developers may find more profitable?

Consultee ID: Mrs. Haig McVitty
106117 Private Individual

Part of document: chapter

Section of Document: Wealden’s Communities

Reason for comment:
1. OVER THE NEXT 20 YEARS IT IS ESSENTIAL THAT DEVELOPMENT MEETS THE REQUIREMENTS OF LOCAL BUSINESSES AND THE LOCAL POPULATION AND NOT MERELY THE PROFIT MARGINS OF DEVELOPERS BUILDING THE TYPE OF HOUSES WHICH ARE MOST PROFITABLE FOR THEM (IN OTHER WORDS in the main , LARGE EXECUTIVE TYPE HOUSES ). If this is allowed to continue then the reasoning behind Government demands for huge numbers of houses to be built in the South East over the next 20 years , will be in danger misfiring, in creating only "dormitory" towns and villages, when the life blood of local communities ( employment, local facilities, mixture of types of houses and their inhabitants) will have drained away.
Option 24a

Section of Document:

Reason for comment:
Preferable to 24b or 24c as it is undesirable to cram people into ‘rabbit-hutch’ developments without the community facilities being available to support a sense of community. Often high-density living means a lack of gardens and open spaces that reduce the quality of life for the residents and if this means too many one-bedroom dwellings this is sometimes a short-term policy, which restricts family visitors or accommodation for carers.

Option 24b

Section of Document:

Reason for comment:
Impossible to generalise on density of development. This must vary according to the type of housing provided and the residents who will live there. Families with small children need more space, older people prefer tiny gardens and often do not have cars. This does not mean that they do not need parking space for visitors or even garage for “storage space” to enable them to downsize and vacate larger underused properties.

Option 24c

Section of Document:

Reason for comment:
Option 24d

Section of Document:

Reason for comment:
As people require travel for different reasons such as getting to work, visiting shops, doctors, friends etc, this is a "chicken-and-egg situation": Transport in rural areas will never improve where there are too few passengers to use the buses and trains to capacity. But, the other side of this coins is that "more buses enable people to use the system more." Therefore increased development only in locations where there are already good travel facilities is likely to result in there being even less transport provided in areas where it is not used because of inconvenience, infrequency of service etc.

Option 25a

Section of Document:

Reason for comment:
As regards small dwellings for older people or first time buyers it is important that they should form part mixed developments so that we don’t build ghettos for one type of inhabitant only and the residents more easily form part of the wider community. Development plans should identify opportunities to provide community facilities across the district so that both new build and conversions provide the facilities and services in accessible locations, which conform to a set of accessibility criteria for facilities provided on site to encourage use by the whole community. As older people will be more inclined to downsize and free up larger properties for bigger families if small affordable housing units are available close to their original homes, there should be planning restrictions preventing changing the original character of these properties so that heirs cannot sell them on at a much higher price. Accommodation for vulnerable people in the district whether new-build or conversions should be of “Lifetime Homes” standards so that older people are able to continue living in them even when they become frail.
In General " We are getting the wrong sort of housing"! General market housing is taking a long time to sell in rural areas as it is, and most houses are priced outside the range of first-time buyers. Part-ownership, and housing association schemes for affordable housing, should ensure that affordable housing is available. NB: When ‘affordable housing’ is built, steps must be taken through Section 106 planning agreements etc to ensure that these houses remain affordable. In joint housing association schemes the proportion of low-cost housing that can never be sold on should be 75% of the number of houses built.

We believe this is the wrong option. A rigid rural exceptions policy will not be appropriate in the next 20 years. We would rather see the scrapping of this policy altogether in favour of a more flexible approach to the existing boundaries of many towns and villages, which will have to happen anyway if all this new building is to take place at the edges of towns and villages.

In rural areas it will be difficult to find landowners willing to part with their land for affordable housing when the going rate for land on which affordable housing is to be built is well below market value. Some HOPE projects seem to have foundered for this reason. (I understand that more realistic prices are now being proposed, but have no direct information on this)?

Part of document: □ document □ chapter □ section □ option
Option 27a

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
Maintaining and improving bus services is very important to maintain the quality of life for elderly people.

Consultee ID: Mrs. Haig McVitty
Agent ID:
106117 Private Individual

Part of document: □ document □ chapter □ section □ option
Option 27b

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
With an ageing population, many of whom do not have cars, reinstatement of this service would help to reduce the problem of rural isolation. The age of the population continues to increase, so that this section of the community needs to be taken into consideration in all development matters over the next twenty years.

Consultee ID: Mrs. Haig McVitty
Agent ID:
106117 Private Individual

Part of document: □ document □ chapter □ section □ option
Option 27e

Section of Document:

Your View ✓ Agree □ No opinion □ Disagree

Reason for comment:
BUT Any plans to reduce car use in town centres in favour of public transport should be given serious consideration, not least because of the impact of using the car on the environment. However, there are many elderly citizens for whom park and ride facilities are inappropriate because they can neither take walking aids onto public transport nor are able to carry shopping any distance when they reach the town centre.
Option 27f

Reason for comment:
Important to provide adequate off-road parking spaces particularly in the case of flats for the elderly because although they may not have cars themselves and do not drive they are all the more reliant on visits from family and friends, otherwise the social and caring quality of their life is diminished and they become lonely and isolated in their homes. The County Council Highways Department are not considering the future traffic likely to be generated when they do not object to a site being redeveloped with houses likely to generate greater car movement.

Option 28a

Reason for comment:
Parks and open spaces are vital for all age groups and to maintain a “green lung” to prevent areas being over-developed.

Option 28b

Reason for comment:
The answer to this question depends on “who is going to be responsible for the maintenance of the recreational facility incorporated into a new building scheme”. The developer will have been more likely to obtain planning permission by providing such a facility and will have already contributed to this by having to build a lesser number of houses. Therefore the maintenance of these facilities should be incorporated into planning conditions attached to the sale of these properties. SEE COMMENTS ON COMMUNITY FACILITIES AT IIf
There is no doubt that new development is needed, but for sports and leisure facilities to be lost as a result of new development would damage the social infrastructure of any community, particularly when additional housing creates a greater need for increased sports and leisure facilities.

Impossible to give a blanket approval without detailed study of the 20-odd situations listed, which is another Consultation paper in itself! The reason for this comment is that the answer to the major infrastructure items listed; what plan they are included in or not; the growth contingency option chosen; the delivery agency involved; and whether or not the developer concerned is required to make a contribution all raise very different issues. Although the obvious requirements of new sewage treatment works, traffic management schemes in towns, Uckfield flood relief scheme and new primary schools and the Crowborough multi-purpose community hall are all going to be necessary for the development control schemes covering the next 20 years.

Who wouldn't agree to a ‘perfect world’, summarised as: Protecting Wealden’s landscapes and environment; Improving economic prosperity; focusing new development where it will be most sustainable and offer the greatest potential benefit for existing communities; and Improving health and well-being of our communities? However unless there is clarification of the Government’s objectives in demanding so much new housing in this area, none of this will ever happen. See comments at Question 1.

Reason for comment:
Until it can be demonstrated that the 10% target can be achieved for domestic housing, it would not make sense to set an unrealistic target of 20%.

Consultee ID: jones
106124

Part of document: ☑ option
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
In order to maintain a balance of more affordable housing, sympathetic development should be permitted provided this is within easy reach of existing amenities and transport links - what we are currently seeing is the development of large expensive houses in prime locations within existing development boundaries - the consequence is that the young people will not be able to afford to buy and the number of people who we need to fill socially important roles/jobs (police, nursing, teachers) will fall. The area is within (and its getting even more so) commutable distance of London so if we want communities that become more and more domitory villages for people to work in London carry on as we are now. With the Wealden district said to be one of the most desirable places to live we need to plan for inevitable growth and the demand that will put on our housing stock and the amenities.

Your View: Agree, No opinion, Disagree

Reason for comment:
I feel that all aspects of the requirements for growth and development needed for future communities has been taken into consideration.
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
I agree that some development for housing needs be allowed on the 'edges' of AONBs - Positions in the landscape could be looked at more carefully, with more flexibility and with a view to allowing infilling in small villages where the impact would be acceptable and manageable. Rather than large developments to meet housing needs, these small additions, carefully considered, could make a big difference to those wishing to live and work in the rural areas.

Option 2a

Reason for comment:
While I agree that 10% renewable energy is a worthy goal for which to aim in new housing and business development, I fear that raising that percentage would tend to introduce visually unacceptable solutions. And, once upon the slippery slope there would be no going back. For instance, one has only to see the amount of towers erected for mobile phone use, now such a blot on the landscape, to understand what could happen in the name of progress.

Section of Document: Housing Delivery 

Your View [ ] Agree [ ] No opinion [ ] Disagree

Reason for comment:
I see that in almost every case the developer will be needed to contribute towards the realisation of the scheme(s). Where this happens I see no reason why developers will not require some 'payback' or special consideration and this appears to me to smack of corporate bribery, putting communities at risk of giving up something more precious than what they might receive.

To disagree with these spacial objectives is not possible. Such 'heavenly' objectives for the plan make agreement the only option, surely. In this section - it appears to be words and pipe dreams. However, one must begin somewhere........so.....I agree.
The problem with allowing expansion of boundaries could result in settlements merging together and ruining the countryside. These type of developments do not seem to be supported by the necessary infrastructure or services.

Uckfield is not a suitable town for vast expansion although some additional development could be supported. This is because it is a linear town with massive traffic problems and restricted car parking. The problem will be worse once the railway is reopened which is necessary if this level of development is to be sustained.

I have concerns about the plan, though I understand the reasoning behind much of it. My main concern is that a high density of housing will destroy the very character of the area, which causes people to want to come here. I do feel that every effort must be made to provide properly to protect wildlife, provide an adequate infrastructure for housing and services for the same, not forgetting the additional pressure on medical services, and transport. Housing should be built as far as possible to blend in with the surrounding established buildings. Not least there must be adequate provision of water, and reservoirs to meet the needs of such an increased population, in this area which is already liable to suffer from a water shortage. The plan has my limited support.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: 106131  
Mr McInnes  
East Hoathly with Halland Parish Council

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option  
Question 32b

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Villages and towns not served by railway stations should be allowed to grow organically to meet local needs only. The proposed new railway link should go ahead creating some new stations. 90% of new development should be either around towns with existing railway links or in large new settlements around new railway stations. The perfect example of an ideal development site would be Berwick with its good railway links and proximity to the A27. Also Wilmington Green Summer Hill and Lavender are regarded as other suitable locations for further development. These are the views of East Hoathly with Halland Parish Council and I have completed this online questionnaire on their behalf in my position as a councillor.

Consultee ID: 106132  
Mr Horton

Part of document: ☐ document  ☐ chapter  ☐ section  ☑ option  
Option 12c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Sympathetically built and designed houses along Burwash Road can sit comfortably within the landscape and can assist our District Council achieve their planning targets. Housing estates would hurt the environment but the Burwash Road with its access and amenities can easily support more housing.
Consultee ID: 106132

Mr Horton

Part of document: ☑ option
Option 12c

Section of Document:

Reason for comment:
We agree with developing the Burwash Road. As a land owner on the Burwash Road we feel that sensitively designed and constructed properties can blend with the existing landscape and can enhance the locality. We own land along the Burwash Road at its intersection with Swife Lane. Our land is crossed by a public right of way which creates a natural triangle of some 2 acres at the intersection of Burwash Road and Swife Lane. We would propose building upon this land and creating a fence along the natural cut off point of the foot path. Our property is serviced by mains water, gas and electricity and as such has the modern amenities to permit easy development. We would build using timber framed construction and in the traditional vernacular English style. We would use Border Oak (a well known developer who uses Oak frames to construct their elegant buildings - as featured on Channel 4s Grand Designs) to build and design housing in a traditional format that would complement the landscape and would 'sit' naturally in the area. The housing that we are proposing would be built in the traditional Sussex Style and would be made from Oak taken only from foresters that followed a re planting scheme - it would be an organic building taken from a renewable resource. The style and design of the housing would be in such a way as to blend with the landscape. From our property very few people would be disturbed or discomfited by our proposed scheme. We would be open to discussion as to how many buildings Wealden would like to site on our property and what size they should be. We are flexible as to whether the properties should be larger 5 bed houses or those of the 3 to 4 bedroom variety. We look forward to hearing from you after 13th August.

Option 16b

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
Most of this land is within the flood plan and I don't agree to any development North of the Polegate by-pass as this will split Polegate.

Consultee ID: Mr Brown
106134

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 16c

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
This area is part of the strategic gap between Hailsham and Polegate, any development would result in Polegate & Hailsham becoming an urban forest.
Option 18f

Reason for comment:
One of your better options.

Option 18h

Reason for comment:
This area is part of the strategic gap between Hailsham and Polegate, any development would result in Polegate & Hailsham becoming an urban forest.

Option 18j

Option 27c

Reason for comment:
Far better to upgrade Berwick station
Mr Brown

Agree

The A27 needs developing if Polegate and Eastbourne are going to attract big business, long overdue.

Ms Howard

Agree

Numbers of houses proposed to be built is far greater than the 8000 required in Wealden. Would it not have been reasonable to begin with more realistic and less alarmist figures? AONBs should be maintained - or what's the point in having them? Any additional housing should be in proportion to the size of existing communities.

Ms Howard

Agree

Renewable forms of energy are desirable to reduce CO2 emissions as long as 'pay back' considerations are met.
Consultee ID: ms howard

Part of document: \(\square\) document \(\square\) chapter \(\square\) section \(\checkmark\) option

Section of Document: Question 5c

Your View \(\checkmark\) Agree \(\square\) No opinion \(\square\) Disagree

Reason for comment:
May be possibilities for redrawing village boundaries to include some infill but this would tend to apply more to larger villages.

Consultee ID: ms howard

Part of document: \(\square\) document \(\square\) chapter \(\square\) section \(\checkmark\) option

Section of Document: Option 8d

Your View \(\square\) Agree \(\square\) No opinion \(\checkmark\) Disagree

Reason for comment:
Extraordinary high number of new homes proposed for Berwick area which would change the village of Berwick Station into a TOWN. This - or any similarly large settlement proposed - would be highly undemocratic if undertaken as very few people currently living in a rural environment would opt for such a transformation. A27 obviously cannot sustain any major increase in traffic and proposed Selmeston-Wilmington bypass would cut a swathe through unspoilt areas of Cuckmere Valley. Rail transport is already fully used at peak times. Most areas of Cuckmere Valley prone to flooding. Where are these 'folds' north of the Station where such large numbers of houses could be hidden?

Consultee ID: ms howard

Part of document: \(\square\) document \(\square\) chapter \(\square\) section \(\checkmark\) option

Section of Document: Site Allocation Thresholds

Your View \(\square\) Agree \(\square\) No opinion \(\checkmark\) Disagree

Reason for comment:
These figures sound reasonable but do not tally with the numbers of houses proposed.
Consultee ID: ms howard  
Consultee ID: 106135

Part of document: option
Section of Document: Option 18i

Reason for comment:
Wilmington Green site is far too close to the Downs and Long Man. Large number of new houses would add more and more traffic to already congested A27.

Consultee ID: ms howard  
Consultee ID: 106135

Part of document: option
Section of Document: Option 18i

Reason for comment:
Proposal for new settlement of up to 7000 new homes/houses would change a village into a town and lead to over-development of an already traffic-congested area, far too close to boundary of proposed S.Downs Nat Park. There may be room for some development but surely this should be in proportion to the existing size of the village at Berwick Station? This appears to be a highly undemocratic proposal.
Timescale for local consultation is far too short and falls in a holiday period, limiting time for local discussion. Internet responses are not practical for many people and so feedback may not be balanced across age and social groups.

Yes, as affordable housing.

Don't think this makes economic sense.

Question 31a

Section of Document:

Your View [ ] Agree [ ] No opinion [ ] Disagree
Reason for comment:

It is not possible to agree when the allocations for new housing are so 'draconian' as in current proposals.
Consultee ID: ms howard  
Agent ID: 106135

Part of document: □ document  □ chapter  □ section  ✔ option

Section of Document: Question 31b

Your View □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
Not a disagreement but a statement, again, that online responses are not practical for a great many people. AND it takes more than a ‘few minutes’! Your leaflet suggests phoning to discuss alternative ways of commenting but doesn’t actually invite written responses.

Consultee ID: mr Willis  
Agent ID: 106137

Part of document: □ document  ✔ chapter  □ section  □ option

Section of Document: Details of How to Comment

Your View ✔ Agree  □ No opinion  □ Disagree

Reason for comment:
I would agree to the development if done sympathetically to the environment on the north side of Polegate only. Provided also that a suitable infrastructure is also provided and most importantly, that the link from Cophall roundabout to the far west of Polegate i.e after Folkington Lane turning, is provided, thus removing long distance traffic and some local away from the present turnoff to the A27 at the western end of Polegate. On no account should any development take place at Hindlands or towards Willingdon, thus ensuring a natural break from Eastbourne.

Consultee ID: Ms Phitidis  
Agent ID: 106138

Part of document: □ document  □ chapter  □ section  ✔ option

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View □ Agree  □ No opinion  ✔ Disagree

Reason for comment:
The AONB should be protected from housing development. The areas has huge potential for renewable fuel source and should be sensitively used for that purpose, as well as recreation etc.

</tbody>
</table>

**Reason for comment:**
It's good to have work places as close to homes as possible - more sustainable that way, in terms of commuting, pollution, etc.

<td>Option 2b</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Reason for comment:**
New domestic housing should be built to a minimum standard of 3 Star as defined by The Code for Sustainable Homes with immediate effect, and this standard be raised by one star grade each year, reaching the maximum standard of 6 Star by 2012. Also, Wealden should have a target of CO2 reduction in all new buildings. Woking's target is 40%.

<td>Option 2b</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Reason for comment:**
All new domestic and commercial development should meet a requirement of generating AT LEAST 20% of its energy from renewable sources with immediate effect, and that this target be the subject of upward review after 3 years.

Section of Document: Option 3a

Your View  ☑ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
I think you would need to define what a 'realistic prospect' means. If I was satisfied that enough time and energy had been devoted to developing that site for employment use, and it was already brownfield, then I would agree, with the proviso that the development was a sustainable one, in all senses of the word.

Reason for comment:
What are the criteria? Whose are they? Do the communities get to set the criteria? If so, then yes, I agree.
Consultee ID: Ms Phitidis
106138

Part of document: Option 7d

Section of Document:

Reason for comment:
I don't think there can be a 'one-size fits all' for Wealden. I think where there is the need and the agreement of the communities, this is the starting point. I live in a rural area, so would vote for option A, as I don't want to see our villages lose their character and the countryside to become choked up with more traffic.

Consultee ID: Ms Phitidis
106138

Part of document: Site Allocation Thresholds

Reason for comment:
Agree to restrict - this doesn't mean it is impossible to change use, if deemed necessary for the best interests and sustainability of the village. Villages need to have services and shops - it is better environmentally and for the local economy. In years to come, this is going to become more and more important.

Consultee ID: Ms Phitidis
106138

Part of document: Question Ten

Reason for comment:
I don't think there can be a one-size fits all approach. For many villages and hamlets, 15 new houses in one spot would alter the character significantly. These decisions need to be more localised.
Consultee ID:    Ms Phitidis
106138
Part of document:  ☑ option
Option 19a

Section of Document:
Your View    ☑ Disagree

Reason for comment:
The development boundaries have little or no spare capacity in Forest Row. This level of increased development would severely compromise the character and sense of community of and in the village. We should concentrate on infilling where possible and be cautious to ensure that local services and amenities are not adversely affected. As a rule, development should only happen if the local economy can provide employment for residents.

Consultee ID:    Ms Phitidis
106138
Part of document:  ☑ option
Option 24a

Section of Document:
Your View    ☑ Agree

Reason for comment:
I think there should be a rethink about the type of housing we build, so that higher density doesn't mean less living space - developers these days squeeze people into tiny spaces - not sustainable! We should be looking at more flats with shared garden spaces. Higher density is more sustainable in terms of energy, use of space etc - just must'n'y be at the cost of people's sanity.

Part 5

Section of Document: Wealden’s Places

Your View ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
Rather than loose country-side, and to give the largest area for building I feel the site in Crowborough best suited to development is site 11d, South East of Crowborough between Alderbrook and Jarvis Brook. But I do feel a new ‘town’ is a much better solution to the main problem (apart from reducing the number of people coming into the country from Europe).

Part of document: ☑ option
Option 7d

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Option 8d

Reason for comment:
Artificial instant creation of "settlements" appears to me to be an attempt to fit a square peg into a round hole. Settlements evolve over hundreds of years and there are good reasons why place A is large, place B is small and place C is undeveloped. To ignore the lessons of centuries of history seems foolhardy. Furthermore section 4.20 states that such an approach is "not promoted" by central government and section 7.5 of the summary documents admits that there is "no requirement" for new settlements.

Option 9a

Reason for comment:
As stated in the question, no financially viable solution to poor traffic situation has been forthcoming. In addition to this there is little spare capacity at UCTC and no scope for the school to expand at its current site.

Option 14e

Reason for comment:
I think it should be stated explicitly that this scheme is a complete non-starter without the re-instatement of the Uckfield - Lewes railway link. Even if the railway were restored (currently a difference of opinion on the funding of the project between Wealden Line Campaign and Strategic Rail Authority to the tune of £50m) it is by no means certain that the stations previously served by the line would be re-opened given that the two main objectives of the campaign are to enable travel from Uckfield (and beyond) to Lewes (and beyond) and remove pressure from the London - Brighton line. I am also unclear as to exactly where the settlement would be. You refer to it as "Lavender New Settlement" suggesting that it would be to the north of the existing station heading towards Little Horsted. I don't see where there is room for a development of this magnitude (more than the 20 year requirement for the whole of the non-coastal Wealden region incidentally) without significant damage to the landscape ("set in rolling countryside" as your analysis notes) which I believe should be avoided wherever possible (would surely precipitate further expansion of Ridgewood to meet this development at the Little Horsted roundabout). It should also be noted that the River Uck runs close to the route of the old railway and flood risk should prevent much development here. Clarification on the exact site of the settlement is therefore welcomed. Isfield does require some additional services (scored 9 on the Village Services Matrix - not the highest but by no means the lowest) but I suspect there are better ways of providing these than a development of this scale especially as Isfield has not been identified as a Village with growth potential in the recent study (thus rendering it suitable for developments of 1-5 units!), surely an admission that this scheme is neither feasible, nor appropriate. Please also bear in mind the weaknesses of the road network in this part of the region (no plans to upgrade A22, A26 near capacity already, junction of A26 and Horsted Lane has little scope for improvement). Your analysis rightly describes this approach as "very high risk" and I would prefer WDC to adopt less fanciful strategies.

Reason for comment:
Far better to upgrade Berwick station !!!!!!!

Question Twenty Nine

Section of Document:  Housing Delivery
Your View  ☑ Agree  ☐ No opinion  ☑ Disagree
Reason for comment:
Consultee ID: MR BROWN
106150

Part of document: option

Section of Document: Infrastructure Requirements

Your View: Disagree

Reason for comment:
STRONGLY DISAGREE POLEGATE AND HAILSHAM WILL BE RUINED FOR EVER SHARE THE HOUSES EQUALLY ACROSS WEALDEN IT SEEMS AN ABSOLUTE JOKE WHY SOME VILLAGES GET 20 HOUSES AND WE TAKE THE BRUNT OF WEALDEN'S ALLOCATION SORT IT OUT WEALDEN !!!!

Consultee ID: Mr. Korth
106151

Part of document: option

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Agree

Reason for comment:
I would like our children to have a chance of living in this location. No development means this cannot happen.
Consultee ID: Mr. Korth
Agent ID: 106151

Option 2a

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

How will this target be met? Biomass is a great idea, BUT: where will the wood come from if it really takes off? Windmills: maximum 57% efficiency - what happens when there is no wind? Tidal: they say sea levels will rise - if this happens, huge capital tidal projects will be swamped. Much higher insulation standards must be implemented, & the use of solar tubes for water heating should be encouraged.

Consultee ID: Mr. Korth
Agent ID: 106151

Option 2b

Section of Document:

Your View □ Agree □ No opinion ☑ Disagree

Reason for comment:

See previous answer.

Consultee ID: Mr. Korth
Agent ID: 106151

Option 3a

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:

If the land has not already been snapped up, their is little likelihood that it would be of viable commercial value anyway.

Consultee ID: Mr. Korth
Agent ID: 106151

Option 3b

Section of Document:

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:

Yes. However, future changes should be allowed for.
Option 3d

Section of Document:

Reason for comment:
Totally market driven.

Option 5a

Section of Document:

Reason for comment:
If there is no space within the existing boundaries, how can we accommodate any new housing? Boundaries therefore need to be redrawn according to need.

Option 5b

Section of Document:

Option 6a

Section of Document:

Reason for comment:
Option 6b
Section of Document:
Your View   ☐ Agree   ☐ No opinion   ☑ Disagree
Reason for comment:
Consultee ID:    Mr.    Korth    Agent ID:
106151
Part of document:    ☐ document    ☐ chapter    ☐ section   ☑ option
Option 6c
Section of Document:

Consultee ID:    Mr.    Korth    Agent ID:
106151
Part of document:    ☐ document    ☐ chapter    ☐ section   ☑ option
Question 6d
Section of Document:
Your View   ☑ Agree   ☐ No opinion   ☐ Disagree
Reason for comment:
Defining distribution is incompatible with market economics. If a particular settlement has very few businesses or future demand, does this mean they should receive a smaller housing quota, even though the area lends itself to new housing? The converse is likely true elsewhere. As per a previous representation, this is a poor question.
Consultee ID:    Mr.    Korth    Agent ID:
106151
Part of document:    ☐ document    ☐ chapter    ☐ section   ☑ option
Option 7a
Section of Document:
Your View   ☐ Agree   ☐ No opinion   ☑ Disagree
Reason for comment:
public & private services are market driven & subject to change
Consultee ID: Mr. Korth

Part of document: Option 7b

Section of Document:

Reason for comment:
Presumably then the classification may change over time depending on growth?

Consultee ID: Mr. Korth

Part of document: Option 7d

Section of Document:

Reason for comment:
Strongly disagree! Again this is down to the market, although there are few people who would actually want to convert a shop into a house, as shops are generally sited in inadequate areas for housing (e.g. little privacy, incorrect layout, proximity to road etc.)

Consultee ID: Mr. Korth

Part of document: Option 19a

Section of Document:

Reason for comment:
There is a particularly acute housing shortage in Forest Row.

Consultee ID: Mr. Korth

Part of document: Option 19e

Section of Document:

Reason for comment:
Mr. Korth

Consultee ID: 106151

Part of document: Option 24a

Section of Document:

Your View: Disagree

Reason for comment:
Densities do not reflect architectural merit or need; rather arbitrary.

Consultee ID: 106151

Part of document: Option 24b

Section of Document:

Your View: Disagree

Reason for comment:
Sounds like inner city sprawl rather than rural clean living....

Consultee ID: 106151

Part of document: Option 24d

Section of Document:

Your View: Disagree

Reason for comment:

Consultee ID: 106151

Part of document: Option 25a

Section of Document:

Your View: Disagree

Reason for comment:
House building costs are not the problem, they are similar in all areas of the country - the cost of land to build on is prohibitive, due to the extreme limits applied to land release.
As soon as these 'affordable' homes have been bought, they will doubtless be sold on at vast profit, much like the recent council house sell-off.

Developers will find a way of profiting from this anyway, so it should be carried out separately.

Time here is of the essence. No doubt some developers will find ways round this though.

I totally agree with the sentiments of Alan Wishart’s representation, & would go further in stating that I do not believe Wealden's planning department to be of adequate calibre. There appears to be little consistency in the decision making process.
Consultee ID: Mr. Korth  
106151  
Part of document: ☑ option  
Question 31a  
Section of Document:  
Reason for comment:  
Some of the statements are nice, but sadly this smacks of corporate style mission statements...

Consultee ID: Mr. Korth  
106151  
Part of document: ☑ option  
Question 31b  
Section of Document:  
Reason for comment:  
I am afraid that I have found this consultation of little value. 'Affordable housing' is a great catch phrase, but short of turning Wealden into a socialist state, this is hardly likely to happen. The way the questions are posed is too generalised, often using targets & percentages which offer little relevance to reality. Direct democracy is a fine ideal, but if we are not careful, we will end up with a mish-mash of ideas that are unhelpful to most; the classic 'decide by comittee' result. I fear the Council is taking the PC route like so much else in Britain at the moment. Is it too much to ask for a bit of vision??

Consultee ID: Mr. Korth  
106151  
Part of document: ☑ option  
Question 32b  
Section of Document:  
Reason for comment:  
The scope of the question is too broad - some of the points I agree with, but others I do not.
Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
In order to meet future development needs JS Bloor would suggest that small scale development may be appropriate in the High Weald AONB to meet local housing needs, provided that development respects the high environmental and landscape value of this setting.

Option 2a

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
The Wealden Core strategy should reflect recent government guidance and the policies of the emerging South East Plan. JS Bloor suggest that Option 2a is therefore the most appropriate way forward.

Option 2b

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:
The Wealden Core strategy should reflect recent government guidance and the policies of the emerging South East Plan. JS Bloor suggest that Option 2a is therefore the most appropriate way forward.
Consultee ID: JS Bloor and Fairfield Partnership

Part of document: □ document □ chapter □ section ☑ option
Option 3a

Section of Document: 

Your View ☑ Agree □ No opinion □ Disagree

Reason for comment:
Bloor Homes would support policies that seek to bring forward housing and employment land together in line with current government guidance and emerging regional policy. The development of mixed use sites is supported as it enables many of the principles of PPS 1 Delivering Sustainable Development to be achieved. Housing and employment sites that are well related yet separate can also achieve similar sustainability benefits.

106152 JS Bloor Ltd (Newbury) and Fairfield Partnership  
102477 Terence O'Rourke

Part of document: □ document □ chapter □ section ✔ option

Section of Document: Option 4a

Your View □ Agree □ No opinion ✔ Disagree

Reason for comment:
There is a clear need for employment land in Hailsham and JS Bloor therefore supports options that deliver employment land to this area. Option 4d is therefore attractive. However, Bloor Homes reiterate the need for housing and employment land to be brought forward together to enable sustainability objectives to be maximised. Bloor Homes would propose Hailsham north is included as a strategic allocation at Option 4e as it has potential to enable the combined delivery of housing and employment land.

- [x] Disagree

**Reason for comment:**

There is a clear need for employment land in Hailsham and JS Bloor therefore supports options that deliver employment land to this area. Option 4d is therefore attractive. However, Bloor Homes reiterate the need for housing and employment land to be brought forward together to enable sustainability objectives to be maximised. Bloor Homes would propose Hailsham north is included as a strategic allocation at Option 4e as it has potential to enable the combined delivery of housing and employment land.

Bloor Homes would propose Hailsham north is included as a strategic allocation at Option 4e as it has potential to enable the combined delivery of housing and employment land.
In line with PPS1 and the delivery of sustainable development JS Bloor would support policies that seek to allocate the majority of growth to existing urban areas and sustainable urban extensions. JS Bloor is of the opinion that it would be wrong to specify percentages at this early stage particularly as the Strategic Housing Land Availability Assessment for the District has not yet been completed.

In line with PPS1 and the delivery of sustainable development JS Bloor would support policies that seek to allocate the majority of growth to existing urban areas and sustainable urban extensions. Bloor Homes would propose Hailsham north is included as a strategic allocation at Option 4e as it has potential to enable the combined delivery of housing and employment land.

Given the government’s growth agenda and the growth targets indicated in the draft South East Plan JS Bloor support Option 5a. Settlement boundaries are important to contain growth and enable the sustainable provision of services, however they must be sufficiently flexible to enable the implementation of the local and regional housing and employment targets.

In line with PPS1 and the delivery of sustainable development JS Bloor would support policies that seek to allocate the majority of growth to existing urban areas and sustainable urban extensions. JS Bloor is of the opinion that it would be wrong to specify percentages at this early stage particularly as the Strategic Housing Land Availability Assessment for the District has not yet been completed.

Reason for comment:
In line with PPS1 and the delivery of sustainable development JS Bloor would support policies that seek to allocate the majority of growth to existing urban areas and sustainable urban extensions. JS Bloor is of the opinion that it would be wrong to specify percentages at this early stage particularly as the Strategic Housing Land Availability Assessment for the District has not yet been completed.
Option 8b

Reason for comment:

All of these options present infrastructure challenges. The capacity of wastewater treatment works and the capacity of the A27 affect development at Hailsham and Polegate in particular. However, JS Bloor consider that these issues can be resolved with a collective effort on the part of WDC, ESCC, GOSE, SEERA, the EA, Southern Water, the Highways Agency and the development industry working together, and welcomes WDCs positive approach in seeking to take a lead in seeking innovative funding and programming solutions to this end. JS Bloor support Option 8a, which seeks to focus development on Hailsham. Development at Hailsham has the potential to minimise impacts on the A27 compared with Polegate, since traffic generation at Hailsham is likely to be dispersed across other parts of the road network. A Polegate focus would place more intense pressure on the A27, and might make a solution to A27 capacity issues more difficult to achieve. This view is supported by the Highways Authority, who in their representations to the infrastructure consultations (July 2007) to the Core Strategy acknowledge, (item 4), that development at Hailsham will have a lesser impact than any development at Polegate. It is noted that the Infrastructure Background Paper assessed the impact of housing development at Polegate as 2.5 times greater than at Hailsham. There are numerous references within the Background Papers and the Addendum that support and confirm this. A focus of development to the north of Hailsham will also help to address the problems associated with the A271 from Boship roundabout to Amberstone. Improvements to the A271 could be brought forward in tandem with new development on the northern fringes of the town, thereby potentially freeing much of this existing stretch of the A271 from much of its current traffic load, particularly in Lower Horsebridge, Upper Horsebridge Road and Hawkswood Road. This would bring considerable environmental benefits to existing communities. It may be possible to seek a balance of growth between the two towns (Option 8c) as a compromise, but Option 8a will always be better in terms of minimising pressure on the A27 and the prospect of achieving a workable solution to improvements to that trunk road. The concept of a new settlement, Option 8d, is likely to be in reality unsustainable in that it will require the development of a large area of greenfield land, creating serious new environmental, landscape, traffic, services and community issues, without providing the opportunity to solve existing problems.
JS Bloor agree that some villages do have the potential to grow. In particular the village of Lower Horsebridge has some growth potential given its accessible location and proximity to the town of Hailsham, and there may be the possibility to link growth at this village with a wider growth area to the north of Hailsham, incorporating improvements to the A271 and providing a sustainable solution to the growth of Hailsham. Whilst we are in agreement with the principles for settlement classification and settlement strategy advocated in 7a to 7d JS Bloor suggest it might be unwise to cap size limits on additional housing growth proposed in each settlement until completion of the Strategic Housing Land Availability Assessment.
All of these options present infrastructure challenges. The capacity of wastewater treatment works and the capacity of the A27 affect development at Hailsham and Polegate in particular. However, JS Bloor consider that these issues can be resolved with a collective effort on the part of WDC, ESCC, GOSE, SEERA, the EA, Southern Water, the Highways Agency and the development industry working together, and welcomes WDCs positive approach in seeking to take a lead in seeking innovative funding and programming solutions to this end. Reason for comment:

JS Bloor suggests that it would be inappropriate to comment on the above suggested size thresholds until the results of the Strategic Housing Land Availability Assessment is complete.
Bloor Homes support Option 15A which seeks to encourage new development in the form of an urban extension to North Hailsham. This option has the capacity to deliver approximately 890 – 1500 dwellings, enabling housing targets to be met without instigating capacity constraints. The assessment in the Issues and Options document shows that there are no significant landscape and biodiversity issues present in this area. This is not true for the other options around Hailsham, with Options 15b, c, d and e being in particularly sensitive locations with respect to the Pevensey Levels. Option 15f is located to the west of the A22 bypass and sits in what is effectively open countryside, making its status as a sustainable urban extension questionable. Large scale development at 15a could assist in providing relief for the existing A271 through the provision of new stretches of road and other improvements to alleviate problems. Such measures, together with proposed Hailsham Town Centre traffic management works, will help to address existing congestion problems in the town. JS Bloor are happy to work with WDC in assessing options for development in this area. They are confident that an acceptable solution exists to the A271 issue that does not result in unacceptable negative impacts on the Cuckmere Valley. JS Bloor have significant land interests in the North Hailsham area and are in close contact with adjacent landowners. They are therefore in a position to have confidence that a solution can be found. The attached plans show how new development might be implemented to the north of Hailsham. Option 1 is deliverable on land entirely within the control of JS Bloor and its partner, the Fairfield Partnership. Options 2 and 3 indicate the potential for further development on other land in the north Hailsham area. All the Hailsham growth options have significant transport infrastructure requirements, with proposals to the north and the east of the town requiring the resolution of issues relating to the A271. However north Hailsham is the only option that can deliver significant improvements to the A271 in association with development. Whilst on the evidence of the assessment in the Issues and Options paper all the other sites have considerable infrastructure problems relating to noise, odour, historic conservation, service provision, community service provision and environmental issues the development of land north of Hailsham (Option 15A) is located in an easily serviced area, free of over-riding constraints. JS Bloor would therefore strongly advocate the allocation of option 15A, north of Upper Horsebridge, as a growth location, and seek its inclusion as such in the forthcoming preferred options document.
Option 15b

Reason for comment:

Bloor Homes support Option 15A which seeks to encourage new development in the form of an urban extension to North Hailsham. This option has the capacity to deliver approximately 890 – 1500 dwellings, enabling housing targets to be met without instigating capacity constraints. **Reason for comment:**
JS Bloor would like to offer assurances that we are willing to work with WDC to together deliver a vision for North Hailsham that will deliver the spatial objectives set out for the town. We value the recent government focus on community participation, co-operation and implementation and are prepared to co-operate fully with the Council and work with them with respect to sustainability appraisal and consultation to ensure the delivery and implementation of a scheme at North Hailsham that is sustainable, viable, gains the support of the community and delivers wide ranging benefits to Hailsham town centre.

Question 15h

**Your View**
- [x] Agree
- [ ] No opinion
- [ ] Disagree

**Reason for comment:**
Bloor Homes are supportive of the stated Spatial Objectives for Hailsham, in particular the need to reduce congestion and the impact of traffic through the town centre and the need to improve the quality of entrances / approaches to the A22. We are also supportive of the need for a new park for the town, and for this park to be linked to the Cuckoo Trail. Option 15A for development to the north of Hailsham is best placed to provide such a facility with links to the Cuckoo Trail.
Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Consultee ID: JS Bloor and Fairfield Partnership
Agent ID: Miss Farquhar
106152 JS Bloor Ltd (Newbury) and Fairfield Partnership

Part of document: Option 18a

Section of Document:

Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:

JS Bloor object to the concept of a new settlement in Wealden District. None of the above sites are truly sustainable and a development strategy that focuses on a new settlement will fail to accord with the spatial objectives for Wealden. For example, the plan seeks to ensure the viability and economic regeneration of town centres, which currently require investment in services and infrastructure. Housing is required to fund major infrastructure investment and this would not be possible if the development of a new settlement is pursued. JS Bloor suggest that these options are not pursued and instead development options focus on the growth of existing urban areas, which can bring a greater and wider range of benefits to the communities of Wealden.

For example, the plan seeks to ensure the viability and economic regeneration of town centres, which currently require investment in services and infrastructure. Housing is required to fund major infrastructure investment and this would not be possible if the development of a new settlement is pursued. JS Bloor suggest that these options are not pursued and instead development options focus on the growth of existing urban areas, which can bring a greater and wider range of benefits to the communities of Wealden.

JS Bloor Homes support the inclusion of Lower Horsebridge, Option 23b as a village with growth potential. The village of Lower Horsebridge is well related to Hailsham and therefore is suitably positioned to help meet the growth needs of Hailsham. Lower Horsebridge is capable of housing capacity in excess of the Draft Settlement Strategy and is not restricted by environmental / landscape issues or access infrastructure investment that constrain the development of other Options. It is well placed to form part of a wider strategic growth area for North Hailsham.

### Section of Document:

**Reason for comment:**

The Housing Needs Survey 2005 indicates there is a clear need for affordable housing in the District. It also indicates that the level of affordable housing need varies across the District. JS Bloor are therefore of the opinion that setting a fixed percentage target would be wrong and that affordable housing is a settlement specific issue. We would advocate that affordable housing is dealt with on a site specific basis, dependant on current need at the time.

### Section of Document:

**Reason for comment:**

Whilst we support the government agenda to maximise the use of land and achieve higher densities JS Bloor is of the opinion that housing densities should be arrived at on a site specific basis and should be dependant on a proper analysis of each site. Some sites may naturally be able to accommodate higher densities whilst others may be constrained.
Option 24c

Reason for comment:
Whilst we support the government agenda to maximise the use of land and achieve higher densities JS Bloor is of the opinion that housing densities should be arrived at on a site specific basis and should be dependant on a proper analysis of each site. Some sites may naturally be able to accommodate higher densities whilst others may be constrained.

Option 24d

Reason for comment:
JS Bloor support the statement that higher densities should be permitted for locations accessible to public transport.

Option 27a

Reason for comment:
In line with PPS1 and PPG13 there is a clear need to encourage sustainable travel. JS Bloor therefore support the objectives of Option 27a to locate development where it might improve vitality of bus services to and from town. Development to the north of Hailsham will enable the release of funding of a Quality Bus link between Hailsham and Eastbourne.
Option 27b

Reason for comment:
JS Bloor doubt that the inclusion of the reinstatement of a Lewes / Uckfield / Turnbridge Wells train service should be a long term priority of the new plan. We would question the sustainability of developing sites along the rail route and whether this is the best use of resources. We would suggest resources would be better directed to improvements to the road network and bus links and that housing development is directed to existing urban areas or sustainable urban extensions to ensure the vitality of existing town centres, communities and services.

Option 27d

Reason for comment:
The dualling of the A27 will be likely to remain unacceptable so long as it impacts on the South Downs directly. A route which takes the dualling away from the South Downs will be likely to be longer and therefore more costly. Consideration should be given to whether a development strategy that focuses development at Hailsham might reduce the pressure on the A27 to the extent that dualling will not be necessary. Should dualling be necessary, then development at Hailsham might be called upon to help to fund a route away from the South Downs.

Option 27f

Reason for comment:
Agree in principle.
Option 28a

Reason for comment:
In line with PPG17 and the need for the provision of open space and leisure facilities to meet local need JS Bloor are supportive of options 28 a, b and c. The development of the North of Hailsham site would enable the development of an area of high quality of open space to meet the needs of new residents and those existing residents of Hailsham. In addition the sites location would enable the provision of an open space link to the Cuckoo Trail, meeting this strategic objective for Hailsham.

Option 28b

Reason for comment:
In line with PPG17 and the need for the provision of open space and leisure facilities to meet local need JS Bloor are supportive of options 28 a, b and c. The development of the North of Hailsham site would enable the development of an area of high quality of open space to meet the needs of new residents and those existing residents of Hailsham. In addition the sites location would enable the provision of an open space link to the Cuckoo Trail, meeting this strategic objective for Hailsham.

Option 28c

Reason for comment:
In line with PPG17 and the need for the provision of open space and leisure facilities to meet local need JS Bloor are supportive of options 28 a, b and c. The development of the North of Hailsham site would enable the development of an area of high quality of open space to meet the needs of new residents and those existing residents of Hailsham. In addition the sites location would enable the provision of an open space link to the Cuckoo Trail, meeting this strategic objective for Hailsham.
JS Bloor agree with most of the infrastructure requirements identified in the table with the exception as stated below. JS Bloor are aware that securing the delivery of infrastructure is a primary consideration of the Council and offer assurances of our will to work with the Council to ensure the delivery of infrastructure projects in North Hailsham. Bloor Homes would agree that the following infrastructure requirements, identified in Table 15 are necessary: - 30a West of Polegate A27 (T) improvements - 30b A27 (T) and A22 (T) Link or junction improvements (various options. - Hailsham North access road and / or Lower Dicker road links. - 30d New sewerage treatment works / long sea outfall serving Hailsham and Polegate. The delivery of these works underpin the spatial vision for Wealden and the growth strategy of the draft South East Plan. - 30h Hailsham Town Centre traffic management and streetscape enhancement scheme - Eastborne, Polegate and Hailsham bus quality corridor. - New GP surgeries primary care facilities in parts of the District - New primary schools and enlarged schools in several parts of the district. Development at North Hailsham would enable the release of funding for sustainable travel and community services. JS Bloor would be happy to discuss the Council’s requirements with regards to the educational and health provision and the scope for inclusion on the North Hailsham site. JS Bloor would object to the delivery of 30l Hailsham South access road as being unnecessary since development should focus at north Hailsham.

JS Bloor agree with most of the main themes of the Preliminary Spatial Vision for Wealden with the exception as stated below. Overall JS Bloor is supportive of the vision, in particular its emphasis on driving economic investment to the Eastbourne / Hailsham triangle and focussing growth on the most accessible and sustainable locations that most benefit the objectives set for that place. Hailsham North is a site that befits this description and developing this site will result in wide ranging benefits to the residents of Hailsham. We would however cast doubt on the appropriateness of reopening the Wealden Line and the impact of directing investment away from town centres and creating potentially unsustainable development along its route.

- [ ] Disagree

**Reason for comment:**

JS Bloor agree with most of the proposed local spatial objectives for Wealden identified in the vision with the exception of as stated below. JS Bloor are largely supportive of the proposed spatial objectives for Wealden. However we would caution the setting of specific targets in relation to the percentage of greenfield / brownfield land, housing densities without detailed site assessment and given the delivery constraints of many of the major sites in the District. JS Bloor is of the opinion that housing densities should be arrived at on a site specific basis and should be dependant on a proper analysis of each site. Some sites may naturally be able to accommodate higher densities whilst others may be constrained.

- [x] Disagree

**Reason for comment:**

We do not wish to comment on specific questions set out in the Issues and Options Consultations Paper, but we do want to express our concern about the general tone of paragraphs 6.28 - 6.34 dealing with 'Gypsies and Travellers Needs'. The way the text is framed (particularly at paragraphs 6.30 and 6.34) it seems to be all about what the Council is required to do by law, the conditions needed to enable successful evictions to occur and the need to protect the environment and local amenities, rather than a genuine attempt to address and meet the accommodation and other needs of this marginalised and socially excluded minority ethnic community. The one question you pose under this section - as to whether sites should be concentrated in the north of the District or distributed throughout the District - is one that should be addressed primarily to the travelling communities themselves. The location of existing sites or stopping places is not in itself evidence of where the need is greatest since Gypsies and Travellers will inevitably go to locations where they are less likely to face eviction rather than locations where they would choose to be if sites were provided. It is dangerous to draw conclusions on the basis of existing patterns of travel and stopping places since these patterns may be seriously distorted by the lack of appropriate sites.

Reason for comment:
AONB's are precisely that, and should be maintained. Once you allow "some development" within them, it sets a precedent for further development.

Consultee ID: Mrs Golby
Agent ID: 106157
Part of document: Option 2a
Section of Document:
Your View □ Agree □ No opinion □ Disagree
Reason for comment:
It is not enough to ask people to save energy. We must set limits on the amount that we use, especially when we "know" that so much is wasted. Setting a target of at least 10% will ensure that the issues are considered seriously and encourage new technological innovation and solutions.

Consultee ID: Mrs Golby
Agent ID: 106157
Part of document: Option 3a
Section of Document:
Your View □ Agree □ No opinion □ Disagree
Reason for comment:
There is nothing to be gained from leaving this land idle. However, more should be done to attract business into the area to provide local employment, otherwise commuting to other towns is inevitable.
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Your View: Agree

Reason for comment:
There will be locations within the Area that can support limited and appropriate development.

Section of Document: Option 21b

Your View: Disagree

Reason for comment:
The proposal, which I understand is in addition to the Grampian site, would mean a 400% increase in the village size. The original proposal for 140 homes at Grampian was refused by Wealden for many reasons but one was the adverse burden the additional dwellings would place on Uckfield, within months of that decision the proposal appears to be for 100 homes at Grampian and up to 400 more. It is not clear exactly where the proposed developments would be. One site at "West of Oakliegh" was the subject of a planning inquiry and was deemed totally unsuitable for development by the Inspector, the Secretary of State agreed and refused development. To the untrained eye there is no more land available within FAD. If the Grampian site goes ahead (which I support) it will virtually double the size of FAD and that is enough. It is essential for the character of the village that it does not be allowed to be joined to Uckfield by creeping urbanisation from the south.

Section of Document: Option 25c

Your View: Disagree

Reason for comment:
It seems illogical to have a higher percentage of affordable homes in locations that have fewer local facilities.

Option 18i

Section of Document:

Your View  ☐ Agree  ☐ No opinion  ☑️ Disagree

Reason for comment:
The countryside, particularly that in the view of the South Downs, National Park, AONB, or near conservation areas, should be preserved and no large scale development permitted. Wilmington green is a sensitive environmental area and the proposed sites at wilmington and Berwick are clearly visible from the Downs. The immediate area of the proposed site at Wilmington Green is steeped in history, with both national landmarks and historical buildings. Housing development should be managed by extending existing urban areas and not by building on greenfield sites. There are some brownfield sites available but development on these areas should not sprawl into the greenfield area. Planning policies could be more flexible in future to allow for expansion by existing inhabitants, development of single residential units by infilling, using garden/domestic land, conversion of farm buildings and outbuildings or by replacing existing buildings. This approach would meet the limited "needs of South Downs villages" and preserve village life. There is insufficient local employment for the occupiers of the planned dwellings. If the development is for commuters then the high cost of rail travel will mean that occupiers or the new settlement will choose to travel by car instead. This will result in increased traffic using the already congested A27. any future improvements made to carry the volume of traffic will further erode the countryside. Increased traffic will use the C120 as a "cut through" to the north. These lanes are narrow and twisty. Cars have difficulty passing along most of the route. There are several blind and dangerous bends. Speeding traffic is already a problem with cars frequently leaving the road and tyre marks where there has been heavy braking. There will be an impact on local services and hospitals where closure of wards and provision of services is currently under threat. Currently there is no capacity to supply water to the number of proposed dwellings. There is no mains sweagerage, drainage and no mains gas supply within the region. the general impact on the environment, increased pollution, light pollution and survival of wildlife should be observe dna potential sites of SSI taken into consideration.

Part of document:  
Option 20b  
Section of Document:  
Reason for comment:  
Wadhurst has already suffered from additional housing. The infrastructure is unable to cope. Village life is being eroded and vandalism is increasing. If further housing is added, it will turn this village into a small town - but without the necessary facilities. People who moved here to enjoy rural life will move away. It is wrong to build in areas of natural beauty. Far better to build in the existing towns and then concentrate the resources for additional infrastructure there. This would enable better use of those finite resources.
Consultee ID: Mrs Cave

Section of Document: Glossary

Reason for comment:
I agree that limited affordable housing needs to be provided. However, I think it should be centred on the more urban areas. To build additional housing in rural areas would destroy the very reasons why this area is so valued. In addition road and rail provision in the area is very limited, if you wish to travel from west to east or vice versa. Additional housing in rural areas will add to road traffic (as public transport is so limited) on an already stretched road infrastructure. The answer is not to build more roads (which will go against environmental issues) but to build the housing in areas where the roads and rail systems exist.

Agent ID: 106163

Part of document: ☑ document ☐ chapter ☐ section ☐ option

Section of Document: Core Strategy - Issues and Options Consultation Paper

Reason for comment:
Whilst I accept and would whole heartedly support affordable housing on a small scale for local residents, housing on the scale that the Consultation paper suggests is possible, would be unacceptable. The recently published Government White Paper “Planning for a Sustainable Future” urges planners to utilise existing agricultural buildings and other brown field sites in an effort to minimise development impact on the countryside. The white paper also suggests the need for urban and inner city rejuvenation. Not new settlements in a countryside that is already struggling to cope with the numbers wishing to live there or to utilise the infrastructure.

Question One

Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
Provided ‘development’ is sympathetic to the surroundings and is provided for the betterment of the community. Infill to existing towns would seem more sensible. Emphasis on retaining communities through shared ownership schemes aimed at those with ties to the area who can’t ordinarily afford housing in that area should be considered.
Consultee ID: mr cox
Agent ID: 106166

Part of document: □ document □ chapter □ section ✓ option
Option 16f

Section of Document:

Reason for comment:
With proposal for such a large development the impact on the local infrastructure is enormous, mainly road congestion, Schools, GPs, Dental practices, Rail links and hospitals. Road congestion: The A2270 has already reached its capacity, at peak times the traffic can be backed up from the top of Polegate high street all the way along the A2270 back to junction of Huggets Lanes. If the intended proposal to build 1,600-2,650 dwellings went ahead then on average assuming each house has two cars then the added congestion could be around anything from 1600 to 5300 extra cars using the A2270. This would bring the area to a virtual stand still and thus making this proposal inconceivable.

Schools: The proposal mentions possibly building a new secondary school but what about Primary schools? In the local area we have 2 Primary Schools, does the proposal assumes that all the people taking up residence at this proposed site will not have child between the ages of 4 and 11 years of age. I believe this will create a greater strain on our already crowed local schools.

GPs: The local GP’s are already struggling to cope with the numbers of existing patients. The report already highlights that this location would not be suitable for a new GP practice, which will be required to take the large number of residences being proposed. Dental practices: There is a shortage of dental practices in the local area and nothing has been proposed to take this into account. Rail links: I commute between Polegate and Croydon and the trains are already filled to capacity when they leave Polegate station. With the addition of so many house in the area this can only add to the already over crowding on the trains as some people who would buy these dwelling would look to commute to work by rail. Hospitals: The local DGH is already struggling to meet the existing residences with such large developments proposed within the local area what plans are there to improve the local hospitals to help meet these large numbers of new residence.

Consultee ID: mr hill

Part of document: □ document □ chapter □ section ✓ option
Option 2b

Section of Document:

Reason for comment:
Strongly agree. All options need to be considered going forward.
Consultee ID: mr hill

Part of document: Option 8b

Section of Document:
Reason for comment:
Need to maintain gap between Polegate and Eastbourne

Consultee ID: mr hill

Part of document: Option 8c

Section of Document:
Reason for comment:
North of Polegate seems most sustainable for development

Consultee ID: mr hill

Part of document: Option 24a

Section of Document:
Reason for comment:

Consultee ID: mr hill

Part of document: Option 24b

Section of Document:
Reason for comment:
30 pha is surely the maximum. If greenbelt land has to be used then so be it - people need to live somewhere.
Option 25b

Section of Document: Agent ID:

Your View

Reason for comment:
Affordable housing should be spread around - not concentrated in specific areas. Some people seem more bothered about diversity in animals than humans

Part of document: Part 7

Section of Document: Making it Happen - Implementation

Your View

Reason for comment:
It is essential that when approving a planning application, the developer is fully agreeable to any infrastructure improvements that are required. Also, a time limit between approval and commencement of development (say, 6 months) needs to be imposed to prevent landbanking

Question Twenty Nine

Section of Document: Housing Delivery

Your View

Reason for comment:
It is absurd that builders can tactically delay building, in order to maximize profit. If WDC approve a P.A. then a start date has to be rigourously enforced. WDC have the power to approve/refuse P.A's so should have the power to insist on a speedy build. 3-6 months seems appropriate
Reason for comment:
The High Weald area is a varied and diffuse one; limited, sensitively-located and sympathetically-planned development should not have a significantly detrimental impact.

Reason for comment:
Maintaining adequate energy supplies is a major and growing concern.

Agent ID:  

Part of document:  
☐ document  ☐ chapter  ☐ section  ☑ option  
Option 4b  

Section of Document:  

Your View  ☐ Agree  ☐ No opinion  ☑ Disagree  

Reason for comment:  
Again this is open country
Part of Document: □ document  □ chapter  □ section  ✔ option
Option 4c

Reason for comment:
This area is bounded by the A27 and existing development and so seems a better candidate for further development than either of the two previous options

Part of Document: □ document  □ chapter  □ section  ✔ option
Option 4d

Reason for comment:
Yes but with the proviso that only the area east of the A22 is developed, not the open country to the west.

Part of Document: □ document  □ chapter  □ section  ✔ option
Option 5a

Reason for comment:
This effectively means that settlement boundaries will not be maintained!

Part of Document: □ document  □ chapter  □ section  ✔ option
Option 5b

Reason for comment:
This seems to me a better approach.

Question 5c

Section of Document:

Your View ☐ Agree ☐ No opinion ☑ Disagree

Reason for comment:
There is no option here for retaining boundaries full stop.

---

Consultee ID: Mrs Tipler
Agent ID:

Part of document: ☐ document ☐ chapter ☐ section ☑ option
Option 6a

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:
Development within villages should take place with regard to planning applications from existing inhabitants - ie for extending properties or building within boundaries of existing properties to accommodate family members. This would keep the community of a village alive. Development of new properties in settlements in rural areas would be unacceptable.

Reason for comment:
This is a greenfield site, would need new road access, a27 would be unable to cope with new traffic generated, creates urban sprawl leading to further infill development.
Consultee ID: Mrs Tipler  
106170

Part of document:  
☑ option

Section of Document:

Option 18i

Reason for comment:
The existing road (A27) would be unable to cope with the extra traffic generated by such a settlement leading to unacceptable new road building. Infill developments would occur between Polegate and Wilmington generating even more traffic. A new railway station at Wilmington may take some of the newly generated traffic from the A27, but the inevitable further expansion towards Polegate would negate this benefit. This development would create a negative visual impact from the South Downs AONB. The Village of Wilmington would be destroyed, which has historical value, not least of all the Long Man hillside figure.

Consultee ID: Mrs Tipler  
106170

Part of document:  
☑ option

Section of Document:

Option 18i

Reason for comment:
The existing road (A27) would be unable to cope with extra traffic generated by such a development so would lead to unacceptable road building within area, negative visual impact from AONB of South Downs, would lead to infill developments between Polegate and Wilmington causing further expansion and more traffic, would destroy the Village of Wilmington which has historical interest, not least of all The Long Man hillside figure.

Consultee ID: Mrs Tipler  
106170

Part of document:  
☑ option

Section of Document:

Option 18j

Reason for comment:
Existing A27 would be unable to cope with new traffic generated thus leading to unacceptable new road building. Brownfield sites within existing boundaries could be developed, and planning priority given to applications for expansion from existing inhabitants. Large densities of new builds must be avoided in small villages otherwise these villages WILL be destroyed and become towns. The future impact of large developments must be considered - they will lead to further development and sprawl increasing traffic.
Reason for comment:
The publicity concerning the contents of this paper was practically non-existent - we heard about these proposed developments, which would have a direct impact upon us, by word of mouth. The related documents are far too long for a casual glance. Also the timescale for comments is far too limited and over a holiday period when meetings and local consultations are very difficult to arrange. The number of comments I have seen on any of the proposals so far are so low that it is obviously not being viewed by a sufficient representation of the affected areas. I do hope that further consultations will take place before any decisions are made.

Reason for comment:
New developments should ONLY be made in areas where good public transport already exists or where provision will be made for new public transport links. Developments should no be made in areas where new road building would be necessary to cope with the extra traffic generated.

Reason for comment:
### Option 25g

**Reason for comment:**
I agree that re-instatement of the line should be a priority but not under the proviso of large scale developments to aid funding.

### Option 26b

**Reason for comment:**
If this would encourage more people to switch to using the railway rather than the A27, this could only be of benefit to Wealden as a whole.
Option 27d

Reason for comment:
This stretch of road does not need dualling, nor does a new dual carriageway need to be built. Building of a new stretch of road here would be accompanied by development on land between the 2 roads leading to more traffic in the area negating any congestion / travel time benefits. The main reason usually cited for dualling / re-building this stretch of road is to improve safety but this would immediately be improved by enforced speed restriction and improved junctions, especially at Wilmington and Selemston.

Mr GUNNER

Reason for comment:
I STRONGLY SUPPORT 2.6 allowing small scale development to meet local needs. 2.8 - which provides for the needs of quiet recreation and the enhancement of the landscape. Helps provide funds for the Management Plan Objectives. 2.17 Helps maintain & enhance biodiversity and habitat connectivity. 2.18 Helps the DC to fulfil its duty to promote nature conservation. and provides sensitively located and designed development to help meet targets in the East Sussex Biodiversity Action Plan. 2.46 Conserve Coppiced Areas for Biofuels. 2.47 Provides microgeneration of renewable sources. 2.48 By small scale woodburning power to provide a new economic source for coppicing.
Option 2b

Reason for comment:
suggests communal heating systems are included in schemes of 10 or more developments.

Option 18j

Section of Document:

Your View   ☐ Agree  ☐ No opinion  ☑ Disagree

Reason for comment:

I strongly oppose the Wealden proposal that Berwick might be a good site for a ‘new town’ of 7000 houses. It is not possible to meet the government's new housing targets in isolation without considering the wider impact on the existing community and the environment. The 1998 Wealden local plan paragraph 14.5 stated that 'there are major landscape and environmental constraints affecting further outward expansion of Hailsham' which would ‘intrude into the open countryside and conflict with the strategy policy of maintaining the existing countryside’. 14.7 'the council’s strategy for the town involves striking a balance between the demands for new housing, the need to improve local employment opportunities, and the protection of the environment'. The 2004 Neighbourhood statistics for 015D - www.statistics.gov.uk showed that there were very few "barriers to housing" in this area. Most of the family housing in the Wealden area is already affordable and there is a good choice available on the market. In fact there were 52 pages of houses in the local paper this week. So what actually is the problem? Is the aim to attract new people to the area or to cater for the existing population? The national birth rate is decreasing so where will the disproportionate 10,000% increase in population in Berwick come from? Do we know that this number of people would want to move to Berwick anyway? Where do they currently work? If the buildings were to be erected would outsiders buy the affordable property and either let it or sell it later for an increased price, as happened in Sovereign Harbour and Newhaven? Berwick is a village. It is a site of ecological and archeological importance, as mentioned by previous correspondents, and it is also historically significant providing respite to visitors who appreciate the rural environment, working farms and vineyards. Part of the magic of Berwick is its literary connections; tourists are attracted by this and the charming setting and remote feel of Berwick is an essential ingredient.

Your View: Disagree

Reason for comment:
I would like to register my protest to a large housing development on Hindsland and Mornings Mill Farm. If a thousand or so houses are built on this area it would most likely see an increase of at least 2000 cars on the already congested roads in this area, also tons of extra rubbish to be collected. This is also an area of low rainfall and with so many more people using water it would put an extra strain on water resources, fortunately for us in this area the heavy rainfall this summer has helped to fill the reservoirs and build up our water supplies. To keep building more and more houses and covering the fields in concrete is not in my opinion the way to "save the planet" as we are urged to do daily. The planners can create large housing developments but are not looking at the long term effects on the environment i.e. Dr Beeching closed a good part of the railway system to save money, now we have motorways cutting through the countryside carrying huge juggernauts which also drive through small villages ruining roads which are having to be constantly repaired. The building in the sixties of high-rise flats was not a good idea and are now being pulled down. They have become ideal places for crime and drugs not the ideal place to live. We now have parking meters on Butts Brow and along the roads to Beachy Head, places of outstanding beauty, but are no longer free. I feel that in the not too distant future we will have theme parks to show future generations what fields and trees were like, also sheep and cattle who grazed on green pastures. I could quote many more examples of planners not looking further than the next development or what seemed like a good idea at the time! Hindsland and Mornings Mill Farm is the last green area before Eastbourne. Please leave some countryside for people to enjoy free of charge.

(See ODPM Planning Policy Statement 1: Delivering Sustainable Development: page 8, paragraph 16. “Plan policies should…take into account the needs of all the community, including particular requirements relating to…religion…”)
There appears to be no reference to policy on places of worship in the core strategy and it is unclear where else to raise this issue in the consultation paper. It is requested that provision for places of worship be included in the Core Strategy in line with government guidelines (see below). This representation is made in order to establish a framework in land use planning policy that provides a basis upon which sites suitable for construction of places of worship may be obtained.

OPDM Diversity and Equality in Planning Page 11, paragraph 1: Planning should aim to improve the lives of the widest cross-section of society. Society today is made up of diverse individuals of varying ... faiths.

Page 37, 3.7.1 The CEHR will also deal with equality issues relating to discrimination on the grounds of ... faith and belief. The CEHR will work with other standard-setting agencies and inspectorates to ensure that public service providers comply with equalities and human rights legislation and take an integrated approach towards adopting good equalities and human rights practices. Page 88, Box - "Good Practice Points: Effective Community Engagement." 1. Links should be made with relevant Council departments and other Councils, regeneration initiatives, local and national voluntary sector agencies, Planning Aid, local community meeting places including places of worship, local universities, developers, etc. Planners don't always have to start from scratch and do everything themselves and should make good use of existing activities, information sources and groups - including local access groups. This also helps to deliver an integrated service. Page 158, "Leicester: Monitoring of Planning Applications" Places of worship: The planning department took a proactive approach helping with site searches. The approach was structured, with the issuing of registration forms and checking the financial viability of groups. This promoted a greater understanding of the issues, in particular the need for a local facility to serve particular faith communities. Planning policy was amended to permit the consideration of the development of places of worship on sites that had previously been reserved for employment uses. Postgraduate student research exploring housing aspirations of Asian families highlighted the importance of being located near a place of worship. Key Lessons A proactive and professional approach to planning applications and siting of places of worship gave confidence in the planning system to the community, promoting trust.
Commission on Environment and Development in 1987: "development that meets the needs of the present without compromising the ability of future generations to meet their own needs." 3.15 The Government has set out four aims for sustainable development in its strategy: A Better Quality of Life, a Strategy for Sustainable Development in the UK. Aims are: i. social progress which recognises the needs of everyone;... The South East Plan Page 231, 11. Reason for comment:

Further comments on the proposal to build on Downlands Farm & Budletts Common Summary:
Downlands Farm and Budletts Common represent important parts of a highly biodiverse habitat jigsaw complex including SNCIs, an SSSI, nature reserves, an ancient common, a designated salmonid stream, ancient woodland, unimproved ancient grassland, wetlands, lower Cretaceous rock outcrops, lowland heath and ghyll (gill) valleys that run across the North of Uckfield between Isfield, Maresfield and Buxted. Most of these habitats have statutory recommendations to be avoided when planning new buildings, and some have national & international protection. The site can be seen from two designated Areas of Outstanding Natural Beauty, and is not contiguous with any previous development, and no other buildings can be seen from most of the site. For these reasons please DISAGREE with any application to develop in this area. Furthermore, put pressure on owners to allow public access. Detail: · The rocks, water, plants and animals of Downlands Farm, Budletts Common and Lake Wood are of exceptional quality and should be conserved for perpetuity (Robinson & Williams 1984; Stenning 1995; Stenning in prep.). · The High Weald Area of Outstanding Natural Beauty and the Downlands Farm/Budletts Common complex rest on massive Lower Cretaceous sandstone ridges, and many outcrops of this rock occur at Uckfield (Robinson & Williams 1984). · The southern boundary of these ridges extends in a line from the villages Fletching to Blackboys, and through the town of Uckfield. However, the boundary of the AONB circumnavigates the Northern boundary of Uckfield and is about 2 kilometres from Budletts Common (Robinson & Williams 1984 & Local Plan 1988). · The area contained within this semi-circle contains most of the features of the AONB (CA letter 25.4.2001), and all the habitats and designations listed above. · The Countryside Agency, now part of Natural England confirmed in correspondence with Uckfield Town Council that the area contained many features of the HWAONB (CA letter 25.4.2001). · Key species occupying the proposed site include great crested newts, dormice and badgers, all of which have statutory protection (Wildlife & Countryside Act 1981; Protection of Badgers Act 1992). Notable birds recorded include wood warbler, lesser spotted woodpecker, common sandpiper, turtle dove. · The imposition of housing and industrial/social activity into this habitat complex will result in initial limited destruction of ancient woodland, wetland and lowland heath, but also progressive habitat degradation and eventual species extinction, including those with statutory protection (see submission from S.O.C.S). · The landscape has profound historic value, being largely unchanged since the Tythe Maps of 1841. Extant woodland has probably existed here since the last ice age 10,000 years ago. · The hydrology of the site is such that it is the purity and extent of the spring water yielded from the bedrock that supports the extraordinary biodiversity of the site and surrounding area (S.O.C. submission, Stenning [species list] in prep.). · In agreement with the Woodland Trust and Sussex Wildlife Trust submissions, to the WDC consultation. The measures proposed by the developer would not be sufficient to adequately protect the landscape, habitats (listed above), living organisms and geological features of the site. · The hydrology of this site is too complex and sensitive to sustain the imposition of housing and industrial activity. · The developers ES (8.60 p. 13) seeks to render the flow through the ghylls artificial. This would result in undermining the natural historical and wild nature of these ancient features which is against the Water Framework Directive (2000/60/EC). Will overburden an already stretched resource in Medical, Hospital, Traffic, Water, Sewerage and as well as take away the green fields and replace them with concrete which will lose them forever. It will not provide affordable housing as the only people who will benefit will be the developers, not the local communities who they are over burdening in the name of monetary gain. If the government wants to regenerate areas why dont they regenerate the north like they did wales when the steel and coal mines closed. Pay people to open businesses and provide work and training in the north, instead of trying to cram the whole population into the south east of the country.

Would like to think that the council will be taking notice of the views of the people who have to live in the area, not government ministers who have not any knowledge of local needs or problems - merely sit in their offices telling the councils who are responsible to the local people what to do. Local Issues should be decided locally not by central Government offices.

Part of document:  ☐ document  ☐ chapter  ☐ section  ☑ option
Option 9c

Section of Document:

Your View  ☑ Agree  ☐ No opinion  ☐ Disagree

Reason for comment:
This location is not suitable as it would be highly intrusive in the landscape, breaching a significant visual horizon and exposing the urban area of Uckfield to a wide tract of previously unaffected countryside. In landscape terms, any development here would cause unacceptable harm to the rural setting of Uckfield and Maresfield and the visual quality, continuity and rural character of the surrounding countryside. The proposed site is clearly visible from 2 AONBS (South Downs and Ashdown Forest). The proposed area would result in the unacceptable loss of ancient woodland and wetland habitats and lead to the unacceptable fragmentation, isolation and disturbance of natural habits that support protected wildlife species and other flora and fauna of acknowledged nature conservation importance. The site supports a number of European protected species together with a range of other species protected by UK legislation and supports priority species listed in the UK Biodiversity Action Plan, together with other bird species of nature conservation concern.

Agent ID: 102478
Mr Thompson
Mayfield and Five Ashes Parish Council

Part of document: □ document □ chapter □ section ✔ option
Option 20c

Section of Document:

Your View ✔ Agree □ No opinion □ Disagree

Reason for comment:
Subject to additional primary care provision, new village hall, improved transport links and enhanced schooling provision. Needs for general infrastructure improvements. Use of other private school facilities. Car Parking and ensuring safe lanes. Maintenance of shopping. Improvement in leisure facilities. Improvement in Rights Of Way and walking opportunities. Transport of shoppers to village. WE NEED TO BE SURE THAT DEVELOPMENT SINCE 2006 ARE COUNTED IN THE TOTAL. Lesser roads rather then the ‘A’ roads will take the impact of housing.

Reason for comment:  

Consultee ID:        Butler        Agent ID:
106194

Part of document: □ document  □ chapter  □ section  ✔ option
Option 13a

Section of Document:  

Your View  □ Agree  □ No opinion  ✔ Disagree

Reason for comment:  
The village of Frant is already growing in size with affordable housing and large properties finding their way through what was thought to be a safe planning control but, sadly, we are now threatened with further development of 500 houses if not in the centre of the village it will still affect the infrastructure and ANOB. The nearest town, Tunbridge Wells in Kent, too close for safety at 3 miles apart, has been trying unsuccessfully to absorb the village within its own boundaries and the more we have built in and around the village will give it (Tunbridge Wells) the excuse to achieve its deals.
The whole area is susceptible to flooding, as is shown today by the extensive rainfall and the subsequent flooding that concerns me. In other words, there are no options available for building in this area because of the risk of flooding.

Worth considering area 15f to the west of AA22, except for the fact that it is impinging on another area of outstanding natural beauty.

Worth considering area 15f to the west of AA22, except for the fact that it is impinging on another area of outstanding natural beauty.

Consultee ID: 106199 Mr & Mrs Edwards

Part of document: □ document  □ chapter  □ section  ✔ option
Option 28c

Section of Document:

Your View  ✔ Agree  □ No opinion  □ Disagree
Reason for comment:
2] The fields between the road and Arlington reservoir provide a virtually uninterrupted view to the South Downs and The Long Man of Wilmington, and the proposed National Park. Its open nature would mean that any extensive housing development would alter that character of that area and impact on the National Park. 3] Water drainage from the old brickworks is taken up by these fields; during heavy rain the lower fields allow the run off to make its way to the Cuckmere. Following heavy rain there is as much as a foot of water lying on the fields. 4] Arlington provides a seasonal habitat for migratory birds, the flight path for many being over the village. Concerns related to the transmission of 'Bird Flu' whilst the potential risk might be small, is certainly enough to warrant acknowledgment with any planning consideration in areas where wild fowl are prominent.
Option 18j

Reason for comment:
1) Berwick station has developed along the line of the road, its existing infrastructure does not support the proposed size of the development. Whilst the brick works are indeed a brown field site, the Cuckmere Brickworks were closed in approximately 1956 and since then the site has reverted to a natural state, with the remnants of the brickworks and clay pits covered with overgrowth. This environment is now a home for Nightingales/owls and other bird, animal species.

Option 2b

Reason for comment:
We agree that 20% should be the minimum requirement as more and more energy has to be imported rather than created in the UK.

<td>A further comment on paragraph 2.41. We think that the existing conservation area in Maresfield should be reviewed and extended to include Park Farm House, Park Farm Barn and Park Farm Oast around the green at Park Farm. Any extension of the conservation area should also include Park Farm land south of the church across to the green at Park Farm.</td>

</tbody>
</table>
Option 6a

Reason for comment:
Developments in and around towns will encourage more retail business leading to more jobs leading to less commuting and either no or shorter car journeys. This will particularly help people on low incomes as they will be nearer to employment, town facilities and health services.

Question 6d

Reason for comment:
We favour one new settlement in the Low Weald and then 80% of the remaining requirement to be focussed in and around towns.

Option 7a

Reason for comment:
However the classification of the village services must reflect the current situation and not be based on out of date statistics (as has happened previously) and providing infrastructure can cope with the increased demands.
Reason for comment:
The growth potential should be based firstly on the established needs of the village and the ability of the existing services to support and sustain the growth.

Reason for comment:
Subject to the criteria in 7a and 7b.

Reason for comment:
We favour one new settlement large enough to bring self sufficient services and infrastructure.
Option 9c

Reason for comment:

Whilst 30+ may be acceptable for towns, the minimum for villages should be lowered to around 10.

Option 14a

Reason for comment:

Development here would lead to a coalescence closing the Uckfield/Maresfield gap and an increase in north and east bound traffic on the A22 causing further traffic problems for both Maresfield and Nutley residents.

Option 14b

Reason for comment:

This would inevitably lead to increased traffic onto to A22 and increase through traffic using Maresfield village as a rat run which would be totally unacceptable to Maresfield.

Reason for comment:
Reason for comment:
Reason for comment:
Reason for comment:

Too close to the flood plain for housing.
As long as Uckfield’s boundaries do not extend and embrace the villages of Maresfield, Five Ash Down and Buxted.
We favour one new settlement area but have insufficient knowledge to favour a specific area.
Because traffic routes, particularly from Buxted and Five Ash Down, converge on Maresfield we suggest these village potential growths be reviewed simultaneously in order to provide a cohesive traffic strategy.

Core Strategy Issue and Options Consultation 2007 - Summary of Consultation Responses

Page 1660 of 6217
However we consider a figure of over 300 homes excessive. Any quota of houses should include the 80 houses already given outline planning permission on Park Farm land. If the Maresfield option is pursued we suggest that full consideration should be given to the advantages of full implementation versus add on phased implementation. We believe that the scale of development should be determined not by arbitrarily imposed figures but by a figure which would provide maximum reciprocal benefits for the village in line with the objectives of the Maresfield Conservation Group which have already been submitted to WDC.

On the contrary they should be located in towns where services, transport and retail job opportunities are provided.

Question Twenty Nine

Section of Document: Housing Delivery

Reason for comment:

Question Thirty

Section of Document: Infrastructure Requirements

Reason for comment:

30i With further housing in Maresfield, Nutley and Five Ash Down it is clear that increased local GP provision is required. 30q Flood relief scheme is essential. The impact of the whole Plan on the A22 needs to be fully assessed.

Question 31a

Reason for comment:
Consultee ID: Mr Kennard Agent ID: 106203
Part of document: Option 3d
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View: Agree
Reason for comment: There should be no new development within the AONB

Consultee ID: Mr Kennard Agent ID: 106203
Part of document: Option 2b
Section of Document: Settlements in the High Weald Area of Outstanding Natural Beauty
Your View: Agree
Reason for comment: With new-build housing, as much energy as possible should be generated from renewable sources. Electricity generating solar roof tiles are ever improving and using solar energy to heat water is very efficient. It would be relatively inexpensive to install underground tanks on a large scale to collect "grey water" for the use of toilet flushing etc.

1,000 more dwellings could lead to 2,000 more cars using Western Road, which is already overcrowded, with cars double parked and on pavements. Whitehill also suffers from congestion. It is unlikely that public transport would be improved as a result of development.

Part of document: Option 21b
Section of Document:
Your View ☑ Agree ☐ No opinion ☐ Disagree
Reason for comment:

Intensive development would put great pressure on the present infrastructure and I think that more services would need to be put in place to deal with the influx of need, for example, places in the school, GP surgery, cars using the already congested High Street, etc. To me, this indicates the need for development to be more fairly distributed, at the same time endeavouring to maintain the character of existing villages. Last, but certainly not least, is the beauty of the area and increase risk to flooding.
Consultee ID: Mr Fothergill

Part of document: ☑ chapter

Section of Document: Details of How to Comment

Reason for comment:
I fully appreciate that Wealden is legally obliged to create this development strategy, and it is an estimable body of work. However in one word I can sum up the future of this region over the next 20 years 'countryCIDE', if these plans come to fruition. I do not support these national govt housing requirements at all, and seriously dispute the building requirements which SEERA wishes to impose on this region. SEERA itself is an unaccountable, unelected profligate talking shop set up by Mr Prescott to inflict the Govt's housing figures on us. There should be NO MORE green field building in this region, only brownfield. The south east is overpopulated and bursting at the seams, our woeful infrastructure groans under the weight of it all and the govt is hardly likely to invest in additional provisions to support it's massive building schemes. The only building that should take place is modest pockets of truly affordable dwellings for LOCAL people attached to existing settlements. No way do I support a massive new town at Berwick right on the border of an AONB that so many people have campaigned for. I do not support large scale expansion of towns such as Polegate, Heathfield and Uckfield, or any development that will lead to a coalescing of existing towns and villages and will result in the semi rural environment and tranquility of the region being destroyed for future generations, these are the very features that make Wealden such an attractive place to live in, work in and visit. As for making provisions for 'travellers' please tell us what provision they make for the rest of us apart from the dreadful mess they leave behind?. I have noted from examining the responses from the 2002-2006 consultation that the vast majority of parish councils, environmental groups and concerned individuals reject these housing figures as excessive, and it is highly telling that only the developers and consultancies who took part supported them. In conclusion I request that Wealden council as guardian of the countryside in one of the most pleasant of English regions has the courage to tell national Govt 'sorry but we are full up'.

Consultee ID: Mr Butler

Part of document: ☑ option

Section of Document: Option 8d

Reason for comment:
The proposal to build a new settlement at Berwick Station or Wilmington would make no logical sense at all. Apart from the destruction of an extremely important and beautiful landscape, there is no existing infrastructure in either location, the roads from Berwick Staion are inadequate for any further traffic, there is no easy access north or south, whilst the A27 is already overcrowded and exceedingly dangerous, whilst the presence of a railway station is a complete red herring, as there is no evidence that people would actually use it. If a new settlement needs to be created to alleviate a housing shortfall, and I am not convinced that this is the best way to resolve this problem, then the ideal location would be along and to the north of the A22 at Lower Dicker, where there is good road access, and existing infrastructure already in place, whilst the farmland is low grade and it will not have any significant impact on the broader landscape.
Option 18d

Reason for comment:
This seems a sensible option. There are good existing road links and communications routes both east-west and north-south. There is substantial existing infrastructure already in place, and this provides a good opportunity to tidy up and infill this rather shabby area of low grade agricultural land, groups of houses and industrial units.

Option 18e

Reason for comment:
This seems a sensible option. There are good existing road links and communications routes both east-west and north-south. There is substantial existing infrastructure already in place, and this provides a good opportunity to tidy up and infill this rather shabby area of low grade agricultural land, groups of houses and industrial units.

Option 18f

Reason for comment:
This seems a sensible option. There are good existing road links and communications routes both east-west and north-south. There is substantial existing infrastructure already in place, and this provides a good opportunity to tidy up and infill this rather shabby area of low grade agricultural land, groups of houses and industrial units.
Any proposed development of this scale will have an enormous negative impact on the area, and landscape, and consequently its main source of income which is from tourism. The Long Man hill figure is of national importance, and this proposed development would seriously impact on its landscape. A recent intervisibility survey has shown that the area from Selmeston through to Wilmington is clearly within the intended landscape of the Long Man, with the importance of the outward looking view from the Long Man being as important as seeing the Long Man from these places.
Option 18j

Section of Document:

Reason for comment:

This proposal goes against all previous statements and policies made by WDC about the character and setting of Berwick Station in relation to planning issues. There is no existing infrastructure to support such a settlement, the roads (including the A27) are insufficient to support the existing traffic, let alone a new development. The railway station is too small and has few car parking spaces, but cannot be extended as it is surrounded by the existing houses. Furthermore your own document states that the presence of a station would not reduce the numbers commuting by car. The drainage is inadequate and there is a very high water table, any development would lead to severe flooding problems, hints of which we see everyday it rains heavily already. Berwick Station is in a unique setting at the northern entrance to the Cuckmere valley, any development on the scale proposed would affect the views from and into the adjacent proposed South Downs National Park, and would have a profound negative effect on tourism to the area. A new town is not the best way of dealing with the requirement for new housing in WD, it will bring little employment, and create social and other problems, whilst not actually providing housing at the place it is actually wanted. The adjacent Arlington Reservoir is a SSSI and there are other important ecological habitats around the village, the destruction of which or the imposition of housing around them will have a major detrimental effect on these. The misdesignated brownfield site of the 19th century brickworks close to Berwick Station is an important ecological habitat for over 20 species of bird including rare nightingales, woodcock, owls and woodpeckers; there are also badgers and glow worms, together with possible crested newts here. Furthermore, the site is an important industrial archaeological site, along with the other brickworks further north, and after all is the reason for Berwick Station being here in the first place. There are also many other important archaeological sites at Berwick Station. Roman roads cross here and there is a probable Roman settlement located in the village centre, along with another one near Arlington, and another was found when the reservoir was built. It is likely that there are a number of Roman villas within the local area adjacent to these roads. There have also been a number of finds of prehistoric date, which indicate that this area is rich in archaeological sites. The location of the village to the Long Man is also important, a recent intervisibility survey has shown that the area from Selmeston through to Wilmington is clearly within the intended landscape of the Long Man, with the importance of the outward view from the Long Man being as important as seeing the Long Man from these places. This policy is fundamentally flawed and must not be allowed to proceed.
Option 18j

Section of Document:
Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
In Berwick there is no existing infrastructure to support such a settlement, roads insufficient to support the existing traffic. Railway station is too small. There would be an increase in light pollution. Drainage in area is inadequate. An adjacent SSSI and other important ecological features. Archeological sites are also present. There would be a negative impact on tourism. Full details of the comments, reside within the letter itself.

Question 18k

Reason for comment:
This document has been released without any publicity and consequently few people are aware of its existence. There has been almost no opportunity for public consultation because of this, and therefore any proposals which go forward will be based on an essentially undemocratic basis. Any proposal to build on greenfield sites to the north of the Downs will have a very serious negative impact on the region. Destruction of this unique landscape, and its associated wildlife habitats and open farmed countryside will have a serious impact on the ecology and will only increase pollution due to the increased housing and traffic, at a time when we are supposed to be reducing pollution.

Option 15d

Section of Document:
Your View  □ Agree  □ No opinion  ✓ Disagree

Reason for comment:
I believe the proposed development to the South of where I live bordering the flood plain area would be a disaster and ruin the environs of where I live. Such development would require substantial infrastructure that would change the rural nature of where I live and would be extremely detrimental to where I live.
Consultee ID: Lemman

Reason for comment:
Yet another odious step in the 'LondOnification' of our once green and pleasant county.

Consultee ID: Mrs Brown

Part of document: option

Section of Document: Question 11f

Your View: Disagree

Reason for comment:
I am very concerned about the traffic impact on Green Lane if the housing development goes ahead. Green Lane is very busy with school children and the lorries which now use the lane as a cut thru (through) to the industrial estate - it is an accident waiting to happen. It will make Green Lane a very dangerous road.

Part of document: □ document □ chapter ✔ section □ option

Section of Document: Infrastructure and Phasing

Reason for comment:
Infrastructure should be in place before any building whatsoever. (even though out North of Watford Gap). Providing decent roads are in place and bypasses with access to small villages.

Consultee ID: Mrs Scott Agent ID: 106215

Part of document: □ document □ chapter □ section ✔ option

Section of Document: Option 18j

Reason for comment:
It seems disproportionate to propose up to 7000 houses for one location. Many local people would be happy to see some houses built at Berwick in proportion to the number of existing houses and in line with the number being built in other similar settlements. Going for one large development such as this is, in the words of the consultation document, 'high risk'. Although apparently an easy option, in that just one decision looks like largely solving the housing problem, there would be many difficulties involved with such a large development, including the need for significant new infrastructure. On this topic, Berwick seems to have been singled out due to its rail infrastructure, but the background document itself acknowledges that few of the journeys generated by any new settlement would be undertaken by rail. The choice of Berwick Station therefore seems in fact to be arbitrary and cynical - spin not substance. Since few jobs will be local, this settlement would lock most residents into car journeys in a way that conflicts with other local and national government policy on sustainable transport and climate change. Finally, the proximity of Berwick Station to the new national park, the boundary of which may come up as far as the station itself, raises further serious questions about the impact of such a large new development in this nationally recognised area of outstanding beauty.

Consultee ID: Houston Agent ID: 106217

Part of document: □ document □ chapter □ section ✔ option

Section of Document: Option 3d

Reason for comment:
The eastbourne-hailsham triangle is an area of relatively high unemployment, so where are all these people going to work?
Reason for comment:
We are being asked to consider proposals to address Wealden’s Spatial Challenge and the council has provided a single success criterion for evaluation in this section: the choice of “the best broad locations for new development so that they add to, rather than detract from the best valued characteristics of individual towns and villages”. Under this proposal the current village would amount to less than 1% of the new town – those best valued characteristics would inevitably be destroyed. It’s unclear how the interests of Wealden residents would be served by such a large single settlement anyway. Wouldn’t it make sense for residents to at least have the option to live near relatives rather than ensuring that they will need to get into their cars to visit them? Apart from the unnecessary risk involved in the gamble of trying to manufacture a healthy community from scratch, the council’s resort to using the inappropriate brownfield designation as an excuse for destroying a rare ecological site is cynical and disappointing. The several hundred bird watchers, who visit the reservoir each year, and hikers who walk through on the Vanguard Way or other country paths, lend character to the village. Berwick is one of the few places in the country where it’s possible to spot the osprey. Large scale development would jeopardise all this and diminish the richness and diversity of what the county has to offer forever.

Reason for comment:
More appreciation should be given to the value of the farming and farming related employment in Wealden, and not writing it of as 'in decline'. As you say, the land of the High Weald is already much neglected and unused. The Low Weald however is still on the whole being farmed well and should be getting more protection from urban development. Our own and EU politicians are belatedly waking up to the fact that we are rapidly running short of land area to feed ourselves so we should not be even thinking of new villages on this land. Encourage the present high rate of working from home that we already have in our villages by allowing small scale sympathetic development. Oversized development as opposed to natural growth leads to dormitory housing and more commuting. Wealden Council have a duty towards their present electorate, not to incomers.
Consultee ID: Mr Coleman  
106223

Option 8d

Section of Document: 
Your View ☑ Disagree

Reason for comment:
Yet again planners see the Low Weald as fair game in spite of the fact that most of it is still attractive and productive farmland, unlike the neglected acres of the High Weald. Are these planners aware that Europe's grain reserves this year are slashed to almost nothing and demand is still rising. The area between the A22 and A27 from Dicker Common to Berwick is designated by the CPRE as a 'Tranquil Area'. East Sussex has a disgracefully low Tranquility score of -4.9. Any development encroaching on this is to be deplored. The country lanes in this area which, being comparatively level, are well used by horses and cyclists, would become dangerous rat runs.

Consultee ID: Mr Coleman  
106223

Option 18a

Section of Document: 
Your View ☑ Disagree

Reason for comment:
This is not low grade agricultural land, as said by another. The EU is taking a long term view of Europe's failing ability to feed its population over the next century and there are directives against any further permanent loss of agricultural land. Food mountains are now a thing of the past and this year our grain reserves are Zero and demand is rising. Large scale development away from the existing towns will further erode our CPRE mapped areas of Tranquility and further lower our already disgracefully low score of -4.9. Our country lanes, already becoming race tracks, will become unusable for cyclists, pedestrians, horseriders, livestock. A new village will, and can only be, a dormitory with associated plague of commuters. Wealdens electorate need small scale housing developments to meet the local needs of the local people, not incomers from other parts of Sussex or further afield. It has been noted that many of the consultees in favour appear to be or work for estate agents-surprise.
### Option 18b

**Consultee ID:** 106223

### Option 18c

**Consultee ID:** 106223  
Mr Coleman

**Reason for comment:**
It would destroy an existing successful community and several agricultural related businesses that bring in hundreds of thousands of pounds to the area and employ many people, and some of the few remaining Wealden small-scale livestock farms which are just the sort that we should encourage as they play such an important part in sustaining the environment. There is more to Golden Cross than the A22. The field pattern is still much the same as shown on the 1817 enclosure act map. Being mainly down to late mown grasses this is a rich hunting ground for Little owls, Barn owls, and bats, has many colonies of great-crested newts and water voles, and is home to rare marsh fritillaries. The consultants appear to use a ratio of 'height of hill: beauty'. This is a basic flaw which shows an immature aesthetic sense as this gently undulating landscape of cattle grazing small fields bounded by ancient hedges with the backdrop of the South Downs in the distance is far more attractive than the scruffy hillier ground to the North, or the vast arable fields of the Southern AONB. They do not seem to have carried out a proper landscape character assessment as required by the Countryside Agency. Those fields of grazing cattle alongside the A22 provide a valuable visual amenity and focus for the several dozen houses that overlook them. Transport is very poor. Existing villages provide a high proportion of work from home having developed in sympathy with their surroundings. A new village could not possibly do this and would be a dormitory. Any large development on Dicker Common between the A22 and A27 would be unnecessary encroachment into what is mapped by CPRE as a 'Tranquil Area', a designation soon to have statutory status. East Sussex already has a disgracefully low Tranquillity score.

Reason for comment:
This is not low grade agricultural land. The EU is taking a long term view of Europe's failing ability to feed its population over the next century and there are directives against any further permanent loss of agricultural land. Food mountains are now a thing of the past and this year our grain reserves are zero and demand is rising. Large scale development away from the existing towns will further erode our CPRE mapped areas of Tranquility and further lower our already disgracefully low score of -4.9. Our country lanes, already becoming race tracks, will become unusable for cyclists, pedestrians, horseriders, livestock. A new village will, and can only be, a dormitory with associated plague of commuters. Wealden's electorate need small scale housing developments to meet the local needs of the local people, not incomers from other parts of Sussex or further afield. It has been noted that many of the consultees in favour appear to be or work for estate agents-surprise.
Wealden Council has a duty to its own electorate, not to the incomers who would be housed in this new dormitory town. The surrounding country lanes would no longer be of any use for the large numbers of cyclists and horse riders that use them for recreation. Yet more of the CPRE mapped 'Tranquil area' would be lost which is something that East Sussex, with its low Tranquility score of -4.9, can ill afford.

Yet again planners see the Low Weald as fair game in spite of the fact that most of it is still attractive and productive farmland, unlike the neglected acres of the High Weald. Are these planners aware that Europe's grain reserves this year are slashed to almost nothing and demand is still rising. The A22 has already reached saturation point and Any development that will lead to increased traffic must be avoided.

Necessary as unfortunately the planning system has allowed the rural stock of affordable houses to be turned into oversized unaffordable mansions and so damaged the social fabric of many of our villages.
Option 27d

Section of Document:

Your View  ☑  Agree  ☐  No opinion  ☐  Disagree

Reason for comment:
To re-route the A27 north of Arlington Reservoir would widen the transport corridor yet further and deeper into the Low Weald Area of Tranquility as mapped by CPRE. In addition valuable farmland would be lost at a time when politicians are at last waking up to the fact that we will soon be short of land area for food. This year Europe’s grain reserves are zero and demand is still rising. The saving in journey times would be just minutes. There is, and could be more, capacity on the railway. The problems caused by commuters need to be solved more imaginatively than just building roads for yet more of them.

Part 1

Section of Document:  Context

Your View  ☑  Agree  ☐  No opinion  ☐  Disagree

Reason for comment:
I am hoping that the views of Wealden residents will be taken very seriously.

Part 2

Section of Document:  Wealden's Landscape

Your View  ☑  Agree  ☐  No opinion  ☐  Disagree

Reason for comment:
Necessary though to preserve as much of our natural landscape as is possible, preserving natural habitats, etc.
Question One

Settlements in the High Weald Area of Outstanding Natural Beauty

Reason for comment:
Prefer to avoid building on AONB for the time being and make use of available land in urban areas.

Reason for comment:
There may be appropriate areas, preferably local consultation for deciding which. Possibly some small scale developments if they are appropriately designed or, e.g. eco-developments, but should be strictly controlled so that no other development occurs.

Reason for comment:
If not on new land.

Reason for comment:
Should meet at least 10%, preferably 50% - should consider renewable energy projects (wind, etc) that are already happening in other parts of the country;

Your View ☑ Agree

Reason for comment:
If it would provide employment for local residents and thus stop unnecessary commuting, stop needless car journeys, etc.
Option 5a

Reason for comment:

if really necessary, but after further local consultation.

Option 5b

Reason for comment:

If done sensibly.

Question 5c

Reason for comment:

Allocations of land should not be allowed to be broken up into smaller plots & thus enabling developers to by-pass affordable housing obligations. There must be scope for new types of housing that take into consideration our concerns about climate change; much higher minimum building requirements, eco-villages on a small scale, for example.

Question 6d

Reason for comment:

Keep to the existing ratio as far as possible, or according to how much additional development can be managed with existing infrastructure; if development is too large, the 'centre of gravity' of a community is destroyed.

If we keep on changing the boundaries of villages and towns it will never end and we soon be losing our indentititng and space to live our lives. we end up on each other laps keep the boundaries.

The land around Willingdon and Eastbourne is open country and acts as a flood plain with all the recent rain we be having, so if this land see any development there is a risk of flooding in the area because where would the extra water go.
Hindsland and Morning Mill farm are the last open countryside before Eastbourne. To develop here will been a real same for many reasons:

1) Road A2270 At the best of times this road gets congested and building more houses means more cars at least 2000 that could lead to total grid lock along that stretch. There is no other means of widening that piece of road as it could lead to number of accidents.

2) Schools Yes there is properly a need to have a other secondary school in the area if more houses are built but not everyone will have children that move here have school children of 11 years and above, to take the places at the school. What about families that have children at primary age where would they go, at the moment Willingdon school is over subscribe meaning the younger children are left without an education that won't do.

3) GPS The GPs in the area are already struggling to cope with the numbers of patients and they say the appose area for development is not suitable to put another GPs surgery in, so where would the extra people go when they are ill when EGH is also struggling with the numbers of patients.

4) Dental This is also the same problems as the GPs where as a nation there is a storage of trained dentist.

5) Rail links My husband commuted from Polegate to Croydon, and the trains were already filled to capacity when they leave Polegate station. with the additional houses in the area this can only add to already overcrowded trains.

6) Hindsland This was part of Brighton uni. playing fields. I agree this land should again be part of play fields for the local people and visitors young and old as there are lack of sports grounds in the local area. This place could be where the young youths could hangout and be off the streets of Polegate and Willingdon. The young youths could help to rebuild and reshape the land to learn new skills along with the designers, craftsmen and the builders, to rebuild trust among the generations of today.
The Council has outlined the economic profile of Wealden District and asked, in Question 4, questions about the future of employment land. An area of search is identified on land west of Hailsham. We believe that the Arlington Stadium site and the surrounding area could contribute very well to the employment provision of the district and provide business units in a range of sizes and tenures that would readily reflect the economic profile of the district. Arlington Stadium is a brownfield site, already in employment generating uses, attracting huge numbers of car-borne visitors. The site has very good road links to the A22 at Hailsham and pedestrian, cycle and public transport links can be improved with the suitable infrastructure contributions. Although the site is currently divorced from Hailsham, transport links can be improved with the correct infrastructure provision. We feel that employment land should be focussed on brownfield sites and that a flexible approach to provision should be taken. Housing provision certainly needs to be balanced with employment provision, to enable travel to work patterns to become more locally based and hence sustainable. For this reason, and for those outlined below, some flexible working environments such Live-Work units and adaptable spaces should be considered on this site in addition to normal business units. In addition, we note that the areas of Lower Dicker and Berwick, for example, are potential areas of search for a new settlement. In order to balance employment and housing land to improve sustainable transport patterns, the Arlington Stadium site could readily be incorporated within a wider area of search for a new settlement. This would enable the site to provide a mix of uses in conjunction with a new settlement; both employment and housing, in conjunction with a new settlement in the area. This would tie in with the discussed alternative A27/A22 link road, which could travel north of the existing A27 and north of Arlington Reservoir (paragraph 6.7.5). Such a link would only be viable in conjunction with significant development in these areas. A wider area of search for a new settlement encompassing Arlington Stadium, would take advantage of a potential realignment of the A27 and the resulting infrastructure provision accompanying large scale development. The site lies within the Eastbourne/Hailsham triangle, which is noted for its poor economic performance. With adaptable provision that reflects the economic profile of the area, the site could raise the profile and prosperity of the area. Whereas the Polegate area lies largely in the visual envelope of the Area of Outstanding Natural Beauty and is constrained by the A27/A22 junction questions, the area west of Hailsham is visually contained and unconstrained by landscape designations. There is some ancient woodland in the area, but this are protected and could benefit from improved management/access and the creation of landscape and wildlife corridors as a result. The Issues and Options paper also highlights noise pollution from the Stadium as a constraint on development. This would of course be removed if the car racing function ceased and employment generating uses, or a mix of uses, were considered in this area. A wider area of search for housing and employment land within a new settlement, incorporating the Stadium and the surrounding area would enable a suitable balance between homes and businesses to promote sustainable travel to work patterns. The proximity of Hailsham, with the range of services etc within the 5m (at 40mph) travelling distance advocated in the draft settlement strategy, would further enhance the areas suitability for development.
Reason for comment:

The non-statutory plan included a policy that we believe should be included in the Core Strategy. Policy DC18 of the non-statutory plan covers the subdivision and conversion of larger properties, whether they are large single dwellings, institutional sites or hotels for example, subject to normal planning considerations. These considerations include proof that it is the only means of preserving the building, that the integrity of the building (and grounds) are maintained, the scale, design etc are appropriate and that amenities of neighbours is not harmed. We note that such sites are often well integrated with the rural character and generated a good deal of traffic and/or other activity. Such a policy would be sustainable on the basis that it uses a brownfield site, represents a good use of existing resources and can allow for the inclusion of measures to reduce energy/water use. Given that we believe that more housing is required in rural areas, this would contribute to that provision, as such sites become redundant for their original uses. Such a policy could read as follows: "In the countryside, the subdivision or conversion of larger properties and institutional buildings into smaller units will be permitted if the following is met: • The conversion to residential use is the only practical means of re-using the building, and • The character and the integrity of the building and its grounds is maintained, and • Extension and alteration of the building is complementary to the original in terms of scale, design, materials, and • Traffic generation and parking are properly managed, and • There is no harm to residential amenities." This proposed policy is more generic and might be included within a ‘generic policy’ Development Plan Document. However if Wealden Council, alongside any saved policies, includes generic policies in their Core Strategy, we would support its inclusion.

Reason for comment:

Settlement boundary changes in East Hoathly, in the area east of South Road south of the existing development boundary, should be considered favourably. East Hoathly, for reasons set out in section 21f, should be considered as an area suitable for development and infilling.
Chiddingly is noted as a village that is not a service centre and hence has limited potential for growth. Having examined the matrices that inform the classification of villages, we note a number of inconsistencies that show Chiddingly as a location that does not satisfy the criteria for growth potential. Proposed amendments to the matrices are as follows: 1. The petrol filling station at Golden Cross is within a 5 minute drive of the village and provides not only petrol but acts as a convenience store for the village. 2. The Pub, the Six Bells, is a significant facility for the village providing not only a public house but is also a significant employer. The village is credited with a total of 10 services. However the actual number is higher; 12 if you count the role played by the petrol filling station at Golden Cross and greater if the role of the Pub is taken into account. Chiddingly has, with Ripe, has a population exceeding 100, a convenience store at Golden Cross, a pub, a village hall, a church and a primary school. The village therefore could be designated as a smaller service centre. The village has a strong focus as a village despite not being within a development boundary in the adopted Local Plan. The main part of the village, centred around the Six Bells public house and the church, has a strong identity and focus. The village has a significant housing need in relation to the population size, if one examines the identified households from the Rural Housing Survey and those on the Housing needs register. We have in other representations, argued the case for a rural bias to housing provision and the need to reduce the site size threshold to below that of 15 dwellings. This would enable villages such as Chiddingly to accommodate small scale developments to address some housing and infrastructure needs without harming its particular rural character. Due to its status in the Draft Settlement Strategy, Chiddingly has not been credited with growth potential. It falls within those villages and parishes that ‘do not satisfy the criteria for any of the growth categories.’ Some villages identified as smaller service centres (Alfriston, Pevensey etc) have been rejected for growth potential due to significant environmental constraints. Chiddingly has no such environmental constraints. The village is not at risk of flooding (a small watercourse flows between the village and Muddles Green but the risk of flooding does not extend to either settlement.) The village lies on gently undulating low weald undesignated landscape. There are expansion opportunities in the village and it meets accessibility criteria. For the above reasons Chiddingly should be re-designated as a smaller service centre with some small scale growth potential. Some infill and/or small scale housing sites may be suitable. Such development could provide affordable housing, support for local services and generate public transport improvements. This could be achieved with the imposition of a settlement boundary that allows a small amount of infill, or a small housing site within the village.
Question 6 asks about the rural/urban split for housing development. The question asks whether 80%, 75% or 70% of the housing requirement should be focussed in towns, with the remainder in villages. It has formerly been noted that unlike the national population, the population in Wealden is 50% in towns and 50% in villages. The population in Wealden is significantly more rural-based than the national average. Local Development Frameworks are charged with being locally specific and relevant to the particular nature and characteristics of the area, This being the case, we believe the Council should consider a greater proportion of the housing requirement should be based in villages. Small scale growth in villages which are within accessible range of shops, services and employment opportunities would be more sustainable than edge of town developments, where the accessibility to the centre is not necessarily better. In addition, growth in villages will often give greater opportunity for the creation of facilities and improved alternative transport links and hence a more sustainable community. A proportion of 60% or less would be more appropriate to Wealden District.

Reason for comment:

Question ten in the Issues and Options paper asks for views about the site thresholds. It is recognised that larger site threshold will tend to generate higher infrastructure provision and affordable housing. However regard must be had to land ownership boundaries and the subsequent impact on deliverability, as well as the need to have regard to the character of an area. In villages a site threshold of 15 dwellings is mooted. However it is important that smaller sites are not discounted on the question of size alone, as these may prove suitable and deliverable, providing much needed housing in small settlements where ability to accommodate growth is not as great. I believe that site size should not be limited to 15 or over, but that smaller sites should be accommodated both within settlement boundaries and as land allocations.
The comments below were added also to the section 4d (Hailsham/Eastbourne Triangle) In retrospect it may be preferable to place the comment in this location. The Council has outlined the economic profile of Wealden District and asked, in Question 3, questions about the future of employment land. An area of search is identified on land west of Hailsham. We believe that the Arlington Stadium site and the surrounding area could contribute very well to the employment provision of the district and provide business units in a range of sizes and tenures that would readily reflect the economic profile of the district. Arlington Stadium is a brownfield site, already in employment generating uses, attracting huge numbers of car-borne visitors. The site has very good road links to the A22 at Hailsham and pedestrian, cycle and public transport links can be improved with the suitable infrastructure contributions. Although the site is currently divorced from Hailsham, transport links can be improved with the correct infrastructure provision. We feel that employment land should be focussed on brownfield sites and that a flexible approach to provision should be taken. Housing provision certainly needs to be balanced with employment provision, to enable travel to work patterns to become more locally based and hence sustainable. For this reason, and for those outlined below, some flexible working environments such Live-Work units and adaptable spaces should be considered on this site in addition to normal business units. In addition, we note that the areas of Lower Dicker and Berwick, for example, are potential areas of search for a new settlement. In order to balance employment and housing land to improve sustainable transport patterns, the Arlington Stadium site could readily be incorporated within a wider area of search for a new settlement. This would enable the site to provide a mix of uses in conjunction with a new settlement, both employment and housing, in conjunction with a new settlement in the area. This would tie in with the discussed alternative A27/A22 link road, which could travel north of the existing A27 and north of Arlington Reservoir (paragraph 6.7.5). Such a link would only be viable in conjunction with significant development in these areas. A wider area of search for a new settlement encompassing Arlington Stadium, would take advantage of a potential realignment of the A27 and the resulting infrastructure provision accompanying large scale development. The site lies within the Eastbourne/Hailsham triangle, which is noted for its poor economic performance. With adaptable provision that reflects the economic profile of the area, the site could raise the profile and prosperity of the area. Whereas the Polegate area lies largely in the visual envelope of the Area of Outstanding Natural Beauty and is constrained by the A27/A22 junction questions, the area west of Hailsham is visually contained and unconstrained by landscape designations. There is some ancient woodland in the area, but this are protected and could benefit from improved management/access and the creation of landscape and wildlife corridors as a result. The Issues and Options paper also highlights noise pollution from the Stadium as a constraint on development. This would of course be removed if the car racing function ceased and employment generating uses, or a mix of uses, were considered in this area. A wider area of search for housing and employment land within a new settlement, incorporating the Stadium and the surrounding area would enable a suitable balance between homes and businesses to promote sustainable travel to work patterns. The proximity of Hailsham, with the range of services etc within the 5m (at 40mph) travelling distance advocated in the draft settlement strategy, would further enhance the areas suitability for development.

Option 21b

Section of Document:

Your View ☑ Agree ☐ No opinion ☐ Disagree

Reason for comment:

Five Ash Down is defined in the settlement strategy as a smaller service centre. It meets the 6 criteria used to make that definition. We support the use of the travelling distance (by car at 40mph or local public transport) to local services as this readily reflects existing travel patterns and the way local services and facilities are currently accessed from villages close to local towns. The matrix at Appendix C notes that Five Ash Down does not benefit from a number of services, such as primary school, within 2m of a rail station, peak hour bus service etc. However its location close to Uckfield, with good and improvable transport links to Uckfield means that the village, with the correct range of infrastructure, could readily provide sustainable housing that is accessible to a wider range of services than at present. Five Ash Down is also defined in the settlement strategy as a village with intermediate growth potential. In order to achieve this definition it must meet a further set of criteria, including being a larger service centre or be within travelling distance of a town. Five Ash Down scores well in this assessment as it has a close relationship with Uckfield. Five Ash Down also benefits as it lies outside of any landscape designation and is on very gently undulating land that can be readily contained and screened if carefully sited. We therefore agree that Five Ash Down is a village suitable for some housing and mixed use expansion. We support the use of settlement boundaries to allow for expansion and infilling to allow for necessary growth, and this can readily be applied to Five Ash Down. A more substantial development at Five Ash Down could, for example, provide open space, improved links to Uckfield (road improvements, cycle and bus provision) and support for local services. The linear nature of the village would change, but with careful siting, layout and landscaping, this could represent an enhancement of the character of the village and its relationship with Uckfield. Paragraph 5.48 of the Issues and Options paper raises the issue of sustainability in relation to location. It highlights the fact that some villages have relatively isolated brownfield sites, and asks whether these are more or less sustainable than greenfield central sites. We believe that where opportunities exist to provide a good central core to a settlement, where walking, cycling and public transport routes exist and can be improved upon, and where new facilities can be readily provided, this represents the best level of sustainability. An isolated brownfield site which is insufficient in size to self perpetuate, will always remain more unsustainable. The same can be said of urban extensions divorced from the town centre by distance. Land in Five Ash Down was recently the subject of a call-in Inquiry, where the non-statutory plan housing allocation was dismissed. The Inspector made a number of comments with respect to the village, and these are now material to any consideration of development in the village. Much of the Inspectors criticism was directed at the status of the non-statutory plan and the site selection process. This selection process beginning with the Core Strategy should stand alone once the process has been complete. Criticisms of the proposal itself stemmed from the density and the lack of evidence relating to services and transport links. We believe that these particular issues can be overcome with a well designed expansion of the village. A strong focus for development can be provided in Five Ash Down, resulting in the provision of open space, affordable housing, improved transport links and services. Five Ash Down has a development boundary in the adopted Local Plan, albeit one that is tightly drawn around the denser parts of the settlement. An alternative development boundary that accommodates housing allocations and allows for infilling would consolidate the vilage, particularly on its eastern boundary.
